1.0 ORGANIZATION STRUCTURE AND STAFFING

1.1 Establishment and Mandate

Kenya Institute of Primate Research (KIPRE) is a State Corporation established under the Legal Notice No. 273 of 2017 to be the National Centre undertaking Biomedical and Preclinical research using non-human primates and other experimental animals for development of health products and other services that meet local and international standards.

1.2 Functions

The core functions of the Institute are provided under Clause 5 of the Legal Notice as follows:

- (a) To conduct basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;
- (b) Establish an incubation Centre linking research and industry in the health products value chain;
- (c) Contribute to early warning systems for emerging and re-emerging diseases;
- (d) Establish and operate a notional breeding colony of non-human primates and other experimental laboratory animals for research purposes;
- (e) Provide national in-vitro fertilization services for endangered wildlife of Kenya in liaison with relevant Government agencies;
- (f) Undertake studies in non-human primate conservation biology and primatology
- (g) Create and maintain a national non-human primate database on consensus research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases;
- (h) Serve as a national research Centre for venom and anti-venom including snake bite disease;
- (i) Undertake basic and pre-clinical research on reproductive health, infectious and non-communicable diseases using non-human primates;
- (j) Develop and characterize both non-human primate and other experimental animal models for priority diseases in Kenya;
- (k) Undertake research in Human African Trypanosomiasis disease
- (l) Undertake capacity building in animal welfare, ethical use and care of non-human primates and other experimental animals in laboratory settings;
- (m) Perform any other function which is incidental to the performance of any of the foregoing functions.

1.3 Grading Structure and Qualification Framework

The Institutes grading structure ranges from KIP 1 for the Director General (CEO) to KIP 12 for Office Assistants which is the lowest grade as summarized in table 1 below.

Table 1: Proposed Grading Structure

S/No	Designation	Non- Research	Grade KIP
1.	Chief Executive Officer / Director-General		1
2.	Director / Chief Research Scientist	Director	2
3.	Deputy Director / Senior Principal Research Scientist	Deputy Director	3
4.	Assistant Director / Principal Research Scientist	Assistant Director	4
5.	Senior Research Scientist	Principal Officer	5
6.	Research Scientist	Senior Officer	6
7.	Assistant Research Scientist / Principal Technician	Officer / Principal Assistant Officer / Principal Technician	7
8.	Senior Technician	Senior Assistant Officer / Senior Technician	8
9.	Technician	Assistant Officer / Technician / Principal Driver/ Principal Craftsman	9
10.		Senior Driver / Principal Office Assistant/Principal Artisan/ Senior Craftsman	10
11.		Driver/ Senior Office Assistant / Senior Artisan/Craftsman	11
12.		Office Assistant/ Artisan	12

Table 2: Grading Structure and Minimum Requirement

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
EXECUTIVE	Director General /Chief Executive Officer	1	U	• Bachelors Degree • Master's Degree • Earned Doctorate degree in Biomedical Sciences or other related scientific, fields • Evidence of at least Thirty (30) publication in refereed journals • Attracted research Funding of not less than Kshs 100 million • At least fifteen (15) years relevant work experience ten (10) years of which have been in a senior management position. • Membership to a professional body and in good standing where applicable; • Leadership course lasting not less than four (4) weeks from a recognized institution • Proficiency in Computer Applications. • Fulfilling the requirements of Chapter Six of the Constitution
DIRECTORATE	Director / Chief Research Scientist	2	S	Research • Bachelor's degree • Master's degree • Earned Doctorate degree in relevant area

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				• Evidence of at least twenty (20) publications in refereed journals • Attracted research Funding of not less than Kshs 80 million • At least fifteen (15) years relevant work experience five (5) of which have been in a senior management; • Leadership course lasting not less than four (4) weeks from a recognized institution • Membership to a professional body and in good standing where applicable; • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six of the constitution 2010;
				Corporate • Bachelor's degree • Master's degree • At least fifteen (15) years relevant work experience five (5) of which have been in a senior management; • Leadership course lasting not less than four (4) weeks from a recognized institution

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				• Membership to a professional body and in good standing where applicable; • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010.
DIVISIONS	Deputy Director Senior Principal Research Scientist	3	R	Research • Bachelor's degree • Master's degree • Earned PhD Degree • Twelve (12) years relevant work experience, five (5) years of which should be in a management role; • Attracted research Funding of not less than Kshs 50 million • Membership to a professional body and in good standing where applicable; • Evidence of at least fifteen (15) publications in refereed journals; • Leadership course lasting not less than four (4) weeks from a recognized institution • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six of the constitution 2010.

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				OR Corporate • Bachelor's degree • Master's degree • Twelve (12) years relevant work experience, five (5) years of which should be in a management role; • Membership to a professional body and in good standing where applicable; • Leadership course lasting not less than four (4) weeks from a recognized institution • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010.
SECTIONS	Assistant Director Principal Research Scientist	4	P	Research • Bachelor's degree • Master's degree • Earned PhD Degree • At least (10) years relevant work experience, four (4) of which should have been in a supervisory role; • Attracted research Funding of not less than Kshs 10 million • Evidence of at least five (5) publications in refereed journals.

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				• Membership to a professional body and in good standing where applicable; • Management course lasting not less than four (4) weeks from a recognized institution • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010. OR Corporate • Bachelor's degree • Master's degree • At least (10) years relevant work experience, four (4) of which should have been in a supervisory role; • Membership to a professional body and in good standing where applicable; • Management course lasting not less than four (4) weeks from a recognized institution; • Proficiency in Computer Applications; • Fulfil the requirements of Chapter Six (6) of the constitution 2010.

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				• Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010.
OPERATIONS	Research Scientist Senior Officer	6	L	Research • Bachelor's degree • At least four (4) years relevant work experience • Membership to a professional body and in good standing where applicable; • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010. OR Corporate • Bachelor's degree • At least four (4) years relevant work experience • Membership to a professional body and in good standing where applicable; • Proficiency in Computer Applications. • Fulfil the requirements of Chapter Six (6) of the constitution 2010.

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				Fulfill the requirements of Chapter six (6) of the Constitution.
	Assistant Officer	9	H	Entry Level for Diploma Holders - Diploma in the relevant field; - Proficiency in Computer Applications. - Fulfill the requirements of Chapter six (6) of the Constitution. OR - At least eight (8) years relevant work experience - Kenya Certificate of Secondary Education mean grade D+ (plus) or its equivalent qualification from a recognized institution. - Craft Certificate from a recognized Institution. - Proficiency in Computer applications. - Fulfil the requirements of Chapter Six (6) of the Constitution.
	Principal Craftsman / Principal Driver			
	Senior Craftsman / Senior Driver	10	G	- At least four (4) years relevant work experience - Kenya Certificate of Secondary Education mean grade D+ (plus) or its equivalent

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
	Craftsman / Driver Senior Office Assistant Senior Artisan	11	F	Entry level for Craft Certificate holders - Kenya Certificate of Secondary Education mean grade D+ (plus) or its equivalent qualification from a recognized institution. - Craft Certificate from a recognized institution - Proficiency in Computer applications. - Fulfil the requirements of Chapter Six (6) of the Constitution. OR - At least four (4) years relevant work experience - KCSE mean grade KCSE D+ (plus) or its equivalent qualification from a recognized Institution. - Proficiency in Computer applications. - Fulfil the requirements of Chapter Six (6) of the Constitution. OR - At least four (4) years relevant work experience - Artisan Certificate or its equivalent qualification from a recognized Institution.

Functional Area	Designation (Research)	KIP Grade	Equivalent Civil Service Grade for Purposes of Allowances Only	QUALIFICATIONS
				• Proficiency in Computer applications. • Fulfil the requirements of Chapter Six (6) of the Constitution.
	Office Assistant	12	F	• KCSE mean grade KCSE D+ (plus) or its equivalent qualification from a recognized Institution. • Proficiency in Computer applications. • Fulfil the requirements of Chapter Six (6) of the Constitution. OR • Artisan Certificate or its equivalent qualification from a recognized Institution. • Proficiency in Computer applications. • Fulfil the requirements of Chapter Six (6) of the Constitution.
	Artisan			

2.0 ORGANIZATIONAL STRUCTURE

2.1 Organizational Structure

The Organizational Structure has been developed with an aim to achieve the following;

- i) To maximize the efficiency and success of the Institute;
- ii) Facilitate working relationships with various Directorates and Divisions of the Institute;
and
- iii) Retain order and command whilst promoting flexibility and creativity.

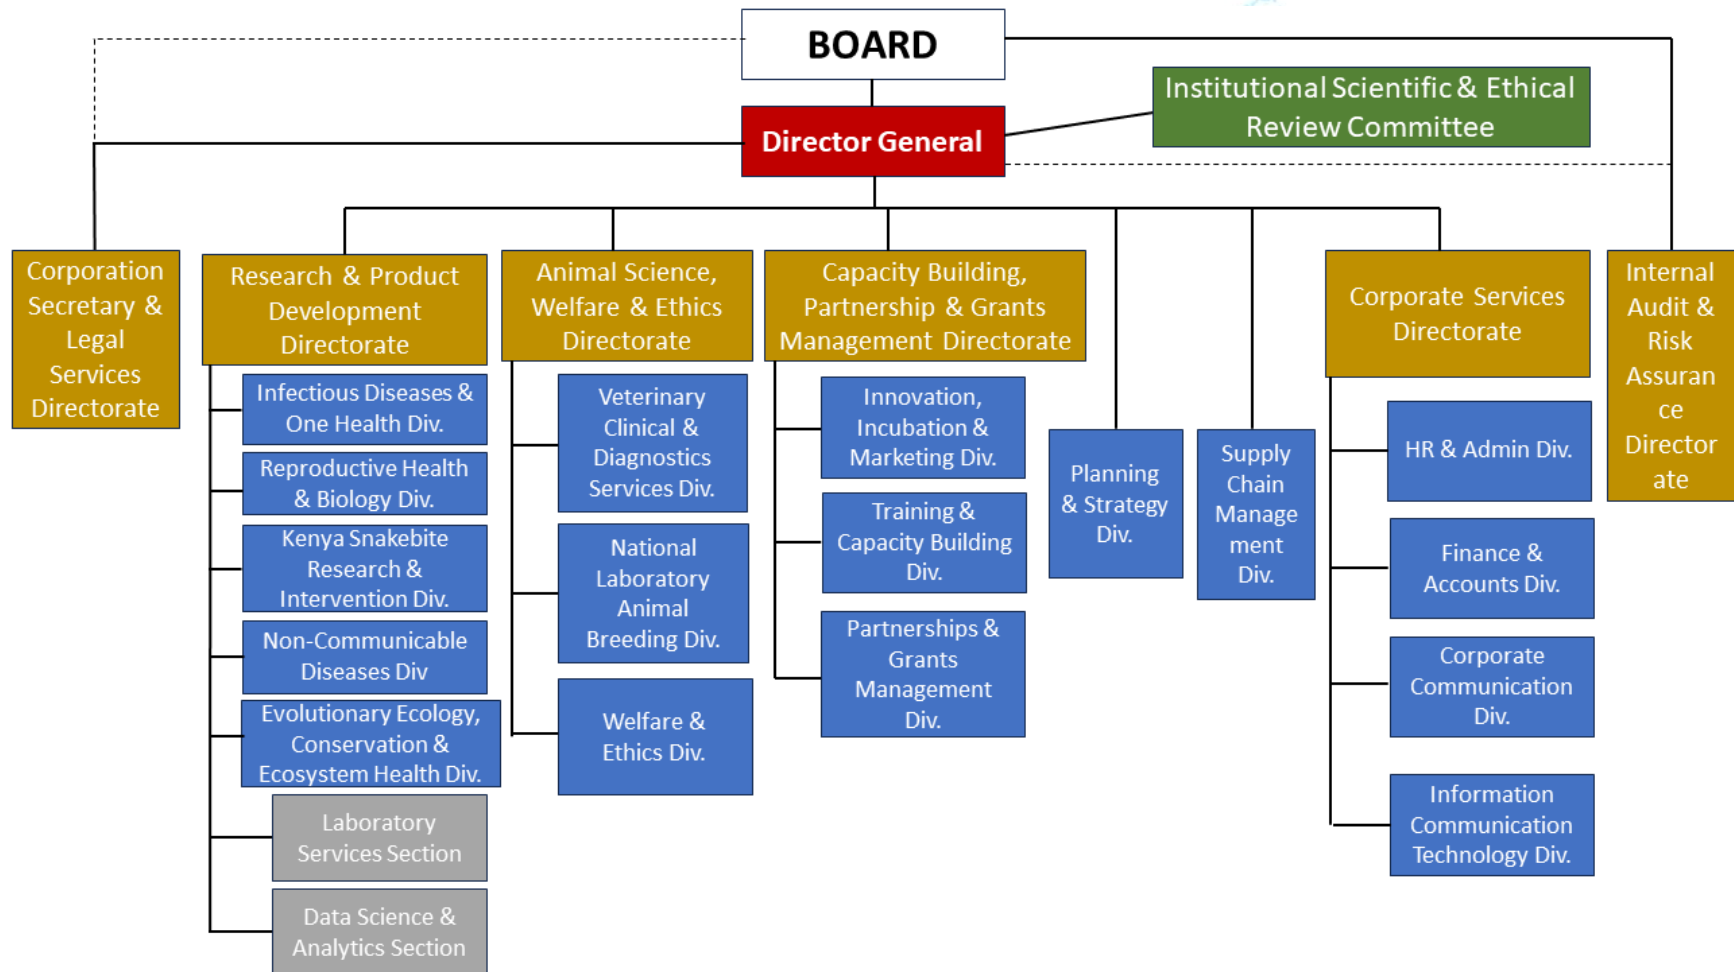

2.2 Kenya Institute of Primate Research Structure

The Board provides policy and oversight to the KIPRE while the day to day operations are delegated to the Director General/CEO. The Institute is organized in six (6) Directorates and two (2) Divisions as indicated below;

- i) Corporation Secretary and Legal Services Directorate
- ii) Research and Product Development Directorate
- iii) Animal Science, Welfare and Ethics Directorate
- iv) Capacity Building, Partnerships and Grants Management Directorate
- v) Planning and Strategy Division
- vi) Supply Chain Management Division
- vii) Corporate Services Directorate
- viii) Internal Audit and Risk Assurance Directorate

Internal audit and Risk Assurance Directorate report functionally to the Board and administratively to the Director General; while the others report functionally to the Director General.

