SECTION I - INVITATION TO TENDER

Kenya Institute of Primate Research (KIPRE) is an autonomous Parastatal established by the presidential order no. 1 of 2023 and Legal notice no. 2073 of 2013. KIPRE is an Organization with a mandate to undertake Bio-medical and applied Research, aimed at providing solutions to challenging health issues. The institute is equally engaged in bio-diversity conservation.

KIPRE hereby invites restricted bids from eligible bidders in ICT Authority accredited list for Supply, installation, Configuration, Customization, commissioning, training and maintenance of Finance & Accounting, Supply Chain Management and HR systems.

A complete set of tender document may be downloaded electronically free of charge from KIPRE website: www.primatereserch.org and /or Public Procurement Information Portal (www.tenders.go.ke).

Interested bidders may obtain further information and inspect the tender documents during normal office working hours (08:00 to 16:00 hours Mondays to Fridays) except for public holiday from:

**The Office of Head, Supply Chain
Management,
Kenya Institute of Primate Research,
P.O Box 24481-00502 Karen.
Email: supplies@primateresearch.org**

Tenderers who download the tender document must forward their particulars immediately to supplies@primateresearch.org to facilitate any further clarification or addendum and shall indicate the tender reference No, Tender Name, official email address and the telephone number, and the complete name and designation of the person to be contacted.

Completed tender documents prepared in line with the format guided in paragraph 2.7.3 of this tender document shall be addressed to:

**Director General,
Kenya Institute of Primate Research,
P.O Box 24481-00502 Karen.**

and deposited in the tender box provided at administration block so as to be received on or before **Thursday, 28th March 2024 at 11.00 AM (EA Time).**

Tenders will be opened immediately thereafter on the same day at the Old Boardroom in the presence of bidders or their representatives who choose to attend.

Late tenders and those submitted electronically will **NOT** be accepted.

SECTION II: INSTRUCTIONS TO BIDDERS (ITT)

2.1 Eligible Tenderers

- 2.1.1 This Invitation for Tenders is open to all eligible tenderers as described in the Invitation to Tender. Successful tenderers shall provide the services for the stipulated duration from the date of commencement specified in the tender document.
- 2.1.2 The KIPRE's employees, committee members, board members and their relatives (spouses and children) are not eligible to participate in the tender.
- 2.1.3 Tenderers shall provide the qualification information statement that the tenderer (including all members of a joint venture and subcontractors) is not associated, or have been associated in the past, directly or indirectly, with a firm or any of its affiliates which have been engaged by KIPRE to provide consulting services for the preparation of the design, specifications, and other documents to be used for the procurement of the goods under this invitation for tenders.
- 2.1.4 Tenderers shall not be under a declaration of ineligibility for corrupt or fraudulent practices or debarred from participating in public procurement.

2.2 Cost of Tendering

- 2.2.1 The bidders shall bear all costs associated with the preparation and submission of their bids, and KIPRE will in no case be responsible or liable for those costs, regardless of the outcome of the bid process.
- 2.2.2 All firms found capable of performing the contract satisfactorily in accordance with the set prequalification criteria shall be considered for award

2.3 The Contents Tender Document

- 2.3.1 The tender document comprises of the documents listed below and addenda issued in accordance with clause 2.6 of these instructions to Tenderers
 - i. Invitation to Tender
 - ii. Instructions to tenderers
 - iii. General Conditions of Contract
 - iv. Special Conditions of Contract
 - v. Schedule of requirements
 - vi. Technical Specifications
 - vii. Tender Form and Price Schedules
 - viii. Tender Security Form
 - ix. Contract Form
 - x. Performance Security Form
 - xi. Bank Guarantee for Advance Payment Form

- xii. Manufacturer's Authorization Form
- xiii. Confidential Business Questionnaire

2.3.2 The Tenderer is expected to examine all instructions, forms, terms and specifications in the tender documents. Failure to furnish all information required in accordance with the tender documents or submission of a tender not substantially responsive as per the tender documents in every respect will be rejected.

2.4 Clarification of Tender Document

2.4.1 A prospective tenderer requiring any clarification in respect of the tender documents may notify KIPRE in writing or by post at the KIPRE's address indicated in the Invitation to Tender. KIPRE will respond in writing to any request for clarification of the tender documents, which it receives not later than five (5) days prior to the deadline for the submission of tenders, prescribed by KIPRE. Written copies of the response by the KIPRE (including an explanation of the query but without identifying the source of inquiry) will be sent to all prospective tenderers that will have received the tender documents.

2.4.2 KIPRE shall reply to any clarifications sought by the tenderer within two (2) days of receiving the request to enable the tenderer to make timely submission of its tender.

2.5 Amendment of Tender Document

2.5.1 At any time prior to the deadline for the submission of bids, KIPRE may, for any reason, whether at its own initiative or in response to a clarification request by a bidder, modify the bid documents by amendment.

2.5.2 All prospective bidders that will have received the tender documents will be notified of the amendment in writing by post and will be binding on them.

2.5.3 In order to give the bidders reasonable time in which to take the amendment into account in preparing their bids, the Purchaser may, at its discretion, extend the deadline for the submission of bids.

2.6 Documents Comprising the Tender

The bid submitted by the bidders shall comprise the following format and content as a minimum:

2.6.1 Technical Proposal

Documents establishing bidder's qualifications are expounded in the section. These include;

- a) Company profile
- b) Certified audited accounts
- c) Firms Experience & References
- d) Functional proposals
- e) Service Proposals
- f) Description of Products, training & Service Features, including warranties

g) Outline of Delivery, installation, training and maintenance plan

2.6.2 Financial Bid/Proposal

A summary of financial proposal

2.7 Submissions, Receipt and Opening of Proposals

- 2.7.1 The original proposals, both Technical and Financial, shall be prepared in indelible ink. It shall contain no interlineations or overwriting except as necessary to correct errors made by the firm it. Person who signs the proposals must initial any such corrections.
- 2.7.2 An authorized representative of the firm initials all pages of the proposals
- 2.7.3 For each proposal, the tenderer shall prepare two copies and mark “Original” and “copy” as appropriate. If there are any discrepancies between the original and the copy, the original shall prevail.
- 2.7.4 For each proposal, the bidder shall prepare bid documents **in two segments**. Segment one will be the technical bid and segment two the financial bid.
- 2.7.4.1 Segment one which is the technical bid shall be submitted **in two documents** one which shall be the original document to be clearly marked “**Original Technical bid**” and the other a replica of the original technical bid to be clearly marked “**Copy Technical bid**”. The markings should be in capital, bold and prominent letters. The two documents shall be enclosed in an envelope and sealed.
- 2.7.4.2 Segment two which is the **financial bid** shall be submitted in two documents one which shall be the original document to be clearly marked “**Original financial bid**” and the other a **replica** of the original financial bid to be clearly marked “**Copy financial bid**”. The markings should be in capital, bold and prominent letters. The two documents shall be enclosed in an envelope and sealed.
- 2.7.4.3 Bidders shall not disclose their financial quotation in the technical bid**
- 2.7.4.4 The inner envelopes shall also indicate the name and address of the tenderer to enable the tender to be returned unopened in case it is declared “late submission”
- 2.7.5 Both the Technical bid and financial bid enclosed in their separate envelopes should be inserted in one outer envelope boldly and clearly marked **TENDER NO. KIPRE/ADM/SUPP/TND/4/2023/2024** and addressed to:
- The Director General,
Kenya Institute of Primate Research,
P.O. Box 24481-00502,
Karen.**
- 2.7.8 After the deadline for submission of proposals, the Technical proposal shall be opened immediately by the tender opening committee. The Financial Proposal shall remain sealed until all qualifying proposals are opened publicly.
- 2.7.9 Evaluators of Technical Proposals shall have no access to the financial proposals until the

technical evaluation is concluded.

2.8 Evaluation of Technical Proposals

- 2.8.1 The evaluation committee, appointed by KIPRE, will evaluate the proposals on the basis of their responsiveness to the Technical Specifications, applying the evaluation criteria and point system as specified. Each responsive proposal will be given a technical score. A proposal will be rejected at this stage if it does not respond to important aspects of the Technical specifications or if it fails to achieve the minimum technical score indicated in the data sheet.

2.9 Tenderers Eligibility and Qualifications

- 2.9.1 The tenderer shall furnish, as part of its tender, documents establishing the tenderers eligibility to tender and its qualifications to perform the contract if it's tender is accepted.
- 2.9.2 The documentary evidence of the tenderers qualifications to perform the contract if its tender is accepted shall establish to KIPRE's satisfaction that the tenderer has the financial and technical capability necessary to perform the contract.

2.10 Validity of Tenders

- 2.10.1 Tenders shall remain valid for One hundred and twenty (120) days or as specified in the tender document after date of tender opening prescribed by KIPRE. A Tender valid for a shorter period shall be rejected by KIPRE as non-responsive.
- 2.10.2 In exceptional circumstances, prior to the expiration of the tender validity period, KIPRE may request tenderers to extend the period of validity of their tenders. The request and the responses shall be made in writing. If a tender security is requested in accordance with 2.10.1, it shall also be extended for thirty days (30) beyond the deadline of the extended validity period. A Tenderer may refuse the request without forfeiting its Tender Security. A Tenderer granting the request shall not be required or permitted to modify its tender, except as provided in paragraph 2.17.2

2.11 Site Visit

The Tenderer, at the Tenderer's own responsibility and risk, is encouraged to visit and examine the site of the required services and its surroundings and obtain all information that may be necessary for preparing the Tender and entering in to a contract for the services. The costs of visiting the site shall be at the Tenderer's own expense.

2.12 Tender Security

- 2.12.1 The Tenderer shall furnish as part of its Tender, either a Tender-Securing Declaration dully filled and signed by Authorized person or a Tender Security as specified in paragraph 2.12.2, in original form.
- 2.12.2 The bid document must be accompanied by a tender security equal to **Kshs Two hundred thousand Only (200,000.00)** and valid for 30 days beyond the

tender validity period.

2.12.3 A Tender-Securing Declaration shall use the form included in Section V, Sample Forms.

2.12.2 The tender security shall be denominated in Kenya Shillings or in another freely convertible currency, and shall be in the form of:-

- a) Cash;
- b) A bank guarantee;
- c) Such insurance guarantee from insurance firms approved by the Public Procurement Regulatory Authority (PPRA);
- d) A guarantee issued by a financial institution approved and licensed by the Central Bank of Kenya; and
- e) Letter of credit

2.12.3 Any tender not accompanied by a tender security shall be deemed non-responsive.

2.12.4 Unsuccessful tenderer's tender security shall be discharged or returned as promptly as possible but not later than thirty (30) days after the expiration of the period of tender validity

2.12.5 The successful tenderer's tender securities will be discharged upon the tenderer signing the contract and furnishing the performance security, pursuant to paragraph 7.4.4

2.12.6 The tender security may be forfeited:

- (a) if a bidder withdraws its tender during the period of tender validity
- (b) in the case of a successful bidder, if the bidder fails:
 - i) to furnish performance security in accordance with clause 7.4 or
 - ii) to sign the contract
- (c) If the bidder rejects correction of an arithmetic error in the tender

2.13 Language of the Tender

The tender prepared by the tenderer, as well as all correspondence and documents relating to the tender exchanged by the tenderer and HRMPEB, shall be written in English language. Any printed literature furnished by the tenderer may be written in another language provided they are accompanied by an accurate English translation of the relevant passages in which case, for purposes of interpretation of the tender, the English translation shall govern.

2.14 Form of Tender

The tenderer shall complete the Tender Form and the Price Schedule furnished in the tender documents, indicating the services to be provided

2.15 Tender Prices

- 2.15.1 The tenderer shall indicate on the form of tender and the appropriate Price Schedule the unit prices and total tender price of the services it proposes to provide under the contract.
- 2.15.2 Prices indicated on the Price Schedule shall be the cost of the services quoted including all customs duties and VAT and other taxes payable.
- 2.15.3 Prices quoted by the tenderer shall remain fixed during the Term of the contract unless otherwise agreed by the parties. A tender submitted with an adjustable price quotation will be treated as non-responsive and will be rejected pursuant to paragraph 2.20.5

2.16 Dateline for Submission of Tenders

- 2.16.1 Tenders must be received by KIPRE at the address specified not later than **11.00 AM Thursday, 28th March, 2024.**
- 2.16.2 KIPRE may, at its discretion, extend this deadline for the submission of tenders by amending the tender documents, in which case all rights and obligations of KIPRE and candidates previously subject to the deadline will thereafter be subject to the deadline as extended.
- 2.16.3 Bulky tenders which will not fit the tender box shall be received and registered in the KIPRE's procurement department

2.17 Modification and Withdrawal of Tenders

- 2.17.1 The tenderer may modify or withdraw its tender after the tender's submission, provided that written notice of the modification, including substitution or withdrawal of the tenders, is received by the KIPRE prior to the deadline prescribed for submission of tenders.
- 2.17.2 The Tenderer's modification or withdrawal notice shall be prepared, sealed, marked, and dispatched in allowed by KIPRE. A withdrawal notice may also be sent by cable, but followed by a signed confirmation copy, postmarked not later than the deadline for submission of tenders.
- 2.17.3 No tender may be modified after the deadline for submission of tenders.
- 2.17.4 No tender may be withdrawn in the interval between the deadline for submission of tenders and the expiration of the period of tender validity specified by the tenderer on the Tender Form. Withdrawal of a tender during this interval may result in the Tenderer's forfeiture of its tender security.

2.18 Preliminary Examination

- 2.18.1 KIPRE will examine the tenders to determine whether they are complete, whether required sureties have been furnished, whether the documents have been properly signed, and whether the tenders are generally in order.

2.18.2 KIPRE may waive any minor informality or nonconformity or irregularity in a tender which does not constitute a material deviation, provided such waiver does not prejudice or affect the relative ranking of any tenderer.

2.18.3 Prior to the detailed evaluation, KIPRE will determine the substantial responsiveness of each tender to the tender documents. For purposes of these paragraphs, a substantially responsive tender is one, which conforms to all the terms and conditions of the tender documents without material deviations. KIPRE's determination of a tender's responsiveness is to be based on the contents of the tender itself without recourse to extrinsic evidence.

2.18.4 If a tender is not substantially responsive, it will be rejected by KIPRE and may not subsequently be made responsive by the tenderer by correction of the nonconformity.

2.19 Opening of the financial proposals

2.18.5 Upon completion of the evaluation of technical proposals, KIPRE will notify those tenderers whose proposals did not either meet the minimum qualifying mark or were considered non-responsive that their financial proposals will be returned unopened after the completion of the evaluation exercise. KIPRE will simultaneously notify those tenderers that have secured the minimum qualifying mark indicating the date and time set for opening of the financial proposals by registered letter, cable, facsimile or electronic mail.

2.18.6 The financial proposal shall be opened publicly in the presence of the tenderers representatives who chose to attend at the set date.

2.18.7 The tenderers' representatives who are present shall sign a register. Evidencing their attendance. The name of the tenderer, the technical scores and the proposal prices shall be read aloud and recorded and minutes of the opening recorded.

2.18.8 Arithmetical errors will be rectified on the following basis: If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail, and the total price shall be corrected. If the candidate does not accept the correction of the errors, its tender will be rejected, and its tender security may be forfeited. If there is a discrepancy between words and figures, the amount in words will prevail

2.20 Clarification of Tenders

2.20.1 To assist in the examination, evaluation and comparison of tenders, KIPRE may, at its discretion, ask the tenderer for a clarification of its tender. The request for clarification and the response shall be in writing, and no change in the prices or substance of the tender shall be sought, offered, or permitted.

2.20.2 Any effort by the tenderer to influence KIPRE's tender evaluation, tender comparison or contract award decisions may result in the rejection of the tenderers' tender.

2.21 Evaluation of Tender

2.21.1 KIPRE shall use the criteria and methodologies listed in this ITT and Section III, Evaluation and Qualification Criteria. No other evaluation criteria or methodologies shall be permitted. By applying the criteria and methodologies, KIPRE shall determine the Best Evaluated Tender. The evaluation and award of the contracts will be based on each Lot. This is the Tender of the Tenderer that meets the qualification criteria and whose Tender has been determined to be:

- a) Substantially responsive to the tendering document; and
- b) The lowest evaluated cost.

2.21.2 The estimated effect of the price adjustment provisions of the Conditions of Contract, applied over the period of execution of the Contract, shall not be considered in Tender evaluation.

2.21.3 In the case of multiple contracts or lots, Tenderers are allowed to tender for one or more lots and the methodology to determine the lowest evaluated cost of the lot (contract) and for combinations, including any discounts offered in the Form of Tender, is specified in Section III, Evaluation and Qualification Criteria. For one or more lots (contracts). Each lot or contract will be evaluated in accordance with ITT

2.21.4. The methodology to determine the lowest evaluated tenderer or tenderers based one lot (contract) or based on a combination of lots (contracts), will be specified in Section III, Evaluation and Qualification Criteria. In the case of multiple lots or contracts, tenderer will be will be required to prepare the Eligibility and Qualification Criteria Form for each Lot.

2.22 Comparison and Award of the Tender

2.21.1 KIPRE shall compare the evaluated costs of all substantially responsive Tenders established to determine the tender that has the lowest evaluated cost.

2.21.2 KIPRE will award the contract to the successful tenderer whose tender has been determined to have achieved the highest combined score, provided further that the tenderer is determined to be qualified to perform the contract satisfactorily.

2.23 Abnormally Low Tenders and Abnormally High Tenders

a. Abnormally Low Tenders

2.21.3 An Abnormally Low Tender is one where the tender price, in combination with other elements of the Tender, appears so low that it raises material concerns as to the capability of the Tenderer in regards to the Tenderer's ability to perform the Contract for the offered Tender Price.

2.21.4 In the event of identification of a potentially Abnormally Low Tender, KIPRE shall seek written clarifications from the tenderer, including detailed price analyses of its Tender price in relation to the subject matter of the contract, scope, proposed methodology, schedule, allocation of risks and responsibilities and any other requirements of the Tender document.

2.21.5 After evaluation of the price analyses, in the event that KIPRE determines that the Tenderer has failed to demonstrate its capability to perform the Contract for the offered

Tender Price, KIPRE shall reject the Tender.

b. Abnormally High Tenders

2.21.6 An abnormally high price is one where the tender price, in combination with other constituent elements of the Tender, appears unreasonably too high to the extent that KIPRE is concerned that it (KIPRE) may not be getting value for money or it may be paying too high a price for the contract compared with market prices or that genuine competition between Tenderers is compromised.

2.21.7 In case of an abnormally high price, KIPRE shall make a survey of the market prices, check if the estimated cost of the contract is correct and review the Tender Documents to check if the specifications, scope of work and conditions of contract are contributory to the abnormally high tenders. KIPRE may also seek written clarification from the tenderer on the reason for the high tender price. KIPRE shall proceed as follows:

- i) If the tender price is abnormally high based on wrong estimated cost of the contract, KIPRE may accept or not accept the tender depending on KIPRE's budget considerations.
- ii) If specifications, scope of work and/or conditions of contract are contributory to the abnormally high tender prices, KIPRE shall reject all tenders and may retender for the contract based on revised estimates, specifications, scope of work and conditions of contract, as the case maybe.

2.21.8 If KIPRE determines that the Tender Price is abnormally too high because genuine competition between tenderers is compromised (often due to collusion, corruption or other manipulations), KIPRE shall reject all Tenders and shall institute or cause competent Government Agencies to institute an investigation on the cause of the compromise, before retendering.

2.24 Contacting Kenya Institute of Primate Research

2.24.1 No tenderer shall contact KIPRE on any matter relating to its tender, from the time of the tender opening to the time the contract is awarded.

2.24.2 Any effort by a tenderer to influence KIPRE in its decisions on tender evaluation, tender comparison, or contract award may result in the rejection of the tenderer's tender

2.25 Post-qualification Verification

2.25.1 KIPRE may determine to its satisfaction whether the tenderer that is selected as having submitted the highest combined score is qualified to perform the contract satisfactorily.

2.25.2 The determination will take into account the tenderer financial and technical capabilities. It will be based upon an examination of the documentary evidence of the tenderers qualifications submitted by the tenderer, as well as such other information as KIPRE deems necessary and appropriate.

2.25.3 An affirmative determination will be a prerequisite for award of the contract to the tenderer. A negative determination will result in rejection of the tenderer's tender, in which event KIPRE will proceed to the next highest combined scorer to make a similar determination of that Tenderer's capabilities to perform satisfactorily.

2.26 KIPRE's Right to Accept or Reject Any or All Tenders

KIPRE reserves the right to accept or reject any tender, and to annul the tendering process and reject all tenders at any time prior to contract award, without thereby incurring any liability to the affected tenderer or tenderers or any obligation to inform the affected tenderer or tenderers of the grounds for KIPRE's action.

2.27 Notification of Award

2.27.1 Prior to the expiration of the period of tender validity, KIPRE will notify the successful tenderer in writing that its tender has been accepted.

2.27.2 The notification of award will constitute the formation of the Contract.

2.28 Signing of Contract

2.28.1 At the same time as KIPRE notifies the successful tenderer that its tender has been accepted, KIPRE will send the tenderer the Contract Form provided in the tender documents, incorporating all agreements between the parties.

2.28.2 Within thirty (30) days of receipt of the Contract Form, the successful tenderer shall sign and date the contract and return it to KIPRE.

2.29 Confidentiality

Information relating to evaluation of proposal and recommendations concerning awards shall not be disclosed to the tenderers who submitted the proposals or to other persons not officially concerned with the process, until the winning firm has been notified that it has been awarded the contract

2.30 Corrupt or Fraudulent Practices

2.30.1 The procuring entity requires that tenderers observe the highest standard of ethics during the procurement process and execution of contracts. A tenderer shall sign a declaration that he has not and will not be involved in corrupt or fraudulent practices.

2.30.2 KIPRE will reject a proposal for award if it determines that the tenderer recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question.

2.30.3 Further a tenderer who is found to have indulged in corrupt or fraudulent practices risks being debarred from participating in public Procurement in Kenya.

SECTION III: EVALUATION AND QUALIFICATION CRITERIA

Tenders received will be evaluated in three stages as detailed below:

1. **Stage 1:** Compliance with Mandatory Requirements (MR)
2. **Stage 2:** Technical Evaluation (Capacity to Deliver the Service)
3. **Stage 3:** Financial Evaluation (quoted prices)

Stage 1: Mandatory Requirements:

Firms that do not meet any of the following mandatory requirements shall be rejected at this stage.

