

6/21/2026

BASIC DETAILS

Name	Kenya Institute of Primate Research (KIPRE)
Category	Government Institution
Email Address	ceo@primateresearch.org
Name	+254202606235
Establishment Document	Uploaded
Postal Address	P.O Box 24481-00502
Country	Kenya
County	KAJIADO

REGISTRATION REPRESENTATIVE

Name	Patrick Waweru Mwaura
Email Address	mwaure76.pm@primateresearch.org
Phone Number	+254741527254
Relation / Role	Staff Member, Head Data science and analytics section

PERSONAL DATA

Employees

Current and former employee records including payroll, performance management, leave, pension and disciplinary records.

Human resource management and statutory compliance.

Job applicants.

CVs, academic certificates, application forms and interview records.

Recruitment and selection.

Suppliers and consultants.

Contact details, contracts, tax information and payment records.

Procurement and contract management.

Research participants.

Demographic, survey, laboratory and research-related information.

Conduct of scientific research.

Customers/clients.

Contact information, service requests and correspondence.

Service delivery and customer support.

Board members.

Governance, appointment and remuneration records.

Institutional governance.

Visitors.

Visitor logs, CCTV footage and access records.

Security and access control.

SENSITIVE DATA

Racial or ethnic origin

Processing demographic and research data on behalf of approved research institutions for epidemiological analysis, biomedical studies, and statistical reporting in compliance with contractual and ethical requirements.

Property Details (Including Financials)

Processing financial and administrative records for payroll management, procurement, grants administration, reimbursements, and statutory reporting on behalf of the data controller.

Religious, philosophical conscience and beliefs

Processing limited information where necessary for employee welfare, accommodation, or approved research activities as instructed by the data controller.

Marital (Include spouse and childrens details)

Processing employee and beneficiary records for insurance administration, pension management, emergency contacts, and human resource functions under authorized institutional processes.

Health Status (Physical or Mental Health)

Processing health and medical data for biomedical research, occupational health assessments, laboratory investigations, clinical monitoring, and approved scientific studies.

Sex/Sexual Orientation

Processing demographic and health-related data for biomedical research, public health analysis, epidemiological studies, and reporting requirements approved by the data controller.

Biometric data

Processing biometric identifiers for participant verification, laboratory sample linkage, institutional access management, attendance systems, and research authentication procedures.

GPS Location Data

Processing geolocation data for field research activities, epidemiological mapping, sample tracking, geospatial analysis, and operational coordination.

Genetic data

Processing genetic and genomic data for biomedical, molecular, translational, and laboratory-based scientific research under approved protocols and data-sharing agreements.

RISK AND SAFEGUARD MEASURES

Malware Attacks e.g., Trojans, Spyware, Adware, Scareware, Ransomware, Botnets, Key logger, Worms, Rootkits, Virus, Fileless Malware
Deployment of antivirus and anti-malware solutions, regular software updates and security patching, firewall protection, restricted installation privileges, secure backup systems, email filtering, and continuous monitoring of institutional ICT systems.

Password Theft

Enforcement of strong password policies combined with multi-factor authentication (MFA), account lockout mechanisms after repeated failed login attempts, and secure password storage using encryption or hashing.

Phishing Attacks

Email filtering and anti-phishing software combined with multi-factor authentication (MFA) to prevent unauthorized account access.

Social Engineering e.g., Baiting, Shoulder Surfing, Dumpster Diving

Regular cybersecurity awareness training for staff combined with strict identity verification procedures and enforced access control policies to prevent unauthorized disclosure of information.

Ransomware

Regular encrypted backups, endpoint antivirus and anti-malware protection, timely security patching, and network segmentation to prevent ransomware infection and enable recovery without paying a ransom.

Fraud e.g., Sim Swap, Embezzlement, Insider Trading

Role-based access control (RBAC) with audit logs and segregation of duties to ensure accountability and traceability of transactions.

Cyberespionage

Data encryption (in transit and at rest), strict role-based access controls (RBAC), multi-factor authentication (MFA), and network monitoring systems to prevent unauthorized surveillance and data exfiltration.

Theft of Financial or Card Payment Data

Encryption of financial and payment data, multi-factor authentication (MFA), secure payment processing systems, and role-based access controls to prevent unauthorized access, interception, and misuse of financial information.

Cyber Extortion e.g., Bribery

Regular offline and encrypted backups combined with endpoint protection (antivirus/EDR), security patch management, and network segmentation to prevent malware spread and enable system recovery without paying ransom.

Distributed Denial of Service

Traffic filtering and rate limiting through firewalls and intrusion prevention systems (IPS), combined with network load balancing and DDoS mitigation services to maintain system availability during attack attempts.