Fig 1: Organization Structure

3.0 STAFF ESTABLISHMENT

3.1 OFFICE OF THE DIRECTOR GENERAL / CHIEF EXECUTIVE OFFICER

a) Rationale

The Office of the Director General / CEO is established pursuant to Section 9 (1) of the Legal notice No. 273, 2017. The Office is responsible for the implementation of the Institute's strategic goals and the day-to-day management of the Institute; including giving direction and leadership to the achievement of institute's strategic goals and will be accountable to the Board.

b) Functions

The functions of the Office of the Director General/CEO are to: -

- (i) Be the Accounting officer of the Institute;
- (ii) Serve as the link between the Board and Management;
- (iii) Be the spokesperson of the organization and responsible for stakeholder management and the enhancement of the corporate image of the organization;
- (iv) Be responsible for the execution and communication of the Board's strategies decision and policies;
- (v) Manage the budget of the Institute and ensure that its funds are properly expended and accounted for;
- (vi) Spearhead mobilization of resources to support implementation of the Institute's programmes;
- (vii) Promote the use ICT to enhance service delivery to the Institute;
- (viii) Spearhead development and implementation of effective performance management systems;
- (ix) Provide regular, thorough and prompt communication to the Board on key technical financial and administrative matters;
- (x) Ensure development , implementation and review of the Institute's risk management framework;
- (xi) Ensure that the organization has effective management structure including succession plan;
- (xii) Promote corporate Environmental, Social and Governance (ESG) programmes;
- (xiii) Promote National values and principles of public service in the Institute;
- (xiv) Provide strategic leadership in accordance with the mandate of the Institute's legal framework;

- (xv) Ensure implementation and fulfilment of the policies, programs and agreed performance targets and service standards of the Institute;
- (xvi) Oversee the implementation of applicable Research standards;
- (xvii) Oversee the activities of the Institute's resources and ensure they are optimally utilized and fully accounted for in line with existing laws and regulations;
- (xviii) Ensure continuous improvement in the quality, value of services to all research activities in the Institute;
- (xix) Provide Guidance and spearhead research activities in the institute in line with the best research practices globally;
- (xx) Lead in development of medical products by the Institute;
- (xxi) Foster and maintain a conducive work environment;
- (xxii) Enhance corporate culture that promotes ethical practices and good corporate governance;
- (xxiii) Maintain effective collaboration and partnerships with organs of Government and Government agencies, county Governments, international organizations, private sector, non-governmental organization and other Stakeholders; and
- (xxiv) Advise on Biomedical and preclinical Research for development of Health products.

c) Establishment

In order to execute the above functions, the office of the Director General / CEO will be staffed as follows:

Table 3: Establishment for the Office of the Director General/ CEO

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director General / CEO	1	1	
2.	Technical Assistant	*	*	
3.	Principal Office Administrator	5	1	
4.	Office Administrator/ Senior	7/6		
5.	Principal Driver	9	1	
6.	Driver/Senior	11/10		
7.	Principal Office Assistant	10	1	
8.	Office Assistant/Senior	12/11		
	TOTAL		4	

*To be deployed from among serving staff not below grade KIP 5

3.2 CORPORATION SECRETARY & LEGAL SERVICES DIRECTORATE

a) Rationale

This Directorate is established pursuant to the provisions of Clause 1.21 of Mwongozo: Code of Governance for State Corporations; and the Office of the Attorney General Circular Ref. AG/CONF/6/D/144 Vol. XI of November, 2020 that requires all National Government entities to establish and empower internal legal function. The Directorate shall be responsible for legal advice, litigations, conveyance, and preparations of contracts. The Directorate will also offer Board secretarial services.

b) Functions

The functions of the Directorate are to: -

- i). Formulate and implement strategies on all legal matters;
- ii). Provide legal opinion or advice on governance matters within the Institute;
- iii). Interpret legal instruments and statutes for the Institute;
- iv). Authenticate documents issued to the Institute as collateral, securities or support documents for loans and undertake conveyance;
- v). Ensure full compliance with Law, legislative issues, policies and procedures as stipulated by the statutes;
- vi). Conduct legal research, investigation, preparation of witnesses for pre-trial and hearing;
- vii). Develop concept papers, preparing legal briefs and opinions as well as development of effective defence strategies, arguments and testimony in preparation for legal proceedings of cases in liaison with external lawyers;
- viii). Maintain an up-to-date record of gazetted matters which relate to the Institute;
- ix). Ensure the Institute complies with statutory and other regulatory requirements by undertaking periodic legal compliance audit;
- x). Ensure the Institute is represented in Court and arbitrations as may be required;
- xi). Draft and review contracts and other documents to ascertain fairness to the Institute and conformity with the law;
- xii). Coordinate all litigations in liaison with the State Law Office.

- xiii). Draw and process legal notices and other gazettelement that is to be issued by the Institute;
- xiv). Coordinate and undertake the review of laws, by-laws and regulations relating to the Institute;
- xv). Participate in the negotiations of agreements and contracts between the Institute and other parties/organizations;
- xvi). Keep custody of all legal instruments for the Institute.
- xvii). Be the custodian of the seal of the Organization and account to the Board for its use;
- xviii). Provide guidance to the Board on their duties and responsibilities and on matters of corporate governance;
 - a) Assist the Board in carrying out;
 - b) Board induction and training,
 - c) updating the board charters,
 - d) preparation of board work plans,
 - e) Board evaluation governance audit, and;
 - f) Implementation of the code of conduct and ethics.;
- xix). Ensure timely preparation and circulation of Board papers;
- xx). Maintain and update the register of conflicts of interest; and
- xxi). Ensure legal returns are promptly filed with the relevant authorities;

c) Staff Establishment

In order to execute the above functions, the office of the Corporation Secretary and Director Legal Services will be staffed as follows:

Table 4: Staff Establishment for the Corporation Secretary & Legal Services Directorate

S/N	Designation	Grade KIP	Approved
1.	Corporation Secretary and Director Legal Services	2	1
2.	Deputy Director, Legal Services	3	1
3.	Assistant Director	4	
4.	Principal Legal Officer	5	
5.	Legal Officer/Senior	7/6	
6.	Principal Assistant Legal Officer	7	1
7.	Assistant Legal Officer / Senior	9/8	1
8.	Assistant Office Administrator/ Senior	9/8	
	Total		4

3.3 RESEARCH AND PRODUCT DEVELOPMENT DIRECTORATE

a) Rationale

The Directorate is established pursuant to Clause 5 (a-c) & (f-k) of Legal Notice No. 273 of 2017 to undertake basic, preclinical, biomedical and translational research using non-human primates and other experimental animals.

b) Functions

The functions of the Directorate are to: -

- (i) Coordinate formulation, implementation and review of policies, strategies and guidelines on all Biomedical and Preclinical Research matters;
- (ii) Oversee strategy on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;
- (iii) Guide in the development of early warning systems for emerging and re-emerging diseases;
- (iv) Oversee laboratory biosafety and biosecurity plans to manage the identified risks with respect to fieldwork and lab-based activities at the Institute;
- (v) Oversee surveillance and monitoring of zoonotic diseases, including those that may pose a threat to human health by monitoring animal and environment to identify and track disease outbreaks;
- (vi) Supervise the development of new diagnostic tests and tools and conduct research to improve diagnostics for infectious diseases and allowing platforms for health information exchange, streamline diagnostic workflows and improve access to health care.
- (vii) Supervise pre-clinical and clinical studies to evaluate the safety and efficacy of bacteriophage (phage) therapy in different infection contexts and patient populations.
- (viii) Guide on Antimicrobial Resistance (AMR) surveillance necessary for national advocacy on antimicrobial use and stewardship.
- (ix) Guide studies on non-human primate conservation biology and primatology;
- (x) Coordinate the establishment and maintenance of a national non-human primate database on census, research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases;
- (xi) Oversee research on venom and anti-venom including snake bite disease;

- (xii) Oversee sub-national and national database on snakebite epidemiology and distribution of snakes;
- (xiii) Supervise snakebite advocacy and social mobilization activities including behavioral change components;
- (xiv) Supervise preclinical efficacy and safety tests of new antivenoms and those available in the market, and other biologics such as tetanus and rabies vaccines;
- (xv) Coordinate basic and pre-clinical research on reproductive health, infectious and non-communicable diseases using non-human primates;
- (xvi) Oversee development and characterization for both non-human primate and other experimental animal models for priority diseases in Kenya;
- (xvii) Coordinate research in Human African Trypanosomiasis disease;
- (xviii) Guide in research fundraising activities;
- (xix) Supervise dissemination of scientific findings through publications, conferences, seminars and workshops.
- (xx) Oversee research on health technologies, drug & vaccine discovery and development and pre-clinical pharmacology & medicinal chemistry
- (xxi) Supervise innovative drug delivery and molecular design strategies for targeting infectious and noninfectious diseases;
- (xxii) Oversee the development and characterization of non-human primate as models for use in drug discovery and development, delivery, and toxicology in Kenya;
- (xxiii) Oversee preclinical validation of traditional knowledge-based products with claimed healing for efficacy using monkeys as models
- (xxiv) Supervise field research on primatology and wildlife ecology with focus on species behavioral ecology (Nutrition, Sociobiology & endocrinology), evolution, conservation and management;
- (xxv) Guide on establishment and maintenance of a national non-human primate database on their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- (xxvi) Oversee in-situ health monitoring of primate populations and other wildlife and support the zoonosis surveillance activities for purposes of developing early warning systems and preparedness to respond to potential disease outbreaks and threats to endemic and critically endangered primate and other species;
- (xxvii) Play national advisory role on matters of primate conservation & management including mitigation of human-nonhuman primate conflicts or interaction threats;
- (xxviii) Oversee studies on impacts of climate change on biodiversity (including primates and other species) and local communities and develop and implement sustainable conservation initiatives or climate actions to promote climate change response in terms of mitigation, adaptation and resilience;

- (xxix) Guide on development of policies, processes and guidelines on innovation and incubation management
- (xxx) Coordinate incubation and acceleration services to institute startups and spin-offs, including access to funding, mentorship, networking, and other support services.
- (xxxi) Guide on the development of strategies for the research and management of the reproductive health research programs, knowledge generation and capacity building programs;
- (xxxii) Supervise reproductive disease surveillance in Kenya to obtain data on the current trends of reproductive diseases and current intervention strategies;
- (xxxiii) Oversee the development and characterization of both non-human primate and other experimental animal models for infectious and for emerging and re-emerging diseases
- (xxxiv) Oversee research in non-communicable diseases for intervention and prevention strategies using non-human primates (NHPs) and other experimental models
- (xxxv) Guide on the development of strategies for the management and prevention of the non-communicable diseases, knowledge generation and capacity building programs;
- (xxxvi) Oversee laboratory quality assurance services;
- (xxxvii) Coordinate collection, analysis and interpretation of biological and health science data across multiple research entities in the institute.
- (xxxviii) Supervise the design of various new computational tools for bioinformatics and assemble and prepare data structures and determine an effective data analysis framework.

c) Staff Establishment

In order to perform the above functions, the Office of the Director, Research and Product Development will be staffed as follows:-

Table 5: Establishment for Office of the Director, Research and Product Development Directorate

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director, Research and Product Development	2	1	
2.	Chief Research Scientist	2	1	
3.	Assistant Office Administrator/ Senior	9/8	1	
4.	Driver / Senior	11/10	1	
5.	Office Assistant / Senior	12/11	1	
	Total		5	

The Directorate will be organized into five (5) Divisions and two (2) sections

- (i) Infectious Diseases & One Health Division;
- (ii) Reproductive Health & Biology Division;
- (iii) Kenya Snakebite Research & Intervention Division;
- (iv) Non-Communicable Diseases Division;
- (v) Evolutionary Ecology, Conservation & Ecosystem Health Division;
- (vi) Laboratory Services Section; and
- (vii) Data Science and Analytics Section.

3.3.1 Infectious Diseases and One Health Division

a) Rationale

The Division is established pursuant to Clause 5 (a-c) & (f-k) of Legal Notice No. 273 of 2017 to undertake research in infectious & communicable diseases, zoonotic diseases and emerging diseases & pathogens.

b) Functions

The functions of the Division are to:

- (i) Formulate, implement and review policies, strategies and guidelines on Infectious Diseases and One Health matters;
- (ii) Carry out basic, pre-clinical, translational research in infectious and emerging diseases using non-human primates (NHPs) and other experimental animals;
- (iii) Supervise research in Virology, Microbiology, Parasitology and Vector Biology; Immunology and Vaccine Development; Zoonotic Biosurveillance and Disease Ecology; and Climate & Health
- (iv) Coordinate surveys of infections in human-livestock-wildlife-environment interface that will contribute to early warning systems for the presence of emerging and re-emerging diseases and for policy formulation;
- (v) Guide scientific findings through publications, conferences, seminars and workshops;
- (vi) Support identification of active molecules and development of vaccines, diagnostics and drugs for viral, bacterial, mycology and parasites;
- (vii) Manage a reference diagnostic lab (supplementing government efforts), specifically for emerging and re-emerging infectious diseases while contributing to public health communication and outreach efforts;

- (viii) Supervise the collection of drug-resistant bacteria from different sources, locally and globally, which will be used as a priority list in the isolation of bacterio-phages (phages) for Antimicrobial Resistance Intervention/management.
- (ix) Supervise the development and characterization of both non-human primate and other experimental animal models for infectious and for emerging and re-emerging diseases in Kenya;
- (x) Oversee national non-human primate database on census, research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases
- (xi) Supervise research in Human African Trypanosomiasis disease;
- (xii) Oversee reproductive disease surveillance in Kenya to obtain data on the current trends of emerging and re-emerging infectious diseases and current intervention strategies;
- (xiii) Manage research data on emerging and re-emerging infectious to inform policy;
- (xiv) Supervise capacity building in the area of emerging and re-emerging infectious;
- (xv) Formulate research fundraising strategies;
- (xvi) Guide on disseminating scientific findings through publications, conferences, seminars and workshops.
- (xvii) Supervise studies on mechanisms of infection/pathogenicity of different diseases in non-human primate animal models.
- (xviii) Guide on Identification of active molecules and development of vaccines and molecules for viral, bacterial, mycology and parasites.

The Infectious Diseases and One Health division will be organized into five (5) sections namely:

- (i) Virology;
- (ii) Microbiology, Parasitology and Vector Biology;
- (iii) Immunology and Vaccine Development;
- (iv) Zoonotic Biosurveillance and Disease Ecology; and
- (v) Climate & Health.

The functions and staffing of the sections are as provided below.

1) *Virology Section*

The Section is responsible for undertaking research in virology using non-human primates and other experimental animals, with the aim of understanding the pathogenesis and management of the resultant diseases for interventions.

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on virology;
- (ii) Develop non-human primate models of viral human disease for pre-clinical studies and for studying mechanisms of infection/pathogenicity for human viral infections.
- (iii) Undertake studies on viruses receptor mechanisms and intervention strategies.
- (iv) Undertake studies on viral vaccine development & testing and drug therapeutic studies.
- (v) Develop in-vitro models for the study of viruses.
- (vi) Conduct virus co-infection studies in collaboration with other programs.
- (vii) Undertake bio-surveillance of viruses of public health importance
- (viii) Develop diagnostic kits for viral disease detection in humans and animals.
- (ix) Implement rapid response activities to mitigate human viral disease outbreaks.
- (x) Promote epigenomics and genomics to study genes factors that encode and are responsible for human viral infection, evasion of the immune system, or establish a chronic infection.
- (xi) Conduct research on structural virology with a focus on understanding the function and sensitivity of viral proteins to host antibodies.
- (xii) Utilize non-human primates and other animal models to characterize Immunological responses to emerging and re-emerging viruses.
- (xiii) Undertake research on use of viruses as drug delivery system vehicles for genetic diseases.
- (xiv) Undertake the study of the mechanism of virus replication and antiviral mechanisms.

2) *Microbiology, Parasitology and Vector Biology Section*

The Section is responsible for undertaking research in Microbiology, Parasitology and Vector Biology using non-human primates and other experimental animals, with the aim of understanding the pathogenesis and management of the resultant diseases for interventions.

The functions of the Section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on microbiology, parasitology and vector biology;
- (ii) Conduct studies on neglected diseases including but not limited to human African trypanosomiasis, leishmaniasis, schistosomiasis and malaria;
- (iii) Develop non-human primate models for bacterial, parasitic and fungal diseases;
- (iv) Conduct disease co-infection pathogenicity in non-human primates and other experimental animals;
- (v) Conduct surveillance studies on infections including both bacterial, parasitic and mycological infections;
- (vi) Undertake research on vector behaviour, genomics & transcriptomics with a focus on disease vector control;
- (vii) Undertake studies on distribution of vectors and insecticide resistance in the disease vector;
- (viii) Rear vectors for research purposes only;
- (ix) Develop of tools for monitoring and evaluation of disease transmission;
- (x) Develop of vector interventions such as repellents;
- (xi) Conduct disease modeling studies for vectors, bacteria, parasitic and fungal diseases for identification of drug targets.

3) *Immunology and Vaccine Development Section*

The section is responsible for undertaking research in immunology and vaccine development using non-human primates and other experimental animals, with the aim of understanding the pathogenesis and management of the resultant diseases for interventions.

The functions of the Section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on immunology and vaccine development
- (ii) Develop non-human primates for basic and translational immunology research;
- (iii) Conduct studies on autoimmune disorders, allergies and chronic infections;
- (iv) Conduct research on adoptive immunity including B and T cell development, immune recognition through major histocompatibility complex and immune cell recognition;
- (v) Conduct studies on immuno-metabolism focusing on cellular metabolic pathways and their effect on immunology;
- (vi) Conduct studies on vaccine development;
- (vii) Conduct studies on the immunology of transplantation;

- (viii) Conduct studies on immunogenetics and its consequences in disease outcome;
- (ix) Conduct studies on mucosal immunology and its relation to pathogen transmission;
- (x) Conduct studies on developmental immunology;
- (xi) Perform computational immuno-biology/systems immunology for identification candidate drugs;
- (xii) Conduct studies on immune-profiling using flow cytometry and other emerging technologies.

