RESEARCH SCIENTISTS

Chief Research Scientist

Job Title	Chief Research Scientist
Grade	KIP 2
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	1) Research and Product Development 2) Animal Science, Welfare & Ethics 3) Capacity Building, Partnerships & Grants Management.
Division	N/A
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director General / Chief Executive Officer
Direct Reports	Senior Principal, Research Scientist
Indirect Reports	1) Principal Research Scientist 2) Senior Research Scientist 3) Research Scientist 4) Assistant Research Scientist
Job Purpose	
Responsible for conducting research and disseminating the research results through publications, conferences, workshops, seminars, and policy briefs; research fundraising; research capacity building; seeking new scientific knowledge and translating research into products/applications that address the core mandate of the Institution for the benefit of the country. Chief Research Scientists may be deployed to research centers and scientific programs, build Partnerships and Collaborations, Research Regulations, Biosafety, Biosecurity and Production, and coordination of pre-clinical studies using non-human primates and other experimental animals and clinical, epidemiological and public health studies in the country.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Spearhead and coordinate formulation, implementation and review of policies, strategies, and guidelines on all Biomedical and Preclinical Research matters; 2) Overseeing formulation, implementation, and review of strategy on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;	

- 3) Coordinate formulation, implementation and review of policies, strategies and guidelines on animals' sciences, breeding, welfare, and ethics;
- 4) Coordinate formulation, implementation and review of policies, strategies, conservation action plans, and management guidelines on endangered species population recovery and problem primate species.
- 5) Spearhead development and implementation of ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare.
- 6) Spearhead formulation, implementation and review of policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- 7) Coordinate, formulate, implement, and review policies, strategies and guidelines on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management;
- 8) Coordinate development of framework for engagements on Incubation and commercialization of products
- 9) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 10) Spearhead formulation, implementation and review of the Directorate's annual work plans, budgets and procurement and asset disposal plans in line with the Council's performance targets and strategic plan;
- 11) Coordinate implementation of a robust performance management system within the directorate through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 12) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the directorate;
- 13) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the directorate;
- 14) Foster a corporate culture that promotes ethical practices and good citizenship within the directorate;
- 15) Provide leadership in execution of risk management policy and strategies that ensure the directorate has a robust system and processes of accountability, risk management, internal controls, business continuity and succession management;
- 16) Provide leadership, supervision, coaching, mentoring, training and development of the directorate staff to ensure an effective and motivated team.

II. Operational Responsibilities / Tasks

- 1) Coordinate the day-to-day administrative and operational functions of the directorate;
- 2) Coordinate development, implementation and review of the directorate's annual budgets, work plans and procurement and assets disposal plan in line with the Strategic plan;

Research and Product Development

- 1) Oversee and guide development of early warning systems for emerging and re-emerging diseases;
- 2) Oversee development and implementation of laboratory biosafety and biosecurity plans to manage the identified risks with respect to fieldwork and lab-based activities at the Institute;
- 3) Oversee and coordinate surveillance and monitoring of zoonotic diseases, including those that may pose a threat to human health by monitoring animal and environment to identify and track disease outbreaks;
- 4) Coordinate and supervise development of new diagnostic tests and tools and conduct research to improve diagnostics for infectious diseases and allowing platforms for health information exchange, streamline diagnostic workflows and improve access to health care.
- 5) Spearhead pre-clinical and clinical studies to evaluate the safety and efficacy of bacteriophage (phage) therapy in different infection contexts and patient populations.
- 6) Coordinate and guide on Antimicrobial Resistance (AMR) surveillance necessary for national advocacy on antimicrobial use and stewardship.
- 7) Oversee and guide studies on non-human primate conservation biology and primatology;
- 8) Coordinate the establishment and maintenance of a national non-human primate database on census, research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases;
- 9) Spearhead research on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management;
- 10) Coordinate collection and management of sub-national and national data and statistics on snakebite trends, patterns, and distribution to guide decision making processes;
- 11) Oversee snakebite advocacy and social mobilization activities including behavioral change components;
- 12) Supervise preclinical efficacy and safety tests of new antivenoms and those available in the market, and other biologics such as tetanus and rabies vaccines;
- 13) Coordinate basic and pre-clinical research on reproductive health, infectious and non-communicable diseases using non-human primates;
- 14) Oversee development and characterization for both non-human primate and other experimental animal models for priority diseases in Kenya;
- 15) Spearhead research fundraising activities;
- 16) Supervise dissemination of scientific findings through publications, conferences, seminars and workshops.
- 17) Oversee research on health technologies, drug & vaccine discovery and development and pre-clinical pharmacology & medicinal chemistry.
- 18) Supervise innovative drug delivery and molecular design strategies for targeting infectious and noninfectious diseases;

- 19) Oversee development and characterization of non-human primate as models for use in drug discovery and development, delivery, and toxicology in Kenya;
- 20) Oversee preclinical validation of traditional knowledge-based products with claimed healing for efficacy using monkeys as models.
- 21) Supervise field research on primatology and wildlife ecology with focus on species behavioral ecology (Nutrition, Sociobiology & endocrinology), evolution, conservation and management;
- 22) Guide on establishment and maintenance of a national non-human primate database on their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- 23) Oversee in-situ health monitoring of primate populations and other wildlife and support the zoonosis surveillance activities for purposes of developing early warning systems and preparedness to respond to potential disease outbreaks and threats to endemic and critically endangered primate and other species;
- 24) Play the national advisory role on matters of primate conservation & management including mitigation of human-nonhuman primate conflicts or interaction threats;
- 25) Coordinate studies on impacts of climate change on biodiversity (including primates and other species) and local communities and develop and implement sustainable conservation initiatives or climate actions to promote climate change response in terms of mitigation, adaptation and resilience;
- 26) Participate in development, implementation and review of policies, processes and guidelines on innovation and incubation management.
- 27) Coordinate incubation and acceleration services to institute startups and spin-offs, including access to funding, mentorship, networking, and other support services.
- 28) Spearhead development, implementation and review of strategies for research and management of the reproductive health research programs, knowledge generation and capacity building programs;
- 29) Coordinate supervision of reproductive disease surveillance in Kenya to obtain data on the current trends of reproductive diseases and current intervention strategies;
- 30) Oversee the development and characterization of both non-human primate and other experimental animal models for infectious and for emerging and re-emerging diseases.
- 31) Spearhead research in non-communicable diseases for intervention and prevention strategies using non-human primates (NHPs) and other experimental models.
- 32) Support the development and implementation of strategies for the management and prevention of the non-communicable diseases, knowledge generation and capacity building programs;
- 33) Oversee laboratory quality assurance services;
- 34) Coordinate collection, analysis and interpretation of biological and health science data across multiple research entities in the institute.
- 35) Supervise the design of various new computational tools for bioinformatics and assemble and prepare data structures and determine an effective data analysis framework.

Animal Science, Welfare and Ethics

- 1) Provide scientific advice and guidance to researchers, veterinarians, and other stakeholders on animal related research, testing and breeding;
- 2) Spearhead proper compliance on animal related research, treatment, testing, husbandry, and breeding;
- 3) Oversee and regulate the acquisition and breeding of animals for research, testing and educational purposes;
- 4) Oversee management of animal colonies;
- 5) Oversee and ensure compliance with local, national and international regulation related to animal welfare and ethics;
- 6) Participate in the establishing ethical review boards and committees responsible for approving research protocols involving animals;
- 7) Provide advice on design and maintenance of animal facilities to meet national and international standards;
- 8) Oversee promotion of the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;
- 9) Spearhead identification of opportunities for innovation and improvement in ethical animal handling practices;
- 10) Coordinate and facilitate training and capacity building animals sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders;
- 11) Overseeing the maintenance and updating of animal health, research, breeding, welfare and ethics database;
- 12) Coordinate conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- 13) Overseeing collaborative and contract research on laboratory animals.
- 14) Undertaking collaborative and independent research on laboratory animal diseases, enrichment methods, and behavioral aspects under captive conditions.
- 15) Undertaking structured contract research and other services to external clients.
- 16) Ensuring the provision of the mandatory presence of a laboratory animal veterinarian in the IACUC.
- 17) Supervising the organization's compliance to national veterinary services statutory requirements, accreditation bodies and international guidelines e.g. Association of Assessment and Accreditation of Laboratory Animal Care (AAALAC), Office of Laboratory Animal Welfare (OLAW) etc.
- 18) Overseeing the development and operation of a National Laboratory Animal Breeding Program for NHPs and other lab animals that will ensure provision of comprehensive methods of uniform breeding conditions for laboratory animals.
- 19) Overseeing the provision of national regulatory and inspection in Laboratory animal facilities in country in collaboration with the Director of Veterinary Services.

- 20) Supervising the collaboration with field primatologists at KIPRE and Kenya Wildlife Services in capture and translocation of either endangered or problem NHPs for conservation, management, research and establishment of breeding colonies.

Capacity Building, Partnerships and Grants Management

- 1) Participate in the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 2) Coordinate the assessment and offering of training to scientists, researchers and healthcare professionals in the biomedical field.
- 3) Participate in ensuring the institution complies with all applicable laws, regulations, and funder requirements.
- 4) Coordinate development and submission of grant proposals, budgets, and reports to funding agencies, ensuring that all requirements are met and that the organization's interests are represented.
- 5) Participate in ensuring that grant-funded projects align with the organization's overall strategy.
- 6) Spearhead and guide the establishment of an innovation and incubation Centre linking research and industry in the health products value chain.
- 7) Spearhead execution of partnership and grant agreements.
- 8) Coordinate and guide establishment of an incubation Centre linking research and industry in the health products value chain;
- 9) Coordinate the monitoring of the performance of partnerships and grants.
- 10) Provide support and guidance to Institute's stakeholders on entrepreneurial skills and best practices, including business development, marketing, fundraising, and product development.
- 11) Negotiating licenses for clients' IP rights, drafting license agreements, and monitoring compliance with those agreements.
- 12) Guiding the entry of KIPRE into partnerships and collaborations with other similar institutions or professional organizations locally and internationally
- 13) Facilitating KIPRE in the development and submission of proposals.
- 14) Providing support and guidance to institute stakeholders on funding opportunities and grant applications, including identifying and pursuing grant opportunities, developing grant proposals, and managing grant project
- 15) Providing resource and knowledge management services including accessioning of all new books, classification and cataloging of the same and keeping custody of relevant literature, information, equipment and documentation for the institute.