No	Requirements *(All copies attached must be certified by a Commissioner of Oaths as true copies of the original)*	Yes/No
MR1	Copy of Certificate of Incorporation	Yes/No
MR2	Current CR12 Certificate from the Registrar of Companies	Yes/No
MR3	Proof of registration with the Ministry of ICT for provision of ERP, DBMS, and CRM services (will verify online from the list of pre-qualified suppliers)	Yes/No
MR4	Copy of Certificate of Systems and Applications (Level 1) with ICT Authority (will verify online from the list of pre-qualified suppliers)	Yes/No
MR5	Copy of the company's valid Certificate of Tax Compliance	Yes/No
MR6	Duly filled, signed and stamped self-declaration form that firm and the bidder is not debarred in the matter of Public Procurement and Asset Disposal Act 2015	Yes/No
MR7	Must have an average turnover of at least 10M in the last three (3) financial years (2022, 2021, 2020) in the sale, supplies and installation of IT systems to be supported by LPO/extracts from the contract and completion/GO LIVE certificate	Yes/No
MR8	Copies of audited financial statements for the company for the last three years (2023, 2022, 2021)	Yes/No
MR9	Tenderers shall provide a Tender Security of Kshs. 140,000.00 (One hundred and forty thousand) only from a reputable bank or reputable insurance company recognized by the Public Procurement Regulatory Authority) valid for 30days beyond the tender validity period.	Yes/No
MR10	Current trade registration certificate from ICT Authority	Yes/No
MR11	Valid Authorization certificate from the product Developer/Solutions copyright holder/Manufacturer confirming Authorizing the bidder to submit a bid and commitment to offer guarantee and warranty as per the format provided Note: The MAFs MUST be for this specific tender	Yes/No
MR12	Current Single Business permit/Trade License from the County government	Yes/No
MR13	Submit a written power of attorney authorizing the signatory of the bid to commit the bidder.	Yes/No
MR14.	Duly filled, signed and stamped self-declaration that firm and the bidder have never and will not engage in any corrupt or fraudulent practice	

MR15.	Dully-filled up Confidential Business Questionnaire, stamped and signed in the format provided by the authorized person.	Yes/No
MR16	Fully serialized/paginated tender document (Original and copy, including copies of attachments) using a numbering machine or typed.	Yes/No
MR 17	Fully conform to the technical responsiveness Checklist in Section IV, paragraph 4.8.3	Yes/No

Stage 2: The Technical Evaluation (Capacity to Deliver the Service)

Section 1: Conformity to Technical specifications of the solution as provided in section IV paragraph 4.8.2

Section 2: In addition to meeting the technical specifications in above, detailed aspects of the technical requirements and competency of the firm will be evaluated as per the following criteria

Description of technical criteria	Weighting Score	Score
A. Technical Specifications Detailed Methodology/Approach including; i. The Proposed Solution – 3 points ii. The proposed implementation methodology Bidders must follow standard international recognized software quality processes such as CMMI level 3/5 and above and/or ISO, etc. (6 points) iii. Responsiveness to the Implementation Approach and Methodology section of RFP including detailed Project Plan/ work plan/ implementation schedule – (4 points) iv. Delivery and Installation plan for systems, Database system licenses and hardware if applicable and development including system customization and adequate licenses (at least 75 concurrent users) – (5 points) v. Pre-commissioning , Testing Plan and Data migration Plan including a 2 Years Post implementation support and maintenance schedule with a sample issues log – (3 points)	3 6 4 5 3	21
B. Training Plan i. Bidders must demonstrate strong ability to provide training and local support. International bidders may associate with local companies to enhance their ability to provide training and local support (3points) ii. The bidders should have a training plan for both users; novice and technical staff including a knowledge transfer mechanism well thought out and clearly articulated. (3points)	3 3	6

C. Partnership The bidder should be a certified partner in the proposed technology (System) (Provide evidence)	3	3
D. Company Core Business Nature of Business, Reputation of organization and Staff, Credibility, Reliability, Industry Standing and should be an IT company and must have been in existence for at least 10 Years • 10 years and above =6 points • 5 years but below 10 years = 5 points • 3 years and below 5 years = 2 points • Below 3 years =1 point		6
E. Business Continuity, Backup and Development Instance The bidder should provide resilience mechanisms for the ERP solution detailing the business continuity aspects including backups and a development instance/test environment.	2	2
F. Specific Experience i. Experience in implementing similar system in Kenya in organizations equal to or higher than KIPRE. The similarity shall be based on the physical size, complexity, technology or other characteristics – (3marks for each up to a maximum of 4 projects evidenced by copies of LPO/extracts from the contract and completion/GO LIVE certificate and reference letters)	12	20
ii. The bidder should have been in existence for the last 5 years with experience in Implementing ICT Integrated systems (automating and integrating at least 5 modules in a project. (Testimonial or UAT MUST be provided). • 5 years and more =8 points • 3 years but less than 5 years = 5 points • Below 3 years = 1 point	8	
G. Key Technical Staff Competencies		

The implementation professionals must be conversant with developing, implementing and managing scalable systems with competencies in integrated systems and information and IT in general A. Project Manager i) The minimum qualification is Master's Degree in either Computer Science, Engineering, IT or related degree. Attach detailed CVs as well as copies of academic certificates and ICT related certification, PRINCE2/PMI or other equivalent project management certifications (3 marks). ❖ Master's Degree and ICT related certification (3 points) ❖ Bachelor's degree and ICT related certification (2 points) ❖ Diploma and ICT related certification (1 point)	3	
ii) The minimum years of experience should be 10 Years in a relevant field (3 Marks) with a minimum of three (3) projects. ❖ 10 years and above (3 marks) ❖ Between 5 years and 9 years (2 points) ❖ Less than 5 years -1 points	3	
B. Security expert i. Minimum qualifications: ❖ Bachelor's degree in computer science, Engineering or related degree and relevant certification in system security eg. CISA, CISM (3 points) ❖ Diploma in above mentioned relevant certification in system security eg. CISA, CISM (2 points) ❖ certificate (1 point) ii. 5+ years of experience in ICT security field and should have experience in ICT systems security and design, development, Implementation of security solutions. Give reference a minimum of three (3) projects ❖ 5 years and above (3 marks) ❖ Between 3 years and 5 years (2 points) ❖ Less than 3 years -1 points	3	24

C. System designer and developer/System Engineer i. Minimum qualifications: ❖ Undergraduate degree in computer science, Engineering or related degree and relevant certification in system development e.g. expert system engineering professional (ESEP), certified system engineering professional (CSEP) etc and have relevant certification in the area of web-based systems and certification in various Programming software e.g. C, C++, ORACLE, MYSQL, etc (3 points) ❖ Diploma and with the above mentioned relevant certification in ESEP, CSEP and Web-based systems and programming software (2 points) ❖ Diploma and below (1 point) ii. 4+ years of experience in ICT system design, development and implementation with a bias on email systems implementation with a minimum of five projects. ❖ 4 years and above (3 marks) ❖ Between 2 years and 4 years (2 points) ❖ Less than 2 years -1 points	3 3	
d. Expert in ERP Systems i. Minimum Qualifications ❖ Undergraduate degree in computer science/IT or related degree and relevant certification in area of system integration, ICT infrastructure eg. Networks, hardware and certified Workflow designer (3 points) ❖ Diploma and with the above mentioned relevant certification (2 points) ❖ Diploma and below (1 point) ii. 4+ years' experience in ERP systems deployment. experience in installing, maintaining and upgrading IT systems with a minimum of three (3) projects ❖ 4 years and above (3 marks) ❖ Between 2 years and 4 years (2 points) ❖ Less than 2 years -1 points	3 3	
H. Financial Stability: a) Average Annual turnover of Kshs. 100,000,000 in the last 3 years to be evidenced by Audited Accounts, for years 2022, 2021, 2020 and LPOs, Contracts and LSOs. i. Average turnover 100 million and above (3 points)	5	

ii. Average turnover above 50M and below 100Million (2 points) iii. Average turnover below 50m (1 Mark)		8
b) Liquidity Ratio i. 2:1 – 3 points; ii. 1:1 – 2 points; iii. 0.5:1- 1 points; iv. Less than 0.5 no point	3	
I. Demonstration Only bidders who achieve 80% and above out of 100% in stages II section II shall be requested to make a presentation of their proposal for clarification and existence of selected features to be determined by the evaluation committee. Each bidder will be invited to make the presentation to the evaluation team at a date and time to be communicated later. This will account for 10% of the total technical score. The following will be considered for scoring: • Bidders will be required to prepare live demonstration/prototype of the ERP system to the KIPRE Technical Evaluation Committee. • How well the demo fits the requirements general and per module • User interface(s) and self-service portal(s) Any value add and how it fits the needs of KIPRE		10
TOTAL		100

Stage 3: The Financial Evaluation (20%)

- a) Bidders whose technical proposals will have met technical evaluation criterion described above shall be invited for the opening of the financial proposals. The other financial proposals shall be returned unopened. Any effort by a bidder to influence the evaluation or contract award decisions shall result in the rejection of the bidder's proposal.
- b) The Financial Proposals shall be opened publicly in the presence of only the Technically Responsive bidder's representatives who choose to attend. The name of the bidding firm, the technical Scores and the proposed prices shall be read aloud and recorded when the Financial Proposals are opened. KIPRE shall prepare minutes of the public opening.
- c) The evaluation committee will determine whether the financial proposals are complete i.e. whether the bidder has priced all the items of the corresponding Technical Proposal and correct any computational errors. The cost of any unpriced items shall be assumed to be included in other costs in the proposal. In all cases, the total price of the Financial Proposal as submitted shall prevail.

- d) The financial proposal will be ranked according to the most economically advantageous bid based on a combined technical (St) and financial (Bid price) (Sf) scores.

The technical specification compliance will have a maximum score (St) of 80 while the bid price will have a maximum score of 20 (Sf).

The financial scores (Sf) of the other bids (F) shall be computed as follows:

$$Sf = 30 F_m / F$$

$$\text{Total score } S = St$$

$$+ Sf$$

- e) The overall ranking will be computed as follows:

S/N	DESCRIPTION	WEIGHT
1	Technical Score	80
2	Financial Score	20
	Total Score	100

The bidder with the **highest Combined Score** from the above formula shall be considered the winner.

NB: Due diligence will be conducted on the bidder who will have emerged a winner. This will include site visit to the clients where the bidder has successfully implemented the system based on the references provided. At this stage, bidders shall be evaluated on a score basis. In case the report is not positive the second lowest responsive bidder will be considered on due diligence

SECTION IV: SYSTEM REQUIREMENTS AND TECHNICAL SPECIFICATIONS

4.1 PROBLEM STATEMENT

KIPRE seeks to procure systems which would best meet its requirements. The system will cover the following operation modules: -

1. Finance and Accounting Module – 7 Users
2. Supply Chain Management Module – 16 Users
3. Human Resource Module – 4 Users

The implementation will be premised on the following dimensions among others:

i) Standardization

Standardization of processes, records, terminology, information exchange mechanisms with the emphasis of:

a. Proven solution

The systems should address the following:

- Scalability
- The integration of processes (interoperability)
- Usability
- Reliability
- Best Practice – the systems will benchmark with global best practices in relation to KIPRE functions.
- Multi-channel service Delivery to facilitate transactions through multiple devices and computer systems.

b. Address evolving needs

The operational characteristics may evolve over a period of time, as the project moves from development stage to operations. Keeping in line with this change the IT systems requirements may also change. The System is expected to act as a platform with which the multiple requirements could be addressed effectively.

4.2. Objectives of System

The main objective of investing in system based applications is to integrate all business processes and systems.

The specific objectives include: but not limited to:

- Achieve quality of service, efficiency, effectiveness and improve controls over prudent

financial management and general operational activities.

- Establish uniform standards and global best practice in business processes related to KIPRE.
- Enhance the customer relationship management.
- Enable real time and end-to-end visibility of information on multiple dimensions (Human Resource, Supply Chain Management, financials, inventory, etc.)
- Avail information seamlessly and on demand without manual intervention and duplication.
- Facilitate management dashboards for monitoring and decision supports systems.
- Facilitate business process re-engineering in the various functions of the organization to make them efficient, transparent, and compliant to regulatory requirements.

4.3. Expected outcome of the systems

The project expects the following outcomes on implementing the systems:

- Improved service experience by all stakeholders.
- Enhanced competitiveness.
- Enhanced quality, efficiency and effectiveness.
- Reduced cost of operations.
- Better decision making.
- Improved ability to deploy new information system functionalities.
- Maximum return on investment.

4.4. Specific tasks

The Consultant is expected to Develop, Supply, Configure, install, train and customize the systems as per requirements of KIPRE. The specific tasks for the Consultant will include but not limited to:-

- a) Develop an implementation plan.
- b) Project scoping- end-user requirement gathering and business process reengineering.
- c) Implement the System incorporating all security features as described in this document adhering to the current trends and standards.
- d) Integrate the System with digital signatures, banks and existing legacy systems.
- e) Provide implementation and project management services.
- f) Extract, transform and migrate data.
- g) Undertake User and technical training.
- h) Pilot, test, commission, roll-out and post implementation support.
- i) Set up the knowledge centre to augment the capacity of adoption and continuous improvement of the System.

4.5. The scope of supply, works and services

The scope and characteristics of the System to be proposed by the bidders to meet the requirements

of KIPRE should cover the following aspects:

- a) System development and implementation services
- b) Process coverage of the functional areas
- c) Project Management services
- d) Training and documentation
- e) Support Services both technical and operational
- f) Establishment and implementation of feedback and monitoring system
- g) Software license management
- h) Skill augmentation
- i) Future expansion and future scalability
- j) Provision of warranty (within an SLA) after successful commissioning of the system.

The additional details of the scope of the consultancy are provided in other sections of this Tender document.

4.4. Current ICT Scenario

Below is a tabulation of the current ICT environment

No.	System	Current Scenario
1	Cloud Based server	None
2	Email system	The KIPRE has a corporate email service: primateresearch.org (domain name)
3	Office Suite	Office Volume License
4	Access Control and CCTV Cameras	None
5	Website	www.primateresearch.org
6	Network Environment	Wide Area Network Available
7	Management Information Systems	None

4.5. Targeted modules and functions

The following modules must be covered:

4.5.1 FINANCE ACCOUNTING MODULE

The Finance and Accounts Department will need a module with the following functionalities:

1. General Ledger
2. Accounts Receivable
3. Accounts Payable
4. Payments and Reconciliation
5. Costing
6. Cash and Treasury Management
7. Bank transactions including reconciliation
8. Budgeting and variance analysis
9. Taxation, duties and levies
10. Banking
11. Fund Management
12. Tracking of funds utilization
13. Preparation of utilization reports
14. Trial Balance
15. Insurance for materials and assets
16. Cost Centre Accounting
17. Imprest processing
18. Internal Order cost controlling
19. Project costing
20. Investment management
21. External Consultancy
22. Statutory reporting- interface with IFMIS, ITAX among other external systems and channels used for statutory reporting
23. Statutory reporting- interface with other modules to facilitate statutory reporting
24. Integration with various E/M payment services.

4.5.2 SUPPLY CHAIN MANAGEMENT MODULE

The Supply Chain Management Department will require a Module with the following functionalities:

1. Procurement and asset disposal planning
2. Procurement budget monitoring
3. Registration of suppliers
4. Purchase/stores requisition management
5. Sourcing of goods, works and services
6. Evaluation process
7. Preparation of professional opinions
8. Award of contracts
9. Procurement and contract management
10. Contract administration, implementation and monitoring
11. Inventory management
12. Supplier performance management
13. Store management
14. Stock taking
15. Management of outsourced transport services

16. Inspection and acceptance
17. Sale or disposal of assets
18. Asset management, distribution & maintenance
19. Replacement, scrapping and decommissioning
20. Physical verification and reconciliation

4.5.3 HUMAN RESOURCE MODULE

The Human Resource Department will require a Module with the following functionalities:

1. Organization structure and establishment
2. Employee master database
3. Employee Onboarding and off boarding Process
4. Recruitment management
5. Training and development
6. Benefits administration
7. Retirement/resignation/termination and death cases
8. Human capital planning
9. Disciplinary action rules (Dar) and vigilance
10. Medical insurance and group life assurance
11. Employee insurance
12. Employee deployment (postings and promotion)
13. Leave administration
14. Integration with Attendance Tracking Module (attendance module, also used for biometric access control)
15. Pension scheme administration
16. Statutory reporting - interface with other modules/systems(external) for statutory reporting
17. Performance management
18. Document management module
19. Occupational safety and health
20. Career and succession planning tool
21. Employee self-service workflows (e.g. Leave application, reimbursement, etc)
22. Surveys on (matters employee satisfaction, work environment, gender mainstreaming among others).

4.6. Project Implementation Stages and Deliverables

4.5.3 Project implementation process

The Project is organized in seven (7) stages as listed hereunder:

- Stage 1: Project planning and conceptual solution definition: conducting feasibility, understanding the requirements and developing the Project plan.
- Stage 2: Detailed analysis and design of the solution: Create user requirements blue print and design the web-based platform prototype based on the blueprint.
- Stage 3: Development/customization and configuration of the platform incorporating the user comments including testing of each module
- Stage 4: Preparation of the required hardware provided by KIPRE to ensure smooth implementation of the proposed platform.
- Stage 5: System installation, implementation, integration with other relevant systems and end to end system testing.
- Stage 6: Provision of training to all the relevant groups in KIPRE (users,

Technical, administrators, super users and other stakeholders).

- Stage 7: Go live, Hand over, and Provision of Maintenance and Support during and after completion of Stages 1-4 for 24 months (with potential to extend on an annual basis subject to satisfaction by KIPRE).

All documentation to be delivered as part of this Contract must be in English and in softcopy (pdf) and hard copy.

4.7 Acceptance Process as per the deliverables in each stage

It is envisaged that the project will go through the following stages and the deliverables at each stage are as tabulated below:

Stages	Description	Project Deliverables	Proof
Stage 1	Project planning and conceptual solution definition: Understanding the requirements and developing the Project plan.	Requirements Document and System Design Document	Inception Report
		Full detailed project plan including work plan & Gantt chart	
Stage 2	Detailed analysis and design of the solution: Create user requirements blueprint and design the web-based platform prototype based on the blueprint.	Refined user requirements blueprint and the enterprise integration platform architectural design	Certificate of Acceptance and Sign Off for Technical Architecture Document, Final Business
		Web-based Integration platform Prototype based on the blueprint.	
Stages 3	Development/customization and configuration of the platform incorporating the user comments including testing of each module	Development/customization and configured integration Platform	Certificate of Acceptance and Sign Off for the tested system report
		Test reports for each Functionality	
Stages 4	Preparation of the required hardware provided by KIPRE to ensure smooth implementation of the proposed platform	Hardware configuration ready for installation of the proposed platform.	UAT Certificate
Stage 5	System installation, implementation, integration with other relevant systems and end to end system testing	Integrated System and implementation with other relevant systems, including end to end system testing reports	Certificate of Acceptance and Sign Off for testing report and end to end functional testing report
		Test report for the integrated system (end to end)	
		User Acceptance Test Cases/Scripts and UAT Plan	
Stage 6	Provision of training to all	Approved Training Plan	Certificate of

	the relevant groups in KIPRE(users, Technical, administrators, super users and other stakeholders).	Provision of training to all the relevant groups in KIPRE (users, technical, administrators, super users and other stakeholders). User and Training Manuals for the System Operational Manuals for all Hardware and Software	Acceptance and Sign Off for training documents
Stage 7	Go live, Hand over, and Provision of Maintenance and Support during and after completion of Stages 1-4 for 12 months. Subsequently, maintenance and support will be renewed on an annual basis subject to satisfactory performance as per the SLA	Handover plan Maintenance and Support plan for 12 months' warranty period. This will be renewed annually subject on satisfactory performance.	Certificate of Acceptance and Sign Off for handover and maintenance documents

4.8 Detailed Technical Specifications

4.7.1. General Technical Specifications

	GENERAL TECHNICAL SPECIFICATIONS
1.	Proposed solution is based on proprietary software and not open source.
2.	The proposed implementation covers all functional areas listed under Specific Technical Specifications
3.	The set of applications shall be by one software manufacturer. Kenya Institute of Primate Research(KIPRE) will not accept different software vendors
4.	Proposed implementation MUST have ability to interface with other existing systems within the organization
5.	Proposed implementation should support Extraction, Transformation and Loading of legacy systems data with no or minimal programming effort
6.	System supports ODBC and multi database environment
7.	Ability to scale UP in the future
8.	Has an In-built development/customization tool
9.	Multi-tenant, multi-user system
10.	Easily customizable
11.	Has an inbuilt adaptive workflow
12.	Web enabled i.e. The proposed solution must be accessible to users remotely and securely through the internet
13.	Has inbuilt backup and recovery
14.	User logs and audit trail
15.	Real time and near real time transaction processing updates
16.	Ability to define access privileges and rights as per business workflows
17.	Centralized data management for all modules/subsystems
18.	Secure access for system administrators
19.	Compatibility with office suite
20.	Ability to integrate with existing email service
21.	Consistency in layout, color, fonts and other design features among all modules/subsystems
22.	Online help system/manual
23.	Should support a menu driven navigation with drag and drop where necessary
24.	Single sign-on for all modules - a user signs once and has access to modules where she/he has rights
25.	Transactions made in one module should be transparent to other modules
26.	Customizable reports (standard document formats including excel, pdf)
27.	Capture data once, access in all points
28.	Should have executive dashboard for management.
29.	Every subsystem/module should have an analytic dashboard
30.	Consultant to extract, transform (where necessary) and load all existing data from legacy automated systems, soft copy, printed files and other materials
31.	24X7 support for system to be offered by the consultant during the contract period

32.	Compatibility with commercial off the self-reporting writing tools such as crystal reports
33.	System to provide data dictionary and database design documentation to facilitate preparation of ad-hoc reports
34.	Ability to create scheduled backups of system data. System should allow different backups including daily, weekly among others. as well as remote backups, online backups and multiple backups
35.	Ability to schedule data export and imports
36.	Multilevel approval of data capture and edits with the system (minimum 3)
37.	New version release notes
38.	Fix and patch notes
39.	Backup manuals
40.	Restore manuals
41.	Archival Manual
42.	System documentation - system structure schema, interface specifications, data/object/application descriptions
43.	Ability to support different levels of drill down in report design and generation.
44.	Ability to schedule report generation
45.	System logs should clearly indicate the kind of log (warning, error, access violations)
46.	Ability to implement password policy as captured in the [Organization] ICT policy
47.	Ability to support batch processing
48.	Ability to support DHCP connection between the server and the client computers
49.	Provide tools for managing and logging system configuration changes
50.	A project closure document in soft copy and three printed copies is to be provided at the end of project
51.	Dashboard for system administration where Administrators can choose various system variables such as performance indicators, system logs among others.
52.	Ability to monitor system performance
53.	System status notification
54.	Multiplatform solution
55.	Common approach to business process modeling and implementation
56.	Notification, task assignments, document management, task scheduling.
57.	The consultant must offer trial licenses for use during project implementation
58.	Consultant must be ready to enter into a contract with the client with regard to warranty, support and annual preventive maintenance services

4.8.2 Specific Module Technical Specifications

These will include:

1. FINANCE AND ACCOUNTING

Management Accounting (Budgeting)	
Budgeting Process	
	The system should incorporate online budget preparation functionality and should be able to cover all budgetary elements whether capital or operational expenses
	The system must possess functionality that allows budget preparation at activity, divisional and departmental levels prior to merging into a corporate budget.
	System should be able to maintain and track budgets and expenditure at activity, divisional, departmental and corporate level. It must be able to provide alerts upon attainment of defined threshold.
	The system must have a workflow approval for creating, uploading and updating the company's annual and supplementary budgets
	The system must be able to keep historic budget information
	The system must keep track of all changes to the budget.
	The system must link payments and invoices to budget line items for cost management purposes.
	The system MUST link payments to project budget line items for cost management purposes (where applicable)
	The system MUST be able to accommodate a budget calendar that may be different from a financial calendar
	The system should support rolling over of budget amounts/lines year on year
	The system should provide functionality to view actual data against budgeted data
	The system must be able to support reallocation of budgets between budget lines
	The system must support Activity Based Budgeting providing for a facility to capture objectives, activities and outcomes at item and sub item level
	The system must facilitate multiple years budgeting – prior years and at least 3 future years.
	The system must facilitate allocation of budget ceilings by activity and account code.
	The system must have ability to allow for creation of special budgets (Monthly, Quarterly, Biannual, Annually) etc.
	The system must support both Bottom-Up and Top-Down budgeting.
	The system must support commitment control by not allowing spending on a line item without a budget
	The system MUST be able to link advances to staff (imprest) and regional offices to budget. Funds so advanced must remain as commitments until they are accounted.
	The system MUST allow for importation of Budget from excel.