4) *Zoonotic, Biosurveillance & Disease Ecology Section*

The section is responsible for undertaking research in zoonotic, biosurveillance and disease ecology to predict and develop interventions for emerging diseases and pathogens.

The functions of the Section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on zoonotic diseases;
- (ii) Conduct one health surveillance and monitoring of zoonotic diseases, including those that may pose a threat to human health
- (iii) Assess the risk posed by zoonotic diseases and develop strategies to mitigate those risks
- (iv) Build capacity among public health professionals, healthcare providers, and other stakeholders to detect and respond to zoonotic diseases using One Health approach
- (v) Communicate with the public, policymakers, and other stakeholders about the risks and impacts of zoonotic diseases and the importance of One Health principles in bio surveillance and incident response.
- (vi) Evaluate the role of host genomics and genetics, social /ecological/environmental factors and interactions in the susceptibility of emerging and re-emerging infectious diseases for risk prediction, diagnosis and prognosis in natural systems, including factors such as climate change, land use, and biodiversity loss.
- (vii) Carry out antimicrobial use and zoonotic Antimicrobial Resistance (AMR) surveillance at one health interface- (animal and environmental surveillance) in order to facilitate AMR stewardship at one health interfaces and carry out outreach on its control/mitigation.
- (viii) Develop and optimize bacteriophage therapy protocols to treat bacterial infections in humans, and animals, including infections that are resistant to antibiotics.

- (ix) Participate in the development and implementation of policies and guidelines related to bacteriophage therapy and antimicrobial resistance at local, national, and international levels.
- (x) Collect and analyse data on health outcomes across different species and ecosystems
- (xi) Develop new technologies to support One Health monitoring and research.
- (xii) Promote environmental and wildlife conservation by monitoring environmental conditions, protecting endangered species, and advocating for policies that support biodiversity and ecological health.

5) *Climate and Health Section*

The section is responsible for undertaking research in climate and health to understand the effect of climate change on disease outbreaks and patterns.

The functions of the Section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on climate and health;
- (ii) Undertake studies on climate change and human-driven changes modify the disease risk patterns.
- (iii) Undertake disease surveillance by monitoring the emergence and spread of vector-borne diseases, which helps in early detection and timely response to outbreaks.
- (iv) Evaluate the biology and ecology of vectors such as mosquitoes and ticks to help in the development of effective vector control strategies.
- (v) Establish the different ways in which vector diversity impacts vector-borne diseases.
- (vi) Undertake studies on the transmission dynamics of zoonotic vector-borne diseases to help in predicting disease spread, identifying high-risk areas, and evaluating the impact of control strategies.
- (vii) Conduct genetic analysis of pathogens and vectors to understand their evolutionary history and identify potential targets for control strategies.
- (viii) Develop disease modeling methods for prediction of climate associated diseases
- (ix) Undertake studies on genetic characterization of disease carrying vectors.
- (x) Undertake studies on host-vector dynamics in disease high risk areas.

c) Staffing

In order to perform the above functions, the Infectious Diseases and One Health Division will be staffed as follows.

Table 6: Establishment for the Infectious Diseases and One Health Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Infectious Diseases and One Health	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide research leadership within the division
	Sub Total		2	
	Virology Section			
1.	Assistant Director, Research	4	1	Head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	
4.	Assistant Research Scientist / Research Scientist	7/6	2	
5.	Principal Laboratory Technician	7	2	
6.	Laboratory Technician/Senior	9/8		
	Sub Total		8	
	Microbiology, Parasitology and Vector Biology Section			
1.	Assistant Director, Research	4	1	Head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	
4.	Assistant Research Scientist / Research Scientist	7/6	2	
5.	Principal Laboratory Technician	7	2	
6.	Laboratory Technician/Senior	9/8		
	Sub Total		8	
	Immunology and Vaccine Development Section			
1.	Assistant Director, Research	4	1	Head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	

4.	Assistant Research Scientist / Research Scientist	7/6	2	
5.	Principal Laboratory Technician	7	2	
6.	Laboratory Technician/Senior	9/8

6.	Laboratory Technician/Senior	9/8		
	Sub Total		8	
	Total		42	

3.3.2 Reproductive Health and Biology Division

a) Rationale

The Division is established pursuant to Clause 5 (a, b, e, i) of Legal Notice No. 273 of 2017 to undertake research in reproductive health and biology to improve reproductive health.

b) Functions:

The functions of the Division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on reproductive health and biology;
- (ii) Oversee basic, pre-clinical, translational research in reproductive health and biology using non-human primates (NHPs) and other experimental animals;
- (iii) Coordinate the development and characterization of both non-human primate and other experimental animal models for priority reproductive health diseases in Kenya;
- (iv) Supervise assisted reproductive technology programs
- (v) Coordinate provision of endocrinology services
- (vi) Support the development of strategies for the management of the reproductive health research programs, knowledge generation and capacity building programs;
- (vii) Supervise surveillance of reproductive disease in Kenya to obtain data on the current trends of reproductive diseases and current intervention strategies;
- (viii) Guide research data for use on reproductive health to inform policy;
- (ix) Guide in the development of capacity building in the area of reproductive health and biology;
- (x) Oversee research fundraising activities; and
- (xi) Guide dissemination of scientific findings through publications, conferences, seminars and workshops.
- (xii) Supervise epidemiological studies on sexually transmitted infections including drug resistance microbes such as gonorrhoea.
- (xiii) Supervise the developments of innovative treatments for reproductive diseases and disorders
- (xiv) Supervise pre-clinical drug trials for endometriosis, subfertility/infertility and other reproductive diseases and disorders.
- (xv) Guide studies on fetal development and pregnancy loss.
- (xvi) Supervise studies on reproductive cancers
- (xvii) Oversee research on metabolic disorders associated reproductive system

The Reproductive Health & Biology Division will be organized into four (4) Sections namely:

- (i) Reproductive diseases and disorders;
- (ii) Contraception and family planning;
- (iii) Assisted reproductive technologies; and
- (iv) Microbicides and Sexually Transmitted Infections.

The functions and staffing of the sections are as provided below.

1) Reproductive Diseases and Disorders Section

The section is charged with carrying out research in Reproductive disease and disorders to improve reproductive health and reduce disease burden.

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on reproductive diseases and disorders;
- (ii) Undertake basic and translational research the understanding of normal and abnormal reproduction
- (iii) Conduct epidemiological survey of reproductive diseases and disorders in Kenya
- (iv) Conduct research on cellular and molecular aspects of gamete biology (spermatogenesis; sperm motility; fertilization), implantation, embryo development and placental function, and epigenetics.
- (v) Develop innovative treatments for reproductive diseases and disorders
- (vi) Undertake research to determine the role of immunity in reproduction.
- (vii) Undertake research to establish the influence of sex steroids on sexual and reproductive function, bone mineral density and muscle strength
- (viii) Undertake research on psychological factors in reproductive failure, the menopause and the premenstrual syndrome.
- (ix) Perform functional studies of the endometrium including fetal interactions
- (x) Undertake research on determination of changes in gene and protein expression throughout the menstrual cycle by doing gene micro array analysis and proteomic approach.
- (xi) Undertake research on recurrent pregnancy loss.
- (xii) Undertake research on associations between ovarian hormones and gynaecological cancers
- (xiii) Undertake research on metabolic disorders associated reproductive system

2) Contraception and Family Planning Section

The section is responsible for undertaking research in contraception and family planning to develop modern birth control methods and strengthen family planning programs.

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on contraception and family planning;
- (ii) Undertake research on promotion of contraception by producing evidence-based guidelines on safety and service delivery of contraceptive methods
- (iii) Develop animal models for conducting contraceptive research
- (iv) Conduct research on safety and efficacy on novel compounds with contraceptive potentials
- (v) Perform community activities to promote the family planning programmes as well as educate the community about specific contraceptive methods
- (vi) Assess family planning needs, preferences and behaviors to inform innovation in contraceptive technologies and services
- (vii) Investigate the influence of hormonal contraceptives on peripheral vascular function and structure in premenopausal women
- (viii) Undertake research on association of maternal use of oral contraceptives and risks of birth defects
- (ix) Promote need for contraceptives and the role of men in family planning programs
- (x) Undertake community outreach programmes on family planning methods and prevention of health problems such as sexually transmitted infections, vaginal infections, diet, preventative health measures and normal growth and development.
- (xi) Undertake knowledge dissemination programmes on contraceptives.

3) Assisted Reproductive Technologies Section

The section is charged with undertaking research in assisted reproductive technologies to address infertility and stigma among populations.

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on assisted reproductive technologies;
- (ii) Undertake research in In vitro fertilization to assist in solving infertility disorders
- (iii) Undertake stem cell research that will allow creation of eggs and sperm cells in human using non-human primate model.

- (iv) Undertake studies on various causes and treatment of infertility including anatomy and physiology of the reproductive system
- (v) Evaluate and recommend infrastructure needed for the conduct of clinical and translational research.
- (vi) Undertake research on the development and maturation of germ cells, their functional interactions in the genital tract
- (vii) Perform the functional diversity of cells belonging to the reproductive system
- (viii) Perform epigenetic regulation and assisted reproductive technologies.
- (ix) Develop diagnostic kits for hormonal analysis and provide endocrinological services
- (x) Undertake research on ovarian and endometrial functions during hormonal contraception.
- (xi) Undertake research on hormonal regulation and dysregulation of reproductive processes.

4) *Microbicides and Sexually Transmitted Infections Section*

The section will undertake research in microbicides and sexually transmitted infections to address sexual health issues in women by empowering them through provision of products that do not require consent from their partners.

The functions of the section are to:-

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on microbicides and sexually transmitted infections;
- (ii) Undertake studies on prevention and treatment of sexually transmitted infections (STIs) including HIV
- (iii) Undertake surveillance of drug resistance microbes causing STIs
- (iv) Develop microbicides for prevention of STIs Including HIV
- (v) Conduct continuous medical education on STI prevention measures
- (vi) Develop animal diseases models for further biomedical research and possible treatment options
- (vii) Promote uptake, testing and development of alternative vaccines for preventing cervical cancer
- (viii) Promote development of prebiotics and probiotics and assess the role of microbiome dysbiosis in STI risk acquisition.
- (ix) Assess reproductive tract inflammatory activation by bacterial metabolites

- (x) Undertake studies on pregnancy outcome and preterm birth risk using microbial profiling
- (xi) Characterize the maternal immune-microbiome interactions
- (xii) Undertake studies on microbial-host interactions on reproductive health including miscarriage, ectopic pregnancy and cervical cancer.
- (xiii) Undertake studies to promote sex education, prevention and management of STIs

c) Staffing

In order to perform the above functions, the Reproductive Health & Biology Division will be staffed follows.

Table 7: Establishment for the Reproductive Health & Biology Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Reproductive Health & Biology	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide research leadership within the division

3.3.3 Kenya Snakebite Research and Intervention Division

a) Rationale

The Division is established pursuant to Clause 5 (h) of Legal Notice No. 273 of 2017 to undertake research in snakebite interventions, antivenom development and maintaining national database on the distribution of snakes of medical importance.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on venomous bites, venom standards, antivenom research and development, venomous animals and insects biology and conservation;
- (ii) Maintain and update sub-national and national database on snakebite epidemiology and distribution of snakes;
- (iii) Assess the socioeconomic burden of snakebite at the community, health facility, county and national level;
- (iv) Oversee disease modelling to predict risk maps of venomous bites and assess the effectiveness of interventions;
- (v) Prepare Division budgets, allocate resources and ensure efficient use of resources;
- (vi) Assist in formulation, implementation and reviewing policies, strategies and guidelines on snakebite clinical management;
- (vii) Implement interventions to ensure timely access to antivenom and treatment;
- (viii) Provide information and technical assistance on diagnosis, treatment and management of snakebite envenomation;
- (ix) Conduct clinical studies on snakebite pathophysiology and pathology and other venomous bites;
- (x) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- (xi) Support venomous bites clinical treatment and trial centres;
- (xii) Develop and implement evidence-based treatment protocols for venomous bites management;
- (xiii) Develop training curricula and materials on matters pertaining venomous bites;
- (xiv) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- (xv) Develop new antivenoms and other therapies to improve the efficacy, safety and affordability;
- (xvi) Analyse clinical data on venomous bites;
- (xvii) Prepare Section budgets, allocate resources and ensure efficient use of resources;

- (xviii) Prepare grant proposals to secure funding;
- (xix) Partner with relevant stakeholders on clinical sciences of venomous bites.
- (xx) Execute outreach programs on venomous bites and related matters;
- (xxi) Implement interventions to ensure timely access to antivenom and treatment;
- (xxii) Facilitate preclinical efficacy and quality control of antivenoms, and other therapeutics;
- (xxiii) Develop new antivenoms and other therapies to improve the efficacy, safety and affordability;
- (xxiv) Conduct clinical studies on snakebite pathophysiology and pathology and other venomous bites;
- (xxv) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- (xxvi) Oversee compliance with regulatory requirements and industry standards for product development;
- (xxvii) Provide information to guide diagnosis, treatment and management of snakebite envenomation;
- (xxviii) Manage and support venomous bites clinical treatment and trial centres;
- (xxix) Conduct research on snake biology, other venomous animals and insects and venom;
- (xxx) Coordinate conservation strategy to protect endangered snakes and other venomous animals and insects;
- (xxxi) Coordinate social mobilisation, behavioral change, training and capacity building on all aspects of venomous bites;
- (xxxii) Conduct conferences, seminars and workshops to disseminate research findings related to venomous bites;
- (xxxiii) Partner with relevant stakeholders on matters venomous bites;
- (xxxiv) Implement Division work plan, staff performance, discipline, monitoring and evaluation and reporting

The Kenya Snakebite Research and Intervention Division will be organized into three (3) sections namely:

- (i) Antivenom (Biologics) Quality Control, Development and Production;
- (ii) Snakebite Epidemiology, Public Health, and Community Engagement; and
- (iii) Snakebite Clinical Sciences.

The functions and staffing of the sections are as provided below.

1) *Antivenom (Biologics) Quality Control, Development and Production Section*

The section is established to undertake research in antivenom development, characterization and quality control.

The functions of the section are to:

- (i) Assist in formulation, implementation and reviewing policies, strategies and guidelines on antivenom and other biologics quality control, development and production section;
- (ii) Implement preclinical efficacy testing and quality control of antivenoms and other therapeutics;
- (iii) Perform research on snake biology, other venomous animals and insects and venom;
- (iv) Develop new antivenoms and other therapies to improve the efficacy, safety and affordability;
- (v) Provide information to guide diagnosis, treatment and management of snakebite envenomation;
- (vi) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- (vii) Implement strategies for the production, distribution and storage of antivenom products;
- (viii) Develop training curricula and materials on matters pertaining venomous bites;
- (ix) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- (x) Partner with relevant stakeholders on antivenom (biologics) quality control, development, production and distribution;
- (xi) Ensure proper documentation of preclinical efficacy testing, quality control, production and distribution of antivenom;
- (xii) Ensure compliance with regulatory requirements and industry standards for product development;
- (xiii) Prepare Section budgets, allocate resources and ensure efficient use of resources;
- (xiv) Prepare grant proposals to secure funding;
- (xv) Disseminate scientific findings through publications, conferences, seminars and workshops.

2) Snakebite Epidemiology, Public Health, and Community Engagement Section

The section is established to undertake research in snakebite interventions, maintain national database on the distribution of snakebites & snakes of medical importance and carry out community advocacy.