Job Dimensions:

I. Financial Responsibility

- 1) Identifying funding opportunities and grant applications, including identifying and pursuing grant opportunities.

2) Development and submission of grant proposals. 3) Spearhead execution of partnership and grant agreements. 4) Managing grant project by ensuring that grant-funded projects align with the organization's overall strategy.
II. Responsibility for Physical Assets
Provide oversight for all the Institute's Physical Assets.
III. Decision Making / Job Influence
1) Strategic decisions; 2) Financial decisions; 3) Managerial decisions; 4) Analytical decisions; and 5) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution; 3) Bachelor's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution;
Professional Qualifications / Membership to professional bodies
1) Evidence of at least twenty (20) publications in refereed journals. 2) Attracted research Funding of not less than Kshs 80 million. 3) Leadership course lasting not less than four (4) weeks from a recognized institution. 3) Membership to a professional body and in good standing where applicable.

Previous relevant work experience required.

At least fifteen (15) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector

Functional Skills, Behavioral Competencies/Attributes:

- 1) Leadership skills.
- 2) Communication skills.
- 3) Mentorship Skills.
- 4) Problem solving.
- 5) Strategic thinking.
- 6) Conflict management.
- 7) Interpersonal skills.
- 8) Organizational skills.
- 9) Negotiation skills.
- 10) Team building

	Name	Signature	Date
Accounting Officer	Dr. Peter Gichuhi Mwethera, PhD, MBS		
Head of Human Resources	Patrick Kimathi Manene		

Senior Principal, Research Scientist

Job Title	Senior Principal, Research Scientist
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Deployed in: 1) Research and Product Development 2) Animal Science, Welfare & Ethics 3) Capacity Building, Partnerships & Grants Management.
Division	Various
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Chief Research Scientist
Direct Reports	Principal Research Scientist

Indirect Reports	1) Senior Research Scientist 2) Research Scientist 3) Assistant Research Scientist
Job Purpose	
Responsible for conducting research and disseminating the research results through publications, conferences, workshops, seminars, and policy briefs; research fundraising; research capacity building; seeking new scientific knowledge and translating research into products/applications that address the core mandate of the Institution for the benefit of the country. Senior Principle Research Scientists may be deployed to research centers and scientific programs, build Partnerships and Collaborations, Research Regulations, Biosafety, Biosecurity and Production, and coordination of pre-clinical studies using non-human primates and other experimental animals and clinical, epidemiological and public health studies in the country.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinate implementation and review of policies, strategies, and guidelines on all Biomedical and Preclinical Research matters; 2) Coordinate implementation, and review of strategy on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies; 3) Coordinate implementation and review of policies, strategies and guidelines on animals' sciences, breeding, welfare, and ethics; 4) Coordinate implementation of ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare. 5) Coordinate implementation and review of policies, strategies and guidelines on all capacity building, partnership and grants management matters; 6) Coordinate implementation of framework for engagements on Incubation and commercialization of products	
II. Operational Responsibilities / Tasks	
1) Coordination of day-to-day administrative and operational functions of the division ; 2) Oversee implementation and review of the Division's annual work plans, budgets and procurement and asset disposal plans in line with the Council's performance targets and strategic plan; 3) Oversee implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan; 4) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;	

- 5) Nurture competencies and promote a working environment that optimizes individual and team potential in the division;
- 6) Coordinate implementation of corruption prevention and mitigation strategies in the division;
- 7) Foster a corporate culture that promotes ethical practices and good citizenship within the division;
- 8) Coordinate execution of risk management policy and strategies that ensure the division has a robust system and processes of accountability, risk management, internal controls, business continuity and succession management;
- 9) Provide leadership, supervision, coaching, and mentoring of staff to ensure an effective and motivated team in the division.

Research and Product Development

- 1) Formulating, implementing, and reviewing policies, strategies and guidelines on all Biomedical and Preclinical Research matters;
- 2) Ensuring strategy implementation on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;
- 3) Implementing laboratory biosafety and biosecurity plans for identified risks with respect to fieldwork and lab-based activities at the Institute;
- 4) Coordinating the development of new diagnostic tests and tools and conduct research to improve diagnostics for infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 5) Coordinate research on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management;
- 6) Supervising and reviewing of research procedures and protocols in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 7) Supervising pre-clinical and clinical studies to evaluate the safety and efficacy of Research products for infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 8) Initiating research collaborations with national and international research partners on infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 9) Undertaking advocacy on priority Research areas including infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;

- 10) Developing and characterizing both non-human primate and other experimental animal models for priority diseases
- 11) Coordinating research in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 12) Supporting research fundraising activities in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 13) Disseminating of scientific findings through publications, conferences, seminars and workshops.
- 14) Coordinating research on drug & vaccine discovery, antivenom research & development, health technologies and development of health products
- 15) Undertaking preclinical & clinical validation of traditional knowledge-based natural products with claimed healing for efficacy using non-human primates and other experimental animals;
- 16) Coordinating conservation strategies to protect and conserve non-human primates, snakes and other priority conservation animals;
- 17) Coordinating establishment and maintenance of a national database on non-human primate, snakes and other priority conservation animals containing their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- 18) Undertaking studies on impacts of climate change on biodiversity (including non-human primates and other species), local communities and disease patterns and initiate mitigation strategies;
- 19) Coordinate incubation and acceleration services to institute startups and spinoffs, including access to funding, mentorship, networking, and other support services.
- 20) Coordinating laboratory quality assurance services;
- 21) Coordinating collection, analysis and interpretation of biological and health science data across multiple research entities in the institute;
- 22) Supporting the designing of new computational tools for bioinformatics;
- 23) Assembling and preparing data structures and data analysis frameworks.

Animal Science, Welfare and Ethics

- 1) Formulating, implementing and reviewing policies, strategies and guidelines on animals sciences, breeding, welfare and ethics;
- 2) Developing ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare;
- 3) Providing scientific advice and guidance to researchers, veterinarians and other stakeholders on animal related research, testing and breeding;
- 4) Ensuring proper compliance on animal related research, treatment, testing, husbandry and breeding

- 5) Overseeing and regulating the acquisition and breeding of animals for research, testing and educational purposes;
- 6) Overseeing management of animal colonies;
- 7) Ensuring compliance with local, national and international regulation related to animal welfare and ethics;
- 8) Guiding in establishing ethical review boards and committees responsible for approving research protocols involving animals;
- 9) Advising on design and maintenance of animal facilities to meet national and international standards;
- 10) Promoting the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;
- 11) Identifying opportunities for innovation and improvement in ethical animal handling practices;
- 12) Facilitating training and capacity building animals sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders;
- 13) Ensuring the maintenance of animal health, research, breeding, welfare and ethics database;
- 14) Organizing conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- 15) Overseeing collaborative and contract research on laboratory animals
- 16) Undertaking collaborative and independent research on laboratory animal diseases, enrichment methods, and behavioral aspects under captive conditions.
- 17) Undertaking structured contract research and other services to external clients.
- 18) Ensuring the provision of the mandatory presence of a laboratory animal veterinarian in the IACUC.
- 19) Supervising the organization's compliance to national veterinary services statutory requirements, accreditation bodies and international guidelines e.g. Association of Assessment and Accreditation of Laboratory Animal Care (AAALAC), Office of Laboratory Animal Welfare (OLAW) etc.
- 20) Supervising the training and capacity building in animal welfare, ethical use and care of non-human primates and other experimental animals in laboratory settings.
- 21) Overseeing the development and operation of a National Laboratory Animal Breeding Program for NHPs and other lab animals that will ensure provision of comprehensive methods of uniform breeding conditions for laboratory animals.
- 22) Overseeing the provision of national regulatory and inspection in Laboratory animal facilities in country in collaboration with the Director of Veterinary Services.
- 23) Supervising the collaboration with field primatologists at KIPRE and Kenya Wildlife Services in capture and translocation of either endangered or problem NHPs for conservation, management, research and establishment of breeding colonies.

Capacity Building, Partnerships and Grants Management

- 1) Formulating, implementing, and reviewing policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- 2) Developing framework for engagements on incubation and commercialization of products;
- 3) Coordinating development and update of an Institutional database on the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 4) Overseeing development of training and capacity building materials for researchers and other stakeholders;
- 5) Supporting the management of the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 6) Enabling training and capacity building to researchers and other staff in the biomedical field;
- 7) Ensuring the institution complies with all applicable laws and regulations on good financial grants management and funder requirements;
- 8) Coordinating the development and submission of grant proposals, budgets, and reports to funding agencies;
- 9) Ensuring that grant-funded projects align with the organization's overall strategy;
- 10) Guiding on the establishment of an innovation and incubation Centre linking research and industry in the health products value chain;
- 11) Enabling partnerships and monitoring the performance of partnerships and grants;
- 12) Ensuring development of technical information for product marketing;
- 13) Overseeing product training to stakeholders;
- 14) Negotiating licenses on institutional Intellectual property rights, drafting license agreements, and monitoring compliance with those agreements;
- 15) Providing resource and knowledge management services including accessioning of all new books, classification and cataloging of the same and keeping custody of relevant literature, information, equipment and documentation for the institute.

Job Dimensions:

I. Financial Responsibility

- 1) Identifying funding opportunities and grant applications, including identifying and pursuing grant opportunities.
- 2) Development and submission of grant proposals, Spearhead execution of partnership and grant agreements.
- 3) Managing grant project by ensuring that grant-funded projects align with the organization's overall strategy.

II. Responsibility for Physical Assets

Provide oversight for all the Institute's Physical Assets.

III. Decision Making / Job Influence
1) Strategic decisions; 2) Financial decisions; 3) Managerial decisions; 4) Analytical decisions; and 5) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 3) Bachelor's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution.
Professional Qualifications / Membership to professional bodies
1) Evidence of at least fifteen (15) publications in refereed journals. 2) Attracted research Funding of not less than Kshs 50 million. 3) Management course lasting not less than four (4) weeks from a recognized institution. 4) Membership to a professional body and in good standing where applicable.