	The application should support copying of budgets from a financial period to another.
	The copied budget should be modifiable through application of percentages or absolute figures.
	The system must link all procurements and payments to the budget.
	The system must facilitate viewing of each department/function budget and expenditure to date.
Reporting Requirements for Budgeting Process	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	The reports must conform to the defined reporting templates:
	• Monthly budget reports • Quarterly budget reports • Annual budget reports • Actual vs. Budget • Year expenditure/revenue reports • Reallocation reports • Cost center budget reports in user defined period • Performance contracting reports • Un utilized commitments • Variance reports.
Budgetary Controls	
	When preparing the budget out-turn report, one must be able to generate it with the
	Factoring in all actual payments and committed funds (i.e. funds whose purchase requisition has been approved but the actual payment has not been made)
	Factoring in only actual payments made
	The budget out-turn should not include future payments (not yet incurred) as a result of scheduled LPOs or journals.
	The system must be able to capture funded program budgets (e.g. GoK, World Bank, etc.) and report on them per the funder's reporting template.
	The system must enable tracking of budget expenditure and produce a report of the Same
	Produce comparative financial statements showing:
	• Prior year budget data • Year to date budget • Annual budget
	The system must be able to produce reports on committed budgets, actual expenditures and balances per budget line/account holder
	System prevents department level users from updating budget information after it has been submitted.
	Allows Budget Office to "push" worksheets out to departments electronically for budget preparation.
Financial Reporting Requirements	

	The system MUST facilitate forecasting of costs and revenue in terms of trends based on historical data.
	The application MUST have following types of reports by date range
	• Profit & Loss account monthly, quarterly annual, comparative • Trial balance • Performance report • Forecasted Income Statement
	• Cash Flow Statement • Statement of changes in equity
	User defined
	Complete IPSAS formats including notes, IFRS formats,
	Complete Quarterly financial statements reports in IPSAS & IFRS formats
	User defined period reports
	Notes to the financial statements
General Ledger	
Chart of Accounts	
	One must be able to define and maintain the structure of the Chart of Accounts
	The system should allow for the same Chart of Accounts that can be used by multiple
	The Chart of Accounts must provide for a unique alpha-numeric, flexible account code
	The Chart of Accounts must provide for user-defined number of segments
	Changes to the Chart of Accounts must be controlled and require necessary approval or amendment to be restricted to authorized personnel
	The system must be able to maintain budgets tied to specific GLs
	The system must be able to create/setup GL accounts and deactivate the same without erasing
	Enable the viewing and extraction of GL accounts listing
	The chart of accounts MUST be flexible to accommodate the future business expansions in the segments & GL codes
	The application should facilitate summary account reporting based on all dimensions available in the database
	The system must be able to support reporting on different reporting templates
	The system MUST have the capability to create sub ledgers within the accounts defined or account categories for all possible combinations. The system MUST be able to generate reporting for specific accounts.
	The application should facilitate summary account reporting based on all dimensions available in the database
	The system must be able to support reporting on different reporting templates
	The application MUST have the capability to generate parent-child within the accounts defined or account categories for all possible combinations. The system MUST be able to generate reporting for specific accounts.
Reporting Requirements for the Chart of Accounts	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). <i>Users who perform this function will have to be trained on use of the tools</i>
	Reports with the following parameters:

	Expenditure/Revenue by GL code either individually or as consolidated
	Expenditure/Revenue by Cost center
	Supplier/Staff/Customer accounts
	Budget Vs Actual expenditure
	Based on posting date, date of data capture
	Reversed journals
	Based on transaction numbers, type, document totals etc.
	Able to translate amounts from functional currency or source currency in the originating ledger, based on a specified exchange rate
	Should be able to perform foreign exchange gain/loss per transaction and post in the designated account.
	The application MUST support currency Conversion:
	The application MUST support currency Revaluation.
	The application MUST maintain all effective exchange rates for all foreign currency
	The system must be able to support the Kenya Shilling as the functional currency and should further be able to support other currencies
	The system should allow upload of currency exchange rates downloaded in predefined file
Reporting Requirements for Currencies	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	Reports with the following parameters:
	- Foreign currency trends
	- Currency loss/gain per transaction
	- Currency loss/gain translation at defined periods
	- Invoices/Credit Notes/Debit Notes in foreign currency
	The system must be able to create and post automatic journal entries
	The system MUST provide a facility to input, update, copy, balance, and post the Journals. Journal Voucher Number MUST be automatically generated by the system.
	The system MUST restrict updates to the GL of a Journal Voucher after posting.
	The system must allow the holding of journal entries pending approval.
	The system must enable held journals to be viewed and posted
	For any transaction posted through this system, it must allow for Correction or reversal of the same through an approved workflow process
	When reversing a transaction, the system must maintain the previous transaction historically without erasing. However, for rejected journals, the system should cancel the transaction without keeping its record.
	The system should be able to handle different types of journals
	The system must be able to maintain a history of full details of all transactions and avail them for printing when required
	Maintain a closed period history on-line.
	A facility to enable enquiry on archived data and reports

	The system must be able to import/upload journal vouchers in batch from a Spreadsheet document or text files. There should be workflow for approving such uploads.
	The system must be able to export journal transactions in batch to spreadsheet or text file
	The application MUST have categories for single journals and batches
	The application MUST provide the capability to identify source documents or module references which are associated with the journal entry (e.g., Invoice No., Payment Voucher No., Telephone No. etc.) for reporting purposes.
	The application SHOULD provide for Recurring Journals.
	Recurring Journal Entries may be based on templates with predefined schedules.
	Posting to control accounts must only take place via business partners (employees, customers, suppliers etc.)
	The system must provide for period closing functionality
Reporting Requirements for Journals	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). <i>Users who perform this function will have to be trained on use of the tools</i>
	Reports with the following parameters
	- Foreign currency journals
	- Journals reports by preparer, reviewer, date posted etc.
	- Journals held (pending posting)
	- Journal reversal
	- Journals by date/user defined period
	The system must have a mechanism for defining a financial year and setting up accounting periods it contains.
	The system should be able to close accounting periods at pre-defined frequencies
	The system must allow for setup and updating separate accounting periods for adjusting and closing entries
	The system should only allow posting to the current period. Posting to closed periods must be subject to approved workflow procedure. Future posting MUST NOT be allowed.
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	Reports with the following parameters
	Notifications on due date
	Change of dates
	Calendar by due date
	Calendar by completed activities
	Calendar by pending activities
Other General Ledger Requirements	
	Setting up GL parameters that will ensure:
	Ledger validity and approvals are captured
	Handling of bank payments (A function on its own)

	Definition of currency rules such as payment limits, currency rates, tolerance levels, and other currency related parameters
	Authorization matrix
	Unique identification/numbering of all transactions
	Audit trail showing name of originator, details of the GL affected, date, etc.
	Query functionality must be sufficient to query all information that has been captured
	Capable of allocating costs across cost centers
	The system must be able to consolidate several general ledgers into one at reporting
	The system should enable one to preview all open items such as open purchase orders, open invoices, etc.
	Ability to meet requirements of the following types of tax and have provision for setting up any additional tax requirements:
	• Corporation tax • Withholding tax • Withholding Value Added Tax • Pay as You Earn (PAYE) • Value Added Tax (VAT) • Any other defined taxes • Reverse VAT
	The system must import opening balance of assets & liabilities (suppliers, customers, staff loans, Staff advances etc.)
	The system must have facility for adjusting entries after closing of the posting period/ financial year.
Reporting Requirements for Other General Ledger Requirements	
	The system must allow for posting of invoices based on LPOs/LSOs, GRNs or on account. It should allow for capturing of all invoice details
	The system must provide for raising of payment voucher based on invoice posted. Payment maybe full or partial payment.
	The system must allow advance payment (down payment) based on purchase document.
	The system must have provision for cancellation/reversal of posted invoice
	The system must have a facility for capturing supplier credit notes
	The system must link an invoice with the approval request (requisition) and the expenditure item.
	The system must calculate tax for vendor invoices and record tax transactions separately. The system must support different taxes and tax rates on an invoice.
	Automate the generation of remittance advice and tax certificate
	The system should be able to process payments in multiple currencies, capture the foreign exchange rate, and date.
	The system must have controls that prevent duplicate processing of payments or over-payment.
Accounts Payables	
	The system should be able to indicate payment type: cash, physical Cheque, EFT, Card, Mobile money transfer/pay, and RTGS

	The system must be able to maintain a complete payment history and enable extraction for analysis
	The system should automatically notify the payment recipient upon completion of the payment process.
	System should be capable of grouping several invoices to be settled as a single payment or settled individually
	Support matching: Requisition, Purchase/Service Order, Goods/Service Receipt Note, Invoice & payment:
	The system should be able to close a purchase order upon payment of the full amount. The system should also be able to close unutilized commitments.
	The system must be able to create and maintain supplier payment information (if not captured in the procurement when creating a supplier)
	The setting up of all supplier details should be via a workflow/process
	The system must interface with the procurement module so as to be able to retrieve all other supplier master details relevant for the payment.
	The system must be able to capture payment terms such as payment discount conditions and penalty conditions.
	The system must interface with the HR module so as to be able to retrieve employee master details relevant for payment.
	The system must be able to interface with the online banking platforms for uploading approved payments and notifications from the bank (accepted/rejected payments).
	The payment application MUST stop payment clearance for all the vendors whose payments are on hold due to specific reasons
	The application MUST support payment interventions such as partial payments, stop payments, void payments, write offs etc.
Reporting Requirements for Accounts Payables Requirements	
	The system must be able to generate the following AP reports:
	• Invoice Aging Report (using specific criteria -- department, date range, specific vendor or all vendors and suppliers) • Down payments/payment advances listing • Supplier Payment history report • Supplier statement • Contract Payment history report • Contract Payment History Report • Project Payment History Report • AP posting status reports per period
Accounts Receivables	
	Ability to record different types of receivables and revenues
	Integrated with GL and provides capability to update GL with A/R transaction
	Ability to bill based on various or combination of billing types with variable rates by customer

	The system must be able to automate the receipting process and generate Payment Receipt.
	The application MUST provide facilities to query accounts receivables
	The system should be configurable so as to allocate receipts into various GL accounts.
	The application must be able to restrict posting of receipts by users to specific accounts.
	The application MUST support the reversals, corrections of the payments and the receipts.
	The application MUST capture receipts other than revenue.
	The application MUST allow matching of receipts to invoices based on different parameters like customer id, name, invoice numbers etc.
	The receivable module MUST define Payment terms such as penalties and/or fines.
	The system must allow one to print a comprehensive customer account statement showing all transactions.
	The application must be able to process receipts in multiple currencies
	The system should be able to produce cumulative reports on receipts per customer, per bank, etc.
	The application should interface with the bank so as to support creation of automatic receipts based on the bank files having customers depositing the cash directly into the corporate account.
	The system must be able to interface with other modules so as to be able to retrieve customer details (such as: customer codes, customer name, location, contact details, etc.) and invoices being settled (licenses, penalties, etc.).
	The system must be able to set up payment parameters for customers such as: currency of payment, payment frequency, etc.
	The system must be able to handle suppliers who are also customers.
	The system must be able to detect duplicate customers by comparing a combination of unique customer details like the KIPRE internal generated numbers and the tax PIN.
	The system must be able to capture and maintain a complete history of customer transactions and generation of customer statements that can be emailed.
	Alerts and notifications when accounts receivables are due.
	The system must be able to produce exceptional reports so as to determine customers whose credit limit is older than a specified number of days.
	The System MUST generate dunning or collection letters, to have credit limit and credit hold functions.
	The system should be able to handle payments in excess of the receivable amount
	Ability to define Customer credit policies/limits.
	Ability to track a customer's credit balance and issue alerts upon attainment of a set threshold.
	The system must support bad debt provisioning.
	The application MUST have write off limits defined for users and inbuilt approval process for bad debts or adjustments.
	The system should have an employee self-service functionality that allows the staff to clear all outstanding balances before they apply for new per diem/ imprest.
Reporting Requirements for Accounts Receivables	

	The system must be able to generate the following AR reports:
	AR Aging Report:
	Using specific criteria -- department, date range, specific customer or all Customers. The report MUST have details in terms of payment terms, customer profile class, customer category, the amount overdue and the payment mode.
	Aging report categorizes receivables from clients based on time intervals:
	Down payments/payment advances listing
	Client Payment history report
	AR posting status reports per period
	Cash Receipts Report
	Client Statement
Imprest Management	
	The system must be able to address imprest management process

	The system must embed a workflow for application, verifying, reviewing and approving staff imprest
	The system must have a facility for defining per diem rates applicable to staff based on job group for different towns.
	The system must interface with the requisition module.
	The system should have an employee self-service functionality that allows the staff to Apply and account for outstanding balances before they apply for new imprest.
	The system should automatically reject imprest application for staff with unclearly advances
	The system should automatically reject imprest application for staff not included in the requisition.
	The system must embed a workflow for verifying, reviewing and approving accountability of staff imprest
	The system must have a facility for uploading accountability supporting documents.
	Imprest Management module should be interfaced with payroll processing component to enable correct recovery of overdue advances/imprest to the employee. This process is subject to approval by an authorized user
	The system should enable posting of imprest and their accountabilities entries to the GL.
	Raise alerts/Reminders or notifications on overdue petty cash/imprest both to the applicant and the issuer (cash office/Finance).
Reporting Requirements for Imprest	
	The system must be able to generate the following imprest management reports:
	Imprest disbursements by individual/amount/date/division/department
	Ageing staff imprest
	Aging report categorizes receivables to clients/staffs based on time intervals
	Client/staff Payment history report
	Client/staff Statement
Cash and Bank Management	
	The system must be able to capture advances.
	Staff must be able to apply for petty cash request online with the defined limits.

	System must have a workflow for processing approved petty cash requests.
	Automatic tracking of petty cash balance for purposes of replenishment.
	The system should provide for definition of petty cash float limits. The system must raise alerts when the limits are exceeded.
	The system should enable posting of petty cash transactions to the GL.
	The system should provide for creation and definition of bank accounts. This facility should define type of account and also capture important details such as account name, number branch, swift code etc.
Reporting Requirements for Cash Management	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
Bank Reconciliation	
	The system must provide for uploading of electronic bank statements
	Functionality for matching and reconciling entries in the cashbook with those on the bank statements by amounts, PV ref etc. The bank balance MUST be automatically updated online based on clearances.
	The system SHOULD interface with the bank banking platform to initiate payment receipts based on credits in the bank.
	The system MUST provide for creation of miscellaneous transactions to record bank-initiated activities like interest gained, bank charges etc.
	The system SHOULD have facilitated definition of matching rules and report on both reconciling and non-reconciling items
Reporting Requirements for Bank Reconciliations	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	The system must be able to generate the following:
	• Bank reconciliation report • Direct debits/credits • Unreconciled items
Bank Accounts	
	Bank details to be captured in full:
	• Bank code • Status (active/inactive) • Bank name • Bank branch • Sort code • Address • Account name • Account number • Lookup code • Transaction details: - Transaction limit - Transaction reference

	- Comments
	- Transaction type
	- Supplier code
	- Customer code
Reporting Requirements for Bank Accounts	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	• Deposit List • Deposit Report • Cash payments (supporting electronic fund transfer) • Cash receipts (supporting direct debit) • The reports conforming to KIPRE's existing bankers' requirements • Bank by Bank name/staff/amount
Cash Forecasting	
	The application MUST provide cash flows projections based on the transactions
	Processed in the integrated modules including receivables and payables.
	The application MUST provide the facility to define cash forecast templates such as:
	• Forecasting periods • Selection criteria for each source
	The application MUST be able to generate cash forecast in any currency based on the user's parameters assigned
Reporting Requirements for Cash Forecasting	
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	• Forecast Report
	☐
The system should have a functionality that allows the user to make requisition for either "Stationeries", "assets" or "Activity Approval"	
Requisition for Activity Approval	
	The system MUST allow the initiation of a request for approval for an activity by a user.
	The system must have a functionality that allows requisition generation for Program based activity and/or procurement-based activity
	In this request for approval, the system should have fields to input;
	• The Title of the activity • Select the Budget Vote line • Performance Contract indicator • Select Strategic Plan Goal & Area • Description of the activity • Justification • Expected output • Venue (County, Region) • Number of persons (including drivers) • Number of days • Activity Dates (from – To)

	Once the request is made, the system should electronically allow the approver(s) to access the request and make the appropriate approval within the system and must have an audit trail of changes. The system must have a workflow approval for creating, uploading, reviewing, updating and approving the requisition.
	The system should allow the user to indicate the state of urgency for the activity.
	The system should have an interface with the budget module
	The system should not allow the user budget for the activity to exceed the budget line'
	The system should have an interface with the procurement module and be linked to the procurement plan. .
	The system should not allow the user to include the supply of item/services not included in the procurement plan in the Procurement based activity.
	The system should not allow the budget for purchase of items/services in the Procurement based activity beyond the budget allocation in the procurement plan.
	The system should have an interface with the HR Module.
	The system should have a functionality that allows the user to include either KIPRE staff or Non- KIPRE staff or Both in the requisition
	The system should allow the user to select KIPRE staff as the activity participants for a Program based activity and include them in the requisition. The system should not allow the user to select individuals beyond the indicated Number of the activity participants
	The system should notify the user on the participants selected with overlapping activities as per the activity dates. It should caution the user and allow him/her to continue with without making changes or allow him/her to make changes. It should allow the management to view individuals included in the activity despite having overlapping activities.
	The system shall allow the user to develop activity budget from the main budget. The user shall define expenditure items and determine the total expenditure per expenditure item.
	In the budget creation, the system should allow the user to input;
	• Expenditure item
	• The rate per item
	• Number of items
	• Number of days
	The system should not allow the user to input number of days beyond the indicated activity number of days.
	The system shall allow the user to include DSA (where applicable) expense only for the selected participants of an activity. The system should not allow the user to submit the requisition unless the DSA (where applicable) for all selected participants have been included in the budget.
	The system should allow the user to indicate whether the expense item is ;
	• Procurement related
	• User related
	• Finance related.
	It should clearly indicate the total budget amount for the separate expenses.

	The system should have functionality that allows the user to submit the requisition as draft copy to the supervisor for review and/or as a final copy to the AIE Holder Budget Manager for budget approval.
	The system shall not allow the AIE holders to approve commitments outside their budget allocation.
	The budget should allow the supervisor to review and make comment on the draft requisition and revert back to the user for corrections. It should allow the user to make corrections and resubmit to the supervisor for review and approval as a final requisition.
	The system should not allow "Draft requisition" be submitted to the AIE Holder for commitment approval. It should only allow "Final requisition" be submitted for approval.
	The system should not allow the user to submit the requisition to the management for approval before clearance by the AIE Holder.
	The system should provide notification to the AIE holder once the "Final requisition" has been submitted for commitment approval
	The system should provide a notification to the user once the budget commitment is approved by the Accounting Officer/Finance Controller.
	The system should allow the user to submit the requisition to the management for reviewing, commenting and approval. It should allow the user to make corrections where the requisition has been reverted for clarification and further justification before resubmission to the management for approval.
	The system should allow the user to track the approval process of the requisition.
	Upon submission to the CEO, system should have a functionality that allows the CEO to "Accept", "Reject" or "Hold" a requisition subject to advise from relevant staff (. It should not allow the CEO to hold a requisition for more than pre-defined time.
	The system should allow the CEO to "Hold" a requisition and get clarification from relevant officers without the knowledge of the user and later "Accept" or "Reject (with reasons)" the requisition subject to the advice given
	The system should allow the CEO to "reject" a requisition subject to further clarification or "reject" a requisition permanently with reason. And on rejection the requisition should be sent into the document repository in the EDMS and the funds de-committed.
	The system should allow the user to make corrections and resubmit to the CEO for further consideration where the requisition was rejected subject to further clarification.
	The system should have a functionality that allows the CEO/HOD/HODIV to delegate the approval function to the relevant staff. It should provide a notification of such delegation to the person delegated to.
	The system should enable the CEO to make any changes in the requisition before approval.
	The system should not allow any staff to make changes to the requisition once approved by the CEO. The approved requisition should be automatically converted to PDF and stored in the Document repository into the EDMS

	The system should provide a notification to the User, to all activity participants, HHR&A, Finance and the Procurements once requisition has been "Accepted" by the CEO.
	B. Requisition for Stationeries/consumables
	The system should have a functionality that allows the user to make a request to the procurement officer for office consumables.
	The system should have an interface with inventory management module
	The system should allow the user to all select consumables they require before submission of the request for consideration by the approvers.
	The system should not allow the user to submit the requisition to the procurement officer without the approval of the Head of Procurement (HP)
	The system should notify the user and the procurement officer once the requisition has been approved by the HP
	The system should notify the user on the item requested is out of stock
	The system should notify the user once the consumables are ready for collection.
	The system should have a repository of the items requested by the users which were out of stock and notifies the user once the items have been procured. It should allow the user to resubmit the previous requisition to the procurement officer without making a new requisition.
	The system should track the time taken from the submission of the request to the collection of the consumables.

2. SUPPLY CHAIN MANAGEMENT MODULE

Formulation of procurement plan	
	Ability to create annual procurement plan
	The system to allow work flow process for preparation and approval of the procurement plan based on various initiators/processors and approvers.
	The system must enable various divisions to develop their procurement plans for the year whose view can be broken down to enable viewing as per various periods e.g. month-on-month, week-on-week, etc.
	Ability to allow end users to create a procurement requisition based on the procurement plan.
	Automatic confirmation of procurement plans against departmental/divisional budget codes
	Consolidation of procurement plans of various department/division into a single procurement plan and vice versa
	Ability to create, print and view of divisional, departmental and the consolidated procurement
	Enable the attachment of documentation to procurement plans submitted by departments and avail the same during consolidated viewing
	The system must be able to address the requirement of updating the
	procurement plan on a periodic basis by having an inbuilt workflow for updating and approval of the procurement plan
	Ability to track requisitions against the procurement plan at divisional, departmental and organization-wide level
	Ability to follow different requisition approval processes depending on the value of goods
	The system should be able to allow procurement personnel to group
	procurement plan requests into categories
	The system should be able to set alerts with respect to initiation of procurement plans
	Ability to indicate the approved method of purchasing for the requisition e.g. some requisition requires open tender, this should trigger the tender initiation process while others can trigger a purchase order directly.
	Provide a report of all pending requisitions as at a certain date showing how long they have been pending. Give periodic alerts to Procurement Division and the users for orders
Formulation of procurement plan – Reporting	
	Ability to track and report on purchasing trends against the procurement plan
	Procurement Plan implementation report based on a defined criterion e.g. per period, division, department etc.
Registration/Prequalification of suppliers	
	The system must support the registration and prequalification of suppliers
	The system must support an on-line supplier portal that shall allow interaction between suppliers and NACC.
	The suppliers should be able to:
	Track on-line the status of their procurement documents (e.g. Order, invoice, etc.).
	Maintain supplier information (e.g. Contacts, Directors, bank details, etc.)
	Register as a supplier and submit bids and seek clarifications pertaining to open bids.
	Embed a workflow for the supplier registration and prequalification process and capture approvals and comments associated with this process
	Should be able to capture the following supplier details and maintain a central repository (supplier master database):
	Supplier number (auto-generated)
	Supplier type
	Category of service
	Items / services supplied
	Supplier's name

• Multiple supplier addresses
• Office address
• Physical location
• Nature of business
• Telephone
• E-mail address
• Trade license no
• Certificate of incorporation/registration
• Registration no. & date
• Tax compliance certificate number
• Tax compliance certificate expiry date
• VAT Certificate Number
• VAT number
• PIN Certificate
• PIN number
• Details of directors (name, nationality, shares)
• Share capital
• Name of bankers
• NSSF Compliance Certificate
• NHIF Compliance Certificate
• Certificate of Good Conduct
• Access to Government Procurement Opportunities (AGLPO/LSO) Certificate
• Maximum value of business which can be handled by your firm at any given time
• NCA Registration Certificate Number and date of registration (where applicable)
• NCA Registration expiry date
• NCA Approved Classification
• IATA Registration Certificate Number and date of registration (where applicable)
• IATA Registration expiry date
- Bank details
- Supplier status (Inactive)
- Comments on the supplier
- Ownership/directorship of the company
The system must allow users in the procurement division to update the status of a successfully registered or prequalified supplier to various status e.g. active to inactive and
Allow sharing of supplier data in the central repository.
Detection of duplicate suppliers based on unique multiple supplier identification number such as PIN, Internal {COMPANY NAME} reference numbers, etc.
For suppliers with more than one location, the system should be able to capture all the alternate locations of the supplier under one profile (belonging to the supplier).
Enable the attachment of documents to supplier prequalification tasks e.g. tender advertised, supplier responsiveness, filled business questionnaire, prequalification document, etc.
The system MUST be able to block the suppliers who have been debarred
The system MUST be able to unblock the supplier by appropriate authority
The system MUST be able to record complaints about the supplier.
The system MUST maintain a list that shows the items supplied by different suppliers.
The application MUST facilitate assignment of different items/ products to a supplier upon prequalification/registration.

	The application MUST facilitate assignment of different items/products to a supplier upon prequalification/registration.
Registration/Prequalification of suppliers – Reports	
	The system should maintain Purchases Year to Date (YTD) in number and currency per
	The system MUST support LSO/LPO reporting of supplier performance analysis in a given period
	The system MUST support LSO/LPO reporting of supplier performance in a given period e.g. Price, quality, delivery, rejected items in number and currency amongst others.
	The system MUST support LSO/LPO generation of a report on shortlisted suppliers
	The system MUST support LSO/LPO generation of a report on status of supplier process.
	The system MUST support LSO/LPO generation of a report history of bidders who have been given work many times (to promote fairness). The report should have the following details:
	• Name of supplier
	• Date of award
	• Nature of work
	• Value of work
	• Date of prequalification
	The system MUST support LSO/LPO generation of reports for supplier company ownership
	The system MUST support LSO/LPO generation of historical information on purchase order/contract cancelled by Company, if any
	The system MUST support generation of reports for supplier company Ownership
	The system MUST support generation of historical information on purchase order/contract cancelled by Company, if any
Tendering and Requests for Quotations	
	The system must be able to capture the following tender details. At a minimum, these details
	• Tender number
	• Name / description of service, goods or works
	• Tender submission format e.g. combined technical and financial proposal
	• Location of the bid document e.g. on website or obtained from procurement office
	• Tender submission location
	• Deadline for tender submission
	• Date of tender opening
	• Bid Bond/ Bid Declaration Certificate
	• Purchasing fee for tender documents & mode of submission (banker's cheque, cash, insurance bond, etc.)
	• System generated evaluation criteria
	• Ability of online evaluation and scoring
	• System supported evaluation START of Tender closure and end Date after 30 days from
	• Tender evaluation results (both technical and financial results)
	• Currency of the quotations
	• Tender Validity period
	• Tender document (specifications, terms & conditions, etc.)
	• Status (Evaluation, under negotiation, awarded, advertised, etc.)
	• Value of tender/quotation
	• Name of bidder
	• Number of tenders issued
	• Responder details: Name of responders, value, technical and financial scores, etc.