The functions of the section are to:-

- (i) Assist in formulation, implementation and reviewing policies, strategies and guidelines on snakebite epidemiology, public health and community engagement;
- (ii) Implement interventions to ensure timely access to antivenom and treatment;
- (iii) Collect and analyse surveillance data on snake species, their geographical distribution and snakebite epidemiology;
- (iv) Assess the socioeconomic burden of snakebite at the community, health facility, county and national level;
- (v) Conduct disease modelling to predict risk maps of venomous bites and assess the effectiveness of interventions;
- (vi) Develop evidence based intervention strategies to prevent and control venomous bites
- (vii) Provide information and technical assistance on diagnosis, treatment and management of snakebite envenomation;
- (viii) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- (ix) Support venomous bites clinical treatment and trial centres;
- (x) Coordinate conservation strategy to protect endangered snakes and other venomous animals and insects;
- (xi) Develop training curricula and materials on matters pertaining venomous bites;
- (xii) Undertake advocacy, training and capacity building initiatives to various stakeholders;
- (xiii) Implement behavior change communication strategies on venomous bites;
- (xiv) Execute outreach programs on venomous bites and related matters;
- (xv) Prepare Section budgets, allocate resources and ensure efficient use of resources;
- (xvi) Prepare grant proposals to secure funding;
- (xvii) Partner with relevant stakeholders on snakebite epidemiology, public health and community engagement.

3) Snakebite Clinical Sciences Section

The Section is establishment pursuant to Section 5(b and h) of Legal Notice No. 273 of 2017 (ST&I Act, No. 28 of 2013).

The functions of the section are to:-

- (i) Assist in formulation, implementation and reviewing policies, strategies and guidelines on snakebite clinical management;
- (ii) Implement interventions to ensure timely access to antivenom and treatment;
- (iii) Provide information and technical assistance on diagnosis, treatment and management of snakebite envenomation;
- (iv) Conduct clinical studies on snakebite pathophysiology and pathology and other venomous bites;
- (v) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- (vi) Support venomous bites clinical treatment and trial centres;
- (vii) Develop and implement evidence-based treatment protocols for venomous bites management;
- (viii) Develop training curricula and materials on matters pertaining venomous bites;
- (ix) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- (x) Develop new antivenoms and other therapies to improve the efficacy, safety and affordability;
- (xi) Analyse clinical data on venomous bites;
- (xii) Prepare Section budgets, allocate resources and ensure efficient use of resources;
- (xiii) Prepare grant proposals to secure funding;
- (xiv) Partner with relevant stakeholders on clinical sciences of venomous bites.
- (xv) Execute outreach programs on venomous bites and related matters;

c) Staffing

In order to perform the above functions, the Kenya Snakebite Research and Intervention Division will be staffed as follows.

Table 8: Establishment for the Kenya Snakebite Research and Intervention Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Kenya Snakebite Research and Intervention	3	1	To head the division

3.3.4 Non-Communicable Diseases Division

a) Rationale

The Division is established pursuant to Clause 5 (i) of Legal Notice No. 273 of 2017 to undertake research in non-communicable diseases using non-human primates.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on Non-communicable diseases;
- (ii) Conduct basic, pre-clinical, translational research in non-communicable diseases for intervention and prevention strategies using non-human primates (NHPs) as models for the diseases;
- (iii) Undertake research in Neurosciences, Cancer, Genetic, Metabolic and chronic respiratory diseases, Drug discovery, development and delivery, Cardiovascular, regenerative, exercise and sports sciences;
- (iv) Develop and characterize both non-human primate and other experimental animal models for priority non-communicable diseases in Kenya;
- (v) Support the development of strategies for the management and prevention of the non-communicable diseases research programs, knowledge generation and capacity building programs;
- (vi) Conduct non-communicable disease surveillance in Kenya to obtain data on the current trends of non-communicable diseases and current intervention strategies;
- (vii) Provide research data on non-communicable disease to inform policy;

- (viii) Conduct capacity building in the area of non-communicable diseases in liaison with other Government agencies & programs;
- (ix) Participate in research fundraising activities; and
- (x) Disseminate scientific findings through publications, conferences, seminars and workshops.

The Non-Communicable Diseases Division will be organized into four (4) Sections namely:

- (i) Neurosciences;
- (ii) Cancer, Genetic & Metabolic diseases;
- (iii) Chronic lung diseases; and
- (iv) Cardiovascular, Regenerative and Sports science.

The functions and staffing of the sections are as provided below.

1) *Neurosciences Section*

The functions of the section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on neurosciences;
- (ii) Conduct basic, pre-clinical, translational research in non-communicable diseases of the nervous system for intervention and prevention strategies;
- (iii) Undertake research on neurobiology, neurodegenerative diseases and related neurological disorders, mental health, Sleep, Addiction and other emerging and neglected conditions of the nervous system;
- (iv) Develop and characterize both non-human primate and other experimental animal models for diseases of the nervous system in Kenya;
- (v) Support the development of strategies for the management and prevention of neurodegenerative diseases and related neurological disorders, mental health, addiction, sleep and other emerging and neglected conditions research programs, knowledge generation and capacity building programs;
- (vi) Conduct neurodegenerative diseases and related neurological disorders, mental health, addiction, sleep and other emerging conditions surveillance in Kenya to obtain data on the current trends of the diseases and current intervention strategies;
- (vii) undertake drug discovery, development, delivery, and toxicology research to provide cost-effective alternatives for the treatment and management of non-communicable diseases and support in knowledge generation and capacity building programs;

- (viii) Provide research data on neurodegenerative diseases and related neurological disorders, mental health, sleep, addiction and other emerging and neglected conditions to inform policy;
- (ix) Conduct capacity building in neurodegenerative diseases and related neurological disorders, mental health, sleep, addiction and other emerging and neglected conditions in liaison with other Government agencies & programs;
- (x) Participate in research fundraising activities; and
- (xi) Disseminate scientific findings through publications, conferences, seminars and workshops.

2) *Cancer, Genetic and Metabolic Diseases Section*

The functions of the section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on cancer, genetic and metabolic diseases;
- (ii) Conduct basic, pre-clinical, translational research in non-communicable diseases of metabolic, hereditary etiologies and cancer for intervention and prevention strategies using non-human primates (NHPs) as models of the diseases;
- (iii) Undertake research on cancer, diabetes, physiologic, lifestyle, hereditary and other emerging conditions;
- (iv) Develop and characterize non-human primates as models of disease, and other experimental animal models for cancer, diabetes, hereditary and other emerging conditions;
- (v) Support the development of strategies for the management and prevention of cancer, diabetes, genetic and other emerging conditions research programs, knowledge generation and capacity building programs;
- (vi) Conduct cancer, diabetes, genetic and other emerging conditions surveillance in Kenya to obtain data on the current trends of the diseases and current intervention strategies;
- (vii) Provide research data on cancer, diabetes, hereditary and other emerging conditions to inform policy;
- (viii) Conduct capacity building in cancer, diabetes, hereditary and other emerging conditions in liaison with other Government agencies & programs;
- (ix) Participate in research fundraising activities; and
- (x) Disseminate scientific findings through publications, conferences, seminars and workshops.

3) *Chronic Lung Diseases Section*

The functions of the Section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on chronic lung diseases;
- (ii) Conduct basic, pre-clinical, translational research in non-communicable chronic respiratory diseases for intervention and prevention strategies using non-human primates (NHPs) as models of the diseases;
- (iii) Undertake research on chronic obstructive pulmonary disease (COPD), genetic cystic fibrosis, bronchiectasis, asbestosis, black lung disease, pneumonitis and other emerging physiologic, lifestyle, hereditary and environmental conditions;
- (iv) Develop and characterize both non-human primate and other experimental animal models for chronic lung diseases and other emerging conditions;
- (v) Support the development of strategies for the management and prevention of chronic lung diseases and other emerging conditions research programs, knowledge generation and capacity building programs;
- (vi) Conduct chronic lung diseases and other emerging conditions surveillance in Kenya to obtain data on the current trends of the diseases and current intervention strategies;
- (vii) Provide research data on chronic lung diseases and other emerging conditions to inform policy;
- (viii) Conduct capacity building in chronic lung diseases and other emerging conditions in liaison with other Government agencies & programs;
- (ix) Participate in research fundraising activities; and
- (x) Disseminate scientific findings through publications, conferences, seminars and workshops.

4) *Cardiovascular, Regenerative And Sports Science Section*

The functions of the section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on cardiovascular, regenerative and sports science;
- (ii) Conduct basic, pre-clinical, translational research in non-communicable diseases of the cardiovascular system, regenerative medicine, exercise and sports sciences for intervention and prevention strategies using non-human primates (NHPs) as models of the diseases;
- (iii) Undertake and render antidoping laboratory services

- (iv) Undertake research on cardiovascular diseases, regenerative medicine, exercise and sports sciences;
- (v) Develop and characterize both non-human primate and other experimental animal models for cardiovascular diseases, regenerative medicine, exercise and sports sciences in Kenya;
- (vi) Support the development of strategies for the management and prevention of cardiovascular diseases, regenerative medicine, exercise and sports sciences research programs, knowledge generation and capacity building programs;
- (vii) Conduct cardiovascular diseases, exercise and sports related disease conditions/injuries surveillance in Kenya to obtain data on the current trends of the diseases and current intervention strategies;
- (viii) Provide research data on cardiovascular diseases, exercise and sports related disease conditions/injuries to inform policy;
- (ix) Conduct capacity building in cardiovascular diseases, exercise and sports related disease conditions/injuries in liaison with other Government agencies & programs;
- (x) Participate in research fundraising activities; and
- (xi) Disseminate scientific findings through publications, conferences, seminars and workshops.

c) Staffing

In order to perform the above functions, the Non-Communicable Diseases Division will be staffed as follows.

Table 9: Establishment for the Non-Communicable Diseases Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Non-Communicable Diseases	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide research leadership within the division

3.3.5 Evolutionary Ecology, Conservation & Ecosystem Health Division

a) Rationale

The Division is established pursuant to Clause 5 (f) of Legal Notice No. 273 of 2017 to undertake studies in non-human primate conservation biology and primatology.

b) Function

The functions of the division are to -

- (i) Formulate, implement and review policies, strategies and guidelines on evolutionary ecology, conservation & ecosystem health matters;
- (ii) Undertake field research on primatology and wildlife ecology with focus on species behavioral ecology (Nutrition, Sociobiology & endocrinology), evolution, conservation and management;
- (iii) Undertake baseline surveys on non-human primates and other biodiversity for the purpose of documentation as well as monitoring & evaluation of efficacy of our conservation strategies;
- (iv) Establish and maintain a national non-human primate database on their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- (v) Undertake in-situ health monitoring of primate populations and other wildlife and support the zoonosis surveillance activities for purposes of developing early warning systems and preparedness to respond to potential disease outbreaks and threats to endemic and critically endangered primate and other species;
- (vi) Contribute data to inform policy on matters of primate conservation & management including mitigation of human-nonhuman primate conflicts or interaction threats;
- (vii) Monitor the impacts of climate change on biodiversity (including primates and other species) and local communities and develop and implement sustainable conservation initiatives or climate actions to promote climate change response in terms of mitigation, adaptation and resilience;
- (viii) Undertake research and monitoring of human-nonhuman primates-wildlife interactions and associated impacts to local communities and species themselves to promote informed risks mitigation, minimize socio-economic losses (from crop raiding, livestock depredation, and loss of life) and potential risk of zoonotic diseases;
- (ix) Undertake animal capture, invasive sample collection, or translocation for purpose of research or populations or species conservation and management

- (x) Offer behavioral expertise to biomedical programs undertaking captive behavioral monitoring or for captive behavioral welfare advice under the directorate of Animal Sciences, Welfare and Ethics in effort to support institutional compliance with animal welfare and ethical guidelines in captivity.
- (xi) Provide technical advice based on in-situ behavioral studies and monitoring of primates on ideal enrichment requirements as well as wise and ethical use of problem animals for research to improve human health;
- (xii) Enhance training and capacity building in the field of primatology and biodiversity, support community pro-conservation alternative livelihoods and conduct outreach programs on environment, primate conservation education, biodiversity and climate change;
- (xiii) Provide guidance and institutional support in establishment and management of field site research stations to support both Sectional and institutional field research on conservation and zoonosis agenda;
- (xiv) Undertake anthropological (including ethno-primate and ethnobotany) studies that inform primates and other wildlife conservation, ecosystem health and public health;
- (xv) Disseminate scientific findings through publications, conferences, seminars and workshops.

The Evolutionary Ecology, Conservation & Ecosystem Health Division will be organized into four (4) Sections namely:

- (i) Populations & Community Ecology Section;
- (ii) Behavioral & Applied Ecology Section
- (iii) Climate Change, Biodiversity & Ecosystem Health Section
- (iv) Anthropology & Conservation Section

The functions and staffing of the sections are as provided below.

1) *Populations and Community Ecology Section*

The Section is established to undertake national primate census, geo-spatial distribution mapping and maintaining a national database of the country's primate biodiversity in addition to primate studies for the purpose of their conservation and zoonotic diseases surveillance and monitoring.

The functions of the Section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on populations and community ecology;
- (ii) Undertake national primate population census and geospatial mapping of the species distribution and associated zoonotic infections and develop a national primate database.
- (iii) Conduct routine primate populations monitoring for the purpose of developing and reviewing the national red-listing of Kenyan primates and share with relevant stakeholders for action prioritization and strengthening of primate conservation.
- (iv) Undertake primate and other wildlife species and population genomics to inform accurate taxonomy, distribution, species dispersal, inbreeding depression and population bottlenecks to enhanced their research and conservation.
- (v) Carry out primates and other wildlife habitat suitability analysis surveys to enhance their protection and long-term survival.
- (vi) Undertake primate studies to describe their biological characterization for purposes of effective conservation and research.
- (vii) Undertake ecological risk assessments and species threat reduction studies to ensure survival of the Kenya's most threatened and endemic species
- (viii) Monitor primate habitat threats (including invasive species) and develop mitigation management plans
- (ix) Undertake restoration ecology for sustainable conservation and management of primates and wildlife habitats
- (x) Undertake landscape ecology to understand the drivers of spatial-temporal distribution patterns of primates and other wildlife and the home range conservation requirements.
- (xi) Undertake demographics monitoring of habituated groups of primates and other prioritized wildlife species to understand drivers of population dynamics, carry out population viability analysis and understand population and environmental stochasticity.

- (xii) Carry out phenological studies to understand food resource dynamics in critical primate habitats.
- (xiii) Promote national and global capacity building in the field primatology through running field-schools, short course training and mentorship of young primatologists.
- (xiv) Undertake outreach programs in schools and to the general public through visits, media, education materials and public lectures or talks to raise awareness on primates, biodiversity & climate change.

2) Behavioral & Applied Ecology Section

The section is responsible for carrying out primatological studies to inform science and conservation of nonhuman primates as well as other wildlife species.

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on behavioral and applied ecology;
- (ii) Conduct in-situ studies on general primates behavior to inform their evolutionary biology, ecology and establish baselines for understanding behavioral changes driven by health changes or disease manifestation in both captivity and in-situ.
- (iii) Carry out research on intra and interspecific species interactions to inform primate sociobiology and multi-species associations.
- (iv) Undertake research on species-environmental interactions to understand behavioral plasticity and adaptations to variable ecological conditions.
- (v) Undertake research on mother-infant behavioral interactions to inform primates life histories and its key drivers as fundamental topic in understanding life-term or developmental health implications.
- (vi) Undertake nutrition ecology of primates and other wildlife to inform their foraging strategies, dietary, anatomical adaptations and their reproductive fitness for conservation implications and drawing population health inferences.
- (vii) Carry out behavioral endocrinology studies to understand coping mechanisms of primate species or populations amid anthropogenic and natural stressors.
- (viii) Generate behavioral data to test debatable evolutionary theories such as primate Socio-ecology theory, Expansive Tissue Hypothesis, Ecological Risk Aversion Hypothesis, and Primate extended juvenile dependency, which are of social and health significance.
- (ix) Carry out behavioral surveys that inform crop raiding and depredation by primates as a socio-economic problem and key driver of conservation and zoonotic disease risks.

- (x) Undertake ecological studies of other sympatric and threatened species that are critical for survival of primate species or are in danger of extinction in primate ranges.
- (xi) Establish a database of detailed ecological characterization of the country primates for purposes of enhancing awareness and informing decisions on their management and protection.
- (xii) Collect, analyze and publish information on primate ecology for purposes of scientific contributions and supporting health studies.