- 2) Undertaking strategy on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;
- 3) Implementing laboratory biosafety and biosecurity plans for identified risks with respect to fieldwork and lab-based activities at the Institute;
- 4) Implementing pre-clinical and clinical studies to evaluate the safety and efficacy of Research products for infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 5) Supporting research collaborations with national and international research partners on infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 6) Implementing research on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management;
- 7) Performing advocacy on priority research areas including infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 8) Developing and characterizing both non-human primate and other experimental animal models for priority diseases

- 9) Implementing research in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 10) Developing and reviewing of research procedures and protocols in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 11) Disseminating of scientific findings through publications, conferences, seminars and workshops.
- 12) Performing research on drug & vaccine discovery, antivenom research & development, traditional medicine/natural products, health technologies and development of health products
- 13) Participating in conservation strategies to protect and conserve non-human primates, snakes and other priority conservation animals;
- 14) Undertaking maintenance of a national database on non-human primate, snakes and other priority conservation animals containing their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- 15) Performing studies on impacts of climate change on biodiversity (including non-human primates and other species), local communities and disease patterns and initiate mitigation strategies;
- 16) Undertaking laboratory quality assurance services;
- 17) Collecting, analyzing and interpreting of biological and health science data across multiple research entities in the institute;
- 18) Designing of new computational tools for bioinformatics;
- 19) Assembling and preparing data structures and data analysis frameworks.

Animal Science, Welfare and Ethics

- 1) Implementing and reviewing policies, strategies and guidelines on animals' sciences, breeding, welfare and ethics;
- 2) Implementing ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare;
- 3) Supporting compliance with the standards and guidelines for animal related research, treatment, testing and breeding;
- 4) Supporting the acquisition and breeding of animals for research, testing and educational purposes;
- 5) Performing duties on proper compliance with local, national and international regulation related to animal welfare and ethics;
- 6) Providing Secretariat services to ethical review boards / committees;
- 7) Designing and assessing animal facilities to meet national and international standards;
- 8) Undertaking the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;

- 9) Supporting innovation and improvement in ethical animal handling practices;
- 10) Undertaking training and capacity building animals sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders;
- 11) Undertaking the maintenance of animal health, research, breeding, welfare and ethics database;
- 12) Participating in organization of conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- 13) Undertaking collaborative and contract research on laboratory animals;

Capacity Building, Partnerships and Grants Management

- 1) Implementing and reviewing policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- 2) Developing frameworks for engagements on incubation and commercialization of products;
- 3) Supporting development of an Institutional database on the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 4) Supporting preparation of training and capacity building materials for researchers and other stakeholders;
- 5) Establishing Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 6) Undertaking training and capacity building to researchers and other staff in the biomedical field;
- 7) Supporting institutional compliance with all applicable laws and regulations on good financial grants management and funder requirements;
- 8) Assisting in the development and submission of grant proposals, budgets, and reports to funding agencies;
- 9) Undertaking duties on the establishment of an innovation and incubation centre linking research and industry in the health products value chain;
- 10) Undertaking duties on the development of partnerships and monitoring the performance of partnerships and grants;
- 11) Developing technical information for product marketing;
- 12) Undertaking product training to stakeholders;
- 13) Assisting in negotiating licenses on institutional Intellectual property rights, drafting license agreements, and monitoring compliance with those agreements;
- 14) Assisting in providing resource and knowledge management services including accessioning of all new books, classification and cataloging of the same and keeping custody of relevant literature, information, equipment and documentation for the institute.

Job Dimensions:

I. Financial Responsibility
N/A
II. Responsibility for Physical Assets
ICT equipment; Office furniture and equipment;
III. Decision Making / Job Influence
1) Technical decisions; 2) Analytical decisions; and 3) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 2) Bachelor's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution.
Professional Qualifications / Membership to professional bodies
1) Management course lasting not less than four (4) weeks from a recognized institution. 2) Membership to a professional body and in good standing where applicable.
Previous relevant work experience required.
At least ten (10) years relevant work experience, four (4) years of which must have been in supervisory role in the Public or Private sector
Functional Skills, Behavioral Competencies/Attributes:
1) Strategic and Analytical skills 2) Communication and reporting skills 3) Proposal writing skills. 4) Leadership skills 5) Mentorship, coaching and ability to lead teams.

- 6) Research fundraising skills.
- 7) Interpersonal and negotiation skills
- 8) Team player

Research Scientist

Job Title	Research Scientist
Grade	KIP 6
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Deployed in: 1) Research and Product Development 2) Animal Science, Welfare & Ethics 3) Capacity Building, Partnerships & Grants Management.
Division	Various
Section / Unit	Various
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Senior Research Scientist
Direct Reports	Assistant Research Scientist
Indirect Reports	N/A
Job Purpose	
Responsible for conducting research and disseminating the research results through publications, conferences, workshops, seminars, and policy briefs; research fundraising; research capacity building; seeking new scientific knowledge and translating research into products/applications that address the core mandate of the Institution for the benefit of the country. Research Scientists may be deployed to research centers and scientific programs, build Partnerships and Collaborations, Research Regulations, Biosafety, Biosecurity and Production, and coordination of pre-clinical studies using non-human primates and other experimental animals and clinical, epidemiological and public health studies in the country	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
N/A	
II. Operational Responsibilities / Tasks	
1) Participate in the implementation and review of the Division's annual work plans, budgets and procurement and asset disposal plans in line with the Council's performance targets and strategic plan;	

- 2) Participate in the implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 3) Participate in execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 4) Nurture competencies and promote a working environment that optimizes individual and team potential in the division;
- 5) Participate in implementation of corruption prevention and mitigation strategies in the division;
- 6) Foster a corporate culture that promotes ethical practices and good citizenship within the division;
- 7) Participate in execution of risk management policy and strategies that ensure the division has a robust system and processes of accountability, risk management, internal controls, business continuity and succession management;
- 8) Provide leadership, supervision, coaching, and mentoring of staff to ensure an effective and motivated team in the division.

Research and Product Development

- 1) Performing basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies;
- 2) Undertaking laboratory biosafety and biosecurity measures for identified risks with respect to fieldwork and lab-based activities at the Institute;
- 3) Undertaking pre-clinical and clinical studies to evaluate the safety and efficacy of Research products for infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 4) Undertaking advocacy on priority research areas including infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 5) Implementing research in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 6) Implementing research on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management;
- 7) Participating in development and review of research procedures and protocols in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;

- 8) Disseminating of scientific findings through publications, conferences, seminars and workshops.
- 9) Supporting research on drug & vaccine discovery, antivenom research & development, traditional medicine/natural products, health technologies and development of health products
- 10) Undertaking conservation strategies to protect and conserve non-human primates, snakes and other priority conservation animals;
- 11) Supporting the maintenance of a national database on non-human primate, snakes and other priority conservation animals containing their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- 12) Assisting in studies on impacts of climate change on biodiversity (including non-human primates and other species), local communities and disease patterns and initiate mitigation strategies;
- 13) Undertaking laboratory quality assurance services;
- 14) Collecting, analyzing and interpreting of biological and health science data across multiple research entities in the institute;
- 15) Supporting the designing of new computational tools for bioinformatics;
- 16) Assembling and preparing data structures and data analysis frameworks.

Animal Science, Welfare and Ethics

- 1) Implementing policies, strategies and guidelines on Veterinary care and use, Laboratory animal science (LAS), breeding, welfare and ethics which includes clinical, diagnostic, surgery and pathology, quarantine services to KIPRE Laboratory animals and the National Laboratory Animal Breeding Program;
- 2) Executing ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare
- 3) Ensuring compliance with the standards and guidelines for animal related research, treatment, testing and breeding by training and assisting Researchers in humane handling of laboratory animals, prescribing medications/and treatments, administering vaccinations to research animals;
- 4) Acquiring and breeding of animals for research, testing and educational purposes;
- 5) Reporting on compliance with local, national and international regulation related to animal welfare and ethics;
- 6) Providing Secretariat services to ethical review boards / committees;
- 7) Designing, assessing and maintaining animal facilities and infrastructure to meet national and international standards;
- 8) Undertaking environmental enrichment of animals e.g the use of Positive Reinforcement Techniques (PRT);
- 9) Handling animals during routine and experimental procedures;
- 10) Updating animal health, research, breeding, welfare, and ethics databases;

- 11) Participating in dissemination of research finding in conferences, seminars and workshops related to laboratory animals.

Capacity Building, Partnerships and Grants Management

- 1) Implementing and reviewing policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- 2) Participating in development of frameworks for engagements on incubation and commercialization of products;
- 3) Updating Institutional database on the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 4) Preparing training and capacity building materials for researchers and other stakeholders;
- 5) Participating in the development of grant proposals, budgets, and reports to funding agencies;
- 6) Monitoring the performance of partnerships and grants;
- 7) Developing technical information for product marketing;
- 8) Undertaking product training to stakeholders;

Job Dimensions:

I. Financial Responsibility

N/A

II. Responsibility for Physical Assets

ICT equipment; Office furniture and equipment;

III. Decision Making / Job Influence

LABORATORY TECHNICIANS

Principal Laboratory Technician

Job Title	Principal Laboratory Technician
Grade	KIP 7
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research & Product Development
Division	N/A
Section	Laboratory Services
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Assistant Director, Research – Laboratory Services
Direct Reports	Senior Laboratory Technician
Indirect Reports	Laboratory Technician
Job Purpose	
Responsible for Performing laboratory experiments; maintenance of laboratory records; archiving of experimental samples and specimens; assisting in field work; Laboratory quality assurance and control; and preparation of experimental laboratory reagents;	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Preparation and Implementing laboratory standards and procedures; 2) Supervising and guiding laboratory technicians, interns and students; 3) Designing and developing the necessary laboratory infrastructure needed for biobanking; 4) Ensuring clean and safe working environment to avoid contamination of final products; 5) Ensure compliance to regulatory requirements and licensure; and 6) Ensuring that all laboratory waste is disinfected and disposed appropriately to avoid environmental contamination.	
II. Operational Responsibilities / Tasks	
1) Collecting, receiving, processing and storing of sample to ensure integrity for future use; 2) Maintaining laboratory equipment for smooth running of the procedures; 3) Performing biobanking activities; 4) Preparing and storing laboratory reagents; 5) Maintain records of tests and samples;	

- 6) Supporting field research activities; and
- 7) Performing analytical and diagnostic procedures in the laboratory to contribute to efficiency in service delivery;

Job Dimensions:

I. Financial Responsibility

N/A

II. Responsibility for Physical Assets

Responsible for departmental physical assets i.e., office space, Laboratory Equipment, ICT equipment, Institute's assets and furniture.