	• System should be able to capture the tender opening proceedings and registration of
	• Location of the suppliers
	• Performance bond value
	• Expected date of start and completion
	• Source of funds/budget availability for the tender
	• User department
	• Date of contract signing
	• Name of persons signing the contract/signatories
	• Date of advertisement
	• System generated evaluation report
	• System generated professional opinion
	• Date of tender award
	• Method of tender procurement (direct procurement, open tender, restricted, etc.)
	• Reasons for using the method of procurement
	• Persons who approved the tender
	• Tender termination details: tender number, reasons for Termination
	The system should support LSO/LPO the generation of tender number for the different types of
	The system must be able to print out the tender details above for purposes of advertisement and reporting
	The system should have the functionality to manage procurements through Open Tendering
	The system should have the functionality to manage procurements through Request for Proposals process
	The system should have the functionality to manage procurements through Two-Stage Tendering process
	For all the above tendering processes, based on the Procurement Plan, it should then provide alerts (to user and procurement divisions) within a pre-defined advance period to initiate
	The value based on which the system determines whether an RFQ or a tender is needed should be configurable as per the procurement method.
	The system should support the RFQ process by providing a workflow that allows procurement Division to:
	• Receive purchase requisitions from the user department/division
	• Convert the purchase requisition into an RFQ if it is less than a specified amount
	• Allow prequalified suppliers to be selected.
	• Automatically send the RFQ to the selected suppliers via email or allow for printing
	• Convert an RFQ to the procurement division's purchase Requisition
	• Convert the procurement division's purchase requisition to an LPO/LSO upon approval
	• Email the approved LPO/LSO to a supplier.
	The workflow must be able to clearly capture all approval stages that have taken place.
	Provide functionality for evaluating and ranking supplier responses to an RFQ so as to determine the lowest quoting vendor.
	For each RFQ sent, the system should be able to capture the following details:
	• RFQ reference number
	• Description of service
	• Names of suppliers to whom the RFQ was sent
	• Name of responders
	• Prices quoted
	• Results of evaluation
	• User defined comments

Ability to keep track of the tender evaluation process and stages and time frames through the process including:
• Tender opening:
• Technical evaluation
• Financial evaluation
• Management of tender opening/evaluation committees
• Supplier notification
The management tender opening/evaluation committee's access rights are only valid for 30 days. System to provide alerts and reminders to the committee members.
Ability to track timelines for each stage of the procurement process
Ability to maintain documents associated with the tender process such as:
• Minutes of opening of tenders
• Evaluation reports
• Contracts
• LPO/LSOs
Ability to create a "single "contract number per physical contract that can be utilized across all operations of the ERP, and other {COMPANY NAME} systems.
Create standardized contracts quickly and easily by utilizing standard menus, lists and auto-fills for LPO/LSO population of contract data.
Ability to create contracts using standard terms and Clauses.
The system support LSO/LPOs required fields to avoid missing information

The system differentiates between prospective and existing vendors.
Allow special item products to be defined as needed
The system should have the ability for contract specialists to document the products covered by the contract. This should include general and specific product information.
Build mechanisms for pricing and service-level agreement flexibility into the contract.
Support for document management to maintain a tender library of templates and sample documents for the various elements of a tender including tender terms and conditions, draft contract terms and conditions, specifications and related documents
Ability to track timelines associated with each stage in the contract process and flag where these are exceeded
Ability to track status of bid bonds. Bid bonds for unsuccessful bidders should be returned when sending regret letters.

Tendering and Requests for Quotations – Reporting

The system MUST be able to generate reports on tenders in the pipeline and their status
The system MUST be able to generate reports on status of the tendering process e.g. contract being drawn, awarded, evaluating, advertised as per specified periods. Alerts should be created to remind users.
The system MUST be able to generate reports on a list of tenders whose submission dates were extended.
The system MUST be able to generate reports on a list of RFQ sorted by different criteria e.g. RFQ number, supplier, material group, material/product etc.
The system MUST be able to generate reports on a price comparison list for RFQs.
The system MUST be able to generate reports on a summary of tender awards by procurement method, value, reserved tenders etc.
The system should generate reports on the responsiveness in a particular period e.g. How many responsive tenders in a particular period?
The system should generate monthly contract status alerts to user divisions.

	The system should generate a list of tenders that have been terminated.
Purchase requisition and Purchase Order Management	
	Embed a workflow for the purchase requisition process and capture approvals, comments
	The system should allow for requisition approvals based on the set thresholds for the different approvers in the work flow process.
	Avail online a purchase requisition form for internal users for raising purchase requisitions to the procurement division. The purchase requisition form should capture the following
	• Department and Division raising the request • Requisition date • Description of the item requested • Quantity of items • Reasons for purchase
	• Technical specifications (e.g. TOR, engineering specifications, etc.) • Budget code
	• Budget Officer to confirm availability (this should be the funds available as at the time of making the requisition) • Name of requestor • User divisional/departmental/Director approval • Date of approval
	Once the purchase requisition is submitted to procurement, the procurement division should be able to input extra data that will enable the requisition to be converted to a Purchase
	• Name of suggested supplier • Address of suggested supplier • Quantity & unit of measure • Description/quality of goods • Costs
	• Name of alternative supplier • Address of alternative supplier • Delivery address • Delivery date of goods • Deadline of submission of the quotation/tender • Discount (percentages, amount) • VAT • Tender/quotation number • Opening Date • System generated price comparison
	• System generated comments/opinion for recommendation for award
	The system should have a workflow that allows the following to be carried out when raising a purchase requisition:
	• Enables of the requisition against departmental budget so as to confirm the verification • Capturing approval/rejection of the requisition by the user departments/Divisional head • Verification by Budget Officer that the budget code has been allocated correctly • Computation of divisional budget balance following the final approval of the purchase
	The workflow for raising a purchase requisition must be set up such that approval of the budget code associated with a purchase requisition is subjected to the approved procurement plan and the available budget
	The system should be able to perform funds reservation for budgeted Items

	For purchase requisitions that have been rejected, the system must be able to release the commitment of funds
	The system must automate the raising of purchase requisition for stocked and non-stocked goods, and services from short listed suppliers
	The system MUST capture the following details for Purchase order header
	• LPO/LSO Number • LPO/LSO description • LPO/LSO type (maintenance & repair, one-time purchase, and service contract) • Requestor ID • Supplier physical address • Suppliers' contact person/directors • Expected delivery date • Comments • Delivery address • Terms
	• Payment term • Full /Partial Delivery • P.O date
	• Warranty • Total value of the LPO/LSO/Contract • Quantity
	And any other necessary details for an LPO/LSO
	• Local Agent • Audit Trail of the Creator, Approver and Modifier of the LPO/ LSO
	The system SHOULD be able to print the LPO/LSO information with company logo only once as an original copy. The re-print option SHOULD indicate duplicate copy.
	The system must have a workflow for generation / raising of local purchase orders following approval of purchase requisition
	Ability to record purchase order acknowledgement from vendor when LPO/LSO is sent by email.
	The system should be able to generate Purchase Orders (LPO/LSO) through a workflow.
	System should automatically generate an alert if acknowledgement is not received within a specified time from LPO/LSO issue date
	All LPO/LSOs generated should include terms and conditions; the system should allow for the definition and maintenance of the terms and conditions.
	The system shall allow an authorized user to update delivery or payment method for a purchase
	Ability to consolidate related procurements
	The system shall notify the user about any changes made to the order.
	Confirmation of item stock levels prior to raising a purchase requisition
	The system should have a workflow for processing Purchase Requisitions where:
	• The supplier and prices have been identified (Prequalified)
	The system must be able to capture all approvals related to the purchase requisitions. These
	• Electronic signoff/approvals at the user department level (name, department, Division, date of approval) • Approval references such as referencing to tender deliberation minutes/reports etc. • All approvals on the system must be clearly captured.
	The system should have provision for raising purchase requisition for recurring services
	The system should have provision for raising purchase requisition for recurring services that do not issue an invoice such as invoices from utility companies, etc.

	The system should be able to provide for supplementary Purchase Orders and Purchase
	System should be able to support LSO/LPO procurement of different services i.e. fixed rate contract service/fixed rate temporary labor/rate based temporary labor
	Manage the entry of Service Entry Sheets i.e. the acknowledgement of the of services received against an LPO/LSO or Contract
	System should be able to show International commercial terms and display clearly the terms with selection options for Countries and their city (s). the final output on LPO/LSO should be e.g. Free on Board (FOB)
	Ability of the system to input and analyze price trending per item and units of Services (Market Survey)
	Ability of the system to track the total cost of Ownership for projects. The system to provide traceability of all cost relating to initial acquisition, installation, maintenance/support LSO/LPO as well as disposal/residual value especially for projects.
	The system should be able to generate an acceptance certificate provide flex fields for end user acceptance of goods and comments for both the NACC internal processes and the
	Ability of system to generate material requests based on the set-up min-max levels.
	Ability to have the material requests generated go through an approval process and a purchase order or requisition created from them.
	Ability of the system to allow for multiple line description per LPO/LSO
	Processes multi-item type LPO/LSOs
	The system should be able to process LPO/LSOs with multiple delivery Locations
	The system Checks for duplicate Purchase order numbers
	Purchase order/requisition numbers to be system assigned
	System should allow reprint of LPO/LSO with 'copy, amendment no., reprint' marked on the print
	Ability to enter project details while creating purchase order and interface the details to budget
	Ability to print purchase order terms and conditions
	Ability to allow authorized users to track status of approval their purchase requisitions and related purchase orders
	Ability to restrict information that end users should view in the procurement process
	Ability to enforce requirement for a contract based on the nature of items/service or value
Purchase requisition and Purchase Order Management- Reporting	
	The system MUST Provide a report of all requisitions for a specific Period.
	The system MUST provide a report of all pending requisitions as at a certain date showing how long they have been pending
	The system MUST generate reports on Frequency and volumes purchased and seasonal trending of items
	The system MUST generate reports on a list of open purchase orders
	The system MUST generate multi-dimensional reports on open purchase order e.g. By cost
	The system MUST generate reports on overdue supplies, which can be used to follow-up with suppliers for the material to be supplied.
	The system MUST generate reports on Purchase order commitment for the specified period.
	The system MUST generate reports on Purchase order detail showing the details of all type of purchase orders specified by the user. It MUST display the quantity received against the
Goods/Services Receipts and Inspections	
	The system allows for the receipt of goods, services, works, repaired items, inter stores
	The system automates generation of Goods Received Note (GRN) that must be associated / matched with an open Purchase Order(s).
	The system allows for full or partial receipts against a purchase order or contract
	The system must allow for the inspection of goods/services/works
	The system must allow for ad hoc set up of the Inspection and Acceptance Committee

	The system must be able to capture the Inspection and Acceptance Committee reports after a workflow approval process
	The system must be able to address situations where the goods have been received but needs to be returned to the supplier.
	The system should be able to provide alerts to key stakeholders on attainment of certain GRN
	System should allow invoicing only for an approved GRN or for consolidated GRNs
	The system SHOULD have the ability to support one-time vendors
	The system SHOULD have the ability to maintain approved supplier catalogue/lists for inventory
Goods/Services Receipts and Inspections – Reporting	
	The system should have the ability to generate reports on pending Purchase Requisition
	By supplier, by item and by department.
Stores Management	
Inventory Item	
	The system MUST allow the definition and maintenance of alpha numeric character codes for
	The system should have templates with predefined set of item attributes
	The system MUST capture the following important information for each Item:
	- Item Number/code (barcode or QR Code) - Item description (brief information) - Unit price - Minimum stock quantity, maximum stock quantity - Safety stock level, re-order stock quantity - Last stock date, last stock quantity - Cycle count code - Physical attributes such as weight, volume, length etc. - Lot number, serial number, bar code number - Supplier information, country of origin - Expiry date, purchase date
	The system MUST allow the definition of the following inventory types inside the application e.g. Consumables, Assets etc.
	The system MUST have an ability to define new Item categories and Catalogues based on their characteristics
	The system MUST allow the assignment of Inventory items to one of these categories and catalogues defined
	The systems allow collecting of item information using barcodes or QR codes during receiving and issuing of items.
	The system allows for the issuance of goods and assets and collecting of the data using barcodes/QR Codes, inter stores transfers, etc.
	The system should allow approval of issuance of all stores or assets through the requisition form by the officer in charge of the procurement function or only delegated officer
	The system automates generation of Goods Issue Note that must be associated/matched with a stores requisition note.
	The system allows for full or partial issues/receipts against a stores requisition note or contract
	System should allow for creation and maintenance of approved items price lists
	System should allow for creation and maintenance of supplier items catalogues
	System should allow for creation of an internal Catalogue for all items/Services
	The system allows for the delivery of goods to a specific store
	The system must allow for the generation of:
	- stores issue notes - stores receipt notes

	• goods in transit notes
	• proof of delivery notes
	The system has the functionality that allows different movements of stock items from one store location to another
	The system has the functionality to close a store for stock take Purposes
	The system has the functionality to open a store after a stock take
	The system has the ability to create a new storage location including:
	• A new store
	• A new stock room
	• A new bin location
	The system has the ability to retire an existing storage location including:
	• A store
	• A stock room
	• A bin location
Inventory Item – reporting	
	The system can generate, per storage location, the store movement reports including:
	• Current stocks (Value and Quantity reports, reorder level, balance to reorder level, etc.)
	• Receipts per a selected period (Value and Quantity LPO/LSO reports)
	• Issues per a selected period (Value and Quantity reports)
	• Transfers ((Value and Quantity reports))
	• Damaged stocks (Value and Quantity reports)
	• Expired stocks (Value and Quantity reports)
	Stock Analysis Report: this report gives information classifying all the items available based on their importance and value as follows:
	• Item categories Report
	• Stock issues
	• Per user
	• Per department/Division
Inventory maintenance	
	Embed a workflow for the receipt/rejection of inventory (including related procurement and stores movements) and capture approvals, comments and documentation associated with this process/task and updating of the inventory data.
	Automatic updating of inventory levels and balances after issuance/reception of inventory (stocked items and services)
	Valuation of stock: The following options must be available for calculating the unit cost of a good in the store:
	• Last in First Out (LIFO)
	• First in First Out (FIFO)
	• Simple average
	• Weighted average
	The following details should be captured for updating the stock levels:
	• Item / part number
	• Item name
	• Inventory type/category
	• Item description
	• Stock date
	• Comments
	• Goods Receipt Note (GRN) number

	• Delivery note number
	• Quantity in
	• Cost of items
	• Quantity out
	• Expiry date
	• Supplier number (referenced to the supplier master data in the procurement module)
	• Supplier name (referenced to the supplier master data in the procurement module)
	Allow the receiving of inventory both at once and partially
	Should maintain a central access-controlled items master database
	The system must give alerts and notifications when stocks are at the re-order level and on
	Embed a workflow for the disposal of items (fixed assets and store items) and capture approvals, comments and documentation associated with this process/task and updating of the information in the fixed asset register or inventory.
	Support the identification of items for disposal both manually and through preconfigured rules e.g. expired, useful life exhausted, damaged, etc.
	Automatic generation of disposal codes
Inventory maintenance – Reporting	
	The system must have provision for extracting any or all of the information above as a report.
Stock takes	
	The system should be able to generate a Stock take count lists
	Allow the manual stock verification stock counts capture by the system, reconcile the physical count against the system count and produce a variance report
	The system should allow for the different actions to be carried out to address the identified variances (e.g. adjustments of the system values, or capture of missing store movements, etc)
	The system should allow for approval of the stock take through a workflow process
	The system should allow for the following types of stock takes:
	• Annual stock take
	• Periodic stock takes
	• Ad hoc stock takes
	• Select (e.g. Fast-moving items, etc.) stock takes
	The system should have the ability to stop, complete, approve/cancel, and/or suspend the movement freeze the stock movements during the period of stock take.
	The system should allow for scheduled stock takes alerts
	The system should have the ability to set up an ad hoc Stock take and Physical Verification
	The system should have the ability to set up access rights to the ad hoc Stock take and Physical Verification Committee for only the duration of the stock take
	The system should have the ability to carry out the stock take for a Division or stock room of the
	The system should have the ability to generate all standard reports with respect to stock takes
	The system should allow for capture of stock take notes/observations to accompany the physical
Additional Reporting requirements	
	In addition to providing a flexible reporting mechanism, the system must be readily able to generate the following reports must be readily able to generate the following reports:
	• Value of store with options for calculating the value of the Store
	• With items flagged for disposal
	• Minus items flagged for disposal

	The officer in charge of the procurement function should have access to a screen that provides him/her with an update on the status of all workflows in his/her division. The objective of this is to allow the officer in charge of the procurement function to have an overview of the status of all requests and activities of his department.
Project Administration and Accounting	
	The system is expected to provide fully automated interfaces with the following • Procurement module to receive supplier invoices
	The system MUST perform flexible budgeting for capital and operating projects while adhering to level of budgetary controls established in the General Ledger.
	The system should have the ability to differentiate transactions between operating and capital budget items.
	The system should provide budget forecasting for multi-year periods, which can support development of a Capital Improvement Plan and an Operating Project Improvement Plan.
	The system should allow for multiple fiscal year budgets for projects.
	The system should provide multiple revisions and amendments to the budget in the above detail.
	The system should track projects over multiple years.
	The system should track projects by budgets.
	The system should allow users to create and maintain project schedule templates.
	The system should support the recording of scanned supporting documentation, and will link the document from the document management system (DMS) with the ERP transaction.
Project Accounting	
	The system MUST be completely integrated with other system modules to provide real-time transactional information for requisitions, contracts and labor distributions. These modules include but are not limited to the following: • Purchasing • Payroll
	The system MUST track both outsourced contracts and in-house spending to a project.
	The system should track multiple contracts to a single project
Project Budgets	
	The system should allow for inquiries into project budgets, pre-encumbrances/encumbrances, revenues, and expenditures at any
	The system should access prior years' project cost.
	The system should establish reimbursable budgets for projects.
	The system should track Reimbursable budgets control expenditures available for project billing
	The system should report actual project cost-to-date for the capital or operating budget.
Reporting Requirement for Project Administration and Accounting	
	The system should provide multiple levels of reporting
	Dynamic reports with the provision for a drill-down capability.
	Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools
	Following additional reports:
	• Monthly budget reports • Quarterly budget reports • Reallocation reports • Actual vs. Budget • Year expenditure/revenue reports • Annual budget reports • Cost center budget reports in user defined period

	Performance contracting reports
E - Tendering Requirements	
Access E – Tendering Portal	
	Access to the e-tendering system should be by way of either User ID/Password
	for some Tenders and through digital signatures and an existing Telegram bot for some Tenders (based on {COMPANY NAME} criteria). All ways of Access should be available. {COMPANY NAME} should be able to decide which Tenders will be accessed through User ID/Password and which will be through digital signatures.
	The portal MUST be able to interface with the Telegram Application in a predefined bot.
	It should be possible for the Administrator to create Tender Owners and Users with any of the two modes i.e. User ID and Password or with digital signatures
	The system should have at least 3 levels of Access Control:
	Administrator - who will be the super User and create Internal Users
	Tender Owners - who can approve Tenders
	Users - Third Level will be the Users who will create Tenders, create corrections, attend pre-bid meetings, download Tender documents of Vendors, evaluate etc.
	Users (Outside the Organization)
	The system should cover full life cycle of purchase (from Initiation to Purchase Order)
Types of Tender	
	Should support various types of Bids applicable at {COMPANY NAME} namely:
	Open Tendering
	Request for Proposals
	Request for Quotations
	Restricted Tendering
	Direct Procurement
	Low Value Procurement
	Design Competition
	Electronic Reverse Auction
	Framework Agreements
	Force Account
	Two-Stage Tendering
	The system should have the facility of tender preparation/indent / Creation that allows for one
	Approve and reject Indent
	Split Single Indent into multiple Tenders
Tender Notice Creation	
	It should be possible to float Tender notice in any format including emailing of tender notice Government Advertising Agency, selected or pre-qualified bidders
	Notices should be visible to Vendors only after it is approved
	System should allow Archival of Tenders and allow retrieval when required.
	System should allow Cancelled Tender to be revived
	It should be possible to categorize a Tender as New, Live, Archived, on-hold, Cancelled, etc.
	There should be provision for attaching images with Tender Notice
	The system should have the capability of assigning unique internal reference number to each
	There should be a facility for Online Pre-bid Meeting, if required
Tender Setting	
	System should support Tenders with or without RFP cost
	System should support Tenders with bid security requirements (or Earnest Money Deposit)

	System should support Tenders with or without Pre-Bid Meeting
	System should support Tenders with or without pre-qualification phase
	System should support Tenders with or without Technical Bid
	System should have provision for inviting EOI and issuing RFP to only pre-qualified bidders of
	System should have inbuilt check to ensure that incomplete bids in any manner is not accepted
	Bid withdrawal option should be available such that Vendor is allowed to withdraw bid, that they might have submitted on or before due date and time.
	System should have facility of sending emails to all Registered Vendors
	System should have the ability to set maximum size of single file upload
	System should have ability for uploading various types of documents
	System should have facility for Vendor Registration & Administration
	It should be possible to down load Tenders free of cost or at determined cost
	System should maintain Vendor details of those Vendors who have downloaded the Tender
	It should be possible to specify online brief description of the Tender to enable Vendors to view
	System should allow upload of multiple documents for a Tender.
	System should have the facility of virus scan for uploading documents

Electronic document formats	
	Support the capture of records created in native file formats from commonly used Software applications such as:
	standard office applications (word processing, spread-sheets, presentation, simple databases)
	email client applications
	imaging applications
	web authoring tools
Online Pre-Bid Queries	
	The system should allow Vendors to post any number of questions.
	It should be possible for Vendors to upload pre-bid queries within the timeline prescribed
	The system should have the facility of masking the name of the Vendors who have raised the questions and should be visible only to {COMPANY NAME}
	It should be possible to upload corrigendum and correlate them to the main Tender
	Corrections should be maintained chronologically
	Corrigendum should be made visible to all those who have already downloaded the original
Vendor Registration	
	Only those Vendors who Register with {COMPANY NAME} for each Tender shall have access to
	It should be possible to provide different levels of access to the employees of the Vendors as required by them
	New vendors have to register online on the E-procurement website by providing requisite details and obtain valid username, password and Vendor
	ID for participating in the bidding process
	The system should have Provision for uploading / updating of vendors.
	Authorized {COMPANY NAME} users should have the authority to change the vendor details.
	Option to be provided to upload the Public Documents like Terms & Conditions, Calendar of Events, etc.
	Option to add / modify the different taxes like, VAT, Withholding Taxes, Excise Duties, Customs
	Option to Approve/Reject the vendor based on his technical suitability for each item is to be
Bid Submission	
	System should allow online submission along with attachments
	Allow extension of tenders opening date before closure of tender
	Tender Opening links should not get activated before due date and time
	As each phase gets completed the comparative chart of Vendors should get auto generated
	Rejected Vendors should not qualify for next round automatically
	System should have the facility to export data to spread sheets
	System should support online Tender Opening where Vendors can participate online from their respective offices
	"Generate Bid Comparison Sheet", Comparative Statement should be generated automatically. The Comparative Statement will be in MS Excel format.
Bid Opening	
	In case of multi envelope Tender, it should not be possible to open the second stage envelope unless the first stage (envelope) is completed
	System should have a provision that {COMPANY NAME} can see the name of the Vendors who are present online at the time of online Tender Opening event
	System should have a provision such that Suppliers can mark their presence online when they try to participate in online Tender opening event
	Financial tender opening links should not get activated before due date and time.

	Should support appointment the online appointment of the various Procurement Committees (e.g. Tender Opening, Evaluation, Disposal, Inspection and Verification, Specialized Contract Implementation Team) with the various approval level.
	Bid Evaluation
	Ability to analyze quotations
	Specifications issued during purchase requisition should be available during evaluations and inspections
	System should electronically store the minutes to each purchase request. In particular, the Evaluation committee minutes should be linked to the purchase requisition.
	No amendments to confirmed minutes should be allowed by the system
	System should be able to capture and calculate the cost comparison for bids received by retrieving the information from the captured bid's details.
	The system should be able to capture the technical evaluation criteria including • Mandatory criteria • Detailed evaluation showing minimum score for which the bidder proceeds to the next level
	The system should provide a linked timeline of all the activities related to a purchase request from the time the user raises the requisition to the point the supplier gets payment. Where there are any deviations from the happy path, the system should keep a record of this.
	Reverse Auctioning
	System should have provision of Reverse / Forward auctions, including Rank bidding, Alias bidder etc.
	System should have provision for Parameters Defining and Setting of Opening Price, Historic Price, Reserve Price etc.
	The System should display and record Start and End Time
	There should have flexibility for Extensions of closing rules and/or Times
	There should be facility of Uploading file attachments
	There should be facility for Message Broadcast to Vendors during auction for information and clarification
	Administration features like Roles and Rights, Checking login status of participants etc. should be available
	The system should be capable of providing event-wise history, Vendor-wise, Product-wise, date-wise reports
	System should have the provision to generate L1, L2, L3 chart dynamically
	Audit Trail - logs should be available for all User Transactions and administrative actions
	The system should have the ability to set:
	Auction Opening Price
	Auction Historic Price
	Auction Reserve Price
	Revised Extension Times
	Auction Start and End Time
	The system should have the ability to set Data validation rules, Auction Rules like lowest / highest bid wins or highest / lowest quality wins etc.
	Facility is provided to {COMPANY NAME} to define criteria for accepting bids during the auction, with any one of the following options:
	'Meet or Beat on Start Price' and also 'Beat on Rank-1 Bid'
	'Meet or Beat on Start Price', and also 'Meet or Beat on Rank-1 Bid'
	'Beat on Starting Price', and also 'Beat on Rank-1 Bid'
	'Meet or Beat on Start Price', 'Beat on own Last Bid'
	Should have ability to provide for selection of the 'Currency' for bidding.