3) *Climate Change, Biodiversity and Ecosystem Health Section*

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on climate change, biodiversity and ecosystem health;
- (ii) Undertake research and monitoring of climate change research and impacts on biodiversity and local livelihoods to promote response to climate change
- (iii) Undertake climate change actions to promote mitigation, adaptation and resilience of people and biodiversity to climate change
- (iv) Undertake biodiversity surveys and monitoring in unexplored and perceived biodiversity hotspot regions in the country to contribute to national biodiversity database and biodiversity action plan
- (v) Promote non-human primate and other biodiversity conservation through species restoration both ex-situ and in-situ.
- (vi) Support endangered species conservation and recovery efforts through development and implementation of effective national action plans of targeted species
- (vii) Undertake studies on climate change and land use changes to understand mechanism of biodiversity distribution, extinctions, and zoonotic infections and transmission.
- (viii) Carry out ecological monitoring in various ecosystems especially on environmental epidemiology and exposure and associated impacts.
- (ix) Carry out surveys to establish the effects of ecosystem deteriorations on biodiversity, disease risks, and overall human & wildlife health and sustainability.
- (x) Undertake habitat restoration activities for resilience of ecosystem health.

4) *Anthropology and Conservation Section*

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on anthropology and conservation;
- (ii) Monitor human-non-human primates and other forms of human wildlife conflicts and recommend appropriate interventions
- (iii) Respond to human-non-human primate conflicts crisis especially where co-existence is no longer feasible primate's translocations remains as the last options in saving the species and resolving the conflict
- (iv) Undertake research on human-wildlife interactions (including non-human primates), interfaces of interactions and potential health or disease risks and develop appropriate mitigation measures for both human and species protection
- (v) Undertake both ethno-primatological and ethno-botanical studies to promote sustainable conservation of species and their habitats.
- (vi) Monitor the ecosystem quality and undertake research on medical anthropology to ensure healthy coexistence of biodiversity and humans
- (vii) Carry out studies on primates and other wildlife microbiome to understand risks and benefits of poly-specific associations for conservation strategies and understanding of ecosystem health
- (viii) Undertake studies on conservation, medical and ecological anthropology
- (ix) Educate and engage local communities in sustainable conservation of primates, biodiversity and natural resources for benefits of the present and future generations
- (x) Sensitize the local communities and general public on the threats driving primates and other biodiversity to extinction and mobilize the community-led actions for mitigation
- (xi) Identify and build capacity of the local community skill gaps in supporting locally-driven conservation and research initiatives that promote primates and biodiversity conservation
- (xii) Develop local resources centres in primate hotspots and support communities in establishing nature based enterprises aimed at minimizing threats to primates and biodiversity and building climate change resilience.

c) Staffing

In order to perform the above functions, the Evolutionary Ecology, Conservation and Ecosystem Health Division will be staffed as follows.

Table 10: Establishment for the Evolutionary Ecology, Conservation & Ecosystem Health Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Evolutionary Ecology, Conservation & Ecosystem Health	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide research leadership within the division
	Sub Total		2	
	Populations & Community Ecology Section			
1.	Assistant Director, Research	4	1	Head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2

	Sub Total		8	
	Anthropology & Conservation Section			
1.	Assistant Director, Research	4	1	Head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	
4.	Assistant Research Scientist / Research Scientist	7/6	2	
5.	Principal Laboratory Technician	7	2	
6.	Laboratory Technician/Senior	9/8		
	Sub Total		8	
	Total		34	

3.3.6 Laboratory Services Section

a) Rationale

The section is responsible for overall coordination of all research laboratories and oversight of biosafety and biosecurity, health and safety, sample management, field works and biobanking to ensure quality of research outputs.

b) Functions

The functions of the section are to:-

- (i) Participate in planning, developing, implementing, interpreting and reviewing of medical laboratory policies, standards, guidelines, programs and scientific proposals;
- (ii) Support in management and coordinating of laboratory services;
- (iii) Provide diagnostic medical laboratory services to support preventive, promotive, curative and palliative health care services and research;
- (iv) Design and develop the necessary laboratory infrastructure needed for biobanking
- (v) Perform biobanking activities
- (vi) Manage of research samples and specimens;
- (vii) Assist in field research activities
- (viii) Support research through provision of laboratory services;
- (ix) Provide specifications, evaluation and validation of laboratory equipment, reagents and chemicals;

- (x) Support in establishment and maintenance systems for preserving samples for future and database referencing;
- (xi) Ensure biosafety and biosecurity practices of laboratory services;
- (xii) Maintain laboratory records, data and information;
- (xiii) Ensure quality assurance and control in laboratory services;
- (xiv) Enforce proper procedure for disposal of laboratory waste and ensuring containment of hazardous materials; and
- (xv) Provide technical advice to the management on recruitment of new laboratory staff, capacity building and continuous training for staff and students.
- (xvi) Support of research through ensuring general cleanliness and wellness of laboratory work environments.
- (xvii) Preparation of laboratory reagents;
- (xviii) Laboratory sample reception and accessioning.
- (xix) Record and report of results.
- (xx) Dispatch the results.
- (xxi) Routine and daily maintenance of laboratory equipment.
- (xxii) Support adherence to biosafety and biosecurity guidelines.
- (xxiii) Support compliance with quality assurance and control guidelines in laboratory services.
- (xxiv) Enforce proper procedure for disposal of laboratory waste and ensuring containment of hazardous materials.

c) **Staffing**

In order to perform the above functions, the Laboratory Services will be staffed as follows:-

Table 11: Staff Establishment - Laboratory Services Section

S/N	Designation	Grade KIP	Approved
1.	Assistant Director, Research	4	1
2.	Senior Research Scientist	5	1
3.	Assistant Research Scientist / Research Scientist	7/6	1
4.	Principal Laboratory Technician	7	2
5.	Laboratory Technician/Senior	9/8	
6.	Principal Technician	7	1
7.	Technician/Senior	9/8	
	TOTAL		6

3.3.7 Data Science and Analytics Section

a) Rationale

The section is established to provide a wide range of advanced data science and analytics expertise, guidance, and support to researchers, research teams, and managers engaged in research studies within the institute.

b) Functions

The functions of the section are to:

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on data analytics;
- (ii) Collect, analyze and interpret biological and health science data across multiple research entities in the institute.
- (iii) Support in the design, development, and reporting of research studies
- (iv) Undertake data safeguarding and management of databases, softwares and workflows
- (v) Provide monitoring and evaluation services to all research projects undertaken within the institution.
- (vi) Collect, analyze and interpret biological and health science data across multiple research entities in the institute.
- (vii) Establish the ecological, epidemiological and natural history of a disease.
- (viii) Design, monitor and assess disease control programmes.
- (ix) Evaluate the effects of a disease, and analysis of the costs and economic benefits of alternative control programmes.
- (x) Identify valuable data sources and automate collection processes.
- (xi) Perform research and analysis on all algorithms and coordinate with various teams and provide support to various research programs
- (xii) Assist scientists by providing effective analysis and feedback on all bioinformatics
- (xiii) Provide training to community and analyze various genome sequencing projects for various research projects
- (xiv) Manage all genomic and proteomic data and maintain knowledge on all scientific literature and prepare appropriate reports
- (xv) Design various new computational tools for bioinformatics and assemble and prepare data structures and determine an effective data analysis framework.

- (xvi) Build predictive models and machine-learning algorithms.
- (xvii) Undertake model combinations through ensemble modeling.
- (xviii) Analyze large amounts of information to discover disease trends and patterns
- (xix) Conduct capacity building and mentorships in biostatistics and modeling.
- (xx) Disseminate scientific findings through publications, conferences, seminars and workshops

c) Staffing

In order to perform the above functions, the Data Science and Analytics Section will be staffed as follows.

Table 12: Staff Establishment - Data Science and Analytics Section

S/N	Designation	Grade KIP	Approved	Remarks
1.	Assistant Director, Research	4	1	To head the Section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	
4.	Assistant Research Scientist / Research Scientist	7/6	2	
	Total		6	

3.4 ANIMAL SCIENCES, WELFARE & ETHICS DIRECTORATE

a) Rationale

The Directorate is established pursuant to Clause 5 (a,d,e,f,g,i,j,l & m) of Legal Notice No. 273 of 2017 to provide quality animals and services to scientists performing animal-based research on reproduction, non-communicable diseases and other infectious diseases in the organization as well as for the industry.

b) Functions

The functions of the Directorate are to:-

- (i) Coordinate formulation, implementation and review of policies, strategies and guidelines on animals sciences, breeding, welfare and ethics;
- (ii) Develop and implement ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare;
- (iii) Provide scientific advice and guidance to researchers, veterinarians and other stakeholders on animal related research, testing and breeding;
- (iv) Ensure proper compliance on animal related research, treatment, testing, husbandry and breeding;
- (v) Provide secretarial services to the Institutional Scientific, Ethics and Review Committee (ISERC)
- (vi) Oversee and regulate the acquisition and breeding of animals for research, testing and educational purposes;
- (vii) Oversee management of animal colonies;
- (viii) Ensure compliance with local, national and international regulation related to animal welfare and ethics;
- (ix) Participate in establishing ethical review boards and committees responsible for approving research protocols involving animals;
- (x) Advice on design and maintenance of animal facilities to meet national and international standards;
- (xi) Promote the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;
- (xii) Identify opportunities for innovation and improvement in ethical animal handling practices;
- (xiii) Facilitate training and capacity building animals sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders;

- (xiv) Maintain and update animal health, research, breeding, welfare and ethics database;
- (xv) Conduct conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- (xvi) Oversee collaborative and contract research on laboratory animals;

c) Staff Establishment

In order to perform the above functions, the Director, Animal Sciences, Welfare & Ethics will be staffed as follows: -

Table 13: Establishment for Office of the Director, Animal Sciences, Welfare & Ethics

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director, Animal Sciences, Welfare and Ethics	2	1	
2.	Chief Research Scientist	2	1	
3.	Assistant Office Administrator/ Senior	9/8	1	
4.	Driver / Senior	11/10	1	
5.	Office Assistant / Senior	12/11	1	
	Total		5	

The Animal Sciences, Welfare and Ethics Directorate will be organized into three (3) divisions namely: -

- (i) Veterinary Clinical and Diagnostics Services Division;
- (ii) National Laboratory Animal Breeding Division; and
- (iii) Ethics and Welfare Division

3.4.1 Veterinary Clinical and Diagnostics Services Division

a) Rationale

The division is been established pursuant to Clause 5 (a,j,l,m) of Legal Notice No. 273 to provide quality veterinary clinical, surgical, diagnostic and pathology services to scientists performing animal-based research at KIPRE.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on veterinary, clinical, diagnostic and pathology services;
- (ii) Develop and implement policies and procedures for laboratory animal clinical care, safety and quality control;
- (iii) Ensure compliance with national, regional and international regulations for animal clinical care and welfare;
- (iv) Maintain and update accurate clinical database on laboratory animals treatment, surgeries, tests and health histories;
- (v) Oversee the ordering and maintenance of animal medical supplies and equipment;
- (vi) Conduct routine and experimental surgeries and related procedures;
- (vii) Provide training and capacity building to technicians, veterinarians, and other researchers on laboratory animal medicine, veterinary medicine and surgery and diagnostics;
- (viii) Ensure advances in laboratory animal medicine, veterinary medicine and surgery and related technologies and diagnostics;
- (ix) Implement Division work plan, staff performance, discipline, monitoring and evaluation and reporting
- (x) Execute outreach programs in laboratory animal medicine, surgery and diagnostics;
- (xi) Oversee collaborative and contract research on laboratory animals;
- (xii) Supervise the running of the Diagnostic laboratory;
- (xiii) Oversee necropsy and histopathology to researchers and the animal facility.
- (xiv) Train, supervise and maintain proficiency and develop clinical, pathological and research diagnostic skills;

The veterinary Clinical and Diagnostic Services Division is organized into two (2) Sections namely: -

- (i) Animal Clinic and Surgery; and
- (ii) Diagnostics Laboratory and Pathology.

1) *Animal Clinic and Surgery Section*

The functions of the Section are to: -

- (i) Assist in formulating, implementing and reviewing policies, strategies and guidelines on veterinary clinical and surgery services;
- (ii) Undertake compliance with national, regional and international regulations for animal clinical care and surgery;
- (iii) Maintain and update accurate clinical database on laboratory animals treatment, surgeries, tests and health histories;
- (iv) Order and maintain of animal medical supplies and equipment;
- (v) Conduct routine and experimental surgeries and related procedures;
- (vi) Conduct training and capacity building to technicians, veterinarians, and other researchers on laboratory animal medicine, veterinary medicine and surgery and diagnostics;
- (vii) Undertake advances in laboratory animal medicine, veterinary medicine and surgery and related technologies and diagnostics;
- (viii) Implement Division work plan, staff performance, discipline, monitoring and evaluation and reporting
- (ix) Promote outreach programs in laboratory animal medicine, surgery and diagnostics;
- (x) Perform collaborative and contract research on laboratory animals;
- (xi) Perform necropsy and histopathology to researchers and the animal facility.
- (xii) Train, supervise and maintain proficiency and develop clinical, pathological and research diagnostic skills;
- (xiii) Perform euthanasia services
- (xiv) Keep safe custody of regulated and restricted drugs

2) Diagnostics Laboratory And Pathology Section

The functions of the Section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on diagnostics and pathology services;
- (ii) Perform necropsy examinations on laboratory animal
- (iii) Analyze biopsies samples and bodily fluids
- (iv) Determine the epidemiological features of animal's cause of death at KIPRE
- (v) Analyze and discuss necropsy results with researchers and other clinical scientist
- (vi) Advise and oversee on proper handling and preparations of samples for laboratory testing
- (vii) Train, supervise and maintain proficiency and develop clinical, pathological and research diagnostic skills of junior pathologists
- (viii) Provide microbiology and clinical chemistry diagnostic services
- (ix) Establish and operate a molecular diagnostic service
- (x) Contribute to the development of drugs and animal health products
- (xi) Assist the Biobank in collection, preservation and labeling of pathology tissues and samples
- (xii) Maintain a tissue archives of Hematoxylin and Eosin microscope slides and other formats as part of teaching and research database
- (xiii) Organize training workshops in pathology and diagnostics

c) Staffing

In order to perform the above functions, the Veterinary Clinical and Diagnostics Services Division will be staffed as follows:-

Table 14: Staff Establishment for the Veterinary Clinical and Diagnostics Services Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Veterinary Clinical and Diagnostic Services	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide technical expertise in support of sections in the division

	Sub Total		2	
	Animal Clinic and Surgery Section			
1.	Assistant Director, Research	4	1	To head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5	2	
4.	Assistant Research Scientist / Research Scientist	7/6	2	
5.	Principal Animal Health Technician	7	2	
6.	Animal Health Technician / Senior	9/8	2	
	Sub Total		10	
	Diagnostics Laboratory and Pathology Section			
1.	Assistant Director, Research	4	1	To head the Section
2.	Principal Research Scientist	4	3	
3.	Senior Research Scientist	5		
4.	Assistant Research Scientist / Research Scientist	7/6		
5.	Principal Laboratory Technician	7	1	
6.	Laboratory Technician /Senior	9/8	1	
	Sub Total		6	
	Total		18	