III. Decision Making / Job Influence

- 1) Operational decision.
- 2) Analytical decisions.

IV. Working Conditions

The job requires office and frequent patrols both day and night within the Institute, exposing the job holder to security and health risks. The job holder is exposed to cold weather especially at night and risk of attack by criminals during routine patrols and investigations.

Job Competencies (Knowledge, Experience and Attributes / Skills).

Academic qualifications

Diploma in any of the following fields: Medical Laboratory Sciences, Laboratory Sciences, Laboratory Technology, Medical Laboratory Technology or any other equivalent qualification from a recognized Institution;

Professional Qualifications / Membership to professional bodies

- 1) Registration Certificate issued by the Kenya Medical Laboratory Technicians and Technologists Board (KMLTTB) where applicable;
- 2) Valid practicing license from Kenya Medical Laboratory Technicians and Technologists Board where applicable;

Previous relevant work experience required.

At least eight (8) years relevant work experience

Functional Skills, Behavioral Competencies/Attributes:

- 1) Analytical skills.
- 2) Interpersonal skills.
- 3) Problem solving skills.
- 4) Report writing skills.
- 5) Team building skills.
- 6) Computer Skills.

- 7) Communication Skills.
8) Time management.

Approvals:

ANIMAL HEALTH PERSONNEL SECTION

Principal Animal Health Technician

Job Title	Principal Animal Health Technician
Grade	KIP 7
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Animal Sciences, Welfare and Ethics Directorate
Division	National Laboratory Animal Breeding Division
Section	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Senior Animal Health Technician
Direct Reports	Animal Health Technician
Indirect Reports	Principal Animal Health Assistant
Job Purpose	
Responsible for performing daily husbandry, care, restraint and observation of laboratory animals in routine and experimental programs; provide technical assistance and laboratory animal welfare; support field related activities; and related duties as assigned by research scientists and veterinarians.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Liaising with the researchers regarding their animal research needs; 2) Managing the infrastructural, operational, facility management, maintenance, and logistics coordination of research facilitation at the established institutional field site. 3) In collaboration with research scientists support the field research station operations, logistical co-ordination of the implementation of field project activities at the site. 4) Providing the necessary basic needs for researchers at the field research station for smooth implementation of projects. 5) Supervising junior staff.	
II. Operational Responsibilities / Tasks	
1) Performing daily husbandry (watering, feeding etc), care, restraint, and observation of laboratory animals in routine and experimental programs, under supervision of a senior officer;	

- 2) Providing technical assistance in the clinical care of laboratory animals and collection of routine clinical and experimental data, under supervision of a senior officer;
- 3) Organizing and segregating animals according to sex and breeding needs;
- 4) Ensuring animal housing standards remain responsive to needs of the animals;
- 5) Maintaining and reporting the welfare of laboratory animals as per national and international standards;
- 6) Ensuring general cleanliness/sanitation of the animal houses/cages and surrounding environment;
- 7) Ensuring proper disposal of animal waste as per the waste management and disposal guidelines;
- 8) Ensuring proper transport and storage of laboratory animal samples and biobanking;
- 9) Maintaining an inventory of animal species;
- 10) Maintaining an inventory of animal feeds and other supplies for the animal house;
- 11) Supervises the organization and segregation of animals according to sex and breeding needs;
- 12) Ensuring proper breeding cycles of animals;
- 13) Making the animals available according to researchers' needs.

Job Dimensions:

I. Financial Responsibility

N/A

II. Responsibility for Physical Assets

Responsible for departmental physical assets i.e., office space, ICT equipment, Institute's assets and furniture.

III. Decision Making / Job Influence

- 1) Operational decision.
- 2) Analytical decisions.

IV. Working Conditions

The job requires office and frequent patrols both day and night within the Institute, exposing the job holder to security and health risks.

Job Competencies (Knowledge, Experience and Attributes / Skills).

Academic qualifications

- 1) Diploma in Animal Science, Animal Health, Animal Husbandry, Conservation Biology, Animal Ecology, Community Conservation, Biomedical research, environmental conservation or equivalent from a recognized Institution
- 2) K.C.S.E certificate or equivalent from a recognized Institution;

Professional Qualifications / Membership to professional bodies

Membership to Kenya Veterinary Board			
Previous relevant work experience required.			
At least eight (8) years of relevant work experience

Section	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Principal Animal Health Technician
Direct Reports	Animal Health Technician
Indirect Reports	Principal Animal Health Assistant
Job Purpose	
Responsible for performing daily husbandry, care, restraint and observation of laboratory animals in routine and experimental programs; provide technical assistance and laboratory animal welfare; support field related activities; and related duties as assigned by research scientists and veterinarians.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Liaising with the researchers regarding their animal research needs; 2) Managing the infrastructural, operational, facility management, maintenance, and logistics coordination of research facilitation at the established institutional field site. 3) In collaboration with research scientists support the field research station operations, logistical co-ordination of the implementation of field project activities at the site. 4) Providing the necessary basic needs for researchers at the field research station for smooth implementation of projects. Supervising junior staff	
II. Operational Responsibilities / Tasks	
1) Performing daily husbandry (watering, feeding etc), care, restraint, and observation of laboratory animals in routine and experimental programs, under supervision of a senior officer 2) Providing technical assistance in the clinical care of laboratory animals and collection of routine clinical and experimental data, under supervision of a senior officer;	

3) Organizing and segregating animals according to sex and breeding needs; 4) Assisting in ensuring animal housing standards remain responsive to needs of the animals; 5) Assisting in maintaining and reporting the welfare of laboratory animals as per national and international standards; 6) Ensuring proper transport and storage of laboratory animal samples and biobanking; 7) Ensuring general cleanliness/sanitation of the animal houses/cages and surrounding environment; 8) Ensuring proper disposal of animal waste as per the waste management and disposal guidelines; 9) Assisting in maintaining an inventory of animal species; 10) Assisting in maintaining an inventory of animal feeds and other supplies for the animal house; 11) Assisting in ensuring proper breeding cycles of animals; 12) Making the animals available according to researchers' needs.
Job Dimensions:
I. Financial Responsibility
N/A
II. Responsibility for Physical Assets
Responsible for departmental physical assets i.e., office space, ICT equipment, Institute's assets and furniture.
III. Decision Making / Job Influence
3) Operational decision. 4) Analytical decisions.
IV. Working Conditions
The job requires office and frequent patrols both day and night within the Institute, exposing the job holder to security and health risks.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Diploma in Animal Science, Animal Health, Animal Husbandry, Conservation Biology, Animal Ecology, Community Conservation, Biomedical research, environmental conservation or equivalent from a recognized Institution 2) K.C.S.E certificate or equivalent from a recognized Institution;
Professional Qualifications / Membership to professional bodies
Membership to Kenya Veterinary Board
Previous relevant work experience required.

At least four (4) years of relevant work experience

Functional Skills, Behavioral Competencies/Attributes:

- 1) Planning and supervisory skills
- 2) Analytical skills
- 3) Communication and reporting skills
- 4) Interpersonal skills
- 5) Team player
- 6) Mentorship skills

RESEARCH AND PRODUCT DEVELOPMENT DIRECTORATE

Director, Research and Product Development

Job Title	Director, Research and Product Development
Grade	KIP 2
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	N/A
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director General / Chief Executive Officer
Direct Reports	1) Deputy Director, Infectious Diseases and One Health 2) Deputy Director, Reproductive Health & Biology 3) Deputy Director, Kenya Snakebite Research and Intervention 4) Deputy Director, Non-Communicable Diseases 5) Deputy Director, Evolutionary Ecology, Conservation & Ecosystem Health 6) Assistant Director, Research (2) 7) Senior Principal, Research Scientist (5)
Indirect Reports	1) Assistant Director, Research (22) 2) Principal Research Scientist (22)
Job Purpose	
Responsible for all research activities and drive them towards innovations leading to product development and commercialization. The holder will work closely with other directorates in execution of the KIPRE mandate	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Spearhead and coordinate the formulation, implementation and review of policies, strategies and guidelines on all Biomedical and Preclinical Research matters; 2) Overseeing strategy on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies; 3) Guiding in the development of early warning systems for emerging and re-emerging diseases;	

- 4) Overseeing laboratory biosafety and biosecurity plans to manage the identified risks with respect to fieldwork and lab-based activities at the Institute;
- 5) Overseeing surveillance and monitoring of zoonotic diseases, including those that may pose a threat to human health by monitoring animal and environment to identify and track disease outbreaks;
- 6) Supervising the development of new diagnostic tests and tools and conduct research to improve diagnostics for infectious diseases and allowing platforms for health information exchange, streamline diagnostic workflows and improve access to health care.
- 7) Supervising pre-clinical and clinical studies to evaluate the safety and efficacy of bacteriophage (phage) therapy in different infection contexts and patient populations.
- 8) Guiding on Antimicrobial Resistance (AMR) surveillance necessary for national advocacy on antimicrobial use and stewardship.
- 9) Guiding studies on non-human primate conservation biology and primatology;
- 10) Coordinating the establishment and maintenance of a national non-human primate database on census, research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases;
- 11) Overseeing research on venom and anti-venom including snake bite disease;
- 12) Overseeing sub-national and national data and statistics on snakebite trends, patterns, and distribution to guide decision making processes;
- 13) Supervising snakebite advocacy and social mobilization activities including behavioral change components;
- 14) Supervising preclinical efficacy and safety tests of new antivenoms and those available in the market, and other biologics such as tetanus and rabies vaccines;
- 15) Coordinating basic and pre-clinical research on reproductive health, infectious and non-communicable diseases using non-human primates;
- 16) Overseeing development and characterization for both non-human primate and other experimental animal models for priority diseases in Kenya;
- 17) Coordinating research in Human African Trypanosomiasis disease;
- 18) Guiding in research fundraising activities;
- 19) Supervising dissemination of scientific findings through publications, conferences, seminars and workshops.
- 20) Overseeing research on health technologies, drug & vaccine discovery and development and pre-clinical pharmacology & medicinal chemistry
- 21) Supervising innovative drug delivery and molecular design strategies for targeting infectious and noninfectious diseases;
- 22) Overseeing the development and characterization of non-human primate as models for use in drug discovery and development, delivery, and toxicology in Kenya;
- 23) Overseeing preclinical validation of traditional knowledge-based products with claimed healing for efficacy using monkeys as models

