

TRAINING REPORT: RECORDS MANAGEMENT, COMMUNICATION SKILLS, AND CUSTOMER CARE

1. Executive summary

This report provides an overview of the capacity-building training program conducted for staff from the **Kenya Institute of Primate Research (KIPRE)**. The intensive program was designed to enhance organizational efficiency, streamline information governance, and elevate public service delivery standard compliance.

2. Administrative Details

Training Title	Records Management, Communication Skills, and Customer Care
Date	11 th to 19 th May 2026
Venue	Kenya School of Government (KSG), Mombasa Campus
Approving authority	National Industrial Training Authority (NITA)
Institutional	Director General (DG), Kenya Institute of Primate Research
Consultancy Firm	SUPERTEMPS International Limited (NITA-accredited)

3. Training Facilitators

The program was delivered by a panel of highly qualified subject matter experts from SUPERTEMPS International Limited:

- 1. Mr. Sakwa Japheth**
- 2. Dr. Richard Ogeto, PhD**
- 3. Mr.**

4. The staff participants were

Name	Division/Section
1. Ms. Stella Nyambariga	HR
2. Mr. Patrick Mwaura	DSAS
3. Mr. Robert Origi Owour	HR
4. Ms. Celestine Rotich	HR
5. Mr. Prester Kioko	HR
6. Ms. Sabina Lithira	HR
7. Ms. Kulthum Kassim	HR
8. Ms. Brenda Opanga	HR

9. Ms. Beatrice Chebet	HR
10. Mr. Zadock Ojall	HR
11. Ms. Happiness Omanwa	Procurement
12. Ms. Dina Wafula	Knowledge Management
13. Ms. Abuya Moraa	Corporate Communications
14. Mr. Geoff Ahomo	Knowledge Management
15. Ms. Evodia Kijuu	Corporate Communications
16. Mr. Evans Ongata	Knowledge Management
17. Mr. Abednego Musau	Procurement
18. Mr. Antony Ntiita	Finance
19. Ms. Sylvia Abere	Finance

5. Key training pillars

5.1 Communications

This pillar focused on equipping participants with modern interpersonal and corporate communication tools to drive team collaboration and organizational synergy.

- *Foundations of Communication*: Investigated the core forms, essential needs, institutional importance, and pathways of communication channels.
- *Workplace Dynamics*: Covered specific strategies for building strong interpersonal relations, identifying signs of toxic or poor workplace relationships, and using feedback techniques.
- *Conflict Resolution*: Explored the primary causes of communication breakdowns and actionable methods to defuse workplace conflicts.
- *Professional Etiquette & Presentation*: Trained staff on professional phone etiquette, formal memo writing, master active vs. passive listening, and high-impact presentation skills.
- *Advanced Barriers*: Addressed how to navigate standard communication barriers and handle cross-cultural communication complexities in a modern workplace.

5.2 Record management

This segment combined traditional data management with modern tech solutions tailored specifically for state corporations and scientific institutions.

Research Institution Workflows:

- Discussed mechanisms for running effective records management within a research-driven environment to improve overall institutional efficiency.
- *Regulatory Compliance*: Aligned data handling with strict state regulations, institutional ethical standards, Intellectual Property (IP) laws, the Data Protection Act (DPA), and explicit funding agency requirements.

- Emerging Technologies: Examined cutting-edge tools transforming information governance, including:
- Block chain for immutable audit trails.
- Nanotechnology applications in extreme high-density hardware storage.
- Cloud Services and secure document management software systems.

5.3 Customer care

This module bridged public service workflows with KIPR's foundational internal culture.

- *Value-Driven Service*: Grounded customer care practices directly in the core values, vision, and mission of the Kenya Institute of Primate Research.
- *Operational Pillars*: Analyzed the technical aspects of customer service delivery, professional hosting, handling complex public inquiries, and representing the corporate brand.

5.4 Legal and policy frameworks

A dedicated cross-cutting module specifically focusing on compliance structures governing state records and professional ethics:

- *Public Archiving*: Navigating the statutory frameworks governing public archives and official government policies.
- *Complaints Infrastructure*: Operationalizing structural complaints handling policies to foster internal and external accountability.
- *Governance*: Implementing standard risk and compliance management protocols while upholding transparency, strict ethics, and administrative accountability.

6. Gaps identified through the training.

During the interactive training sessions, the facilitators and participants identified several critical functional and systemic gaps within KIPR's current operations:

- *Information Governance Flaws*: Absence of structured document **coding, indexing, and referencing frameworks across departments**.
- *Outdated Protocols*: Standard Operating Procedures (SOPs)- particularly regarding records classification, indexing, and referencing- are obsolete and require immediate review.
- *Suboptimal Records Practices*: Widespread deficiencies in both physical and digital records management workflows.
- *Competency Deficits*: Inadequate technical personnel skills and specialized training regarding modern records management.
- *Broken Records Lifecycle*: Lack of a clear, managed records lifecycle covering creation/receipt, distribution/retrieval, usage, storage, retention, and final disposal or archiving.

- *Compliance & Accreditation Gaps:* Weak alignment with modern Quality Management Systems (QMS), ISO certifications, and other key institutional accreditations.
- *Technological Lag:* Internal technology infrastructure and centralized document management systems are significantly lagging behind modern standards.

7. Recommendations/ Critical immediate course of action

To bridge the identified gaps and optimize KIPR's institutional efficiency, the training cohort recommends the immediate execution of the following actions:

- ***SOP Overhaul:*** Review, rewrite, and update all Institutional Standard Operating Procedures (SOPs) to incorporate standardized document classification, coding, and referencing systems.
- ***Policy Alignment:*** Undertake a comprehensive review and holistic update of all institutional records management and communication policies to ensure absolute compliance with national legislation and international best practices.
- ***System Centralization:*** Fast-track the procurement and deployment of a modern, centralized electronic document management system.
- ***Continuous Capacity Building:*** Institutionalize periodic refresher training on QMS, ISO frameworks, and advanced records lifecycles for all administrative personnel.