3.4.2 National Laboratory Animal Breeding Division

a) Rationale

The Division is established pursuant to Clause 5 (d) of Legal Notice No. 273 to establish and operate a national breeding colony of Non-Human Primates and other experimental laboratory animals for research.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on laboratory animal breeding;
- (ii) Supervise the acquisition and breeding of animals for research, testing and educational purposes;
- (iii) Oversee development and implementation of a national NHPs and other lab animals breeding policy
- (iv) Provide high quality and enough laboratory animals for research
- (v) Ensure research animals have adequate access to quality and healthy diet
- (vi) Oversee the development of quality infrastructure for improving animal productivity and breeding that ensure the physical and psychological of animals are not constrained, e.g. by poor cage design and size may affect the growth and development of animals.
- (vii) Supervise the provision of nutritional requirements, environmental needs and disease risks of the laboratory animals that are allocated to researchers are properly taken care of
- (viii) Supervise capture and translocation of either endangered or problem NHPs for conservation, management, research and establishment of breeding colonies;
- (ix) Oversee provision of healthcare by working closely with division of Veterinary Clinical and Diagnostic services
- (x) Supervise the development of superior germplasm for improving animal productivity through in vitro fertilization and other assisted reproductive technology
- (xi) Oversee production post F2 generation NHPs for research purposes
- (xii) Guide on production of well-documented genetically characterized population of laboratory animals
- (xiii) Supervise the breeding of specific pathogen-free animals (S.P.F.) and another to germ free animals.

c) Staff Establishment

In order to perform the above functions, the National Laboratory Animal Breeding Division will be staffed as follows:-

Table 15: Staff Establishment for the National Laboratory Animal Breeding Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, National Laboratory Animal Breeding	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide technical expertise in support of sections in the division
3.	Assistant Director, Research	4	1	To head the Section
4.	Principal Research Scientist	4	3	
5.	Senior Research Scientist	5		
6.	Assistant Research Scientist / Research Scientist	7/6	2	
7.	Principal Animal Health Technician	7	2	
8.	Animal Health Technician / Senior	9/8	2	
9.	Principal Animal Health Assistant	10	2	
10.	Animal Health Assistant / Senior	12/11		
	Total		14	

3.4.3 Welfare and Ethics Division

a) Rationale

The Division is established pursuant to Clause 5 (I) of Legal Notice No. 273 of 2017 to undertake national capacity building in animal welfare, ethical use and care of non-human primates and other experimental animals in laboratory settings.

b) Functions

The functions of the division are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on animals welfare and ethics;
- (ii) Regulate the acquisition and breeding of animals for research, testing and educational purposes;
- (iii) Formulate national laboratory animal welfare and ethics policies, in consultation with Director of Veterinary Services (DVS) and National Commission for Science, Technology & Innovation (NACOSTI) and other stakeholders;
- (iv) Contribute to national and international guidelines for animal welfare care and use standards
- (v) Supervise the training of veterinarians, scientists, and animal care personnel on best practices in environmental enrichment
- (vi) Provide secretariat to ISERC
- (vii) Supervise the establishment of a structured positive reinforcement training (PRT) program at KIPRE; including physical and food enrichment, social housing to the animals
- (viii) Supervise animal social groups through management of animal behavior
- (ix) Supervise animal husbandry practices for captive animals
- (x) Ensure maintenance of local and international accreditations
- (xi) Guide on good practices for caring and rehabilitating rescued animals
- (xii) Supervise field animal behavioral studies and enhance proper ethics and welfare practices.

c) Staff Establishment

In order to perform the above functions, the Welfare and Ethics Division will be staffed as follows:-

Table 16: Staff Establishment for the welfare and ethics Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Welfare and Ethics	3	1	To head the division
2.	Senior Principal Research Scientist	3	1	To provide technical expertise in support of sections in the division
3.	Assistant Director, Research	4	1	To head the section
4.	Principal Research Scientist	4	1	
5.	Senior Research Scientist	5	2	
6.	Assistant Research Scientist / Research Scientist	7/6	2	
	Total		8	

3.5 CAPACITY BUILDING, PARTNERSHIP & GRANT MANAGEMENT DIRECTORATE

a) Rationale

The Directorate is established pursuant to Clause 5 (I) of Legal Notice No. 273 of 2017 to coordinate capacity building in primate research, knowledge transfer and support the research directorates with both grant management systems and incubation of promising products to promote commercialization.

b) Functions

The functions of the directorate are to:-

- (i) Coordinate formulation, implementation and review of policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- (ii) Develop framework for engagements on Incubation and commercialization of products
- (iii) Manage the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- (iv) Assess and offer training to scientists, researchers and healthcare professionals in the biomedical field.
- (v) Ensure the institution complies with all applicable laws, regulations, and funder requirements.
- (vi) Develop and submit grant proposals, budgets, and reports to funding agencies, ensuring that all requirements are met and that the organization's interests are represented.
- (vii) Ensure that grant-funded projects align with the organization's overall strategy
- (viii) Guide on the establishment of an innovation and incubation centre linking research and industry in the health products value chain.
- (ix) Executing partnership and grant agreements.
- (x) Guide on the establishment of an incubation centre linking research and industry in the health products value chain;
- (xi) Monitoring the performance of partnerships and grants.
- (xii) Provide support and guidance to institute stakeholders on entrepreneurial skills and best practices, including business development, marketing, fundraising, and product development
- (xiii) Negotiating licenses for clients' IP rights, drafting license agreements, and monitoring compliance with those agreements.

- (xiv) Guide the entry of KIPRE into partnerships and collaborations with other similar institutions or professional organizations locally and internationally
- (xv) Facilitate KIPRE in the development and submission of proposals.
- (xvi) Provide support and guidance to institute stakeholders on funding opportunities and grant applications, including identifying and pursuing grant opportunities, developing grant proposals, and managing grant projects
- (xvii) Provide resource and knowledge management services including accessioning of all new books, classification and cataloging of the same and keeping custody of relevant literature, information, equipment and documentation for the institute.

c) Staff establishment

In order to perform the above functions, the Office of the Director, Capacity Building, Partnership & Grant Management will be staffed as follows.

Table 1: Staff Establishment for the Office of the Director, Capacity Building, Partnership & Grant Management

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director Capacity Building, Partnership & Grant Management	2	1	
2.	Chief Research Scientist	2	1	
3.	Assistant Office Administrator /Senior	9/8	1	
4.	Driver/Senior	11/10	1	
5.	Office Assistant/Senior	12/11	1	
	Total		5	

The Capacity Building, Partnership & Grant Management Directorate of is organized into three (3) Divisions namely: -

- (i) Innovation, Incubation and Marketing Division;
- (ii) Training and Capacity Building Division; and
- (iii) Partnership & Grant Management Division

3.5.1 Innovation, Incubation and Marketing Division

a) Rationale

The Division is established pursuant to Clause 5 (b) of Legal Notice No. 273 of 2017 to establish an incubation centre linking research and industry in the health products value chain.

b) Functions

The functions of the division are to:-

- (i) Formulate, implementation and review of policies, strategies and guidelines on innovation, incubation and marketing matters;
- (ii) Establish and maintain an incubation centre linking research and industry.
- (iii) Guide on development of policies, processes and guidelines on innovation and incubation management
- (iv) Provide incubation and acceleration services to institute start-ups and spin-offs, including access to funding, mentorship, networking, and other support services.
- (v) Participate in research fundraising activities and organize events to identify, expose and reward innovators.
- (vi) Identify opportunities for commercialization of research results, patent licensing, and spin-off creation.
- (vii) Develop policies, processes and guidelines for Licensing and Contract management at KIPRE
- (viii) Develop and negotiate licensing agreements for the commercialization of intellectual property assets generated by the institute, including patents, industrial designs, copyrights, trademarks / trade names, trade secrets, and other forms of intellectual property rights.
- (ix) Review and analyze license agreements to ensure compliance with intellectual property law, institute policies, and other legal and regulatory requirements.
- (x) Facilitate acquisition of local research permits and develop relevant research agreements such as material transfer agreements (MTAs), Prior informed consent and memorandum of association.
- (xi) Conduct campaign management for marketing initiatives arising from research activities.
- (xii) Produce marketing and promotional materials for KIPRE products and services.
- (xiii) Create marketing content providing search engine optimization for website.
- (xiv) Conduct customer and market research and oversee vendors and agencies.

The Division for Innovation, Incubation and Marketing is organized into three (3) Sections namely: -

- (i) Intellectual property rights Section
- (ii) Industrial liaison Section
- (iii) Drug Discovery, Development & Delivery Section

1) *Intellectual Property Rights Section*

The functions of the section are to;

- (i) Assist in implementation and review of policies, strategies and guidelines on all intellectual property rights matters;
- (ii) Develop and implement strategies to identify, evaluate, and protect institute intellectual property, including patents, trademarks, copyrights, and trade secrets.
- (iii) Develop and implement strategies for commercializing institute research and innovation, including identifying and pursuing licensing and spin-off opportunities.
- (iv) Facilitate acquisition of local and international research permits and develop relevant research agreements such as material transfer agreements, Prior informed consent and memorandum of association.
- (v) Coordinate reporting requirements Provide support and guidance to institute stakeholders on regulatory compliance issues related to entrepreneurship and commercialization activities, including export controls, intellectual property rights, and data management.
- (vi) Provide support and guidance to institute stakeholders on entrepreneurial skills and best practices, including business development, marketing, fundraising, and product development.
- (vii) Collaborate with industry partners to identify and pursue joint research and development opportunities, ventures, strategic partnerships, and research consortia.
- (viii) Provide support and guidance to institute stakeholders on project management and collaboration tools and technologies, including data management, collaborative software, and project tracking tools.
- (ix) Develop and implement strategies for accessing venture capital, angel investors, and other sources of funding for institute start-ups and spin-offs.
- (x) Develop and implement strategies for promoting the commercialization of institute research and innovation through licensing and other partnership arrangements.

- (xi) Collaborate with other departments and stakeholders within the institute to promote interdisciplinary collaboration and knowledge transfer, including developing cross-disciplinary research projects and programs.
- (xii) Provide mentorship and training to institute researchers and students on entrepreneurship and commercialization skills, including business plan development, marketing strategy, and fundraising.
- (xiii) Collaborating with industry partners to develop research and development projects that leverage institute expertise and capabilities, and identifying opportunities for collaborative funding.
- (xiv) Coordinate reporting requirements and other obligations to research sponsors regarding innovation developed under a research contract or grant including but not limited to obligations to the Kenya government.
- (xv) Prepare for approvals, reports listing the titles and brief descriptions of all innovations or invention disclosures received.
- (xvi) Drafting contracts related to intellectual property and technology transfer, such as licence agreements, confidentiality agreements, material transfer agreements, and research collaboration agreements.

2) *Industry Liaison Section*

The functions of the section are to:-

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on all industry liaison, sales and marketing matters;
- (ii) Secure funding for research and start-ups from industry partners.
- (iii) Identifies potential industry partners and develops strategies to engage them in collaborative Research & Development projects, sponsored research, or other forms of partnership.
- (iv) Develop invention handling procedures and participate in licensing negotiations in conjunction with industry partners.
- (v) Works with research scientists to identify research opportunities that align with industry needs, and supports the development of joint research proposals, project management, and reporting.
- (vi) Develop, review and implement Marketing strategy to support the Institute's objectives;
- (vii) Conduct marketing and campaign management programmes for the institute.
- (viii) Facilitate transfer of research technology and know-how between research and industry market.

- (ix) Produce marketing and promotional materials.
- (x) Builds and maintains long-term relationships with key industry stakeholders, understanding their needs, challenges, and Research & Development priorities, and matching them with relevant academic expertise and resources.
- (xi) Organize events for research scientists like workshops, conferences, and seminars to bring together academia, industry, and government stakeholders, fostering dialogue, networking, and collaboration.
- (xii) Create marketing content providing search engine optimization for KIPRE website.
- (xiii) Develops marketing materials and communications strategies to raise awareness about the institute's research capabilities, success stories, and available resources for professionals.
- (xiv) Conduct customer and market research for KIPRE products and services.
- (xv) Contribute to the development of the institute's overall research strategy, identifying opportunities for growth, diversification, and alignment with regional economic development priorities.
- (xvi) Identify KIPRE products and services prime for commercialization.
- (xvii) Monitor industry trends and developments to identify potential opportunities and threats to the organization.
- (xviii) Maintain a database of contacts of industry-related actors.
- (xix) Raise awareness of research activities and offers among industrial actors.
- (xx) Maintain presentation material documenting centre activities targeting industry.
- (xxi) Identify opportunities for the institute to support new industry sectors.

3) *Drug Discovery, Development and Delivery Section*

The functions of the Section are to: -

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on drug discovery, development and delivery matters;
- (ii) Undertake research on drug discovery and development
- (iii) Collaborate with pharmaceutical industries for manufacturing and commercialization of the generated drug leads, molecules and nutraceuticals;
- (iv) Manage the drug discovery and development process
- (v) Develop innovative drug delivery and molecular design strategies for targeting infectious and non-infectious diseases;

- (vi) Support the development of strategies for drug discovery and development, delivery, and toxicology research programs to provide cost-effective alternatives for the treatment and management of diseases through, knowledge generation and capacity building programs;
- (vii) Preclinically validate traditional knowledge-based products with claimed healing for efficacy using monkeys as models
- (viii) Obtain regulatory approval for drug candidates
- (ix) Conduct capacity building in drug discovery and development, delivery, and toxicology in liaison with other Government agencies & programs;
- (x) Participate in research fundraising activities; and
- (xi) Disseminate scientific findings through publications, conferences, seminars and workshops.

c) Staffing

In order to perform the above functions, the Innovation, Incubation and Marketing Division will be staffed as follows:-

Table 2: Staff Establishment for the Innovation, Incubation and Marketing Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director Innovation, Incubation and Marketing	3	1	To head the Division
2.	Senior Principal Research Scientist	3	1	
	Sub Total		2	
	Intellectual Property Rights Section			
1.	Assistant Director, Research	4	1	To head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5		
4.	Assistant Research Scientist / Research Scientist	7/6	1	
	Sub Total		3	
	Industry Liaison Section			
1.	Assistant Director, Research	4	1	To head the section
2.	Principal Research Scientist	4	1	
3.	Senior Research Scientist	5		

4.	Assistant Research Scientist / Research Scientist	7/6	1	
5.	Principal Sales and Marketing Officer	5	1	
6.	Sales and Marketing Officer / Senior	7/6	1	
	Sub Total		5	
	Drug Discovery, Development & Delivery Section			
1.	Assistant Director, Research	4	1	To head the section
2.	Principal Research Scientist	4		
3.	Senior Research Scientist	5	1	
4.	Assistant Research Scientist / Research Scientist	7/6	1	
	Sub Total		3	
	Total		13	

3.5.2 Training and Capacity Building Division

a) Rationale

The Division is established pursuant to Clause 5 of Legal Notice No. 273 of 2017 which requires the institute to perform research and associated capacity support.

b) Functions

The functions of the Section are to: -

- (i) Formulate, implement and review policies, strategies and guidelines on all training and capacity building matters;
- (ii) Oversee development of short biomedical courses that meet the needs of professionals and students in the biomedical field with relevance to KIPRE mandates.
- (iii) Develop and implement the institute's training and capacity building strategy programs.
- (iv) Guide development of educational programs that align with the KIPRE's research objectives
- (v) Design, Evaluate and deliver effective training programs
- (vi) Supervise development and management of partnerships with stakeholders including industry, government, non-profit organizations, and other research institutions to advance the institute's research and innovation objectives.
- (vii) Manage the training budget.

- (viii) Guide and support researchers, staff, and students on partnership development and management, including partnership agreement negotiation, project management, and communication strategies.
- (ix) Stay up-to-date on the latest training and development trends
- (x) Guide on mechanisms for information, data storage, analysis and knowledge dissemination.

The Division for Training and Capacity Building is organized into two (2) Sections namely: -

- (i) Training and Development
- (ii) Resource and Knowledge Management

1) *Training and Development Section*

The functions of the section are to:-

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on all resource and knowledge matters;
- (ii) Develop short biomedical courses that meet the needs of professionals and students in the biomedical field with relevance to KIPRE mandates.
- (iii) Assess the training needs of scientists, researchers and healthcare professionals in the biomedical field so as to develop short courses to meet those needs.
- (iv) Update and improve course materials and content to ensure that they remain current and relevant to the changing needs of the biomedical industry
- (v) Manage administrative tasks such as registration, and program evaluation to ensure that graduate students are meeting academic standards and making progress toward their degrees.
- (vi) Facilitate communication and collaboration between fellowship recipients and their mentors, and promote networking opportunities among graduate students in different fields and programs.
- (vii) Promote research findings by helping disseminate research findings through publications, presentations, and other means, which can contribute to the advancement of knowledge in their respective fields.
- (viii) Participate in the selection of suitable candidates for Research Training programs, based on their academic background, interests, and skill set.
- (ix) Provide supervision and mentorship to interns and attaches, ensuring that they receive adequate guidance and support throughout their placement.