	The system's Disclosure Norms for Security & Transparency capabilities should allow for:
a)	Display of system-generated 'Pseudo-Identity' in lieu of each Bidder's 'Actual-Identity'
b)	Display of Rank-1 Bid Details (i.e. Rank-1 Bidder's Identity)
c)	Display of Bidder's Own Rank
d)	Display of Other Bidders' Details
e)	Display of Reserve-Price
	The system maintains a complete Audit-trail of the various activities of the auction process.
Purchase Indent Management	
	Indent Creation/tender preparation - Facilitate online creation of the works and goods indents in standardized formats. Facilitate upload of documents (Drawings-scanned or {COMPANY NAME} format, technical specifications, etc.) with the indent. The system should auto generate a unique indent number for each new indent.
	Demand Aggregation - In case of goods procurement, provide online templates for demand estimation from several divisions' locations. Support LSO/LPO consolidation of several indents into a single indent by a centralized indenting authority.
	Estimate Preparation – In case of works and goods procurements facilitate preparation of estimates should be supported.
	Indent Approval Workflow - Facilitate hierarchy-based workflow in the system for creation and approval of the indent. In the workflow system, comments made by an approver at each stage or creator should be frozen, stored and viewable. In case of works procurement, facilitate the workflow for creation and approvals (Administrative & Technical Approvals) of plans and estimates. Facilitate configuration of separate workflows depending on the type & value of work selected at the time of creating the indent (e.g. major or minor work, original or repair).
	Indent Approval - Facilitate online review of submitted indent by the approver. In case of works procurement, support LSO/LPO use of Digital Certificates for providing administrative approval and technical sanction online. Facilitate providing comments, etc. with the indent. System should capture comments of the approvers at each stage. Update/cancel the indent number based on the results of the review by the authorized approver. Provision for
	Identification of indents under project code - Allow linking of the indent number with the overall project code, if the procurement is part of a bigger project with multiple procurements (indents). Facilitate computation of the overall project expenditure based on the expenditures of the individual procurements (indents) linked to the project code.
	Integration with Budgeting Module - Allow integration with existing budgeting module to facilitate validation of project (indent) cost with available departmental budget, to avoid project
	Indent Tracking - Allow tracking of the indent throughout the creation and approval cycle using the unique indent number
Vendor Contract management	
	The system should support the automatic/balanced allocation of the file(s) to the contract drafting officer for drafting the contract
	The system should support the sending of an allocation alert to the drafting officer and contract reviewer(s)
	The system should support the reallocation instructions by the reallocating officer and capture the reason for the reallocation
	The system should support the upload, storage, versioning and tracking of iterations of draft documents in their original form (e.g. MS Word, MS Excel, PDF, etc.)
	The system should support the insertion of annotations on the draft contract document by each
	The system should support the tracking of comments made by reviewers (i.e. both internal and external reviewers)
	The system should support the final editing of the penultimate contract (i.e. Notification of award, Letter of acceptance, negotiation minutes, draft contract, etc.) by the drafting officer
	The system should support the uploading of the signed contract by authorized personnel
	System should enable supplier(s) to digitally sign the contract upon granting of access rights.

	The system should support the sending of alerts upon uploading of the signed contract to the relevant internal stakeholders (e.g. Finance, Procurement, user departments, etc.)
	The system should support the flagging of the file serialized number with the various statuses such as opened, signed, registered, open, on-hold, closed.
Project Management Requirements	
	The bidder MUST provide information on the proposed, recognized methodology for implementing the integrated Enterprise Resource Planning including the functional analysis, installation, configuration, testing, staging, data migration deployment activities, risk
	The vendor MUST develop an overall implementation strategy which includes a comprehensive project implementation plan; it shall include, but not be limited to:
	• Tasks estimation
	• Project planning
	• Work allocation
	• Progress tracking and monitoring
	• Reporting scenarios
	The vendor MUST develop an issues resolution methodology.
	The vendor must be verifiable with manufacturer of the system
	The vendor MUST develop a risk identification and mitigation strategy and develop a contingency plan.
	The vendor MUST develop technical standards for modifications, security, conversion, and system administration for all modules.
	The bidder MUST describe what tools and techniques will be used in managing this project.
	The bidder MUST describe the project management team structure, along with their technical qualifications and roles and responsibilities of all team members.
	The bidder MUST describe the approach that will be used for task management and tracking as well as project meetings and documentation, as well as the updating of the senior management on timely status of the project.
	The bidder MUST describe what resources (Business & IT resources) will be necessary for the project to succeed including clear resource roles and responsibilities during the project and how to better utilize these resources, and transfer the knowledge for them.
	The bidder MUST describe what procedures will be used to keep the project on track, and what escalation procedures will be used to address any problems with project progress.
	The bidder MUST describe process of transferring the knowledge and training of {COMPANY
	The bidder MUST provide specifications and a list of all project deliverables.
	The bidder MUST NOT propose a development, customization or implementation model where offshore resources are required to log on to onshore servers, instead the vendor MUST propose a plan for performing all development activities on – site.
Asset Management System Requirement	
	The system must interface with the procurement and inventory management module. For items defined as assets, there should be an embedded workflow for updating the asset register with all the requisite details
	The system should provide a notification to Asset Manager once an item marked as assets is
	Ability to generate asset tag based on asset class & predefined sequence numbering to help in the process of physical verification process.
	Ability to allocate each asset to one or more insurance policies
	Provide alerts for payment of insurance premium before the expiry
	Ability to trigger off alerts as reminders for maintenance for assets
	Ability to register and track warranty information
	Ability to associate a fixed asset with a regional office and calculate depreciation expense
	The system provides the ability to store manufacturing information
	The system provides the ability to store supplier information.

	The system provides the ability to track to what system a piece of equipment belongs to
	The system provides the ability to track the asset purchased, installed dates, removed dates, original costs, life-to-date repair costs, current replacement costs.
	The system provides the ability to allow for categorization of an asset (apply different depreciation methods for different components of a major asset)
Asset Movement Management	
	The system should have the functionality to request for and get approval of an asset movement/transfer from one location to another
	The system should have the functionality to monitor the asset movements within {COMPANY
	Provide facility to generate asset movement forms and approvals when asset is moved and identify current location and current user (whenever it is applicable)
	Ability to facilitate inter-region / inter-department asset issues and transfers
	Ability to facilitate inter-region / inter-department asset receipts
Reporting Requirements for Asset Movement Management	
	The system should have the functionality to produce standard reports on the asset movements within {COMPANY NAME}
Asset Maintenance Management	
	The system must be able to maintain an Asset Maintenance budget and total life cycle of the
	The system should have the functionality to manage Preventive maintenance. It should have the ability to:
	- Define PM (preventative maintenance) parameters per asset - Define PM inspection schedules per asset - Capture PM inspection feedback reports per asset - Capture PM actions carried - Update PM next inspection date - Capture the team (internal or outsourced) scheduled to carry out the PM - Track all stock items issued towards the asset maintenance work order - Track all outsourced service orders issued towards the asset maintenance
	The system should have the functionality to manage Breakdown Maintenance. It should have the ability to:
	- Capture repairs reported per asset - Capture repairs inspection feedback reports per asset - Capture repairs actions carried - Define repairs next inspection date - Define the next repair actions - Capture the team (internal or outsourced) scheduled to carry out the repairs - Track all stock items issued towards the asset maintenance work order - Track all outsourced service orders issued towards the asset maintenance
Reporting Requirements for Asset Maintenance Management	
	Provide reports on:
	- PM scheduled, conducted on time, conducted after due date, and not yet done - Per selected period/department/organization unit actions carried out under: - Per selected period/department/organization unit the costs incurred under:
	The system should generate the following reports:
	- Assets beyond their useful life - Assets that have been maintained over a select period - Assets with maintenance costs over a select threshold - Assets with +/- maintenance budget balances
	The system should be able to generate the following work order reports:

	• How many work orders in a certain time period were scheduled or non- Scheduled • How many work orders in a certain time period by reason, subassembly and/or repair type
	• Open work orders by type, by status (pending, waiting parts, etc.), by location, and/or by asset category
	The system should be able to generate the Asset/Equipment downtime report by summary or detail by user defined periods for:
	• Each location • Cost center • Asset Category
	Ability for creating annual disposal plans
	The system should have the functionality to manage different types of
	asset disposals at {COMPANY NAME}.
	The system should have the functionality to manage asset disposals through Sale by Public Tender process
	The system should have the functionality to manage asset disposals through Sale by Public Auction process
	The system should have the functionality to manage asset disposals through Donation process
	The system should have the functionality to manage asset disposals through Trade-In process
	The system should have the functionality to manage asset disposals through Waste/Destruction/burying Disposal process
	Ability to mark assets, in the approved disposal plan, for disposal as well as re-admit assets back into the assets listing.
	Ability to calculate and create automated journals and reverse accumulated depreciation at the time of sale, scrap, and retirement of asset
	The system should have the functionality for the estimation of disposal costs, and ensuring that costs recovered are sent to the appropriate location in budget module

Asset Disposal Management	
	Manage all asset disposal related data including dates, rates and attachable documents.
	Allow for the management of important dates in the asset disposal plan (deadlines, stages and conditions).
	Create individual reports for presenting data on asset disposal
	The system must enable various divisions to develop their disposal plans for the year whose view can be broken down to enable viewing as per various periods e.g. month-on-month.
	Consolidation of disposal plans of various divisions into a single disposal plan and vice versa
	Ability to view and print divisional and consolidated disposal plan
	Have a workflow for disposal plan preparation and approval
	Enable the attachment of documentation to disposal plans submitted by divisions and avail the same during consolidated viewing
	The system must be able to address the requirement of updating the disposal plan on a periodic basis by having an inbuilt workflow for updating the disposal plan
	Ability to track disposal requisitions against the disposal plan at divisional level and company- wide level
	The system should be able to allow categorization of disposal plan requests
	The system should be able to set alerts with respect to initiation of disposal plans preparation
	The system should have a functionality that allows one to generate a number of different standard reports, including:
	• Current asset tagging listing • List of fixed assets transferred between locations or custodian during the period • List of newly added fixed asset • Assets disposed during the period indicating the reserve disposal price, Actual disposal price, and Variance • Assets earmarked for disposal listing
	All these reports can have their layout changed and have fields included / excluded depending on the users' needs.
	The system must be able to perform fixed assets registration. The registration should be from the procurement/AP process.
Reporting Requirements for Asset Disposal Management	
	• Asset tag (Barcode) • An asset to be uniquely identified • An asset classification(s) • An asset to be adequately described • The status of the asset to be monitored (whether active, suspended, or disposed) • Impact on the depreciation accounts (balance sheet and profit & loss) when different periods are selected
	• The location and holder (responsible person) of the asset to be determined and transfers to be approved and recorded
Asset Accounting	
	• Quantity and value of fixed assets per category and in summary to be determined • Categorization of fixed assets • Depreciation value to be computed using various methods and parameters • Quantity and value of fixed assets per category and in summary to be determined • Fixed asset details to be retrieved such as cost, useful life, salvage value, date of commissioning, etc. • Warranty & licensing information to be captured and renewal alerts • Inspection data to be recorded (tagging)

	• Revaluation
	• Impairments
	The system should have flexible reporting functionality that enables one to extract any information above as a report. It should have a report on assets whose residue book value is
	The system must be able to perform fixed assets disposal through a workflow. This disposal may be a full or partial disposal.
	The system must be able to perform fixed assets depreciation with options for using depreciation methods
	The system must be able to post fixed assets ledger entries to the general ledger
	Automated calculation of net book value and gains/loss of asset value
	The system should allow for revaluations of fixed assets
	Ability to automatically check and stop depreciation on reaching the user defined residual values for assets or predefined service years
	Provide facility to account for the retrospective change in depreciation rate/ method (i.e. calculate depreciation for prior periods as per revised depreciation rate/method)
	Provide facility to distribute depreciation expenses among reporting units & department
	Ability to handle impairment of fixed assets and its accounting Treatment
	Ability to permit accounting of sale of fixed assets as per statutory requirements
	The system should have a functionality that allows one to generate a number of different standard report and have their layout changed and fields included /excluded depending on the
	• Fixed assets register
	• Fixed asset valuation report
	• Fixed asset depreciation report
	• Fixed asset reports by asset type and other assets category
	• Depreciation forecasting report
	• Accumulated depreciation list by category by Location
	• List of fixed assets transferred between locations or custodian during the period
	• List of newly added fixed asset

3. **HUMAN RESOURCE MODULE**

Organizational Structure	
	System MUST have ability to include Organization structure hierarchy definition and organogram.
	System MUST be able to build an organization structure, which caters for various organization units such as departments, Divisions, sub-Divisions, Units, B533costcentres.
	System MUST have an ability to multiple organizations (subsidiaries) Hierarchies
	System MUST have a functionality to modify the organization structures as and when required and maintain the history of all such changes.
	System MUST have an ability to have position-based organizations.
	System MUST have a functionality to assign managers to various Organizations and view the managers and sub-ordinates reporting to them.
	System MUST have an ability to view positions linked to various Organizations.
	System MUST have provision to define various divisions at various locations.
	The system must be able to define, develop, analyze/ evaluate and store job descriptions, skills and qualifications required for each position.
	Job forms will include breakdown of approved jobs or staff establishment, (total number, vacant, occupied, blocked, etc.).
	The system MUST be able to identify jobs and positions uniquely.
	The system MUST be able to maintain history of changes done to the position details
	Ability to show all vacant and occupied positions & jobs (staff in post).
	Allow job rotation
	Ability for Departmental heads, Division Heads using the self-service to request for “New Jobs”, “Transfer of jobs and positions” and build the required workflow.
	Ability to link rewards and salary scales with employees’ position grading.
	Ability to integrate staff costs with the budget module
	The system must have the ability to maintain changes in employee position and jobs details such as:
	• Position and job Transfer • Position and job Status • Position and job Description • Position and job History
	The system should allow for changes in position title.
	The system should allow for upgrading a position.
	The system should allow for downgrading a position.
	The system should allow for removing or returning a position.
	The system should allow for the ability to create several types of employment (terms of service) such as Permanent and Pensionable, contractual, consultant, internship etc.
	The system should allow for addition, removal or amendment of types of employment
	Ability to create grading levels (managerial, technical and support) and flexibility to adding new levels.

	Ability to create employee status (active employment, resigned, suspended, study leave and unpaid leave) and integrate it with affected areas in leave management and payroll
Reporting Requirements for Organizational Structure	
	Ability to generate multiple statistical reports for all positions & jobs within the Organization
	The system MUST produce the following reports:
	• Organizational structure reporting by location. • Organizational structure reporting by department/divisions. • Open and filled positions reporting. • Positions associated with organizations. • Budget & Actual Head Count Comparison.
Recruitment and selection	
	Ability to create and develop employee requisitions/vacancies.
	Ability to receive applications during online recruitments and serialized
	Ability to allow for information drawn from physical applications to be inputted into the system during recruitments
	Ability to accept both internal and external applications.
	Ability to screen and select candidates.
	Ability to track candidates and recruiter in the placement process.
	Ability to manage pre-placement verification, which includes salary authorization.
	Ability to advertise vacancies internally (self-service)
	Alert the HHRA and the HODs on overdue vacant positions
	The system SHOULD enable candidates to apply for available vacancies and allow only those who meet the minimum requirements.
	Ability to generate a long list as per the job criteria e.g. experience, technical, academic and competence qualifications.
	Ability to capture interviewer notes and feedback.
	System MUST have an inbuilt vacancy approval process/workflow.
	System must have a recruitment and selection workflow that covers the process from vacancy creation to defining a new employee.
	Ability to track recruitment process and produce reports for management (e.g. recruitment costs, time taken to fill a position, status of the process, etc.).
	Ability to generate resumes from candidate input details.
	Ability to upload and share candidate documents (e.g. certificates, CV, etc.).
	Ability to verify budget prior to recruitment drive.
	Ability to generate offer letters, appointment letters, etc. Ability to send an offer letter electronically or as a print out.
	Ability to generate regret letters.
	Ability to hire staff on contract for a specified period.
	Ability to hire temporary staff and/or interns for a specified period.
	The system should be able to shortlist qualified applicants from the long-list at the point of job application. This will assist HR from having to review overwhelming number of applications from unqualified persons.
	When employees are rehired, the system should link all previous employment information to the new record.

	The system SHOULD have recruitment planning mechanism to capture recruitment plans online
	The system MUST be able to track the requisitions for vacancies for a particular job, grade, location or position
	Ability to schedule interviews
	Ability to track interview results
	The requisition form should be flexible to change according to requirements
	Ability to register the employment contract, renewal and termination
	The system must have the ability to provide an interface for customizing recruitment letters
	Ability to implement a specified probation period for newly hired employees
Reporting Requirements for Recruitment and selection	
	Ability to generate the following reports:
	- Recruitment Activity reports, Recruitment reports –direct / internal reports - Recruitment reports based on recruiting department. - Vacancies report. - Applicants Qualifications reporting. - Statistical reports of the applicants and provide the management with tabular and graphical reports and other analytic presentations - Statistical report of the requested number of employees for a specific area
Staff orientation / induction	
	Should be able to develop induction program within the system with input from HR and user departments.
	Ability to allocate employee compensation and benefits (NHIF, NSSF, club membership, advances, loans, etc.).
	Ability to confirm/reject new employee after completion of probation period or extend probation period.
	At a minimum, the following employee master details must be captured:
	- Staff number (auto-generated) - Nationality - Ethnicity - Disability - Gender - PIN Details - NSSF Details - NHIF Details - HELB status - ID/Passport number - Marital status - Date of birth - Employees names - Contacts (Phone Number, Postal Address, and Email etc.) - Spouse details: name, ID number, occupation and contacts (Phone number, Postal Address, Email etc.) - County of origin - Dependents: Age, Gender, relation (daughter, son, adopted)

	• Next of kin details: Names, ID number, occupation and contacts
	• Employee photo
	• Employee qualifications, experience and skills
	• Previous employer
	• Medical related details
	• Employment date
	• Position
	• Category (senior, management, mid management, support)
	• Department/Division
	• Employment status (contract, permanent, probation, temporary)
	• User-defined comments
	• Ability to add/delete any bio data as necessary by authorized user
	The system must allow an employee to view and update personal data such as names, address, contacts, schools and/or University attended, qualifications, HELB, etc. subject to verification and approval.
	The system must allow an employee to view and update payment details such as bank, account name, account number, Bank Branch Codes etc. subject to verification and approval.
	The system must allow the user to view and update information on beneficiary and dependents subject to verification and approval.
	The system SHOULD have storage repository for certification and other relevant documents for employees
	The system SHOULD alert new employees to participate in the induction program coordinated by HR.
	The System SHOULD allow grouping of employees based on various aspects such as department/Division and grades
	The system MUST be able to store working hour's details, work frequency and normal timings for the employee.
Employee Management	
	Act as a centralized portal for disseminating static employee information such as benefits, leave information, disciplinary action and appeal process, FAQs, loans application, benefits, etc. which can be updated as need be.
	The system must be able to manage staff transfers, acting appointments, relocations, promotions and demotions and track such movements.
	The system should be able to address acting appointments. It should be able to capture under an employee's profile:
	• The event of acting appointment
	• Position
	• Start and end dates of the appointments
	• Benefits applicable
	Embed a workflow that supports Employee transfers including acting Appointments
	Provision for uploading and attaching documents to an employee's profile such as scanned transfer letters, etc.

	Maintain a history of Employee transfers taken and support the ability to profile the same employee
	Employee transfers module should be interfaced with payroll processing component
	Provision for managing employee disciplinary actions
	Embed a workflow that supports the disciplinary process (disciplinary module)
	Provision for uploading and attaching documents to an employee's profile such as scanned warning letters, certificates, commendations, etc.
	Maintain a history of disciplinary action taken against an employee and support the ability to profile the same employee
	Disciplinary module should be interfaced with payroll processing component
	Disciplinary module should integrate with the personal development, training and separation modules
	The system must be able to adequately address situations where an employee is suspended and capture this event on the employee's profile. This includes provision of workflows for initiating the suspension process, ending suspension and reinstating/rejecting an employee after suspension
Reporting Requirements Employee Management	
	Ability to generate the following reports:
	Employee details by department, location, positions, jobs, grades, payroll, Allowances, date of birth, ID/Passport number, date of employment, personal number, next of kin, beneficiaries, health conditions if any, etc.
	New appointments / joiners report.
	Acting appointments report.
	Transferred employees report.
	Employee addresses and contact details report.
	Employees' summary reporting by specific criteria e.g. by department, grade etc.
	Employees Locations report
	Employee turnover reporting and analysis
	Disciplinary actions taken report
	Positions Analysis
	Contract Employees
	Employees by Cost Centre
	Employees Ethnicity Reports
	Employees by Education Level
	Promoted Employees
	Retiring Employees
	Terminated Employees
	Transferred Employees
	Workforce planning
	Staffing level analysis
	Ages of staff

	- Dates of employment - Report listing employee NHIF, NSSF, PIN, HELB, NSSF or NITA (National Industrial Training
	Authority) details
	- Gender analysis - People with Disabilities (PWD) analysis
	Skill set and competencies status: to list per employee the professional qualifications, academic qualifications, learning / development map, job requirements.
	Performance management
	System MUST have an inbuilt performance appraisal process/workflow.
	Ability to support the 360 degrees appraisal system with the ability to be configured to any other system such as the balanced scorecard.
	Ability to define various objectives associated with performance management.
	Ability to define and amend KPI's associated with the objectives defined subjected to a workflow approval.
	The 360 degrees appraisal system and KPI's must be amendable for different categories of employees.
	The system must enable calculations for the KPIs against predefined rules to arrive at the performance measurement.
	Ability to monitor and manage performance contract deliverables.
	Ability to capture performance requirements per position: qualification requirements, personal attributes, education, experience, skills, etc.
	Ability to receive periodic (e.g. quarterly) appraisal reviews/results from various Divisions
	Ability to send employees / special groups performance appraisal report on the system.
	Ability to track performance appraisal results over a period of time per employee, special group, department, etc.
	The performance management system should interface with the Training and Development module to enable identification of development requirements during the appraisal process and converting them to training requests in the Training and development module.
	Support the associating of evidence to performance KPI's.
	Extraction of performance data to (excel, MS word, pdf etc.) per employee and per department and Divisions.
	The system should support self-appraisal.
	Assessment of self-appraisals for annual or periodic appraisal process MUST be possible for the managers.
	Support electronic signoffs between the appraised and appraiser and other relevant officials.
	The system should allow the salary adjustment as defined in the salary progression
	The system must allow the employee to receive performance feedback from their supervisor/manager.
	The system must allow KPI tracking and management dashboards.
	A workflow must be present for issuing a performance rating to an employee.

Reporting Requirements for Performance management	
	The ability to generate the following reports:
	• Performance reporting per individual. • Performance reporting by position. • Performance reporting by department / special group.
	• Monthly/Quarterly/Annual performance reports per employee/ department
Training Management	
	Ability to match training needs of an employee against their position's qualification requirements (academic, personal attributes, professional, experience, skills, etc.), organizational growth plans and performance management system.
	Ability to identify and evaluate training needs based on the performance appraisal.
	Capturing of training request submissions from user departments.
	Ability to create a list of training providers and their details.
	Ability to create a training plan, manage and update training plan.
	Ability to create a short-list of candidates for training and compare them against the training selection criteria (e.g. competency-based selection).
	The system must have an approval/rejection process for a training request.
	Ability to create, manage and update an employee's personal development plan.
	Ability to capture information on trainings attended by an employee.
	Ability to capture/receive training and development requests from other departments.
	Ability to maintain historical data on all information captured e.g. trainees, trainers, vendors, training requirements, attendance, training record, performance, cost etc.
	Ability to create (define) training selection criteria and maintain historically (e.g. competencies-based criteria.).
	Ability to allocate roles to different personnel in the training development process.
	Ability to interface the training request process with financial system e.g. raising invoice,
	Ability to track the status of a training request from requisition through planning to delivery and completion by trainees.
	Centralized cataloguing and tracking of training courses
	Ability to design, create and deliver online training programs for new staff as part of induction (modules and tests).
	The system should have provision for setting the maximum number of trainings and cost a single employee can receive in one financial year.
	The system should have functionality to restrict an employee from registering the same training course more than once after successfully undertaking the course
	The system MUST facilitate development of a training calendar specific to departments within the company, jobs skills requirements, technical aspects and publish the calendar
	The system SHOULD be able to generate training requirements-based performance

	Ability to monitor effectiveness of the training offered
Reporting Requirements for Training Management	
	Ability to generate the following reports pertaining to training:
	• Competencies reporting along with skills. • Training requirements reporting. • Trainings history reporting. • List of Attendees of a Course • List of Attendees of a Course in a Department • List of Courses for a certain position • List of Courses Taken by Employee during a defined period • List of Employees not Attended a mandatory Course (if expected to attend) • Enrolled For postgraduate courses/ professional courses / scholarship. • Employee Training/development needs • Staff trained • Trainings delivered • Trainings in the pipeline • Training plan • Training feedback reports • Total training costs over a particular period
Training Attendance (E-Learning / Staff Induction)	
	The system should be able to present to employees a list of approved courses from which to choose from
	The system MUST facilitate the enrolment for training courses
	The system MUST enable the users to maintain a history of the courses attended, status of registrations and passes/fails
	The system must be able to track enrolment and maintain enrolment status for all courses
	If registrations are received beyond the maximum capacity of the course, the system must be able to keep a waiting list for that course
	Ability to send reminders and notifications to employees on upcoming courses which they have registered for
	Ability to capture training evaluation and feedback by attendees so as to determine the success of the training delivered
	Ability to record skills gained by the trainee after attendance of the training
	The system must be able to capture the grade (pass/fail/marks obtained) of an employee upon completion of a course either automatically or manually by the trainer
	The system must be able to track on number of hours of training an employee has attended for each course
Leave Management	
	The system MUST automate the leave application process by enabling end-to-end online leave management
	The system must embed a workflow for leave management that can capture comments and approvals related to the task depending on its requirements

	Ability to accrue leave days at a configurable rate.
	Provide alerts and notifications to users and relevant authority on leave days above 15 leave days, 30 days before the close of the financial year
	Ability to deduct leave days.
	Ability to suspend leave subject to approval by Head of Department
	Capability to track and extract a history of the leave management data of an employee
	Calculation of leave balances and how much they are worth
	The system must be able to carry forward leave balances as per HR policy and Kenya Statutory laws
	Interfaced with payroll component of the HRMS so as to support the conversion of leave balances to payment (during separation only)
	Should enable users to perform online leave planning on a Financial Year based system and submission of the same into the leave approval workflow or save plans as draft
	Provide alerts and notifications to users and relevant authority on leave anniversary, public holidays, etc.
	The system should provide for Public holidays
	Enable one to apply for different types of leave including:
	• Maternity • Study • Paternity • Compassionate • Annual • Compulsory • Terminal • Sick • Unpaid
	The system must allow initiation of sick leave on behalf of the employee application by HR personnel
	At a minimum, the following details on leave application must be captured:
	• Name • Department/Division • Grade • Date of appointment • Leave entitlement (days per annum) • Leave days applied for • Leave start date • Leave end date • Contacts when away • Leave balance carried forward • Leave balance brought forward • Leave balance
	The system MUST have the provision to access leave information online.

