Invitation to the Africa Health and Development Annual Research Symposium (AHDARS)

Dear Patrick,

The African Population & Health Research Center (APHRC), in partnership with GSMA and the Science for Africa Foundation (SFA Foundation), is honored to invite you to the **2026 Africa Health and Development Annual Research Symposium (AHDARS)**, to be held on **Tuesday, 10, and Wednesday, 11 November 2026**, at the **APHRC Campus in Nairobi, Kenya.**

The APHRC is a premier research-to-policy institution on the continent; the SFA Foundation bolsters science and innovation across Africa; and the GSMA unifies the global mobile ecosystem, leveraging digital advancements to benefit society. Together, these three partners host AHDARS, bringing together researchers, policymakers, parliamentarians, private-sector leaders, and development practitioners to foster dialogue on critical health and development issues. This year's theme, "**Building African-Centered Data Systems: New Models, New Power. What Can Be Done Differently**?" focuses on how Africa can create and manage data systems that support its development priorities and safeguard its interests.

We would be honoured if you would join us as a valued participant in this important convening and contribute your perspectives to the discussions on strengthening African-centered data systems for health and development.

A detailed programme is attached for your reference. To assist with planning, we kindly ask that you confirm your availability by **5th November 2026**. Please reach out in case of any questions.

We look forward to your participation, which will undoubtedly enrich the discussions and offer invaluable insights for our audience.

Warm regards,

GSMA
Passionately Driven, Insightful Leaders, Stronger Together

The GSMA Africa Events Team