- (x) Work with researchers to develop educational programs that align with the KIPRE's research objectives and provide value to visitors. These programs could include guided tours of the facility, interactive exhibits, and demonstrations of the research process.

2) Resource and Knowledge Management Section

The functions of the section are to:-

- (i) Assist in formulation, implementation and review of policies, strategies and guidelines on all resource and knowledge matters;
- (ii) Managing the institution's library.
- (iii) Identify and map the research institute's key resources and knowledge assets.
- (iv) Identify and map the organization's key resources and knowledge assets.
- (v) Conduct research and analysis to identify trends and opportunities for improvement in RKM
- (vi) Provide a mechanism for information, data storage, analysis and dissemination.
- (vii) Represent the organization on resource and knowledge management-related committees and working groups.
- (viii) Maintain a repository of institutional artifacts and achievements.
- (ix) Manage the organization's records and information management program
- (x) Develop standard operating procedures for library and information services.
- (xi) Promoting and digitization of reference and other materials to users.
- (xii) Provide access to media resources.
- (xiii) Maintain registration and access to digital research libraries.
- (xiv) Provide media related research support services.
- (xv) Conduct information science research.
- (xvi) Collaborating and networking with stakeholders in the promotion and marketing of library services.

c) Staffing

In order to perform the above functions, the Training and Capacity Building Division will be staffed as follows:-

Table 3: Staff Establishment for the Training & Capacity Building Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Training & Capacity Building	3	1	
	Sub Total		1	
	Training and Capacity Building Section			
1.	Assistant Director, Research	4	1	To head the section
2.	Senior Research Scientist	5	1	
3.	Assistant Research Scientist / Research Scientist	7/6	1	
	Sub Total		3	
	Resource and Knowledge Management Section			
1.	Assistant Director, Resource and Knowledge	4	1	To head the section
2.	Principal Knowledge Management Officer	5	1	
3.	Knowledge Management Officer / Senior	7/6	1	
4.	Principal Knowledge Management Officer	7	3	
5.	Assistant Knowledge Management Officer / Senior	9/8		
	Sub Total		6	
	Total		10	

3.5.3 Partnerships and Grants Management Division

a) Rationale

The Division is established pursuant to Clause 5 (I) of Legal Notice No. 273 of 2017 to undertake partnership and capacity building to perform research and associated matters.

b) Functions

The functions of the division are to:-

- (i) Formulate, implement and review policies, strategies and guidelines on all partnership and grants management matters;
- (ii) Develop and manage partnerships with stakeholders including industry, government, non-profit organizations, and other research institutions to advance the institute's research and innovation objectives.
- (iii) Management of the grants program for the institute.

- (iv) Monitors and evaluates the performance of partnerships and grants, and prepares regular reports for internal and external stakeholders.
- (v) Identify and pursue grant opportunities from various funding sources, including foundations, governments, and international organizations.
- (vi) Assist the finance department on the institutional budget process on grant funding.
- (vii) Represent the institution to grantors and other stakeholders
- (viii) Negotiate contracts, monitor compliance with grant terms and conditions, and ensure timely and accurate financial and narrative reporting.
- (ix) Conduct due diligence on behalf of the institution on potential partners and grantees to ensure that they meet the institutional standards for integrity, accountability, and fiscal responsibility.
- (x) Contribute to the organization's strategic planning process by identifying new partnership and grant opportunities,
- (xi) Maintains a database of partner and grant information, and shares knowledge and best practices across the institution to improve collaboration and learning.
- (xii) Advice on how to leverage resources to achieve the organization's goals.
- (xiii) Provide guidance and support to researcher scientists, and students on partnership development and management, including partnership agreement negotiation, project management, and communication strategies.
- (xiv) Preparation of contractual and non-disclosure agreements between collaborating partners.
- (xv) Identify collaborations that will influence grants policy changes to cultivate funding opportunities.
- (xvi) Represent the institute on capacity building and grant related committees and working groups
- (xvii) Develop and implement policies and procedures for managing conflicts of interest and ensuring ethical conduct in partnership activities, including disclosure requirements and conflict resolution mechanisms.
- (xviii) Negotiate and manage KIPRE Research scientist grant contracts.
- (xix) Assess collaborative and negotiate favorable terms, in managing grants risk.
- (xx) Identify relevant funding opportunities for research scientists and provide information on funding sources, application requirements, and deadlines.
- (xxi) Support Research scientists in developing grant proposals, including providing guidance on proposal structure, content, and budget development.
- (xxii) Monitor grant performance and compliance.

- (xxiii) Coordinating and reviewing grant proposals to ensure they meet the funding agency's requirements development and submission of core institutional grant calls.
- (xxiv) Maintain records of grant submissions, awards, and progress reports to ensure compliance with funding agency requirements
- (xxv) Collaborate with internal and external stakeholders to develop interdisciplinary research projects that can be funded through grants.
- (xxvi) Develop and implement policies and procedures for managing grants, including tracking and reporting grant expenditures, managing subcontractors and collaborators, and ensuring compliance with funding agency requirements.
- (xxvii) Monitor changes in funding agency policies and regulations and provide guidance to institute researchers on how to comply with these changes.
- (xxviii) Manage sub-awards and subcontractors, including ensuring compliance with funding agency requirements and managing payment schedules.

c) Staff Establishment

In order to perform the above functions, the Partnerships & Grant Management Division will be staffed as follows.

Table 20: Staff Establishment for Partnerships & Grant Management Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Partnership and Grants Management	3	1	
2.	Assistant Director, Research	4	1	
3.	Senior Research Scientist	5	1	
4.	Assistant Research Scientist / Research Scientist	7/6		
5.	Principal Planning Officer	5	1	
6.	Planning Officer / Senior	7/6		
	Total		4	

3.6 PLANNING & STRATEGY DIVISION

a) Rationale

The Division is responsible for spearheading KIPRE policy and strategy formulation and execution, planning and performance management, monitoring and evaluation, projects management, and budget forecasting for realization of Institute vision.

b) Functions

The functions of the Division are to:

- Formulate, implement and review planning & strategy policies, strategies and programs;
- Provide advice on the capital projects to ensure alignment with the strategic business goals of the Institute;
- Centralize appraisal and cost benefit analysis for all projects;
- Support divisions to develop and review Key Performance Indicator's (KPI's);
- Measure the performance of the key projects through the selected KPI's;
- Coordinate the development, evaluation and reviewing of the Institute Strategic Plan;

- (vii) Coordinate the development, implementation and evaluation of the Institute Performance contract;
- (viii) Compile and disseminate periodic performance reports;
- (ix) Coordinate development of standard operating procedures and control documents across all functions in the Institute;
- (x) Coordinate quality management in line with established systems and procedures including Quality Management Systems and ISO requirements to achieve goals, objectives and work standards of the Institute;
- (xi) Facilitate Risk Management in the Institute through overseeing development and implementation of an Enterprise Risk Management Framework;
- (xii) Coordinate preparation, formulation and implementation of the Institute quality management through quality Assurance Programme and standard operating procedures
- (xiii) Provide standardized project planning guidelines, methods, systems, tools and metrics for consistent value outcome;
- (xiv) Monitor and evaluate progress of all key Institute projects and programmes;
- (xv) Develop and maintain a database of all approved Projects;
- (xvi) Design Monitoring & Evaluation tools;
- (xvii) Compile and disseminate Monitoring & Evaluation reports; and
- (xviii) Coordinate monitoring, evaluation, review and implementation of SWOT and PESTEL concerns.

c) **Staff Establishment**

In order to perform the above functions, the Planning & Strategy Division will be staffed as follows.

Table 21: Establishment for the Planning & Strategy Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Planning & Strategy	3	1	
2.	Assistant Director, Planning & Strategy	4	1	
3.	Principal Planning Officer	5		
4.	Planning Officer / Senior	7/6		
	Total		3	

3.7 SUPPLY CHAIN MANAGEMENT DIVISION

a) Rationale

The Division facilitates the procurement of goods, works and services, inventory management and disposal in accordance with the Public Procurement Asset Disposal Act (PPADA), 2015, Public Procurement Regulations Disposal Act of 2020 (PPRDA).

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review supply chain management policies, strategies, plans and programs;
- (ii) Coordinate the development and implementation of procurement and disposal plans;
- (iii) Review purchase requisitions against stock records and coordinate the development of detailed tender specifications and performance standards to facilitate procurement of capital equipment, goods and services in strict compliance to government procedures and regulations;
- (iv) Coordinate and participate in procurement negotiations with suppliers and vendors to consider tender application against technical specifications and with due regard to market price, cost, quality and speed of delivery as well as economy of operations;
- (v) Prepare purchase orders; obtain authorized signatures and forward procurement documents to finance Deputy Director for payment processing.
- (vi) Undertake procurement of goods, works and services within the confines of Public Procurement and Asset Disposal Act, 2015, regulations, circulars and internationally recognized procurement procedures;
- (vii) Coordinate receipt of goods and supplies and verify information on delivery notes and supply requisitions in order to establish their accuracy;
- (viii) Advise the Institute on aggregation of procurement in order to promote economies of scale;
- (ix) Coordinate disposal of unserviceable and obsolete stores;
- (x) Sensitize stakeholders on procurement guidelines and supply chain best practices;
- (xi) Prepare quarterly and annual reports showing achievement of the procurement plan;
- (xii) Pre-qualify suppliers, appraise and update the suppliers list;
- (xiii) Maintain and update the stores and assets register;
- (xiv) Manage Institutional Contracts;

- (xv) Prepare and publish tender awards in Public Procurement Information Portal (PPIP) and the Institute website;
- (xvi) Maintain and archive the procurement and asset disposal documents and records for the prescribed period;
- (xvii) Provide secretariat services to all committees concerning supply chain management;

c) **Staff Establishment**

In order to perform the above functions, the Supply Chain Management Division will be staffed as follows.

Table 22: Establishment for the Supply Chain Management Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Supply Chain Management	3	1	
2.	Assistant Director, Supply chain management	4	1	
3.	Principal Supply Chain Management Officer	5		
4.	Supply Chain Management Officer /Senior	7/6	2	
5.	Principal Supply Chain Management Assistant	7	2	
6.	Supply Chain Management Assistant / Senior	9/8		
	Total		6	

3.8 CORPORATE SERVICES DIRECTORATE

a) **Rationale**

The Directorate is established pursuant to Clause 5(m) of Legal Notice No 273 of 2017 to provide leadership and coordination of Human Resource Management & Development, Administration, Corporate Communication and Information Communications Technology.

b) **Functions**

The functions of the Directorate are to: -

- i. Coordinate the formulation, implementation and review of policies, strategies, plans, procedures and manuals for Information Communication Technology, Human Resource & Administration and Corporate Communications;
- ii. Coordinate human resource training and development programmes;
- iii. Oversee development and implementation of performance management system;
- iv. Ensure compliance with Human Resource and Administration statutory and regulatory requirements;
- v. Coordinate and oversee the implementation of the recommendation of work environment surveys;
- vi. Provide systems and operational procedures including Financial management information, internal controls and accounting;
- vii. Manage and control the Institute's finances; and advice Chief Executive Officer appropriately;
- viii. Participate in development and implementation of the Institute's short- and long-term operation plans;
- ix. Ensure compliance with internal and external reporting requirements including accurate production of financial and non-financial data;
- x. Plan and ensure efficient and effective use of the Institute's finances;
- xi. Oversee development and implementation of finance and accounts policies, strategies, standards and procedures;
- xii. Formulate the financial policy of the Institute to ensure optimal utilization of funds, and rational potential uses of those funds against the cost of alternative potential sources;
- xiii. Maintain and constantly review the Institute's revenue and expenditure streams;
- xiv. Prepare timely and accurate financial reports in compliance with the law and statutory and regulatory requirements;
- xv. Monitor creditors and ensure that payments are processed in good time;
- xvi. Ensure financial records are kept according to laid down financial policies and standards;
- xvii. Ensure timely submission of statutory reports to the relevant authorities;
- xviii. Oversee management of outsourced administrative services;
- xix. Coordinate provision of ICT services;
- xx. Coordinate Corporate Communication services and Customer Care;
- xxi. Ensure effective branding and visibility of the Institute;
- xxii. Coordinate the Institutes Social Responsibilities (CSR) of the Institute;
- xxiii. Oversee library services;
- xxiv. Oversee the records management;
- xxv. Implement the Board's strategic objectives on Human Resource Management and Administration;

- xxvi. Develop and manage staff welfare schemes;
- xxvii. Establish and maintain a catalogue of all KIPRE assets and properties;
- xxviii. Advise the Institute on all Information Communication Technology matters;
- xxix. Formulate, implement and maintain information technology policies, procedures and systems;
- xxx. Provide strategic leadership, advice and direction in the areas of Corporate Communication, Customer Care, Media Relations and Management, Crisis Communication, Customer Service and Experience, Service delivery, CSR among others; and
- xxxi. Provide advisory and support to other Directorate/Divisions/Sections on development and implementation of communication programmes.

c) Staff Establishment

In order to execute the above functions, the Office of the director will be staffed as follows:

Table 23: Establishment for Office of the Director, Corporate Services Directorate

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director, Corporate Services	2	1	
2.	Assistant Office Administrator/ Senior	9/8	1	
	Total		2	

The Directorate will be organized into four (4) Divisions

- (i) Human Resource and Administration Division;
- (ii) Finance and Accounts Division;
- (iii) Corporate Communication Division; and
- (iv) Information Communication Technology Division.

3.8.1 Human Resource and Administration Division

a) Rationale

The division is established to manage Human Resource and administration functions under the Human Resource management professionals Act No.52 of 2012, Employment Act Cap 226 and the Kenya Gazette Supplement No.169.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement, monitor and review human resource management and Administration policies, procedures, systems and strategies.
- (ii) Develop and implement capacity building programmes and strategies;
- (iii) Formulate and implement performance management systems;
- (iv) Initiate the development and implementation of a reward, compensation and benefit scheme;
- (v) Manage and administer staff welfare programmes, employee relations and staff medical scheme
- (vi) Undertake Human Resource management surveys on working environment;
- (vii) Manage the Human Resource and Administration records of the Institute;
- (viii) Provide advice on matters relating to human resource management and Administration;
- (ix) Coordinate human resource and administration planning;
- (x) Manage staff recruitment, selection, induction, placement, promotions and retention.
- (xi) Manage staff disciplinary processes and grievances;
- (xii) Administer employment contracts, pensions and gratuities;
- (xiii) Manage human resource information systems and skills inventory;
- (xiv) Coordinate mainstreaming of gender, HIV & AIDS and disabilities;
- (xv) Promote Public Service values and Principles;
- (xvi) Enhance employee experience through provision of suitable facilities that are fit-for purpose, optimal, sustainable, in good condition and available for use.
- (xvii) Provide support services during occupation of premises including routine maintenance, redecoration, workplace safety, furnishing, equipping, housekeeping, courier, telephony, beverages amongst others.
- (xviii) Maintain all Institute's premises, vehicles, parking slots, licenses, and transport arrangement for all functions and activities;
- (xix) Coordinate provision of office accommodation and equipment;
- (xx) Facilitate meetings, conferences and other special events.
- (xxi) Carry out ground maintenance and custodial services.
- (xxii) Coordinate provision of Security services and ensure safety of persons, property and the work-place environment.

c) Staff Establishment

In order to perform the above functions, the Human Resource and Administration Division will be staffed as follows:

Table 24: Establishment for the Human Resource and Administration Division

S/ N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director , Human Resource and Administration	3	1	
	Sub Total		1	
	Human Resource Management Division			
1.	Assistant Director, Human Resource Management	4	1	
2.	Principal Human Resource Officer	5		
3.	Human Resource Officer/Senior	7/6	1	
4.	Principal Human Resource Assistant	7	1	
5.	Human Resource Management Assistant / Senior	9/8		
	Sub Total		3	
	Administration Section			
1.	Assistant Director, Administration	4	1	
2.	Principal Administrative Officer	5		
3.	Administrative Officer / Senior	7/6	1	
4.	Principal Administrative Assistant	7	2	
5.	Administrative Assistant / Senior	9/8		
6.	Driver / Senior	11/10	4	
7.	Principal Technician	7	1	Electrician
8.	Technician / Senior	9/8		
9.	Principal Craftsman	9	2	Welder, Carpenter, Plumber and Mason
10.	Craftsman/ Senior	11/10		
11.	Principal Artisan	10	2	
12.	Artisan / Senior	12/11		
13.	Office Assistant / Senior	12/11	3	
14.	Principal Security Assistant	7	1	To be deployed from National Police Service
15.	Security Assistant / Senior	9/8	3	
	Sub Total		20	
	Total		24	

3.8.2 Finance and Accounts Division

a) Rationale

This Division is responsible for development and implementation of accounting and financial management systems that ensure adherence to planned and approved budgets and keeping books of accounts relating to the income and expenditure as well as assets and liabilities of the Institute.

b) Functions:

The functions of Division are to: -

- (i) Formulate, Implement and review Finance & Accounts policies, strategies and guidelines
- (ii) Provide Systems and operational procedures including financial management information, internal controls and accounting;
- (iii) Manage and control the Institute's finances; and advice Chief Executive Officer appropriately;
- (iv) Participate in development and implementation of the Institute's short and long-term operation plans;
- (v) Ensure compliance with internal and external reporting requirements including accurate production of financial and non-financial data;
- (vi) Plan and ensure efficient and effective use of the Institute's finances;
- (vii) Analyze objectively the financial position and financial problems
- (viii) Oversee development and implementation of finance and accounts policies, strategies, standards and procedures;
- (ix) Formulate the financial policy of the Institute to ensure optimal utilization of funds, and rational potential uses of those funds against the cost of alternative potential sources;
- (x) Maintain and constantly review the Institute's revenue and expenditure streams;
- (xi) Prepare timely and accurate financial reports in compliance with the law and statutory and regulatory requirements;
- (xii) Monitor creditors and ensure that payments are processed in good time;
- (xiii) Ensure financial records are kept according to laid down financial policies and standards;
- (xiv) Manage the Institute's cash flow and reconcile cash books and bank balances;
- (xv) Handle Institute tax matters
- (xvi) Ensure timely submission of statutory reports to the relevant authorities;

c) Staff Establishment

In order to perform the above functions, the Finance and Accounts Division will be staffed as follows:

Table 25: Staff Establishment for the Finance and Accounts Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Finance and Accounts	3	1	
	Sub Total		1	
	Finance Section			
1.	Assistant Director, Finance	4	1	
2.	Principal Accountant	5		
3.	Accountant / Senior	7/6	1	
	Sub Total		2	
	Accounts Section			
1.	Assistant Director, Accounts	4	1	
2.	Principal Accountant	5		
3.	Accountant / Senior	7/6	2	
4.	Principal Accounts Assistant	7		
5.	Accounts Assistant / Senior	9/8	1	
	Sub Total		4	
	Total		7	

3.8.3 Corporate Communication Division

a) Rationale

The Division is responsible for effective and efficient coordinating of all Communications related activities including, public relations, digital communications, and internal communications, sponsorships, events, brand and reputation management in the Institute. These activities are anchored in Media Council Act, 2013; The Kenya Information and Communications (Amendment) Act, 2013 and CAP 411A of Kenya Information and Communications ACT (2012).

b) Functions

The functions of the Division are to:

- (i) Formulate, implement, monitor and review corporate communication and customer care policies, procedures, programs and strategies;
- (ii) Advice in the areas of Corporate Communication, Customer Care, Media Relations and Management, Crisis Communication, Customer Service and Experience, Service delivery, Corporate Social Responsibility (CSR);
- (iii) Publish periodicals and ad hoc magazines and newsletters;
- (iv) Promote and facilitate research in Corporate Communication, Brand Communication and innovative customer service initiatives to keep abreast with emerging customer needs and expectations;
- (v) Coordinate the protocol function;
- (vi) Coordinate the development, implementation and review of the Institute's service charter to inform delivery of quality service and enhanced customer experience;
- (vii) Handle customer feedback including complaints.
- (viii) Coordinate stakeholder relations and engagements through scheduled forums, front office customer care and social media;
- (ix) Provide advisory and support to other Directorates/ Divisions/ Sections on development and implementation of communication programmes;
- (x) Coordinate the preparation of official speeches for the Institute;
- (xi) Manage Corporate brand and reputation of the Institute;
- (xii) Keep custody of media equipment and media related materials;
- (xiii) Manage media relations;
- (xiv) Develop, review and transmit print, electronic and digital media;
- (xv) Conceptualize, design and coordinate the execution and management of all Institute events and fora for brand visibility;

- (xvi) Design, develop and manage the Institute's media, brand and publicity campaigns across various platforms and media;
- (xvii) Coordinate the development and implementation of the Corporate Social Responsibility Policy and programs;
- (xviii) Oversee design, development, production and dissemination of Information Education and Communication (IEC) materials.
- (xix) Liaise with Research Directorate on regular research and surveys in Customer experience & brand communication;
- (xx) Coordinate the review and update of the Institute's website and social media platforms;
- (xxi) Handle inquiries from customers and another stakeholder;
- (xxii) Maintain telephone switchboard and its operations;

c) Staff Establishment

In order to perform the above functions, the Corporate Communication Division will be staffed as follows:

Table 27: Staff Establishment for the Corporate Communication Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director, Corporate Communication	3	1	
2.	Assistant Director, Corporate Communication	4	1	
3.	Principal Corporate Communications Officer	5		
4.	Corporate Communications Officer / Senior	7/6	1	
5.	Principal Customer Care Assistant	7	1	
6.	Customer Care Assistant / Senior	9/8	4	
	Total		8	

3.8.4 Information Communication Technology Division

a) Rationale

The Division is anchored in the national ICT Policy based on the Economic Recovery Strategy for Wealth and Employment Creation (2003-2007) and ensures that the Institute leverages on Information Technology to deliver its mandate.

b) Functions

The functions of the Division are to: -

- (i) Formulate, implement and review information communication technology policies, strategies, procedures, standards and guidelines;
- (ii) Advise the Institute on matters Information Communication Technology;
- (iii) Ensure compliance with all statutory and regulatory government targets in respect of ICT;
- (iv) Maintain, monitor and update ICT infrastructures in the Institute;
- (v) Spearhead the digitization of Institutes records;
- (vi) Review business user requirements to automate the business operations and improving the systems;
- (vii) Ensure timely backup of Institutes information and records;
- (viii) Develop technological solutions and seek partnerships with relevant stakeholders for integration and implementation;
- (ix) Plan, develop, review and implement information communication technology corporate disaster recovery and business continuity strategy;
- (x) Provide specifications and standards in the procurement of all information technology hardware, software and services;
- (xi) Provide technical support services to Information Communication Technology users and train them to acquire skills needed to implement computer- based information systems;
- (xii) Ensure management, protection and security of data;
- (xiii) Maintain and update information communication technology hardware and software;

c) Staff Establishment

In order to perform the above functions, the Information Communications Technology Division will be staffed as follows:

Table 26: Establishment for the Information Communications Technology Division

S/N	Designation	Grade KIP	Approved	Remarks
1.	Deputy Director , Information Communication Technology	3	1	
2.	Assistant Director, ICT	4	1	
3.	Principal Information Communications Technology Officer	5		
4.	Information Communications Technology Officer / Senior	7/6	2	
5.	Principal Assistant Information Communication Technology Officer	7	1	
6.	Assistant Information Communications Technology Officer / Senior	9/8		
	Total		5	

3.9 INTERNAL AUDIT & RISK ASSURANCE DIRECTORATE

a) Rationale

The Directorate is responsible to the Audit and Risk Management Committee of the Board and administratively to the Chief Executive officer for providing assurance to the Board of Directors that internal processes of management, execution of mandate, risk management, governance structures and inherent controls are being implemented in accordance with existing legal, Statutory and professional requirement

b) Functions

The functions of the Directorate are to: -

- (i) Formulate, Implement and Review internal audit & Risk Assurance policies, strategies and plans;
- (ii) Provide advisory and consultancy services to the board and management on operations of the Institute.
- (iii) Provide secretariat services to the Board Audit and Risk Assurance Committee
- (iv) Develop, implement, monitor and review Board Audit Committee Charters.

- (v) Advise the audit committee and management on emerging issues in internal auditing
- (vi) Provide capacity building including developing curriculum, training materials and undertake training for audit committees
- (vii) Examine and make recommendation on budget estimates of the Institute as guided by PFM Act through the Accounting officer.
- (viii) Prepare and implement a risk based Internal Audit Annual Work Plan.
- (ix) Report audit observations and recommendations to the Board;
- (x) Conduct special assignments as requested by the management and the board from time to time.
- (xi) Provide assurance that established processes and systems enable compliance with the policies, procedures, laws, and regulations that could significantly impact the Institute.
- (xii) Assess, report and make recommendations for improving the governance process of the Institute
- (xiii) Evaluate the effectiveness and contribute to the improvement of risk management processes of the Institute
- (xiv) Assist the Institute in maintaining effective controls by evaluating their effectiveness and efficiency and by promoting continuous improvement
- (xv) undertake follow-ups on the management actions on internal audit recommendations;
- (xvi) Follow up on the Board resolutions on audit and risk assurance matters;
- (xvii) Follow up on management resolutions of audit queries from external auditors and other agencies.
- (xviii) Support external audit and investigating agencies;
- (xix) Review and evaluate budgetary performance, financial management, transparency and accountability mechanisms
- (xx) Identify gaps in the management of risk and recommend measures to mitigate such gaps;
- (xxi) Make recommendations on new/emerging risks;

c) Staff Establishment

In order to perform the above functions, the Internal Audit and Risk Assurance directorate will be staffed as follows.

Table 4: Staff Establishment for the Internal Audit & Risk Assurance directorate

S/N	Designation	Grade KIP	Approved	Remarks
1.	Director, Internal Audit & Risk Assurance	2	1	
2.	Deputy Director, Internal Audit & Risk Assurance	3	1	
3.	Assistant Director, Internal Audit & Risk Assurance	4		
4.	Principal Auditor	5	1	
5.	Internal Auditor / Senior	7/6		
	Total		3	

3.10 INSTITUTIONAL SCIENTIFIC & ETHICAL REVIEW COMMITTEE (ISERC)

a) Rationale

ISERC is registered with National Commission for Science and Technology and Innovation and submits annual reports of all activities, upon which it receives renewal to carry on activities.

b) Functions

The functions of the Committee are to:-

- (i) Ensure adherence to standards for scientific conduct and research ethics best practices among scientists with ISERC-approved.
- (ii) Review and approval new research protocols.
- (iii) Monitor ISERC-approved ongoing research protocols to ensure that sound scientific and ethical principles are adhered to in the conduct of research.
- (iv) Provide and facilitate training in research methodology and ethics towards building capacity for researchers and committee members.
- (v) Support the improvement of health by promoting best practices in research conduct and ethics.
- (vi) Initiate and support research in bio-medical ethics.
- (vii) Serves as a resource centre for researchers and committee members on matters concerning research ethics.

- (viii) Review, at least semi-annually, the institution's program for the humane care and use of animal and Inspect at least semi-annually, the institution's animal facilities (including satellite facilities).
- (ix) Prepare reports to the Institutional Official (IO) of the IACUC evaluations.
- (x) Review animal welfare concerns.
- (xi) Make recommendations to the IO on any aspect of the animal program, facilities, or personnel training.
- (xii) Review and approve, those components of PHS conducted or supported activities related to the care and use of animals.
- (xiii) Review and approve, proposed significant changes to the use of animals in ongoing activities; and be authorized to suspend an activity involving animals.
- (xiv) Provide oversight on review and approval of proposed animal use (protocol review) and of proposed significant changes to animal use;
- (xv) Regular inspection of facilities and animal use areas; regular review of the Program; ongoing assessment of animal care and use; and establishment of a mechanism for receipt and review of concerns involving the care and use of animals at the institution.
- (xvi) The committee must meet as often as necessary to fulfil its responsibilities, and records of committee meetings and results of deliberations should be maintained;
- (xvii) Program review and facilities inspections.

c) Staff Establishment

Institutional Scientific & Ethical Review Committee (ISERC) will draw members from various research divisions and its secretariat from ethics and welfare divisions

3.11 SUMMARY TABLE OF KIPRE STAFF ESTABLISHMENT

S/N	Designation	Grade KIP	Approved staffing
OFFICE OF THE DIRECTOR GENERAL/ CEO			
1.	Director General / CEO	1	1
2.	Technical Assistant	*	*
3.	Principal Office Administrator	5	1
4.	Office Administrator/ Senior	7/6	
5.	Principal Driver	9	1
6.	Driver/Senior	11/10	
7.	Principal Office Assistant	10	1
8.	Office Assistant/Senior	12/11	
Sub Total			4
CORPORATION SECRETARY AND DIRECTOR LEGAL SERVICES DIRECTORATE			
1.	Corporation Secretary and Director Legal Services	2	1
2.	Deputy Director, Legal Services	3	1
3.	Assistant Director	4	
4.	Principal Legal Officer	5	
5.	Legal Officer/Senior	7/6	
6.	Principal Assistant Legal Officer	7	1
7.	Assistant Legal Officer / Senior	9/8	
8.	Assistant Office Administrator/ Senior	9/8	1
Sub Total			4
RESEARCH AND PRODUCT DEVELOPMENT DIRECTORATE			
1.	Director, Research and Product Development	2	1
2.	Chief Research Scientist	2	1
3.	Assistant Office Administrator/ Senior	9/8	1
4.	Driver / Senior	11/10	1
5.	Office Assistant / Senior	12/11	1
Sub Total			5
INFECTIOUS DISEASES AND ONE HEALTH DIVISION			
1.	Deputy Director, Infectious Diseases and One Health	3	1
2.	Senior Principal, Research Scientist	3	1
Sub Total			2
VIROLOGY SECTION			
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2

5.	Principal Laboratory Technician	7	2

3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
KENYA SNAKEBITE RESEARCH AND INTERVENTION DIVISION			
1.	Deputy Director, Kenya Snakebite Research and Intervention	3	1
2.	Senior Principal Research Scientist	3	1
	Sub Total		2

	ANTIVENOM (BIOLOGICS) QUALITY CONTROL, DEVELOPMENT AND PRODUCTION SECTION		
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
	SNAKEBITE EPIDEMIOLOGY, PUBLIC HEALTH, AND COMMUNITY ENGAGEMENT SECTION		
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
	SNAKEBITE CLINICAL SCIENCES SECTION		
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
7.	Principal Animal Health Technician	7	2
8.	Animal Health Technician / Senior	9/8	
9.	Principal Animal Health Assistant	10	2
10.	Animal Health Assistant / Senior	12/11	
	Sub Total		12
	NON-COMMUNICABLE DISEASES DIVISION		
1.	Deputy Director, Non-Communicable Diseases	3	1
2.	Senior Principal Research Scientist	3	1
	Sub Total		2
	NEUROSCIENCES SECTION		
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2

6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
CANCER, GENETIC AND METABOLIC DISEASES SECTION			
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
CHRONIC LUNG DISEASES SECTION			
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
CARDIOVASCULAR, REGENERATIVE AND SPORTS SCIENCES SECTION			
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
4.	Assistant Research Scientist / Research Scientist	7/6	2
5.	Principal Laboratory Technician	7	2
6.	Laboratory Technician/Senior	9/8	
	Sub Total		8
EVOLUTIONARY ECOLOGY, CONSERVATION & ECOSYSTEM HEALTH DIVISION			
1.	Deputy Director, Evolutionary Ecology, Conservation & Ecosystem Health	3	1
2.	Senior Principal Research Scientist	3	1
	Sub Total		2
POPULATIONS & COMMUNITY ECOLOGY SECTION			
1.	Assistant Director, Research	4	1
2.	Principal Research Scientist	4	1
3.	Senior Research Scientist	5	2