	The system MUST have a facility to keep a track of number of days of leaves taken, for the various categories of leave
	The system MUST have a facility for the supervisors or the HR users to approve or reject the leave applied by the employees
Reporting Requirements for Leave Management	
	Ability to generate the following reports:
	• The system MUST have a provision to report the usages of leave types. • The system MUST have reporting for various types of leaves for employees. • Leave accruals reporting.
Employee separation	
	A workflow must be present for KIPRE to initiate the separation of an employee in the event that it is a dismissal and capture comments where necessary.
	A workflow must be present for processing a request for separation from an employee and capture comments where necessary
	A workflow must be present for processing a request for separation through an employee retirement, and demise and capture comments where necessary
	The system should store the notice period details of all employees
	Employees clearance form should be accessible online
	At a minimum, the following should be captured on the clearance form:
	- Name and Employment Number
	- Date employed
	- Forward Contacts
	- Designation
	- Department
	- Type of separation
	- Last day of service
	- Leave days due payable
	- Notice period (adequate/inadequate)
	- Notice period (to hand over KIPRE Property)
	- Pay in lieu of notice
	- Signoff requirements with relevant personnel, departments or Divisions
	Electronic signoff of clearance form between user and relevant personnel and capture comments
	Integration with compensation module, loans, mortgages, etc.
	Maintain employee exit interview information
	The system should capture the separation event and date under an employee's profile. Further to this, it should capture type of separation (dismissal, resignation, death, retirement, and contract expiry), details and allow attaching of relevant separation documentation
	The system must have a workflow for processing an employee reinstatement application that allows one to either approve and process the reinstatement or reject the reinstatement application.
	The system must be able to address the process of employee reinstatement. During reinstatement, the system should allow one to continue working with the previous data that was captured prior to termination of the employee and register the event of reinstatement on the employee's profile.

	The System MUST allow for terminating the employee record at the conclusion of the employment period without deletion.
--	--

Reporting Requirement for Employee separation	
The system should have the following reports:	
- Terminated / separated employees report. - Terminated Employees by Termination Reason. - End dated positions reports. - Staff due to retire (in 3 years, 2 years, 1 year, 9 months, 6 months)	
Institutional Calendar	
The system should incorporate online annual institutional calendar preparation functionality and should be able to cover all Divisions/Departments programmatic Calendar	
The system must possess functionality that allows activity plan preparation at a departmental/Divisional level prior to merging several departments'/Divisions' activity plan into a singular institutional activities plan.	
System should be able to maintain and track of activities at departmental/divisions and institutional level and be able to provide alerts to the user Divisional/Departmental Heads and HP, HF, HHRA 1month, 2 weeks and 1 week before the actual date of the activity	
The system must have a workflow approval for creating, uploading and updating the organization's annual calendar.	
Reporting Requirements for Institutional Calendar	
Dynamic reports with the provision for a drill-down capability.	
Create customized reports (user defined). Users who perform this function will have to be trained on use of the tools	
Reports with the following parameters	
- Notifications on due date - Notifications on due date - Calendar by due date - Calendar by completed activities - Calendar by pending activities - Calendar by Division/department	
Loans and advances	
Staff must be able to fill loan application form online through the self-service module for the different types of loans and advances:	
- Salary advance - Mortgage/ Car Loan	
An inbuilt workflow(s) for processing applications of the different types of loans and advances must be present that addresses the unique qualification requirements for each loan/advance. The workflow must address the entire loans application, processing and approval process	
The system must capture the loan/advance against the employee's compensation and benefits profile	
The system must interface with the payroll component so as to correctly record issued loans, recovered loans/advances.	

The system must not allow for issuance of loans/advances that violate the statutory guidance on employee deductions in Kenya

SYSTEM ADMINISTRATION REQUIREMENTS
System Administration
The System MUST have ability to provide adequate audit trails that can be reviewed for information. These records MUST be non – editable and be secured from unauthorized access.
Electronic records MUST maintain the old and new values to the change and the transaction used to generate the record.
The system parameters, including application controls, authorizations and standard security configuration MUST be clear, well defined and can allow processing in an efficient and controlled manner, while protecting valuable data.
The system MUST support multiple levels of security. This includes protecting certain fields from unauthorized access. In addition, access to certain functions and data MUST be protected until they are approved by policy makers (e.g. budget scenarios that are created for analysis prior to publishing a formal recommendation.) Application security MUST be integrated with database security and
Microsoft Active Directory.
Templates or group functions MUST be provided to facilitate maintenance. Changes in assignment or termination MUST automatically trigger a review of the employee's security privileges. Comprehensive logs of transactions and security incidents MUST be maintained for auditing purposes.
The system MUST allow administrator to export logs on various formats for further offline analysis.
System Access
The System MUST have a robust security active directory integrated administration and authorization profiles that assure system access.
The system user and security administration functions MUST provide necessary controls to ensure that not more than one individual can access the system or perform specific operations
The system MUST execute authority checks in its security administration and authorization profiles to ensure only authorized individuals can access the system or perform specific operations.
The system MUST record changes to authorization profiles.
The system MUST facilitate archival of documents from the Systems to a Separate repository and MUST be accessible.
Access to archived records MUST be secured using standard authorization profiles.
System MUST prohibit multiple users from updating the same record simultaneously.
The number of failed attempts allowed MUST be configurable

The system MUST have features that prevent the user from further access when the SET number of failed attempts is exceeded
The system MUST allow one to define security events / incidents which upon occurrence, the system generates an email and sends it to a defined distribution list to notify the security administration "in an immediate and urgent manner". The messaging system MUST also have the capability of being interfaced to send this message externally to Microsoft Exchange or SMS system.
The system MUST have the ability to log out the user automatically after a specified period of an idle session.
The "profiles" user defined or system defined MUST be maintained at different levels for better security usage.
The system MUST have the ability to support single sign-on.
The users in the systems MUST have controlled access to different business areas such as modules and
The user MUST be able to access a single or multiple menus / modules in the system as granted by the system administrator.
The system MUST have facility to run an individual job schedule request / group of job schedule requests.
The system MUST have facility to create a group of job schedule requests that would be accessible to a single or group of users.
The system should have the facility to create user defined menus and attach different business functions to it.
The system MUST provide default data groups or user defined data groups to enable access to different business data in the system.
The system MUST have an inbuilt System Administrator Role with the ability to monitor all the requests submitted in the system.
The system MUST have the flexibility to create user defined responsibilities / profiles to which different requests / functions / reports can be attached.
The system MUST be able to define policies for different levels of users e.g. a "High Security" profile for power users whose requirements are stricter than "Medium Security" profile for business end users
Clear segregation of privileges must be presented and implemented by security matrix of roles against authority. Security matrix will be gathered and created by vendor during the project analysis phase
Data masking/encryption of sensitive data MUST be supported
The system MUST support digital signatures
User Interface
The system MUST provide an intuitive, user-friendly, and easy – to - use interface that minimizes the need for training.
The system SHOULD have a common look and feel across all modules.
Online help MUST be available for all modules.
The system MUST identify errors, inconsistencies or additional requirements at the time data is entered. Processing of the transaction MUST be suspended and / or re-routed to resolve the problem in "real time".

The system SHOULD provide quick menus (favorites) which would be helpful to store the most used menu for a user.
The language of the system and all its components MUST be English.
Date and Time Stamping (Audit Trails)
The system MUST automatically generate all records and logs when creating, modifying, or deleting data.
These records and logs MUST be date and time stamped and MUST include the user ID of the individual who is logged onto the system and performed the action.

System Flexibility
All records generated by the system MUST be accurate, complete, and presented in a readable format.
The system MUST support open systems interfaces with complementary software partners.
The system MUST be available in mobile and must be operating system independent.
The system MUST support Graphical User Interface (GUI) input and output screen design.
The system MUST support web-based architecture.
The system MUST provide a multi-user access solution capability of supporting an unlimited number of work stations while at the same time providing high speed simultaneous multi-user response times.
The System MUST be scalable
The system MUST have interface capabilities feeding into the back-office from other systems (such as, including, but not limited to, legacy systems and web-based systems).
The system MUST be vendor agnostic. It must be compatible with standard hardware, operating system, database management software, networking hardware, internet and intranet supporting the applications software.
The system MUST be a complete, fully developed, integrated and operationally proven system offering unsurpassed reliability.
The system MUST be easily reconfigured to respond to changes in business practices, policy directives, organization structure, statutes and regulations. As business requirements change, the system MUST also be able to change to support the new requirements.
Output Controls
The system MUST ensure that the processed data is provided to users in a consistent and secure manner.
Multiple Environments
In addition to the production environment, the system MUST support independent copies for training, development, and test.
The multiple environments MUST be sufficiently isolated from production and from each other so that operations in one environment will not affect those of another.
System Performance
The system MUST be responsive and available. Any volume processing MUST not interfere with online responsiveness or availability.
Disaster Recovery

	Bidders MUST propose a number of disaster recovery configurations and should indicate the level of protection offered by each alternative.
	The system MUST support replication and rapid fail-over or redeployment in the event of problems or planned maintenance.
Reporting	
	The system MUST include comprehensive reporting tools that allow for easy access to authorized data.
	Standard reports SHOULD be included that will serve as models for customized reporting as well as provide for basic functional reports.
	Report wizards or similar techniques SHOULD be available to guide users through report creation.
	The system MUST be designed such that reporting activities do not compromise the responsiveness of the interactive system.
	The system MUST be able to provide departments the ability to develop ad hoc reports at their discretion.
	The system MUST include a data dictionary or similar provision to allow non - technical users to identify the appropriate data elements for inclusion in their reports.
	The system MUST be able to provide departments the ability to develop ad hoc reports at their discretion. The system MUST include a data dictionary or similar provision to allow non - technical users to identify the appropriate data elements for inclusion in their reports.
	Reports MUST have output flexibility i.e. can be printed or exported into several industry-standard formats such as Adobe PDF, XML, XLS, XLSX, CSV, TXT (tab delimited), etc.
Data Migration Requirements	
	The system MUST have capability for data conversion.
	The system MUST have exception reports to capture items not converted automatically during data conversion.
	The system MUST have functionality for methods to verify conversion, e.g. file comparisons, balance / totals / count comparisons.
	The system MUST have Parameters for successful conversion, e.g. Percentages consistency.
	The System MUST have capability for scheduling and sequencing of tasks.
	The Bidder MUST provide in the Technical proposal, sufficient details covering the data conversion approach to be adopted to ensure sound data migration:
	• Database analysis • Data mapping. • Post - conversion clean up. • Conversion coding development.

	Data integrity checking and audit methodology.
	Business Value Enhancements Requirements
	The Vendor MUST work with the relevant user departments / Divisions to identify all business requirements
	The vendor MUST provide services to implement “best practice” business processes associated with the supplied systems.
	The vendor MUST provide “best practice” business process documentation for business processes associated with the supplied systems.
	The bidder MUST describe how they will assist the organization in maximizing the business value out of the supplied systems.
	The vendor must describe a detailed methodology for undertaking business process improvement activities and execute business process improvement activities
	The vendor should highlight experience of the firm for delivering the following services:
	- Gap analysis of the “best practices” business processes as brought by the bidder with the organization’s current business processes. - Developing a “To-Be” business model based on the proposed system solution and best practices. - Creating Key Performance Indicators (KPIs) to measure the efficiency of the new processes.
	Integration Requirements
	Vendors MUST conduct an integration review workshop. The outcome of the workshop will be a complete mapping of all existing points of system integration, the identification of new points of integration and the identification of existing points of integration which may benefit from re – design or re – implementation.
	The vendor must implement all integration requirements identified as a result of the integration review workshop.
	Bidders MUST describe their interface development process.
	Vendors MUST implement an interface management methodology and process, that will assist KIPRE maintain the interfaces in the future.
	Vendors MUST implement operational processes for the monitoring and management of points of systems integration.
	The vendor must conduct an integration training workshop for the systems Core Team to provide knowledge transfer with the objective of building internal capacity for:
	- Providing in-house maintenance and support to the Interface
	- Development of interfaces
	The vendor must supply all documentation, manuals and guides necessary for maintaining the integration platform
	The system MUST support modern “best business practices”, with data located in one integrated system and a centralized location, shared across KIPRE’s departments. The system MUST support enterprise-wide business processes with a goal of eliminating multiple handling of data and increasing accuracy.

	The vendor must provide an open integration platform that will be used for integrating the systems with current information systems and future information systems yet to be identified. The platform must not limit integration to particular vendors/products.
Documentation Standards	
	All project documentations (softcopy and hardcopy) MUST be handed over by the vendor and will be considered FINAL once approved by KIPRE systems Core Team.
	The documentation provided should be done at all the phases of the implementation
	All project documentation versions MUST be controlled by the use of a Project Library directory. All relevant documentation MUST be handed over to KIPRE after the project implementation.

	All documents MUST be submitted in English language, including user manuals.
	The following project documentation, among others, MUST be provided:
	Requirements and Business Process documents including customization, modification or extensions Solution document, Architecture and design document.
	Data Migration Strategy (to be reviewed by the KIPRE systems Core Team and amended as appropriate)
	Testing Strategy (to be reviewed by the KIPRE systems Core Team and amended as appropriate) and amended as appropriate)
	Training / User guide manuals for each module,
	Technical administration guide for all the technical components of the Solution
	Backup and restore document, and any documentation needed to transfer the knowledge.

Training and Knowledge Transfer	
	The Bidder MUST provide information on the types of training to be offered for super users, end users IT personnel, among others.
	The information provided should include:
	- Training strategy and plan for pre and post implementation
	- Location
	- Training provider (in-house, external)
	- Type of training and modules provided
	- Medium (class room, e-learning etc.)
	The bidder MUST provide Knowledge Transfer Plan. The approach MUST cover the following:
	Functional Area: by which the key-users MUST be able to configure, setup, and handle any new requirements after the implementation. This will allow KIPRE to continue with process improvement exercises after the completion of the implementation.
	Assistance and guidance with development of the business rules and applying them to the software.
	Fit and gap analysis and systems analysis.
	Technical Area: by which the IT personnel of KIPRE MUST have the sufficient knowledge that qualify them to carry out:

• System administration (ability to maintain, install, configure) especially in the initial stages of testing and implementation.
• Database Administration, during the initial stages of implementation and subsequent performance tuning later in the implementation.
• Workflow and Graphical User Interface (GUI) customization support Release management support
• Development of data interfaces to / from external entities.
• Conversion of data.
The knowledge transfer plan MUST include a component where KIPRE's staff is involved in all phases of the project's design, development, implementation and support.

Knowledge transfer for the solution implemented should include, and not limited to, operating system administration, database administration, application administration, modules management, troubleshooting, backup and restore.
The bidder MUST provide a list of expected training documents and material to be delivered during the project.
Testing and Acceptance
The Vendor MUST design and develop detailed functional test specifications and scripts that cover all possible business scenarios with the help of business users for all the modules.
The vendor must participate in the User Acceptance Testing processes and be available for consultation during this process.
The vendor must implement results of all test activities conducted during the project
The Vendor MUST designs, develop, manage and conduct Integration System
Testing (IST). The scope and results of this testing must be presented to KIPRE's systems Core Team for approval.
The Vendor MUST design, develops, manage and conduct Performance and Volume Testing. The scope and results of this testing must be presented to KIPRE systems Core Team and Management for Approval
The Vendor MUST provide test reports on all conducted tests.
The Vendor MUST design, develop and conduct regression testing following the correction of problems identified during the testing cycle.
Implementation Schedule and Location
The Implementation schedule should be no more than 6 months, addressing the following requirements, among others:
• Project organization and management plan
• Full customization, implementation and commissioning of the Systems.
• Regular updates to the KIPRE's systems Core Team on the progress of the project
• Hardware procurement, where necessary.
• Testing schedules such as unit testing, integration testing, etc.
• User Acceptance testing, Performance testing and regression testing.
• Training for KIPRE Executives, Managers, end users and power users.
• Soft launch
• Final Go live
• Provision of all documentation and manuals.
• Sign – offs

	• Official handover and commissioning of the system. • Task, time and resource scheduling
	As part of the implementation plan, the bidder should clearly demonstrate how the following reporting components will be incorporated as part of their implementation schedule:
	Updates to the KIPRE systems Core Team and Management summarizing:
	• Results accomplished between the reporting periods • Deviations from project plan/milestones and reasons for such Corrective actions to be taken and their due dates • Other issues and outstanding problems and proposed corrective actions that should be
	• Actions that should be undertaken by KIPRE and due dates

	• Other issues that the bidder foresees could impact on the project's progress or Effectiveness
	• Project management reports • Inspection and quality assurance reports • Training participants test results • Log of service calls and problems resolution

	The Bidder is required to provide the specification and description of the different phases and activities of the project. The plan shall clearly specify the start and end dates (relative to contract signing) of each of the project phases specifying key milestones allowing visibility of project progress.
--	---

Hardware and Operating System Requirements

	The bidder MUST indicate whether the system will work optimally in a Virtual Environment running VMware and Windows Server operating systems.
	While it is expected that the vendor will conduct a technical architecture /sizing exercise during the Definition Phase to determine the required infrastructure to host and run the solution appropriately, the bidder MUST estimate from previous experiences the following:
	• The Computer servers' configuration and architecture including number of applications and database servers, requisition size requirements, CPU power requirements and hard disk capacity requirement for each server. • Assess and evaluate the current infrastructure and recommend the best way to utilize it in order to get the maximum reuse of the current hardware. • Assess current network connectivity, speed, stability, and recommend any required updates. • Recommend other communication requirements, backup, printing, development tools, etc.
	The Vendor MUST Conduct a technical architecture/sizing exercise during the Definition Phase to determine the required infrastructure required to host and run the solution appropriately
	The Vendor MUST ensure that the implementation is secure and reliable for access to the implemented solution.

	The Bidder MUST propose the optimal connectivity required for the solution within a WAN environment while utilizing the KIPRE's current infrastructure. The Bidder MUST also recommend any additional optional bandwidth and security requirements to the existing infrastructure.
Warranty, Post implementation and Annual Maintenance Support	
	The Bidder MUST describe the approach and plan to provide on-site support for three months.
	The Bidder MUST describe the services and activities that will be provided during the nine months off- site support.

	The Bidder will be expected to provide comprehensive maintenance of the systems after the post- implementation support period. This will include all aspects of the system support including software updates, among others. This will be spelt out in a comprehensive Service Level Agreement (SLA) between the bidder and KIPRE. (The SLA must clearly describe Warranty and Licensing mechanism and mode and currency of payment).
	Clearly indicate the channel of communication between the vendor and the KIPRE

4.72 Technical Responsiveness Checklist

Bidders shall use the following options to indicate the "**DEGREE OF SUPPORT OF COMPLIANCE**" their solution provides for each of items listed in this section:

1. **FS** - (Fully Supported) the application fully supports the requirement without any modifications.
2. **PS** - (Partially Supported) the application supports the requirement with use of a workaround.
3. **CR** (Customization required) the application will be customized to meet the requirement(s).
4. **NS** - (Not Supported) the system is not capable of supporting the requirement and cannot be modified to accommodate the requirement.

Please fill in the COMPLIANCE column as appropriate to indicate one of the responses listed above for each item.

4.8.2.1 Finance and Accounting

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
1	Provide an interface that allows cash receipts captured in all regions to be automatically reflected on the GL and cash book on a real time basis.	Mandatory	
2	Allow authorized users to post transactions to the current, future and previous periods throughout the system, with the appropriate approval and audit trails	Mandatory	
3	Provide workflow capabilities for authorizations on transaction processing, journals, asset transfers, exception reports, etc.	Mandatory	
4	Provide a common chart of accounts across the departments but allow flexibility in definition of account codes to allow reporting at departmental Level	Mandatory	
5	Provide flexible mechanisms for allocation of organizational costs to specified cost centres.	Mandatory	
6	Ability to flag prepayments to show periods they relate to (and system creates required entries)	Mandatory	
7	Ability to support a customizable home page (dashboard) with user defined –favourites for analysis/reports /menus optional	Mandatory	
8	Ability to edit existing journals	Mandatory	
9	Ability to support reversal of journal entries	Mandatory	
10	Ability to compare invoices relating to a specific period (based on invoice date and date processed) with the related accrual that were made previously to try and gauge the accuracy of accrual processes.	Mandatory	
11	Ability to flag as "matched off" certain G/L transactions (e.g. in a clearing account) with automatic reconciliation, and be able to alternately include or exclude –matched" items in subsequent reporting	Mandatory	
12	Facility of an extended narrative to describe what should / should not get posted to particular G/L accounts	Mandatory	
13	Ability to "Attach" scanned supporting documents to entries	Mandatory	

14	Ability to drill down from GL entries into supporting documentation/transactions (may be multi-level drill down) to see original entry	Mandatory	
15	Allow nominated GL accounts to be only updated by subsidiary ledger transactions and blocked from journal entries.	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
16	When making queries, ability to filter and sort transaction entries on every field, and to filter based on multiple criteria	Mandatory	
17	Provide a flexible and customizable user Interface	Mandatory	
18	Provide a robust and fault tolerance error management functionality that ensures data integrity and prevents incomplete entries or corrupt data e.g. if there is a power failure in the middle of processing a transaction	Mandatory	
19	Allow seamless integration with MS Office applications specifically MS Word and MS Excel as well as outlook	Mandatory	
20	Allow to define transaction default values	Mandatory	
FINANCIAL REPORTING			
<i>Provide the following reports:</i>			
21	Trial Balance	Mandatory	
22	Income Expenditure statement/ Profit & Loss Statement	Mandatory	
23	Balance Sheet (Statement of Financial Position)	Mandatory	
24	Cash Flow Statement	Mandatory	
25	Quarterly reports to treasury- Should provide variance and comparison in current period expenditure and income with prior periods. Treasury provides standard template forms for these reports	Mandatory	
26	Monthly Management Report- This should be a financial report for each votes in the ledger for the purpose of budget monitoring	Mandatory	

27	Ability to generate Budget report	Mandatory	
28	Ability to compare financial reports such as Income and expenditure and Balance sheet against budget, across periods e.g. month, year to date, previous three cumulative years, and provide variances	Mandatory	
29	Ability to export reports to MS Excel	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
30	Ability to generate management accounts and statutory accounts reports from the ledger. Allow for Tax computation and analysis	Mandatory	
31	Automatic re-categorization of accounts for balance sheet reporting purposes, depending whether the balance is debit or credit.	Mandatory	
32	Fund accountability statement: Ability to generate fund accountability statement pre funding source per period. And compare last year to this year	Mandatory	
33	Allow for creation of customized reports to serve various requirements	Mandatory	
Business Analytics			
34	Support for business intelligence	Mandatory	
35	Ability to perform _what if analysis based on data in the system	Mandatory	
36	Provide a user friendly ad-hoc reporting and analysis tool to assist users in generating reports based on data in the system.	Mandatory	
37	Ability to define key performance indicators and monitor them through the reporting and analysis tool. Examples include performance on levy collection, actual expenditure vs. budget, ratio of recurrent to development expenditure, rate of cost reduction	Mandatory	
38	Ability to preview reports before printing	Mandatory	
39	Ability to use multiple querying capabilities to feed the results of one query into another and roll them up into a single report	Mandatory	