- 24) Supervising field research on primatology and wildlife ecology with focus on species behavioral ecology (Nutrition, Sociobiology & endocrinology), evolution, conservation and management;
- 25) Guiding on establishment and maintenance of a national non-human primate database on their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;
- 26) Overseeing in-situ health monitoring of primate populations and other wildlife and support the zoonosis surveillance activities for purposes of developing early warning systems and preparedness to respond to potential disease outbreaks and threats to endemic and critically endangered primate and other species;
- 27) Playing a national advisory role on matters of primate conservation & management including mitigation of human-nonhuman primate conflicts or interaction threats;
- 28) Overseeing studies on impacts of climate change on biodiversity (including primates and other species) and local communities and develop and implement sustainable conservation initiatives or climate actions to promote climate change response in terms of mitigation, adaptation and resilience;
- 29) Guiding on development of policies, processes and guidelines on innovation and incubation management
- 30) Coordinating incubation and acceleration services to institute startups and spin-offs, including access to funding, mentorship, networking, and other support services.
- 31) Guiding on the development of strategies for the research and management of the reproductive health research programs, knowledge generation and capacity building programs;
- 32) Supervising reproductive disease surveillance in Kenya to obtain data on the current trends of reproductive diseases and current intervention strategies;
- 33) Overseeing the development and characterization of both non-human primate and other experimental animal models for infectious and for emerging and re-emerging diseases
- 34) Overseeing research in non-communicable diseases for intervention and prevention strategies using non-human primates (NHPs) and other experimental models
- 35) Guiding on the development of strategies for the management and prevention of the non-communicable diseases, knowledge generation and capacity building programs;
- 36) Overseeing laboratory quality assurance services;
- 37) Coordinating collection, analysis and interpretation of biological and health science data across multiple research entities in the institute.
- 38) Supervising the design of various new computational tools for bioinformatics and determine an effective data analysis framework

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Directorate;
- 2) Coordinate development, implementation and review of the directorate's annual budgets, work plans and procurement and assets disposal plan in line with the Strategic plan;

- 3) Reviewing of Directorate budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Directorate work plan, staff performance, discipline, monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;
- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Spearhead formulation, implementation and review of the Directorate's annual work plans, budgets and procurement and asset disposal plans in line with the Council's performance targets and strategic plan;
- 8) Coordinate implementation of a robust performance management system within the directorate through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 9) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the directorate;
- 10) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the directorate;
- 11) Foster a corporate culture that promotes ethical practices and good citizenship within the directorate;
- 12) Provide leadership in execution of risk management policy and strategies that ensure the directorate has a robust system and processes of accountability, risk management, internal controls, business continuity and succession management;
- 13) Provide leadership, supervision, coaching, mentoring, training and development of the directorate staff to ensure an effective and motivated team.

Job Dimensions:

I. Financial Responsibility

- 1) Guides on the development of the Directorate budget and recommends for approval;
- 2) Recommends approval of expenditure to be incurred in the Directorate;
- 3) Accounts for resources used within the directorate;
- 4) Identifying funding opportunities and grant applications, including identifying and pursuing grant opportunities.
- 5) Development and submission of grant proposals, Spearhead execution of partnership and grant agreements.
- 6) Managing grant project by ensuring that grant-funded projects align with the organization's overall strategy.

II. Responsibility for Physical Assets

Responsible for office space, ICT equipment and furniture.

III. Decision Making / Job Influence
1) Strategic decisions; 2) Financial decisions; 3) Managerial decisions; 4) Analytical decisions; and 5) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 3) Bachelor's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution
Professional Qualifications / Membership to professional bodies
1) Evidence of at least twenty (20) publications in refereed journals. 2) Attracted research Funding of not less than Kshs 80 million. 3) Leadership course lasting not less than four (4) weeks from a recognized institution. 4) Membership to a professional body and in good standing where applicable.
Previous relevant work experience required.
At least fifteen (15) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector
Functional Skills, Behavioral Competencies/Attributes:
1) Leadership skills. 2) Communication skills.

- 3) Mentorship Skills.
- 4) Problem solving.
- 5) Strategic thinking.
- 6) Conflict management.
- 7) Interpersonal skills.
- 8) Organizational skills.
- 9) Negotiation skills.
- 10) Team building

Deputy Director, Infectious Diseases and One Health

Job Title	Deputy Director, Infectious Diseases and One Health
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	Infectious Diseases and One Health
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director, Research and Product Development
Direct Reports	1) Assistant Director, Research (5) 2) Principal Research Scientist (5)
Indirect Reports	Senior Research Scientist (10)
Job Purpose	
Responsible for all research activities and drive them towards innovations leading to product development and commercialization. The holder will work closely with other directorates in execution of the KIPRE mandate	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinating, formulating, implementing and reviewing policies, strategies and guidelines on Infectious Diseases and One Health matters; 2) Carrying out basic, pre-clinical, translational research in infectious and emerging diseases using non-human primates (NHPs) and other experimental animals; 3) Supervising research in Virology, Microbiology, Parasitology and Vector Biology; Immunology and Vaccine Development; Zoonotic Bio-surveillance and Disease Ecology; and Climate & Health 4) Coordinating surveys of infections in human-livestock-wildlife-environment interface that will contribute to early warning systems for the presence of emerging and re-emerging diseases and for policy formulation; 5) Guiding scientific findings through publications, conferences, seminars and workshops; 6) Supporting identification of active molecules and development of vaccines, diagnostics and drugs for viral, bacterial, mycology and parasites;	

- 7) Managing a reference diagnostic lab (supplementing government efforts), specifically for emerging and re-emerging infectious diseases while contributing to public health communication and outreach efforts;
- 8) Supervising the collection of drug-resistant bacteria from different sources, locally and globally, which will be used as a priority list in the isolation of bacterio-phages (phages) for Antimicrobial Resistance Intervention/management.
- 9) Supervising the development and characterization of both non-human primate and other experimental animal models for infectious and for emerging and re-emerging diseases in Kenya.
- 10) Overseeing national non-human primate database on census, research affiliations, and geo-spatial distribution of non-human and related zoonotic diseases;
- 11) Overseeing reproductive disease surveillance in Kenya to obtain data on the current trends of emerging and re-emerging infectious diseases and current intervention strategies;
- 12) Managing research data on emerging and re-emerging infectious to inform policy;
- 13) Supervising capacity building in the area of emerging and re-emerging infectious;
- 14) Formulating research fundraising strategies;
- 15) Guiding on disseminating scientific findings through publications, conferences, seminars and workshops.
- 16) Supervising studies on mechanisms of infection/pathogenicity of different diseases in non-human primate animal models.
- 17) Guiding on Identification of active molecules and development of vaccines and molecules for viral, bacterial, mycology and parasites.

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Division;
- 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan;
- 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Division monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;
- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division;
- 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division;

10) Foster a corporate culture that promotes ethical practices and good citizenship within the division; 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.
Job Dimensions:
I. Financial Responsibility
1) Development, implementation and review of the work plans and procurement and assets disposal plan in line with the Strategic plan; 2) Review of the budget, allocate resources and ensure efficient use of resources; and 3) Leading in resource mobilization
II. Responsibility for Physical Assets
Responsible for office space, ICT equipment and furniture.
III. Decision Making / Job Influence
1) Financial decisions; 2) Managerial decisions; 3) Analytical decisions; and 4) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate in any of the following disciplines:- Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution; 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution; 3) Bachelor's Degree in any of the following disciplines: Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution;

Professional Qualifications / Membership to professional bodies			
1) Membership to a professional body and in good standing where applicable. 2) Evidence of at least fifteen (15) publications in refereed journals; 3) Leadership course lasting not less than four (4) weeks from a recognized institution.			
Previous relevant work experience required.			
At least twelve (12) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector			
Functional Skills, Behavioral Competencies/Attributes:			
1) Leadership skills. 2) Communication skills. 3) Mentorship Skills. 4) Problem solving. 5) Strategic thinking. 6) Conflict management. 7) Interpersonal skills. 8) Organizational skills. 9) Negotiation skills. 10) Team building

Deputy Director, Reproductive Health and Biology

Job Title	Deputy Director, Reproductive Health and Biology
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	Reproductive Health and Biology
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director, Research and Product Development
Direct Reports	1) Assistant Director, Research (4) 2) Principal Research Scientist (4)
Indirect Reports	Senior Research Scientist (8)
Job Purpose	
Responsible for administrative management and coordination of research activities, mentoring junior staff, and contributing to the development of research programs at the Reproductive Health and Biology Division while reporting to the Director of Research and Product Development	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinate, formulate, implement and review policies, strategies and guidelines on reproductive health and biology; 2) Oversee basic, pre-clinical, translational research in reproductive health and biology using non-human primates (NHPs) and other experimental animals; 3) Coordinate the development and characterization of both non-human primate and other experimental animal models for priority reproductive health diseases in Kenya; 4) Supervise assisted reproductive technology programs. 5) Coordinate provision of endocrinology services 6) Support the development of strategies for the management of the reproductive health research programs, knowledge generation and capacity building programs; 7) Supervise surveillance of reproductive disease in Kenya to obtain data on the current trends of reproductive diseases and current intervention strategies; 8) Guide research data for use on reproductive health to inform policy;	

- 9) Guide in the development of capacity building in the area of reproductive health and biology;
- 10) Oversee research fundraising activities;
- 11) Guide dissemination of scientific findings through publications, conferences, seminars and workshops.
- 12) Supervise epidemiological studies on sexually transmitted infections including drug resistance microbes.
- 13) Supervise the developments of innovative treatments for reproductive diseases and disorders.
- 14) Supervise pre-clinical drug trials for endometriosis, subfertility/infertility and other reproductive diseases and disorders.
- 15) Guide studies on fetal development and pregnancy loss.
- 16) Supervise studies on reproductive cancers.
- 17) Oversee research on metabolic disorders associated with reproductive system

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Division;
- 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan;
- 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Division monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;
- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division;
- 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division;
- 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division;
- 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.

