INTERNAL MEMO

DATE: 14 April 2026

TO: Director General, KIPRE

THRO': Ag. Director, Research and Product Development

FROM: Patrick Waweru Mwaura

REF: KIPRE/SDA/PWM/2026/01

RE: SPECIAL DUTY ALLOWANCE AND CONTINUITY OF SERVICE – DATA SCIENCE & ANALYTICS (DSAS)

I am writing to follow up on my deployment to the **DSAS** (Ref: KIPRE/DG/ADM/25/9/20190118042). Since taking on this role in September 2025, it has been a privilege to lead our institutional data strategy, particularly as we build the new Data Governance Framework (DGF).

Given the expanded scope of my responsibilities, which go significantly beyond my substantive designation, I would like to formally request the **Special Duty Allowance (SDA)** as provided for in the Institute's HR Manual.

1. Recognition of higher responsibilities (Clause 4.6.2).
Since my deployment, I have transitioned from research assistance to providing high-level technical leadership. This includes formulating institutional data policies and managing complex analytical workflows that are critical to KIPRE's strategic goals.

2. Retroactive claim (Clauses 3.8.1 & 4.6.2) (p.22).
As per the HR Manual guidelines, I became eligible for this allowance on **25 October 2025** (following the initial 30-day qualifying period). I am therefore requesting the back-pay for this first cycle (25 October 2025 to 24 April 2026) at the standard rate of 15% of my basic salary.

3. Alignment with ongoing institutional re-organization.
My deployment letter specifies that these duties continue until the Institute's re-organization is complete. To align with **Clause 4.6.4** of the HR Manual regarding payment cycles, I request that this allowance be authorized for the full duration of my service in this capacity. This will ensure seamless continuity as I lead the section into the upcoming financial year.

I have attached a summary of the technical outputs delivered so far, alongside my deployment letter, for your review. I look forward to your continued support as we strengthen KIPRE's data science capabilities.

Respectfully,

Patrick Waweru Mwaura
Data Science and Analytics

ANNEX: HIGHLIGHTS OF KEY CONTRIBUTIONS (OCT 2025 – APRIL 2026)

Since my deployment, I have focused on transforming the **DSAS** (Data Science and Analytics Section) into a high-functioning unit that adds measurable value across the Institute. Below is a summary of the key milestones achieved during this first cycle:

1. Building an institutional foundation

Operational excellence

I authored **24 SOPs**. This provides our section with its first formal operational framework, ensuring that all data handling is consistent, professional, and audit-ready.

Strategic roadmap

I completed a comprehensive **Needs Assessment** across all KIPRE directorates to identify our current gaps. This partly and directly informed the 2026/2027 Work Plan and proposed budget for the section, which will ensure our data strategy is perfectly aligned with the Institute's research mandate.

2. Enhancing research quality & visibility

Direct research support

I have served as a technical consultant for **over 5 major research projects**, providing the rigorous statistical oversight needed to maintain high data integrity.

Data-driven decisions

For the **ASWED**, I have built and deployed an automated dashboard, turning raw data into real-time visual insights for management.

Global competitive edge

I developed three high-level research proposals, successfully submitting two to **Wellcome Trust and Google Inc.** This positions KIPRE to secure international funding for advanced biomedical analytics.

3. Supporting the KIPRE community

HR Modernization

I managed the end-to-end digital survey process for the **HR Division**, from designing the questionnaires to delivering the final analytical reports, providing management with clear evidence for institutional decision-making.

Investing in Talent

I have taken an active lead in mentoring our **PSIP interns** and university students. By sharing these technical skills, we are building a stronger, more data-literate internal culture at KIPRE.