40	Ability to reprint documents(Invoices, Credit memos, receipts)	Mandatory	
41	Ability to support analysis of financial reports using graphs and charts	Mandatory	
42	Ability to generate report on accounting ratios	Mandatory	
43	Ability to support business intelligent reporting in inventory, payables and receivables including graphical presentation	Mandatory	
SECURITY AND CONTROLS			
44	Allow user access to be controlled at numerous levels e.g. menu level, screens level, transaction level and field level	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
45	Ability to maintain detailed and summary transaction history by account with audit trail showing who, when and why	Mandatory	
46	Ability to log reversals or corrections without allowing complete deletion	Mandatory	
47	Ability to query audit trails by transaction, by user, by account or GL code etc. for both transactions and standing data	Mandatory	
48	Allow definition of roles with different system permissions which can be assigned to user accounts to ensure segregation of duties including segregation between transaction creator and approver roles	Mandatory	
49	Ability to secure financial and reporting information to appropriate individuals associated with specific departments, roles or functions	Mandatory	
GENERAL LEDGER			
Chart of Accounts			
50	Maintain alphanumeric account code	Mandatory	
51	Ability to support segmented accounts with user defined lengths at the time of setup	Mandatory	

52	Ability to support segmented Entry Selection (Global level, Local Account Level, Cost centre/Branch, project Code)	Mandatory	
53	Ability to define the chart of accounts in such a manner that account balances can be tracked by following dimensions: a. Department/Cost Center b. Sub department/cost center c. Main GL accounts/ sub-ledgers d. Projects e. Location f. Profit Center	Mandatory	
54	Ability to setup different analysis codes one level below the GL account code combination without increasing the size of chart of accounts	Mandatory	
55	Ability to group the accounts by different types (user defined) e.g. assets, current assets, etc.	Mandatory	
56	Ability to flag account for deletion	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
57	Ability to tag accounts as active or inactive	Mandatory	
58	Ability for users to define account mask. (E.g. numeric, alpha, alphanumeric etc.)	Mandatory	
59	Ability to restrict access to specific accounts as per pre-defined rules	Mandatory	
60	Ability to summarize detail accounting information into multiple summary levels as needed	Mandatory	
61	Ability to quick search on chart of accounts at transaction entry	Mandatory	
62	Ability to show budget allocation / balance at entry of transaction	Mandatory	
63	Ability to Flag transaction entry if the budget is exhausted	Mandatory	
64	Ability to create logs of user activity	Mandatory	
65	Ability to retain log of deleted transactions / journals	Mandatory	
66	Ability to retain data integrity between sub ledgers and the general ledger even in cases of system shut-down	Mandatory	

67	Ability to generate alerts in cases where data integrity is compromised	Mandatory	
68	Ability to import / export data in various formats e.g. Excel, PDF, RTF, CSV, TXT	Mandatory	
69	Ability to drill down transactions from the GL	Mandatory	
70	Ability to display fields that fully describes the transactions	Mandatory	
71	Ability to print GL in a specified period	Mandatory	

Transaction Processing

72	Ability to pass journal	Mandatory	
73	Ability to approve journal entries in the system	Mandatory	
74	Ability to enter comments with journal entries	Mandatory	
75	Ability to support automated recurring journal entries based on user-defined schedules	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
76	Ability to provide for automatic journal entries numbering and support for capturing of supporting/external document numbers such as cheque reference numbers. It should be possible to make transaction queries based on the automatic system numbers and the external document numbers	Mandatory	
77	Ability to prevent posting to inactive accounts	Mandatory	
78	Ability to force balanced transactions (restrict transactions from updating accounts unless there is an offsetting entry)	Mandatory	
79	Ability to support reallocation of e.g. reallocation of expenses across cost centres based on user defined criteria	Mandatory	
80	Display running total of transactions (debits and credits) as they are entered	Mandatory	

81	In relation to recurring journals, the ability to: a) Set up fixed amount standing journals several periods in advance; b) Set up standing journals whereby the user is prompted to enter the appropriate amount each month	Mandatory	
82	Ability to drill-down from ledger balances into supporting modules for transaction details	Mandatory	
83	Ability to query transaction history by account or any other relevant parameters	Mandatory	

Month, Quarter, and Year End Closing

84	Generate period closing reports that ensures consistency check with the sub-ledgers	Mandatory	
85	Have separate period closing capability by sub Ledgers	Mandatory	
86	Selectively close or open periods for posting (with adequate security)	Mandatory	
87	Closing checklist indicates to various tasks as completed or outstanding e.g. manual automatic entries are not posted, X sub-module are not closed yet, etc.	Mandatory	
88	Generate closing exception reports	Optional	

Reports

89	Ability to print cost centres report with budget allocations, variance analysis in absolute and Percentage	Mandatory	
----	--	-----------	--

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
90	Generate transaction detail report for a single account or for a range of account by: a. Period to date b. Year to Date c. Project to date (Project to date reports will help analysing expenses for a project expenses are spread for more than a financial accounting year) e. Summarized f. Detailed	Mandatory	

ACCOUNTS RECEIVABLE

Customer/Credit Management			
91	Ability to enter and maintain different types of customer profiles	Mandatory	
92	Ability to import customer details from the Excel	Mandatory	
93	Ability to search or look up customer based on any criteria stored in the customer record	Mandatory	
94	Allow entry and maintenance of primary contact name and contact information like telephone, fax, email etc..	Mandatory	
95	Ability to show Active or Inactive Customers	Mandatory	
96	Ability to set Credit Limit for Customer	Mandatory	
97	Ability to notify if Customer Invoice Aging Limit has been reached	Mandatory	
98	Ability to support customer Authorisation	Mandatory	
99	Ability to set customer Defaults(Payment method, Tax, Default Territory, Default Sales Person, Posting Account)	Mandatory	
100	Ability to write dunning messages/comments	Mandatory	
101	Ability for automatic numbering of receipts	Mandatory	
102	Ability to print statements(Print hard copy , soft copy and forwarding to email)	Mandatory	
103	Allow entry and maintenance of comment fields per customer	Mandatory	
Cash Receipts/Receivables Management			
104	Ability to create a Receipt if paying Cash/cheque/EFT/Mobile	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
105	Ability to create Invoice if not paying immediately	Mandatory	
106	Ability to link payments to invoice	Mandatory	
107	Ability to deposit payments to an invoice/ receipt to an account	Mandatory	
108	Ability to request for Approval for unmatched payments (Payment not matched to invoice)	Mandatory	

109	Ability to generate deposit vouchers	Mandatory	
110	Ability to support different types of customer remittances for example cash, cheque, EFT ,Real time gross settlement (RTGS) payments etc.	Mandatory	
111	Ability of Receipting of the cash, cheques and direct bank credits in the receipt book.	Mandatory	
112	Ability to receive cash and cheques from debtors and others.	Mandatory	
113	Ability to integrate with Online Banking	Mandatory	
114	Ability to edit receipts before posting	Mandatory	
115	Ability to settle receipts to invoices	Mandatory	
116	Posting of the receipts cash book into the general ledger.	Mandatory	
117	Facility to monitor accounts receivable total against budget	Mandatory	
118	Ability to raise after the fact invoices(Invoices that do not involve movement of stocks)	Mandatory	
119	Ability to raise credit Memo's	Mandatory	
120	Ability to support multiple bank accounts. Bidder to specify no. of bank accounts the system can support	Mandatory	
121	Staff standing Imprest	Mandatory	
122	Ability to support Staff imprest requisition.	Mandatory	
123	Ability to support imprest requisition approval	Mandatory	
124	Ability to support imprest payment processing	Mandatory	
125	Ability to support Funds recorded as amounts issued to the staff under the imprest register.	Mandatory	
126	Ability to support Staff imprest accounting using expenditure receipts	Mandatory	
127	Ability to support Preparation of reimbursement vouchers.	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
128	Ability to support Checking expenditure vouchers against imprest register.	Mandatory	

129	Ability to support analysis of expense of the imprest surrender.	Mandatory	
130	Ability to support posting of the imprest surrender expenditures into the general ledger.	Mandatory	
Reports			
131	Debtors statements	Mandatory	
132	AR reconciliation report	Mandatory	
133	Credit memo report	Mandatory	
134	Produce Aged debtors listing reports	Mandatory	
135	Ability to provide Invoice reports based on different parameters for example, Customer, Date range etc.	Mandatory	
136	Ability to provide receipt reports based on different parameters for example, customer, date Range	Mandatory	
ACCOUNTS PAYABLE			
Invoice Processing			
137	Ability to maintain vendors master data	Mandatory	
138	Ability to Pay bills to vendors	Mandatory	
139	Ability to set recurring bills	Mandatory	
140	Ability to Set reminder for when a bill is due	Mandatory	
141	Ability to show/track unpaid bills	Mandatory	
142	Ability to Pay from an account	Mandatory	
143	Allow generation of a payment voucher entry	Mandatory	
144	Ability to prepare Payment Voucher and forward for Cheque writing.	Mandatory	
145	Ability to assign payment voucher numbers automatically	Mandatory	
146	Ability to approve invoices on the system	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
----	------------------------	----------	-----------------------------

147	Ability to approve payment vouchers on the system	Mandatory	
148	Accept different payments	Mandatory	
149	Ability to write cheques	Mandatory	
150	Ability for Creditors Ledger updating.	Mandatory	
151	Ability to carry prepaid and accrued expenses into a new year	Mandatory	
152	Ability to distribute expenses to multiple accounts per line item	Mandatory	
153	Ability to configure error and warning conditions during the posting validation process. E.g. ability to define that department and cost centre must be indicated before posting to an expense account	Mandatory	
154	Ability to generate alerts on approved documents	Mandatory	
Payables Analysis			
155	Ability to age supplier balances	Mandatory	
156	Ability to mark an invoice/voucher as held with appropriate approval	Mandatory	
157	Ability to prevent duplicate invoice numbers per Supplier	Mandatory	
158	Ability to raise debit memo	Mandatory	
159	ability to settle payments	Mandatory	
160	Provide reviews/queries of open invoices:	Mandatory	
161	a. By supplier	Mandatory	
162	b. By invoice number	Mandatory	
163	c. By due date	Optional	
164	d. By expense account	Mandatory	
Produce cash flow projections:			
165	a. By invoice due date:	Mandatory	
166	b. Including all obligations, regardless of status	Mandatory	
167	c. Including only invoices released for payment	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
168	d. Including only invoices scheduled for payment	Mandatory	
169	e. By user-defined time periods	Mandatory	
170	Ability to show how much you owe	Mandatory	
171	Produce past due payables report	Mandatory	
172	Ability to project annual cash flows	Mandatory	
173	Ability to merge and report actual / historical cash flow utilization and future cash flow projections	Mandatory	
174	Ability to merge bank / cash accounts with respect to cash flows	Mandatory	
175	Ability to generate cash flows in different Currencies	Optional	
Support partial payment of specified Invoices:			
176	a. Ability to select specific invoices for payment	Mandatory	
177	b. Ability to select specific suppliers for payment	Mandatory	
178	c. Ability to pay a designated percentage of the total due	Mandatory	
179	Ability to place supplier on hold (for payment purposes) with appropriate approval	Mandatory	
180	Ability to capture invoice date as well as a receipt date	Mandatory	
181	Ability to specify person/department responsible for authorizing each voucher	Mandatory	
Cheque Writing			
182	Ability to support system printed cheques in accordance with duly approved vouchers.	Mandatory	
183	Ability to prevent duplicate cheque numbers for a payment account	Mandatory	
184	Ability of posting of cheques and direct debits in the payments cash book and general ledger.	Mandatory	
185	Ability to pay multiple invoices with one cheque	Mandatory	
186	Ability to a print remittance advice	Mandatory	
187	Ability to print digital signatures on checks	Mandatory	

188	Ability to specify thresholds/maximum amounts for which digital signatures are applicable	Mandatory	
-----	---	-----------	--

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
189	Ability to support on-line check registers	Mandatory	
190	Ability to print check register before printing checks	Mandatory	
191	Ability to support on-line approvals for specific checks or check registers	Mandatory	
192	Ability to re-print checks. This should be restricted to specific personnel and an audit trail maintained of reprinted cheques	Optional	
193	Ability to void checks. This should be restricted to specific personnel and an audit trail maintained of reprinted cheques	Mandatory	

Tax processing

194	<i>KIPRE is a tax withholding agent and withholds VAT and tax on goods and services before submitting to KRA. The system should therefore have:</i>	Optional	
195	a. Ability to compute withholding VAT and withholding tax and post them to relevant GL accounts	Mandatory	
196	b. Ability to classify customers/suppliers and services / products as VAT exempt or VAT chargeable.	Mandatory	
197	c. Ability to generate periodic report on withheld VAT showing details of tax withheld by supplier and invoice and total for the period	Mandatory	
198	d. Ability to generate periodic report on withheld tax showing details of tax withheld for each payment and total for the month.	Mandatory	
199	e. Ability to setup tax tables and update them when rates change	Mandatory	
200	f. Ability to generate withholding tax certificates from the system	Mandatory	

BUDGETING

Budget creation

201	<i>Ability to capture budgets by:</i>		
202	Month, quarter and year	Mandatory	

203	By GL account, department and cost centre etc.	Mandatory	
204	Ability to generate new budget based on prior year budget and apply a percentage increase or decrease	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
205	Ability to prepare both expense budgets and revenue budget/forecasts	Mandatory	
206	Ability to retain historical budget data	Mandatory	
207	Ability to store multiple "proposed" budgets	Mandatory	
208	Allow automated conversion of "proposed" budget to actual budget	Mandatory	
209	Ability to support top down and bottom up budgeting	Mandatory	
210	Ability to reallocate budgets. This should require online approval.	Mandatory	
211	Ability to allow pre-determined allocating/apportionment of budgets to required departments. Top down budget allocation	Mandatory	
212	Ability to create balance sheet, profit & loss, cash flow and capital budgets	Mandatory	
213	Ability to monitor expenses against the budget per department per GL a/c	Mandatory	
214	Ability to control access to particular budgets	Mandatory	
215	Ability to provide a comprehensive audit trail of changes to a budget	Mandatory	
216	Ability to revise and approve a new budget	Mandatory	
217	Ability to synchronize budget with current GL structure and changes to cost centres and Departments	Mandatory	
218	Ability to reallocate budget items with appropriate audit trail	Mandatory	
219	Ability to segregate working versions of budgets and forecasts from the approved version	Mandatory	
Reporting/Analysis			
220	Ability to generate budget vs. actual reports across multiple levels e.g. departmental, GL codes, cost centre, overall etc.	Mandatory	

221	Ability to factor commitments e.g. open purchase orders in carrying out analysis of budget against actual	Mandatory	
222	Ability to import/export budgets or budget information elements from/to spreadsheet	Mandatory	
223	Ability to print monthly departmental exception reports of actual amounts that exceed a user defined budget variance	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
224	Ability to create user-defined budget analysis reports	Optional	
225	Ability to compare current year actual/budget/forecast month and YTD, previous year actual/budget month & YTD at any level, department, GL code.	Mandatory	
Expense reporting			
226	Ability to support self-service expense requisition and submission by employees	Mandatory	
227	Ability to support expense policy definition and compliance – e.g. approval limits for expenses	Mandatory	
228	Ability to support per diem and mileage calculation	Mandatory	
229	Ability to upload expenses from excel worksheets	Mandatory	
230	Ability to capture expenses by individual persons	Optional	
Reports			
231	<i>Provide expense reports grouped by:</i>	Mandatory	
232	a. Individual	Mandatory	
233	b. Cost centres	Mandatory	
234	c. Expense Item	Mandatory	
235	d. Department	Mandatory	
236	Ability to support expense reporting and analysis by vote	Mandatory	
237	Ability to consolidate individual expenses into departmental expense reports	Mandatory	

FIXED ASSETS

Asset Maintenance

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
238	Ability to create a fixed asset and capture the following fixed asset information: a. Asset description b. Asset serial number c. Asset bar code e. Location f. Asset main category g. Asset sub category h. Department/Cost Centre i. Custodian j. Purchase date k. Depreciation start date l. Service start date m. Vendor n. PO reference o. Invoice reference p. Warranty period, e.g. start and end dates q. Original cost r. Salvage value s. Useful life in month/years t. Depreciation method	Mandatory	
239	Ability to maintain a fixed assets register	Mandatory	
240	Ability to assign different life spans to assets and process accordingly	Mandatory	
241	Able to add, transfer, dispose, revalue, write off and re-life assets	Mandatory	
242	Ability to account for part disposals of assets	Mandatory	
243	Ability to support automatically calculate gains / losses on disposal of assets and creating the journal in the GL	Mandatory	
244	Maintain cost of improvements to existing assets as component of asset value	Mandatory	
245	Ability to report on life left on the asset	Mandatory	
246	Comprehensive search facility based on details captured on the assets	Mandatory	

247	Prompt for insurance cover on asset addition	Mandatory	
248	Prompt for renewal insurance cover on assets requiring insurance cover	Optional	
245	Automatic capture of fixed asset items into the GL account as assets and not expenses	Mandatory	
No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
Asset Acquisition			
246	Ability to support various methods of asset Acquisition	Mandatory	
247	Ability to capture work/construction in progress (WIP/CIP) assets and later on convert them as normal assets and start depreciating	Mandatory	
248	Add WIP/CIP expenditures to an existing CIP assets through the accounts payable system	Optional	
249	The asset system should be allowed to be marked as physical inventory tracking asset and should generate physical inventory reports	Mandatory	
Depreciation			
250	Ability to use flexible depreciation methods and change as required and to vary these over the asset life	Mandatory	
251	Ability to support the following depreciation methods:	Mandatory	
252	a. Reducing balance	Mandatory	
253	b. Straight-line	Mandatory	
254	c. User defined method of depreciation	Mandatory	
255	Ability to calculate depreciation based on groups of assets: a. By dept b. By cost center c. By Category	Mandatory	
256	Ability to recalculate depreciation on asset: a. Based on a change in value b. Based on a change in depreciation schedule c. Based on a change in asset life	Mandatory	
257	Ability to capitalize assets	Mandatory	
258	Ability to perform "un-planned" depreciation	Optional	

259	Ability to process and post transactions: a. Depreciation expenses b. Cost Adjustments, if any	Mandatory	
Asset Transfer			
No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
260	Ability to Transfer assets between: a. Divisions/Departments/Cost Centers b. Locations c. Custodians d. Projects	Mandatory	
261	Ability to transfer all or part of an asset	Optional	
262	Ability to transfer groups of assets	Mandatory	
Asset retirement			
263	Ability to retire assets via different methods: a. Fully retire b. Partially retire c. Retire by units	Optional	
264	Ability to reinstate retired assets	Optional	
Other requirements			
265	Ability to split both new and existing assets and allow partial disposals	Mandatory	
266	Support asset cycle count facility (prompting the counting and reconciliation of certain classes of assets).	Optional	
267	Ability to transfer assets with history of the asset to other departments, etc.	Mandatory	
Reporting/Analysis			
268	Ability to generate fixed assets register by: a. Department/Section b. Location c. Gain and Loss on asset sales d. Custodian e. Cost Center wise	Mandatory	
269	Generate asset depreciation register (detail and summary)	Mandatory	

270	Report on fixed asset transactions history (i.e., fixed asset movements)	Mandatory	
271	Generate unposted depreciation calculation report before transferring them to GL but after running depreciation in the assets module	Mandatory	
272	Asset cost report	Mandatory	
273	Asset report by major and minor category	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
274	Ability to generate the following Asset activity reports: a. Asset transfer b. Asset Disposals c. Asset retirement in the form of sale, scrap, write off etc. d. Asset Acquisition	Mandatory	
275	Ability to generate automatic reconciliation report for GL and depreciation register	Mandatory	
276	Ability to generate Retirement Register by month / asset number: by department a. by location/region b. by account c. by account segment d. by retirement type	Optional	

CASH MANAGEMENT

Banking and Cash Management

277	Ability to support the following Bank Master details: a. Bank Country code b. Bank Code and name c. Branch code and name	Mandatory	
278	Ability to support maintenance of bank accounts for the business	Mandatory	
279	List/show all undeposited payments	Mandatory	
280	Deposit payments to bank accounts	Mandatory	
281	Ability to specify which bank account the money goes to	Mandatory	

282	Ability to print deposit slips or summary of deposit records	Optional	
283	Ability to define petty cash limits in the system. The system should not allow petty cash accounts to exceed defined petty cash limits	Mandatory	
Cash book processing			
284	Ability to process receipts	Mandatory	
285	Ability to process sundry cashbook payments	Mandatory	
286	Ability to process cashbook journals	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
287	Ability to process and record manual payments	Mandatory	
288	Ability to set up payment tolerance levels and reason codes for writing off payment differences.	Mandatory	
289	Ability to support at least two levels of approval for withdrawal of cash.	Mandatory	
290	Maintain petty cash and support accounting for petty Cash	Mandatory	
291	Ability to process manual bank transactions	Mandatory	
292	Support inter-bank transfers	Mandatory	
Reconciliation Processing			
293	Ability to Carry out/ run cashbook/bank reconciliation procedure	Mandatory	
294	Ability to support automatic Cashbook/Bank reconciliation	Mandatory	
295	Ability to support EFT payments to vendors by providing an automated interface to the EFT system	Mandatory	
Foreign Currency			
296	The system should have full multi-currency Functionality	Optional	
297	Ability to setup periodic foreign currency rates in the system. All foreign currency transactions will be converted to local currency at rates held on the system	Optional	

298	Ability to override system rates and enter transaction specific rates. This should be restricted to authorized individuals and an audit trail should be retained	Optional	
299	For each foreign transaction the currency code, currency amount and base currency amount should be retained on the system	Optional	
300	Ability to provide a facility to revalue foreign currency balances and generate appropriate postings to an unrealized currency gains/losses account	Optional	
301	On transaction enquiries the system should display the foreign currency value, base currency at historical rate and base currency at current rates	Optional	
302	Ability to define forex rates for future periods in multiple currencies	Optional	
303	Ability to change forex rates for future periods	Optional	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
304	Ability to generate journal for exchange loss / gain based on the actual forex rates	Optional	
Reports			
305	Ability to provide detailed reports on: a. Reconciling differences b. Daily reconciled cashbook position c. Reconciled items and un-reconciled items d. Mismatched items	Mandatory	
306	Ability to generate cashbook detailed report - receipts, payments and adjustments	Mandatory	
307	Generate bank reconciliation report	Mandatory	
308	Ability to print outstanding transactions reports	Mandatory	
309	Ability to import bank statements	Mandatory	
PROJECT ACCOUNTING			
310	Project Creation Features and functions to support detailed contract management and its sub-unit levels		
311	A new project type may be created by creating a new task sequence and assigning a cost code structure	Mandatory	

312	A project can be created from a default table containing different project templates, which in turn contain definitions and separate coding structures	Mandatory	
313	An existing project structure may be duplicated with no data being transferred	Mandatory	
314	Permits multiple phase project definitions	Mandatory	
315	Support for multiyear projects	Mandatory	
316	Tracks a contract change order from identification, where it is reported as pending; to formal approval, when it is included in the contract and automatically transferred to commitment	Mandatory	
Project and code structure Features and functions			
317	Provide an option to budget or commit project expenditures by periods	Mandatory	
318	Provide cut, copy, and paste of coding structure elements between projects	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
319	Provide for user definition of project or cost code Segments	Mandatory	
320	Use the project and cost coding structures for selection required in reporting	Mandatory	
321	User-defined number of actual, commitment, budget, and statistical accounts for each level of the account Structure	Mandatory	
322	User-defined sub-project coding can be applied at any level of the regular cost coding structure to provide a unique breakdown of costs, with optional inclusion or exclusion in project reports	Mandatory	
323	Uses date sensitivity in a structure, such as particular roll-up of tasks, which will take effect within a certain period of time	Mandatory	
Cost Coding Structure creation and Maintenance Features and functions			
324	Cost codes may be added to the structure without affecting existing projects	Mandatory	
325	Cost codes to general ledger account conversion is maintained in an online table	Mandatory	
326	A cost code may not be deleted if there are any values for that code in existing projects	Mandatory	

327	When deleting a cost code the system either automatically deletes all references to the code from other parts of the system, or disallows the deletion	Mandatory	
328	Retains statistical accounts in a manner that allows the statistical amount to be defined as either a balance forward account or as a balance only account	Mandatory	
329	Uses the same accounting calendars as the general Ledger	Mandatory	

Transaction Processing Features and functions

330	A running total shows the total debits and credits as they are being entered	Mandatory	
331	An accounting date or effective date, indicating which cost ledger accounting period is to be posted	Mandatory	
332	Automatic creation of general ledger transactions with appropriate debit or credit offsets	Mandatory	
333	Distribution to unlimited project and cost codes accounts	Mandatory	
334	E-mail and workflow routing and tracking of un posted transactions and related images for approval	Mandatory	

No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
335	Posting of budget, commitment, or statistical data to any open or future period	Mandatory	
336	Posting of financial transactions to open periods	Mandatory	
337	Provide for recording and tracking of contingent liabilities by project	Mandatory	
338	Provide for recording and tracking of preliminary notices by project and contract	Mandatory	
339	Support a posting interface which permits simultaneous updates of the general and cost ledgers when financial transactions are posted to either Ledger	Mandatory	
340	The system should be able to track a transaction either as income or expense to particular projects	Mandatory	
Line item Features and functions			
341	A transaction description field of at least sixty characters in the summary or header	Mandatory	