Job Dimensions:

I. Financial Responsibility

- 1) Development, implementation and review of the work plans and procurement and assets disposal plan in line with the Strategic plan;

2) Review of the budget, allocate resources and ensure efficient use of resources; and 3) Leading in resource mobilization
II. Responsibility for Physical Assets
Responsible for office space, ICT equipment and furniture.
III. Decision Making / Job Influence
1) Financial decisions; 2) Managerial decisions; 3) Analytical decisions; and 4) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate in any of the following disciplines:- Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution; 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution; 3) Bachelor's Degree in any of the following disciplines: Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution
Professional Qualifications / Membership to professional bodies
1) Membership to a professional body and in good standing where applicable. 2) Evidence of at least fifteen (15) publications in refereed journals; 3) Leadership course lasting not less than four (4) weeks from a recognized institution.
Previous relevant work experience required.
At least twelve (12) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector

Functional Skills, Behavioral Competencies/Attributes:

- 1) Leadership skills.
- 2) Communication skills.
- 3) Mentorship Skills.
- 4) Problem solving.
- 5) Strategic thinking.
- 6) Conflict management.
- 7) Interpersonal skills.
- 8) Organizational skills.
- 9) Negotiation skills.
- 10) Team building

Deputy Director, Kenya Snakebite Research, and Intervention

Job Title	Deputy Director, Kenya Snakebite Research, and Intervention
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	Kenya Snakebite Research and Intervention
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director, Research and Product Development
Direct Reports	1) Assistant Director, Research (3) 2) Principal Research Scientist (3)
Indirect Reports	Senior Research Scientist (6)
Job Purpose	
Responsible for overall leadership, strategic direction, administrative management, coordination and development of research and clinical programs, and production of antivenom and other biologicals at the Kenya Snakebite Research and Intervention Centre/Division while reporting to the Director of Research and Product Development.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinate, formulate, implement, and review policies, strategies and guidelines on venomous bites, venom standards, antivenom research, development and production, venomous animals and insects' biology and conservation, snakebite epidemiology, public health and clinical management; 2) Maintain and update sub-national and national database on snakebite epidemiology and distribution of snakes; 3) Assess the socioeconomic burden of snakebite at the community, health facility, county and national level; 4) Oversee disease modelling to predict risk maps of venomous bites and assess the effectiveness of interventions; 5) Implement interventions to ensure timely access to antivenom and treatment; 6) Provide information and technical assistance on diagnosis, treatment and management of snakebite envenomation;	

- 7) Conduct clinical studies on snakebite pathophysiology and pathology and other venomous bites;
- 8) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- 9) Support venomous bites clinical treatment and trial centers;
- 10) Develop and implement evidence-based treatment protocols for venomous bites management;
- 11) Participate in development of training curricula and materials on matters pertaining venomous bites;
- 12) Develop new antivenoms and other therapies to improve the efficacy, safety and affordability.
- 13) Analyze clinical data on venomous bites;
- 14) Prepare grant proposals to secure funding;
- 15) Partner with relevant stakeholders on clinical sciences of venomous bites.
- 16) Execute outreach programs on venomous bites and related matters;
- 17) Implement interventions to ensure timely access to antivenom and treatment;
- 18) Facilitate preclinical efficacy and quality control of antivenoms, and other therapeutics;
- 19) Develop new antivenoms and other therapies to improve the efficacy, safety, and affordability;
- 20) Conduct clinical studies on snakebite pathophysiology and pathology and other venomous bites.
- 21) Conduct pre-clinical and clinical trials of antivenoms and other therapeutics for venomous bites;
- 22) Oversee compliance with regulatory requirements and industry standards for product development;
- 23) Provide information to guide diagnosis, treatment, and management of snakebite envenomation;
- 24) Manage and support venomous bites clinical treatment and trial centers;
- 25) Conduct research on snake biology, other venomous animals and insects and venom;
- 26) Coordinate conservation strategy to protect endangered snakes and other venomous animals and insects;
- 27) Coordinate social mobilization, behavioral change, training, and capacity building on all aspects of venomous bites;
- 28) Conduct conferences, seminars, and workshops to disseminate research findings related to venomous bites;
- 29) Partner with relevant stakeholders on matters venomous bite.

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Division;
- 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan;

3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources; 4) Implementing Division monitoring and evaluation and reporting; 5) Leading in resource mobilization for the Directorate; 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management; 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan; 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division; 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division; 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division; 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.
Job Dimensions:
I. Financial Responsibility
1) Development, implementation and review of the work plans and procurement and assets disposal plan in line with the Strategic plan; 2) Review of the budget, allocate resources and ensure efficient use of resources; and 3) Leading in resource mobilization
II. Responsibility for Physical Assets
Responsible for office space, ICT equipment and furniture.
III. Decision Making / Job Influence
1) Financial decisions; 2) Managerial decisions; 3) Analytical decisions; and 4) Operational decisions.

Deputy Director, Non-Communicable Diseases

Job Title	Deputy Director, Non-Communicable Diseases
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	Non-Communicable Diseases
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director, Research and Product Development
Direct Reports	1) Assistant Director, Research (4) 2) Principal Research Scientist (4)
Indirect Reports	Senior Research Scientist (8)
Job Purpose	
Responsible for administrative management and coordination of research activities, mentoring junior staff, and contributing to the development of research programs at the Non-Communicable Diseases Division while reporting to the Director of Research and Product Development.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinating, formulating, implementing and reviewing policies, strategies and guidelines on non-communicable diseases in partnership with other Government programs; 2) Conducting basic, pre-clinical, translational research in non-communicable diseases for intervention and prevention strategies using non-human primates (NHPs) as models for the diseases; 3) Conduct pre-clinical evaluations of innovative adjunct remedies and therapeutics for management of chronic non-communicable conditions 4) Undertaking research in Neurosciences, Cancer, Genetic, Metabolic and chronic respiratory diseases, Drug discovery, development and delivery, Cardiovascular, regenerative, exercise and sports sciences; 5) Developing and characterizing both non-human primate and other experimental animal models for priority non-communicable diseases in Kenya;	

- 6) Supporting the development of strategies for the management and prevention of the non-communicable diseases research programs, knowledge generation and capacity building programs;
- 7) Conducting non-communicable disease surveillance in Kenya to obtain data on the current trends of non-communicable diseases and current intervention strategies;
- 8) Conducting research on addiction, substance abuse and mental health in partnership with other Government agencies & programs;
- 9) Supervising continuous environmental surveillance in Kenya for triggers of non-communicable diseases in partnership with other Government agencies & programs;
- 10) Guiding research on genetic and epigenetics of sports and exercise sciences to promote healthy sporting and exercise;
- 11) Guiding research in non-communicable disease from a one health and climate change perspectives in collaboration with local and international partners;
- 12) Conducting research on chronic infectious diseases that trigger non-communicable diseases in partnership with other Government agencies & programs;
- 13) Overseeing research in neurodegenerative diseases to foster and promote healthy ageing in partnership with other Government agencies & Government programs;
- 14) Overseeing research on sleep disorders and related neurological conditions in partnership with international and other Government programs;
- 15) Conducting research on phage therapy as biotherapeutics for leprosy and other neglected conditions of the nervous system;
- 16) Providing research data on non-communicable disease to inform policy;
- 17) Conducting capacity building in the area of non-communicable diseases in liaison with other Government agencies & programs;
- 18) Participating in research fundraising activities; and
- 19) Disseminating scientific findings through publications, conferences, seminars and workshops

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Division;
- 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan;
- 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Division monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;
- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan;

- 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division;
- 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division;
- 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division;
- 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.

Job Dimensions:

I. Financial Responsibility

- 1) Development, implementation and review of the work plans and procurement and assets disposal plan in line with the Strategic plan;
- 2) Review of the budget, allocate resources and ensure efficient use of resources; and
- 3) Leading in resource mobilization

II. Responsibility for Physical Assets

Responsible for office space, ICT equipment and furniture.

III. Decision Making / Job Influence

- 1) Financial decisions;
- 2) Managerial decisions;
- 3) Analytical decisions; and
- 4) Operational decisions.

IV. Working Conditions

The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally, and internationally.

Job Competencies (Knowledge, Experience and Attributes / Skills).

Academic qualifications

- 1) Doctorate in any of the following disciplines:- Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution;
- 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution;

3) Bachelor's Degree in any of the following disciplines: Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution

Professional Qualifications / Membership to professional bodies

- 1) Membership to a professional body and in good standing where applicable.
- 2) Evidence of at least fifteen (15) publications in refereed journals;
- 3) Leadership course lasting not less than four (4) weeks from a recognized institution.

Previous relevant work experience required.

At least twelve (12) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector

Functional Skills, Behavioral Competencies/Attributes:

- 1) Leadership skills.
- 2) Communication skills.

Deputy Director, Evolutionary Ecology, Conservation and Ecosystem Health

Job Title	Deputy Director, Evolutionary Ecology, Conservation and Ecosystem Health
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Research and Product Development
Division	Evolutionary Ecology, Conservation and Ecosystem Health
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director, Research and Product Development
Direct Reports	1) Assistant Director, Research (6) 2) Principal Research Scientist (6)
Indirect Reports	Senior Research Scientist (12)
Job Purpose	
Responsible for administrative management and coordination of research activities, mentoring junior staff, and contributing to the development of research programs at the Evolutionary ecology, conservation and ecosystem health Division while reporting to the Director of Research and Product Development.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinating, formulating, implementing and reviewing policies, strategies and guidelines on evolutionary ecology, conservation & ecosystem health matters; 2) Undertaking field research on primatology and wildlife ecology with focus on species behavioral ecology (Nutrition, Sociobiology & endocrinology), evolution, conservation and management 3) Undertaking baseline surveys on non-human primates and other biodiversity for the purpose of documentation as well as monitoring & evaluation of efficacy of our conservation strategies; 4) Establishing and maintaining a national non-human primate database on their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management; 5) Undertaking in-situ health monitoring of primate populations and other wildlife and support the zoonosis surveillance activities for purposes of developing early warning	

- systems and preparedness to respond to potential disease outbreaks and threats to endemic and critically endangered primate and other species;
- 6) Contributing data to inform policy on matters of primate conservation & management including mitigation of human-nonhuman primate conflicts or interaction threats;
 - 7) Monitoring the impacts of climate change on biodiversity (including primates and other species) and local communities and develop and implement sustainable conservation initiatives or climate actions to promote climate change response in terms of mitigation, adaptation and resilience;
 - 8) Undertaking research and monitoring of human-nonhuman primates-wildlife interactions and associated impacts to local communities and species themselves to promote informed risks mitigation, minimize socio-economic losses (from crop raiding, livestock depredation, and loss of life) and potential risk of zoonotic diseases;
 - 9) Undertaking animal capture, invasive sample collection, or translocation for purpose of research or populations or species conservation and management
 - 10) Offering behavioral expertise to biomedical programs undertaking captive behavioral monitoring or for captive behavioral welfare advice under the directorate of Animal Sciences, Welfare and Ethics in effort to support institutional compliance with animal welfare and ethical guidelines in captivity.
 - 11) Providing technical advice based on in-situ behavioral studies and monitoring of primates on ideal enrichment requirements as well as wise and ethical use of problem animals for research to improve human health;
 - 12) Enhancing training and capacity building in the field of primatology and biodiversity, support community pro-conservation alternative livelihoods and conduct outreach programs on environment, primate conservation education, biodiversity and climate change;
 - 13) Providing guidance and institutional support in establishment and management of field site research stations to support both Sectional and institutional field research on conservation and zoonosis agenda;
 - 14) Undertaking anthropological (including ethno-primatology and ethnobotany) studies that inform primates and other wildlife conservation, ecosystem health and public health;
 - 15) Disseminating scientific findings through publications, conferences, seminars and workshops

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Division;
- 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan;
- 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Division monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;

- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division;
- 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division;
- 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division;
- 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.

