

KIPRE STAFF TRAINING NEEDS ASSESSMENT (TNA) REPORT

Prepared by Mr. Patrick Mwaura (DSAS)

For

Mrs. Stella Nyambariga, Head of HR

2026-01-31

Executive Summary

Background

The primary purpose of this Training Needs Analysis (TNA) is to systematically assess institutional competency gaps and evaluate workforce preparedness. This evidence-based approach is designed to inform training priorities and guide strategic human capital development across the KIPRE. The assessment was conducted using a multi-dimensional questionnaire structured into specific modules to capture a holistic view of the workforce. These sections included:

- Basic Information (Directorate, Age, and Sex of the employee)
- Job Role and Responsibilities
- Self Performances Assessing Questions
- Skills and Copetency Assessment
- Training History
- Identification of Training Needs
- Training Delivery Preferences
- Organizational Support
- Future Skills and Emerging Needs
- Additional Comments

By triangulating data from these domains, the analysis identifies not only current skill deficiencies but also the organizational support structures and delivery formats required to bridge them effectively.

Methodology

The assessment was digitized via ODK Central and deployed from 20th – 28th April of 2026. To ensure we captured a representative voice, we used a multi-channel approach—utilizing official email and professional WhatsApp groups. Participation was voluntary, positioned as a collaborative effort to co-design the organization’s future training roadmap. Data Processing & Analysis Once the collection window closed, raw data was ingested into R (v4.5.2). The analytical pipeline focused on cleaning, recoding qualitative responses for statistical depth, and aggregating the results to provide a granular view of needs across all Directorates and Divisions.

Workforce profile

Demographic and organisational distribution

1. Which critical competency gaps exist across directorates, divisions, and job grades, and which areas require immediate training intervention?

This question helps management identify

High-priority skill deficiencies
Departments with the greatest capacity gaps
Staff categories requiring urgent support

Likely outputs

Competency gap heatmaps
Directorate ranking tables
Priority training matrix
Skill deficiency frequencies

Likely recommendations

Targeted capacity-building programmes
Directorate-specific training plans
Prioritised budget allocation

2. To what extent are employees adequately prepared to meet emerging organizational, technological, and policy-related demands?

Key recommendations

Priority actions

Conclusion

Strategic implications

7. Exemplary visualisations