342	Transaction number, transaction type, and general reference fields by line	Mandatory	
343	A line item description initially taken from the sixty character description field in the journal header and optionally overridden by operator	Mandatory	
344	A source or subsidiary accounting system reference Field	Mandatory	
Reporting format and tools Features and functions			
345	Actuals vs budget	Mandatory	
346	Authorized funds	Mandatory	
347	Commitments	Mandatory	
348	Current budget	Mandatory	
349	Estimate-to-complete	Mandatory	
350	Original budget	Mandatory	
351	Pending commitments (change orders in process)	Mandatory	
352	Permits inter-project comparisons at the user defined level of detail	Mandatory	
353	Prior budget	Mandatory	
No	Finance and Accounting	Priority	Compliance (FS, PS, CR, NS)
354	Provides an online query tool or direct link to query tool, and real-time spreadsheet interface (specifies spreadsheets, i.e. Excel)	Mandatory	
355	Retentions	Mandatory	
356	Supports reporting of posted transactions, unposted transactions, or both	Mandatory	
357	Uses the cost coding structure to allow online drill-downs from summary to detail; drills-through to source transactions and related documents and images, including estimates and supporting detail, contracts and change orders (actual and pending commitments), and invoices (actuals)	Mandatory	
358	Ability to generate ad-hoc reports base on users Needs	Mandatory	
359	The system should be able to provide seamless integration with other systems/modules	Mandatory	

360	Reports to be able to filter those items specifically related to the project the organization is controlling.	Mandatory	
No.	Budget creation	Priority	Compliance (FS, PS, CR, NS)
	<i>Ability to capture budgets by:</i>		
361	Month, quarter and year	Mandatory	
362	By GL account, department and cost centre etc.	Mandatory	
363	Ability to generate new budget based on prior year budget and apply a percentage increase or Decrease	Mandatory	
364	Ability to roll over budget over multiple periods	Mandatory	
365	Ability to prepare both expense budgets and revenue budget/forecasts	Mandatory	
366	Ability to retain historical budget data	Mandatory	
367	Ability to store multiple "proposed" budgets	Mandatory	
368	Allow automated conversion of "proposed" budget to actual budget	Mandatory	
369	Ability to support top down and bottom up Budgeting	Mandatory	
370	Ability to reallocate budgets. This should require online approval.	Mandatory	
371	Ability to allow pre-determined allocating/apportionment of budgets to required departments. Top down budget Allocation	Mandatory	
372	Ability to create balance sheet, profit & loss, cash flow and capital budgets	Mandatory	
373	Ability to monitor expenses against the budget per department per GL a/c	Mandatory	
374	Ability to control access to particular budgets	Mandatory	
375	Ability to provide a comprehensive audit trail of changes to a budget	Mandatory	
376	Ability to revise and approve a new budget	Mandatory	
377	Ability to synchronize budget with current GL structure and changes to cost centres and departments	Mandatory	
378	Ability to reallocate budget items with appropriate audit trail	Mandatory	

379	Ability to segregate working versions of budgets and forecasts from the approved version	Mandatory	
No.	Budget creation	Priority	Compliance (FS, PS, CR, NS)
	Reporting/Analysis		
380	Ability to generate budget vs. actual reports across multiple levels e.g. departmental, GL codes, cost centre, overall etc.	Mandatory	
381	Ability to factor commitments e.g. open purchase orders in carrying out analysis of budget against actual	Mandatory	
382	Ability to import/export budgets or budget information elements from/to spreadsheet	Mandatory	
383	Ability to print monthly departmental exception reports of actual amounts that exceed a user defined budget variance	Mandatory	
384	Ability to create user-defined budget analysis Reports	Optional	
385	Ability to compare current year actual/budget/forecast month and YTD, previous year actual/budget month & YTD at any level, department, GL code.	Mandatory	
	Expense reporting		
386	Ability to support self-service expense requisition and submission by employees	Mandatory	
387	Ability to support expense policy definition and compliance – e.g. approval limits for expenses	Mandatory	
388	Ability to support per diem and mileage Calculation	Mandatory	
389	Ability to upload expenses from excel Worksheets	Mandatory	
390	Ability to capture expenses by individual Persons	Mandatory	
	Reports	Mandatory	
	<i>Provide expense reports grouped by:</i>		
391	a. Individual	Mandatory	
392	b. Cost centres	Mandatory	
393	c. Expense Item	Mandatory	
394	d. Department	Mandatory	

395	Ability to support expense reporting and analysis by vote	Mandatory	
396	Ability to consolidate individual expenses into departmental expense reports	Mandatory	

4.8.2.2 Supply Chain Management

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
397	Ability to distribute costs to multiple G/L accounts based on a pre-set percentage split.	Mandatory	
398	The ability to allocate costs to a particular department	Mandatory	
399	Ability to handle expense and capital purchases	Mandatory	
400	For all forms of the LPO, apply corporate formats, logos and stylised designs; manage designs so that individuals do not adjust corporate standards. Provide a facility for printing to a Mandatory quality that does not require pre-printed stationary	Mandatory	
401	Ability to archive LPOs, without deleting them	Mandatory	
402	Ability to view information relating to enquiries, quotations, purchase orders and delivery progress with easy access and user-friendly	Mandatory	
403	Ability to capture terms and conditions and print them with LPOs	Mandatory	
404	Ability to maintain detailed audit trails on all transactions	Mandatory	
405	Ability to integrate with an Short Messaging System	Optional	
SUPPLIER MAINTENANCE			
406	Ability to maintain the following information per vendor: a. Vendor code b. Vendor name c. Multiple Contact Name d. Multiple Vendor address e. Multiple Postal address f. E-mail address g. Phone number (multiple) h. Fax number i. Default payment / credit term j. Default currency k. Multiple Vendor bank account number l. Default delivery options m. Product Description/category	Mandatory	
407	Ability to classify vendors e.g. Overseas and local vendors, preference and reservations	Mandatory	

408	Ability to maintain the supplier register/list	Mandatory	
-----	--	-----------	--

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
409	Ability to flag a supplier as active, inactive or blacklisted	Mandatory	
410	Ability to provide enquiry access to users with necessary authorization and for Prequalification: ability to dispatch e-mail communication to vendors on areas where they qualify.	Mandatory	
411	Ability to facilitate for one-off (cash, miscellaneous) supplier accounts subject to approval/authorisation levels	Mandatory	
412	Ability to attach text to a supplier account for historical information or any other purpose	Mandatory	
413	Ability to support prequalification of suppliers. The system should enable capturing of a prequalification criteria checklist and indicate which for each bidder whether they have met the criteria e.g. criteria includes years of experience, compliance to KRA requirements etc.	Optional	
414	Ability to allow suppliers/contractors to capture their data via an online form for prequalification	Optional	
415	Ability to restrict raising of LPOs for certain items to only pre-qualified suppliers/contractors	Mandatory	
416	Ability to blacklist selected suppliers. This should be restricted to authorised personnel and an audit trail retained	Mandatory	
417	Ability to track annual review of suppliers/contractors with contracts	Mandatory	
418	Ability to rate suppliers performance against all aspects of agreements such as delivery times, quality of goods and services, availability of product, pricing, support	Mandatory	
419	Ability to maintain detailed audit trails on changes to the supplier/contractor master data	Mandatory	
420	Provide system generated supplier/contractor numbers	Mandatory	
421	Ability to support multiple payment methods per supplier/contractor	Mandatory	
422	Allow for multiple creditor control accounts in the GL based on supplier/contractor categories	Mandatory	

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
423	Ability to support quick supplier review with: a. Outstanding balance b. Last payment date c. Last payment amount d. Invoices paid e. Last purchase date f. Last purchase amount g. Year-to-date purchases h. Purchases in previous years i. Year-to-date purchases	Mandatory	
424	Analyse expense accounts by suppliers/contractors	Mandatory	
425	Ability to support vendor specific payment terms	Mandatory	
Reporting			
426	List of prequalified suppliers/contractors	Mandatory	
427	Report on supplier/contractors balances	Mandatory	
428	Provide a consolidated report on expenditure supplier	Mandatory	
PROCUREMENT PLAN			
429	Ability to capture departmental procurement needs in the system against the budget	Mandatory	
430	Provide for the approval of departmental procurement needs by the Head of Department.	Mandatory	
431	Ability to consolidate the approved procurement needs into the annual procurement plan.	Mandatory	
432	Provide for approval of the organization procurement plan.	Mandatory	
433	Ability to change the procurement plan with approval.	Mandatory	
434	Ability to track and store different versions of the Procurement Plan (only latest version should be active)		
435	Ability to check if the item being procured is in the procurement plan at the point of raising a purchase requisition or purchase order	Mandatory	
Procurement Plan Reporting			
436	Provide a report on all items procured	Mandatory	

437	Ability to track and report on compliance of purchases to the procurement plan	Mandatory	
-----	--	-----------	--

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
438	Provide a report on items procured but not in the procurement plan	Mandatory	
439	Ability to retrieve purchase orders or tender documents related to a requisition	Mandatory	
PURCHASE REQUISITION MANAGEMENT			
440	Provide approval of store requisition by Head Of Department of respective users		
441	Ability for users to create purchase requisitions for items and services not in store	Mandatory	
442	Provide approval of purchase requisition by Head Of Department of respective users		
443	Ability to default cost centres and departments on the requisitions based on the user creating it	Mandatory	
444	Ability to consolidate multiple purchase requisition from different departments	Mandatory	
445	Ability to follow different requisition approval processes depending on the value of goods, through different approval routes	Mandatory	
446	Ability to monitor the status of purchase requisition raised	Mandatory	
447	Ability to attach documents (e.g. Word, excel, pdf e.t.c.) with the header and lines of purchasing documents (PR, RFQ, Quotes and PO).	Mandatory	
448	Ability to raise Purchase Requisition against a project	Mandatory	
449	Ability to raise Purchase Requisition for service contract with vendors	Mandatory	
450	Ability to allow requisition based on the budget balance	Mandatory	
451	Ability to create purchase orders from data imported from approved purchase requisitions	Mandatory	
QUOTATION MANAGEMENT			
452	Ability to prepare Request for Quotation against a purchase requisition	Mandatory	
453	Ability to electronically send the request for quotation and link it to multiple suppliers	Mandatory	
454	Ability for suppliers to submit the quotes electronically /online	Mandatory	

455	Ability to have an expiry date for the Quote	Mandatory	
456	Ability to secure submitted quotes by encryption until the time and date of opening		
457	Ability to copy vendor's quotation into PO either as a whole or selected lines	Mandatory	

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
458	Ability to rank and report submitted quotations	Mandatory	
PURCHASE ORDER MANAGEMENT			
459	Ability to generate a purchase order against a quotation	Mandatory	
460	Ability to create multiple purchase orders against a single quotation/requisition	Mandatory	
461	Ability to create purchase order for goods and services	Mandatory	
462	Ability to give alerts on approved order requisitions	Mandatory	
463	Ability to generate pending orders and give alerts	Mandatory	
464	Ability to give expiry period to an order and gives alert to the user who requested	Mandatory	
465	Ability to maintain records of the cancelled/expired orders	Mandatory	
466	Ability to set lead time, minimum reorder levels and prompt for reordering and maximum stock level	Mandatory	
467	Ability to link the order to supporting documents e.g. quotations	Mandatory	
468	Ability to forward approved purchase orders to the supplier on email	Mandatory	
469	Ability to track PO/SO's by vendor, service provider, department, order date, requested delivery date and order number	Mandatory	
470	Ability to cancel an order on approval	Mandatory	
471	Ability to view available inventory at PO/SO entry	Mandatory	
472	Ability to scan and attached relevant documents to the PO/SO	Mandatory	
473	Ability to define PO/SO line types (i.e., service, goods, fixed assets)	Mandatory	
474	Ability to route order authorisation based on the set thresholds	Mandatory	

475	Ability to create an order using a previous open or closed order as a template	Mandatory	
476	Facility for adding text notes to purchase order (as total) or to individual line items e.g., delivery information, etc.	Mandatory	
477	Facilities to consolidate orders for suppliers	Mandatory	
478	Flexibility to effect price on purchase order according to terms agreed to with supplier i.e. price effective if within a certain period or price effective	Mandatory	

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
	if a certain quantity is purchased		
479	Ability to modify purchase order with appropriate authorisation. The same approval process as creating a new purchase order has to be followed	Mandatory	
480	Ability to provide alerts of unfulfilled orders and orders about to lapse	Mandatory	
481	Ability to define Local Purchase Order, Local Service Order and Overseas Purchase Orders in the system	Mandatory	
482	Ability to record purchase order acknowledgement from vendor	Mandatory	
483	System should automatically generate an alert if acknowledgement is not received within specified duration from PO issue date	Mandatory	
484	Ability to enter price, payment terms, special discounts, delivery instructions, delivery schedule e.t.c. in purchase order/release	Mandatory	
485	Ability to set receiving tolerance limits in purchase order	Mandatory	
486	System should allow reprint of PO with 'copy, amendment no., reprint' marked on the print out	Mandatory	
487	Ability to search for orders on a number of criteria e.g. Order Number, Supplier, Product, Product category, expected delivery date, etc.	Mandatory	
GOODS RECEIVED (GR)			
488	Ability to receive un-ordered receipts or substitute items with proper authorization	Optional	
489	Ability to match goods received note to Purchase Order	Mandatory	
490	Support for multiple and partial receipts against the same purchase order or service order	Mandatory	

491	Ability to generate goods receipt note with facility to amend/reprint as necessary	Mandatory	
492	Ability to attach scanned documents to support the Goods Received Note eg. the inspection report	Optional	
493	Ability to process good returns e.g. if rejected by inspection committee	Mandatory	
INVOICE VERIFICATION			
494	Ability to Match quantity on an invoice to a Goods receipt and Purchase Order	Mandatory	
495	Ability to Match Value on an invoice to a Goods receipt and Purchase Order	Mandatory	
496	Report on stock issues per department or user	Mandatory	

No	GENERAL REQUIREMENTS	Priority	Compliance (FS, PS, CR, NS)
REPORTING			
497	Ability to query/report on all LPOs status	Mandatory

T7: FORM OF TENDER SECURITY-[Option 1–Demand Bank Guarantee]

Beneficiary: _____

Request for Tender No: _____

Date: _____

TENDER GUARANTEE No.: _____

Guarantor: _____

1. We have been informed that (hereinafter called "the Applicant") has submitted or will submit to the Beneficiary its Tender (hereinafter called "the Tender") for the execution of under Request for Tenders No. ("the ITT").

2. Furthermore, we understand that, according to the Beneficiary's conditions, Tenders must be supported by a Tender guarantee.

3. At the request of the Applicant, we, as Guarantor, hereby irrevocably undertake to pay the Beneficiary any sum or sums not exceeding in total an amount of..... () upon receipt by us of the Beneficiary's complying demand, supported by the Beneficiary's statement, whether in the demand itself or a separate signed document accompanying or identifying the demand, stating that either the Applicant:

(a) has withdrawn its Tender during the period of Tender validity set forth in the Applicant's Letter of Tender ("the Tender Validity Period"), or any extension thereto provided by the Applicant; or

b) having been notified of the acceptance of its Tender by the Beneficiary during the Tender Validity Period or any extension thereto provided by the Applicant, (i) has failed to execute the contract agreement, or (ii) has failed to furnish the Performance.

4. This guarantee will expire: (a) if the Applicant is the successful Tenderer, upon our receipt of copies of the contract agreement signed by the Applicant and the Performance Security and, or (b) if the Applicant is not the successful Tenderer, upon the earlier of (i) our receipt of a copy of the Beneficiary's notification to the Applicant of the results of the Tendering process; or (ii) thirty days after the end of the Tender Validity Period.

5. Consequently, any demand for payment under this guarantee must be received by us at the office indicated above on or before that date.

[signature (s)] _____

T8: FORMAT OF TENDER SECURITY [Option 2–Insurance Guarantee]

TENDER GUARANTEE No.: _____

1. Whereas [Name of the tenderer] (hereinafter called “the tenderer”) has submitted its tender dated [Date of submission of tender] for the [Name and/or description of the tender] (hereinafter called “the Tender”) for the execution of under Request for Tenders No. (“the ITT”).

2. KNOW ALL PEOPLE by these presents that WE of [Name of Insurance Company] having our registered office at (herein after called “the Guarantor”), are bound unto [Name of Procuring Entity] (hereinafter called “the Procuring Entity”) in the sum of (Currency and guarantee amount) for which payment well and truly to be made to the said Procuring Entity, the Guarantor binds itself, its successors and assigns, jointly and severally, firmly by these presents. Sealed with the Common Seal of the said Guarantor this day of 20.

3. NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that if the Applicant:

a) has withdrawn its Tender during the period of Tender validity set forth in the Principal's Letter of Tender (“the Tender Validity Period”), or any extension thereto provided by the Principal; or

b) having been notified of the acceptance of its Tender by the Procuring Entity during the Tender Validity Period or any extension thereto provided by the Principal; (i) failed to execute the Contract agreement; or (ii) has failed to furnish the Performance Security, in accordance with the Instructions to tenderers (“ITT”) of the Procuring Entity's Tendering document. then the guarantee undertakes to immediately pay to the Procuring Entity up to the above amount upon receipt of the Procuring Entity's first written demand, without the Procuring Entity having to substantiate its demand, provided that in its demand the Procuring Entity shall state that the demand arises from the occurrence of any of the above events, specifying which event(s) has occurred.

4. This guarantee will expire: (a) if the Applicant is the successful Tenderer, upon our receipt of copies of the contract agreement signed by the Applicant and the Performance Security and, or (b) if the Applicant is not the successful Tenderer, upon the earlier of (i) our receipt of a copy of the Beneficiary's notification to the Applicant of the results of the Tendering process; or (ii) twenty-eight days after the end of the Tender Validity Period.
5. Consequently, any demand for payment under this guarantee must be received by us at the office indicated above on or before that date.

SECTION VI: FINANCIAL BID

(To be enclosed in a separate envelop from the Technical bid)

- (i) This section constitutes the financial bid segment
- (ii) A bidder **MUST** attach duly signed and stamped **original** Form of Tender and Price Schedule Form

6.1 KIPRE will not consider time and materials pricing. Tenderer shall provide firm and fixed pricing based on the functionality described. For each item, indicate if the cost is one-time, annual, or other.

- The tenderer shall provide price information for each separate component, as well as the costs of any modifications necessary
- Vendor shall provide prices in Kenya shillings
- Vendor shall make clear the rationale and basis of calculation for all fees.
- Vendors shall show separate subtotals for the required elements of the proposed solution, and for any layers of optional elements.

6.2 In presenting software license fees, the tenderer shall:

- Explain all factors that could affect licensing fees;
- Make clear what type of license is offered for each price (named user, concurrent user, installed copies, processor-based, etc.);
- Indicate which product versions, operating platform(s), and machine classes are included for each price;
- Indicate whether a product is for –server or –client, as applicable; and,
- Make clear the extent of any implementation services that are included in the license fees (installation, configuration, training, etc.)
- To the extent possible, bidders shall show any applicable discounts separately from the prices for products and services.
- KIPRE prefers that Bidders provide separate prices for each item in the proposed solution.
- KIPRE reserves the right to pursue direct purchase of all items and services proposed.

SECTION VII: GENERAL CONDITIONS OF CONTRACT

7.1 Definitions

In this contract the following terms shall be interpreted as indicated:

- a) –The contract¹ means the agreement entered into between KIPRE and the tenderer as recorded in the Contract Form signed by the parties, including all attachments and appendices thereto and all documents incorporated by reference therein.
- b) –The Contract Price¹ means the price payable to the tenderer under the Contract for the full and proper performance of its contractual obligations.
- c) –The services¹ means services to be provided by the vendor including materials and incidentals which the tenderer is required to provide to KIPRE under the Contract.
- d) –The Procuring entity¹ means the organization sourcing for the services under this Contract.
- e) –The vendor means the individual or firm providing the services under this Contract.
- f) –GCC¹ means general conditions of contract contained in this section
- g) –SCC¹ means the special conditions of contract
- h) –Day¹ means calendar day

7.2 Application

These General Conditions shall apply to the extent that they are not superseded by provisions of other part of contract.

7.3 Standards

The services provided under this Contract shall conform to the 7 standards mentioned in the Schedule of requirements.

7.4 Patent Right¹

- 7.3.1 The tenderer shall indemnify KIPRE against all third-party claims of infringement of patent, trademark, or industrial design rights arising from use of the services under the contract or any part thereof.

7.5 Performance Security

7.5.1 Within twenty-eight (28) days of receipt of the notification of Contract award, the successful tenderer shall furnish to KIPRE the performance security denominated in Kenyan Shilling for an amount equal to **100,000.00 (one hundred thousand)**.

7.5.2 The proceeds of the performance security shall be payable to KIPRE as compensation for any loss resulting from the tenderer's failure to complete its obligations under the Contract.

7.5.3 The performance security shall be denominated in the currency of the Contract or in a freely convertible currency acceptable to KIPRE and shall be in the form of either Cash or a bank guarantee.

7.5.4 The performance security will be discharged by KIPRE and returned to the candidate not later than thirty (30) days following the date of completion of the tenderer's performance of obligations under the contract, including any warranty obligations under the contract.

7.6 Inspections and Tests

7.6.1 KIPRE or its representative shall have the right to inspect and/or to test the services to confirm their conformity to the Contract specifications. KIPRE shall notify the tenderer in writing, in a timely manner, of the identity of any representatives retained for these purposes.

7.6.2 Should any inspected or tested services fail to conform to the specifications, KIPRE may reject the services, and the tenderer shall either replace the rejected services or make alterations necessary to meet specification requirements free of cost to the Procuring entity.

7.6.3 Nothing in paragraph 4.6 shall in any way release the tenderer from any warranty or other obligations under this Contract.

7.7 Payment

7.7.1 The method and conditions of payment to be made to the tenderer under this Contract shall be specified in SCC

7.8 Prices

Prices charged by the vendor for services performed under the Contract shall not, with the exception of any Price adjustments authorized in SCC, vary from the prices by the tenderer in its tender or in the procuring entity's request for tender validity extension as the case may be. No variation in or modification to the terms of the contract shall be made except by written amendment signed by the parties.

7.9 Assignment

The tenderer shall not assign, in whole or in part, its obligations to perform under this contract, except with the Authority's prior written consent.

7.10 Termination for Default

7.10.1 KIPRE may, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the tenderer, terminate this Contract in whole or in part:

- a) If the tenderer fails to provide any or all of the services within the period(s) specified in the Contract, or within any extension thereof granted by the Procuring entity.
- b) If the tenderer fails to perform any other obligation(s) under the Contract.
- c) If the tenderer, in the judgment of KIPRE has engaged in corrupt or fraudulent practices in competing for or in executing the Contract.
- d) In the event KIPRE terminates the Contract in whole or in part, it may procure, upon such terms and in such manner as it deems appropriate, services similar to those undelivered, and the tenderer shall be liable to KIPRE for any excess costs for such similar services.

7.11 Termination of insolvency

KIPRE may at the anytime terminate the contract by giving written notice to the vendor if the vendor becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the vendor, provided that such termination will not produce or affect any right of action or remedy, which has accrued or will accrue thereafter to the procuring entity.

7.12 Termination for convenience

7.12.1 KIPRE by written notice sent to the vendor may terminate the contract in whole or in part, at any time for its convenience. The notice of termination shall specify that the termination is for KIPRE convenience, the extent to which performance of the vendor of the contract is terminated and the date on which such termination becomes effective.

7.12.2 For the remaining part of the contract after termination KIPRE may elect to cancel the services and pay to the vendor on agreed amount for partially completed services.

7.13 Resolution of disputes

7.13.1 KIPRE and the vendor shall make every effort to resolve amicably by direct informal negotiations any disagreement or dispute arising between them under or in connection with the contract.

7.13.2 If after thirty (30) days from the commencement of such informal negotiations both parties have been unable to resolve amicably a contract dispute either party may require that the dispute be referred for resolution to the formal mechanisms specified in the SCC.

7.14 Governing Language

7.13.1 The contract shall be written in the English language. All correspondence and other documents pertaining to the contract, which are exchanged by the parties, shall be written in the same language.

7.15 Force Majeure

The vendor shall not be liable for forfeiture of its performance security, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

7.16 Applicable Law.

The contract shall be interpreted in accordance with the laws of Kenya unless otherwise specified in the SCC

7.17 Notices

7.17.1 Any notices given by one party to the other pursuant to this contract shall be sent to the other party by post or by fax or E-mail and confirmed in writing to the other party's address specified in the SCC

7.17.2 A notice shall be effective when delivered or on the notices effective date, whichever is later.

SECTION VIII: SPECIAL CONDITIONS OF CONTRACT

8.1.1 Special conditions of contract shall supplement the general conditions of contract, wherever there is a conflict between the GCC and the SCC, the provisions of the SCC herein shall prevail over those in the GCC.

8.1.2 Special conditions of contract with reference to the general conditions of contract.

8.1.3 **Implementation support:** The successful tenderer will be required to offer a 2 year post implementation support under warranty and training for the project to ensure that all the benefits associated with procuring the systems pass to the client. Thereafter, the bidder will be offered a one (1) year renewable contract for post implementation support.

8.1.4 Hardware Requirements

The successful tenderer shall give a clear indication as to the hardware requirements to the client while exercising due care.