Job Dimensions:

I. Financial Responsibility

- 1) Development, implementation and review of the work plans and procurement and assets disposal plan in line with the Strategic plan;
- 2) Review of the budget, allocate resources and ensure efficient use of resources; and
- 3) Leading in resource mobilization

II. Responsibility for Physical Assets

Responsible for office space, ICT equipment and furniture.

III. Decision Making / Job Influence

- 1) Financial decisions;
- 2) Managerial decisions;
- 3) Analytical decisions; and
- 4) Operational decisions.

IV. Working Conditions

ANIMAL SCIENCES, WELFARE AND ETHICS DIRECTORATE

Director, Animal Sciences, Welfare and Ethics

Job Title	Director, Animal Sciences, Welfare and Ethics
Grade	KIP 2
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Animal Sciences, Welfare and Ethics
Division	N/A
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director General / Chief Executive Officer
Direct Reports	1) Deputy Director, Veterinary Clinical and Diagnostic Services 2) Deputy Director, National Laboratory Animal Breeding 3) Deputy Director, Research 4) Senior Principal, Research Scientist (3)
Indirect Reports	1) Assistant Director, Research (4) 2) Principal Research Scientist (4)
Job Purpose	
Responsible for ensuring that all issues of animal sciences, welfare and ethics are adhered to both local and international standards. The holder will ensure that there is provision of experimental animals for research and national and international needs.	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Supervise the coordination, formulation, implementation and review of policies, strategies and guidelines on animals' sciences, breeding, welfare, and ethics; 2) Lead in resource mobilization for the Directorate; 3) Supervise the development and implementation of ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare; 4) Provide scientific advice and guidance to researchers, veterinarians and other stakeholders on animal related research, testing and breeding; 5) Ensure proper compliance on animal related research, treatment, testing, husbandry and breeding;	

- 6) Oversee and regulate the acquisition and breeding of animals for research, testing and educational purposes;
- 7) Oversee management of animal colonies;
- 8) Ensure compliance with local, national and international regulation related to animal welfare and ethics;
- 9) Advise and participate in establishing ethical review boards and committees responsible for approving research protocols involving animals;
- 10) Advise on design and maintenance of animal facilities to meet national and international standards;
- 11) Promote the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;
- 12) Identify opportunities for innovation and improvement in ethical animal handling practices;
- 13) Facilitate training and capacity building animals' sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders.
- 14) Oversee the maintenance and updating animal health, research, breeding, welfare, and ethics database;
- 15) Oversee the organization of conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- 16) Oversee collaborative and contract research on laboratory animals

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Directorate;
- 2) Coordinate development, implementation and review of the directorate's annual budgets, work plans and procurement and assets disposal plan in line with the Strategic plan;
- 3) Reviewing of Directorate budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing Directorate work plan, staff performance, discipline, monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the Directorate;
- 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management;
- 7) Spearhead formulation, implementation and review of the Directorate's annual work plans, budgets and procurement and asset disposal plans in line with the Council's performance targets and strategic plan;
- 8) Coordinate implementation of a robust performance management system within the directorate through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 9) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the directorate;

10) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the directorate; 11) Foster a corporate culture that promotes ethical practices and good citizenship within the directorate; 12) Provide leadership in execution of risk management policy and strategies that ensure the directorate has a robust system and processes of accountability, risk management, internal controls, business continuity and succession management; 13) Provide leadership, supervision, coaching, mentoring, training and development of the directorate staff to ensure an effective and motivated team.
Job Dimensions:
I. Financial Responsibility
1) Guides on the development of the Directorate budget and recommends for approval; 2) Recommends approval of expenditure to be incurred in the Directorate; 3) Accounts for resources used within the directorate; 4) Identifying funding opportunities and grant applications, including identifying and pursuing grant opportunities. 5) Development and submission of grant proposals, Spearhead execution of partnership and grant agreements. 6) Managing grant project by ensuring that grant-funded projects align with the organization's overall strategy.
II. Responsibility for Physical Assets
Responsible for office space, ICT equipment and furniture.
III. Decision Making / Job Influence
1) Strategic decisions; 2) Financial decisions; 3) Managerial decisions; 4) Analytical decisions; and 5) Operational decisions.
IV. Working Conditions
The role is performed in an office setting at the Institute's Headquarters with occasional field assignments locally, regionally and internationally.
Job Competencies (Knowledge, Experience and Attributes / Skills).
Academic qualifications
1) Doctorate degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology,

Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 2) Master's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution. 3) Bachelor's Degree in any of the following disciplines: - Biomedical Sciences, Public Health, Environmental Sciences, Conservation Biology, Biology, Veterinary Medicine, Animal Sciences, Medicine, Pharmacy, nursing, clinical medicine, Primatology, Anthropology, Biostatistics, Bioinformatics, Computational Biology or equivalent qualification from a recognized Institution			
Professional Qualifications / Membership to professional bodies			
1) Evidence of at least twenty (20) publications in refereed journals. 2) Attracted research Funding of not less than Kshs 80 million. 3) Leadership course lasting not less than four (4) weeks from a recognized institution. 4) Membership to a professional body and in good standing where applicable.			
Previous relevant work experience required.			
At least fifteen (15) years relevant work experience, five (5) years of which must have been in senior management position in the Public or Private sector			
Functional Skills, Behavioral Competencies/Attributes:			
1) Leadership skills. 2) Communication skills. 3) Mentorship Skills. 4) Problem solving. 5) Strategic thinking. 6) Conflict management. 7) Interpersonal skills. 8) Organizational skills. 9) Negotiation skills. 10) Team building

Deputy Director, Veterinary Clinical and Diagnostics Services

Job Title	Deputy Director, Veterinary Clinical and Diagnostics Services
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Animal Sciences, Welfare and Ethics
Division	Veterinary Clinical and Diagnostics Services
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director of Animal Science, Welfare and Ethics.
Direct Reports	1) Assistant Director, Research (2) 2) Principal Research Scientist (2)
Indirect Reports	Senior Research Scientist (4)
Job Purpose	
Responsible for administrative management and coordination of veterinary, clinical, diagnostic and pathology services, mentoring junior staff, and contributing to the development and provision of quality and relevant programs and services at the Veterinary, Clinical and Diagnostic Division while reporting to the Director of Animal Science, Welfare and Ethics	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinating, formulating, implementing and reviewing policies, strategies and guidelines on veterinary, clinical, diagnostic and pathology services; 2) Developing and implementing policies and procedures for laboratory animal clinical care, safety and quality control; 3) Ensuring compliance with national, regional and international regulations for animal clinical care and welfare; 4) Maintaining and updating accurate clinical database on laboratory animals treatment, surgeries, tests and health histories; 5) Overseeing the ordering and maintenance of animal medical supplies and equipment; 6) Conducting routine and experimental surgeries and related procedures; 7) Providing training and capacity building to technicians, veterinarians, and other researchers on laboratory animal medicine, veterinary medicine and surgery and diagnostics;	

8) Ensuring advances in laboratory animal medicine, veterinary medicine and surgery and related technologies and diagnostics; 9) Executing outreach programs in laboratory animal medicine, surgery and diagnostics; 10) Overseeing collaborative and contract research on laboratory animals; 11) Supervising the running of the Diagnostic laboratory; 12) Overseeing necropsy and histopathology to researchers and the animal facility. 13) Training, supervising and maintaining proficiency and develop clinical, pathological and research diagnostic skills
II. Operational Responsibilities / Tasks
1) Overseeing and coordinating all administrative roles for the Division; 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan; 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources; 4) Implementing Division monitoring and evaluation and reporting; 5) Leading in resource mobilization for the Directorate; 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management; 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan; 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division; 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division; 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division; 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.
Job Dimensions:

Deputy Director, National Laboratory Animal Breeding

Job Title	Deputy Director, National Laboratory Animal Breeding
Grade	KIP 3
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Animal Sciences, Welfare and Ethics
Division	National Laboratory Animal Breeding
Section / Unit	N/A
Location / Work Station	Head Office, Nairobi
Reporting Relationships	
Reports to	Director of Animal Science, Welfare and Ethics.
Direct Reports	1) Assistant Director, Research 2) Principal Research Scientist
Indirect Reports	Senior Research Scientist (4)
Job Purpose	
Responsible for administrative management and coordination of National Laboratory Animal Breeding services and programmes and mentoring junior staff, while reporting to the Director of Animal Science, Welfare and Ethics	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
1) Coordinating, formulating, implementing and reviewing policies, strategies and guidelines on laboratory animal breeding; 2) Supervising the acquisition and breeding of animals for research, testing and educational purposes; 3) Overseeing development and implementation of a national NHPs and other lab animals breeding policy 4) Providing high quality and enough laboratory animals for research; 5) Ensuring research animals have adequate access to quality and healthy diet 6) Overseeing the development of quality infrastructure for improving animal productivity and breeding that ensure the physical and psychological of animals are not constrained, e.g. by poor cage design and size may affect the growth and development of animals. 7) Supervising the provision of nutritional requirements, environmental needs and disease risks of the laboratory animals that are allocated to researchers are properly taken care of 8) Supervising capture and translocation of either endangered or problem NHPs for conservation, management, research and establishment of breeding colonies;	

9) Overseeing provision of healthcare by working closely with division of Veterinary Clinical and Diagnostic services 10) Supervising the development of superior germplasm for improving animal productivity through in vitro fertilization and other assisted reproductive technology 11) Overseeing production post F2 generation NHPs for research purposes 12) Guide on production of well-documented genetically characterized population of laboratory animals. 13) Supervising the breeding of specific pathogen-free animals (S.P.F.) and another to germ free animals.
II. Operational Responsibilities / Tasks
1) Overseeing and coordinating all administrative roles for the Division; 2) Coordinate development, implementation and review of the division's work plans and procurement and assets disposal plan in line with the Strategic plan; 3) Reviewing of Division budgets, allocate resources and ensure efficient use of resources; 4) Implementing Division monitoring and evaluation and reporting; 5) Leading in resource mobilization for the Directorate; 6) Coordinate execution of risk management policy and strategies in the directorate for accountability, risk management, internal controls, business continuity and succession management; 7) Coordinate implementation of a robust performance management system within the division through providing oversight of the delivery of the annual performance contract and the strategic plan; 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the division; 9) Provide leadership in the development and implementation of corruption prevention and mitigation strategies in the division; 10) Foster a corporate culture that promotes ethical practices and good citizenship within the division; 11) Provide leadership, supervision, coaching, mentoring, training and development of the division staff to ensure an effective and motivated team.

Assistant Director, Research

Job Title	Assistant Director, Research
Grade	KIP 4
Corporation/Organization	Kenya Institute of Primate Research (KIPRE)
Directorate	Deployed in the following Directorates : 1) Research and Product Development; 2) Animal Science, Welfare & Ethics; and 3) Capacity Building, Partnerships & Grants Management.
Division	Deployed in the following divisions: 1) Infectious Diseases and One Health 2) Reproductive Health & Biology 3) Kenya Snakebite Research and Intervention 4) Non-Communicable Diseases 5) Evolutionary Ecology, Conservation & Ecosystem Health 6) Veterinary Clinical and Diagnostic Services 7) National Laboratory Animal Breeding 8) Welfare And Ethics 9) Innovation, Incubation and Marketing 10) Training & Capacity Building 11) Partnership And Grants Management
Section / Unit	Deployed to head the following sections: 1) Virology 2) Microbiology, Parasitology and Vector Biology 3) Immunology And Vaccine Development 4) Zoonotic Surveillance & Disease Ecology 5) Climate & Health 6) Reproductive Diseases and Disorders 7) Contraception And Family Planning 8) Assisted Reproductive Technologies 9) Microbicides And Sexually Transmitted Infections 10) Antivenom (Biologics) Quality Control, Development and Production 11) Snakebite Epidemiology, Public Health, And Community Engagement 12) Snakebite Clinical Sciences 13) Neurosciences 14) Cancer, Genetic and Metabolic Diseases 15) Chronic Lung Diseases 16) Cardiovascular, Regenerative and Sports Sciences

	17) Populations & Community Ecology 18) Behavioral & Applied Ecology 19) Climate Change, Biodiversity & Ecosystem Health 20) Anthropology & Conservation 21) Laboratory Services 22) Data Science and Analytics 23) Animal Clinic and Surgery 24) Diagnostics Laboratory and Pathology 25) Intellectual Property Rights 26) Industry Liaison 27) Drug Discovery, Development & Delivery 28) Training And Capacity Building 29) Resource And Knowledge Management
Location / Work Station	1) Head Office, Nairobi 2) Regional offices
Reporting Relationships	
Reports to	Deputy Directors (heading respective division)
Direct Reports	Senior Research Scientists (in respective sections)
Indirect Reports	Research Scientists (in respective sections)
Job Purpose	
Responsible for administrative management and coordination of research activities, mentoring junior staff, and contributing to the development of research programs at the Section level and reporting to the relevant Deputy Director	
Key Responsibilities/ Duties / Tasks	
I. Managerial / Supervisory Responsibilities	
Research and Product Development	
1) Oversee and coordinate all administrative roles for the Section; 2) Coordinate, formulate, implement and review policies, strategies and guidelines on all biomedical, preclinical and clinical research matters; 3) Lead in resource mobilization for the Section; 4) Participate in strategy implementation on basic, pre-clinical and translational research using non-human primates and other experimental animals in liaison with the relevant government agencies; 5) Undertake laboratory biosafety and biosecurity plans for identified risks with respect to fieldwork and lab-based activities at the Institute; 6) Supervise the development of new diagnostic tests and tools and conduct research to improve diagnostics for infectious diseases & One Health, non-communicable diseases,	

- snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
- 7) Participate in pre-clinical and clinical studies to evaluate the safety and efficacy of Research products for infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 8) Supervise research collaborations with national and international research partners on infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 9) Develop and review of research procedures and protocols in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 10) Establish advocacy on priority research areas including infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 11) Review of section budgets, allocate resources and ensure efficient use of resources;
 - 12) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
 - 13) Develop and characterize both non-human primate and other experimental animal models for priority diseases;
 - 14) Coordinate research in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 15) Support research fundraising activities in infectious diseases & One Health, non-communicable diseases, snakebite diseases, reproductive health diseases and / or conservation Biology and other priority research areas;
 - 16) Disseminate scientific findings through publications, conferences, seminars and workshops.
 - 17) Coordinate research on drug & vaccine discovery, antivenom research & development, health technologies and development of health products.
 - 18) Undertake preclinical & clinical validation of traditional knowledge-based natural products with claimed healing for efficacy using non-human primates and other experimental animals;
 - 19) Participate in conservation strategies to protect and conserve non-human primates, snakes and other priority conservation animals;
 - 20) Undertake establishment and maintenance of a national database on non-human primate, snakes and other priority conservation animals containing their diversity (taxonomy), population status, and geo-spatial distribution for effective prioritization of research, conservation and management;

- 21) Undertake studies on impacts of climate change on biodiversity (including non-human primates and other species), local communities and disease patterns and initiate mitigation strategies;
- 22) Coordinate incubation and acceleration services to institute startups and spin-offs, including access to funding, mentorship, networking, and other support services.
- 23) Coordinate laboratory quality assurance services;
- 24) Coordinate collection, analysis and interpretation of biological and health science data across multiple research entities in the institute;
- 25) Support the designing of new computational tools for bioinformatics;
- 26) Assemble and prepare data structures and data analysis frameworks

Animal Science, Welfare & Ethics

- 1) Oversee and coordinate all administrative roles for the Section;
- 2) Coordinate, formulate, implement and review policies, strategies and guidelines on animals sciences, breeding, welfare and ethics;
- 3) Lead in resource mobilization for the Section;
- 4) Review ethical guidelines for establishing and enforcing ethical standards and guidelines for animal care and welfare;
- 5) Provide scientific advice and guidance to researchers, veterinarians and other stakeholders on animal related research, testing and breeding;
- 6) Enable proper compliance on animal related research, treatment, testing, husbandry and breeding;
- 7) Regulate the acquisition and breeding of animals for research, testing and educational purposes;
- 8) Support management of animal colonies;
- 9) Ensure compliance with local, national and international regulation related to animal welfare and ethics;
- 10) Review of section budgets, allocate resources and ensure efficient use of resources;
- 11) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- 12) Support the establishment of ethical review boards and committees responsible for approving research protocols involving animals;
- 13) Review designs and maintenance of animal facilities to meet national and international standards;
- 14) Participate in the use of Positive Reinforcement Techniques (PRT) and environmental enrichment of animals;
- 15) Enable innovation and improvement in ethical animal handling practices;
- 16) Support training and capacity building animals sciences, breeding, welfare and ethics to veterinarians, researchers and other stakeholders;
- 17) Supervise the maintenance of animal health, research, breeding, welfare and ethics database;

- 18) Participate in organization of conferences, seminars and workshops to disseminate research findings related to laboratory animals;
- 19) Support collaborative and contract research on laboratory animals;

Capacity Building, Partnerships & Grants Management.

- 1) Oversee and coordinate all administrative roles for the Section;
- 2) Coordinate, formulate, implement and review policies, strategies and guidelines on all capacity building, partnership and grants management matters;
- 3) Lead in resource mobilization for the Section;
- 4) Review framework for engagements on incubation and commercialization of products;
- 5) Undertake the management of the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 6) Develop of an Institutional database on the Institute's intellectual property portfolio, including patents, trademarks, copyrights, and trade secrets among others;
- 7) Review training and capacity building materials for researchers and other stakeholders;
- 8) Perform training and capacity building to researchers and other staff in the biomedical field;
- 9) Support institutional compliance with all applicable laws and regulations on good financial grants management and funder requirements;
- 10) Review of section budgets, allocate resources and ensure efficient use of resources;
- 11) Implement section work plan, staff performance, discipline, monitoring and evaluation and reporting;
- 12) Undertake the development and submission of grant proposals, budgets, and reports to funding agencies;
- 13) Align grant-funded projects with the organization's overall strategy;
- 14) Support the establishment of an innovation and incubation center linking research and industry in the health products value chain;
- 15) Support the development of partnerships and monitoring the performance of partnerships and grants;
- 16) Develop technical information for product marketing;
- 17) Undertake product training to stakeholders;
- 18) Negotiate licenses on institutional Intellectual property rights, drafting license agreements, and monitoring compliance with those agreements;
- 19) Provide resource and knowledge management services including accessioning of all new books, classification and cataloging of the same and keeping custody of relevant literature, information, equipment and documentation for the institute.

II. Operational Responsibilities / Tasks

- 1) Overseeing and coordinating all administrative roles for the Sections;
- 2) Coordinate development, implementation and review of the section's work plans and procurement and assets disposal plan in line with the Strategic plan;

- 3) Reviewing of section's budgets, allocate resources and ensure efficient use of resources;
- 4) Implementing section's monitoring and evaluation and reporting;
- 5) Leading in resource mobilization for the section;
- 6) Coordinate execution of risk management policy and strategies in the section for accountability, risk management, internal controls, business continuity and succession management;
- 7) Coordinate implementation of a robust performance management system within the sections through providing oversight of the delivery of the annual performance contract and the strategic plan;
- 8) Oversee nurturing of competencies and promote a working environment that optimizes individual and team potential in the sections;
