2026/2027 ANNUAL WORKPLAN

Costed Institutional Workplan Aligned to the KIPRE Strategic Plan 2023–2027

Total Approved Budget Allocation

KES 1,025,113,534

		Signature:	Date:
Prepared & reviewed by:	Ag. Deputy Director, Planning & Strategy Division		10/08/2026
Approved by:	Director General/CEO		10/08/2026

Kenya VISION 2030

VISION

To be a centre of excellence in innovative research and conservation efforts for improved human health

MISSION

To promote public health through innovative preclinical and biomedical research, training and biodiversity conservation

CORE VALUES

1. Professionalism
2. Research integrity
3. Innovation
4. Customer Focus
5. Equity

Kenya Institute of Primate Research (KIPRE)

FOREWORD

The Kenya Institute of Primate Research (KIPRE) presents this Institutional Workplan, carefully crafted to show what the Institute intends to achieve by the end of the 2026/2027 Financial Year. This workplan is firmly anchored on Year Four of the Institute's Strategic Plan 2023–2027, reflecting our deep commitment to the KIPRE vision of being a center of excellence in innovative research and conservation for improved human health.

Guided by our mission, to promote public health through innovative preclinical and biomedical research, training and biodiversity conservation, this workplan demonstrates a firm resolve towards achieving our strategic objectives, ensuring that every planned initiative contributes directly to our core mandate.

This is not simply a budget document. Backed by a total resource envelope of KES 1,025,113,534 spread across four strategic issues and ten Key Result Areas, the workplan translates KIPRE's mandate into 139 concrete activities and 435 measurable sub-activities, each with a named responsible Division, a performance indicator and a funding source. It is a management instrument as much as a planning one: it tells every Director, Head of Division and staff member exactly what is expected of them, by when, and with what resources.

The workplan speaks directly to the national health agenda. It advances the Ministry of Health's drive towards Universal Health Coverage by strengthening the preclinical and translational research pipeline that underpins new diagnostics, treatments and vaccines. It responds to the Ministry's pandemic preparedness and health security priorities through our One Health and antimicrobial resistance work. And it supports the Bottom-Up Economic Transformation Agenda by building a domestic antivenom production capability, diversifying KIPRE's own revenue streams, and growing the research and innovation value chain that the health sector depends on for jobs, technology transfer and export-ready health products.

The workplan focuses on four strategic issues:

1. Inadequate research and innovation for improved human health;
2. Insufficient pandemic preparedness, epidemiology, biodiversity conservation, climate change response, environmental antimicrobial resistance (AMR) and ecosystem health;
3. Weak institutional capability for health research excellence; and
4. Inadequate financial support for health research and innovation.

By addressing these strategic priorities, KIPRE will continue to contribute meaningfully to national and global efforts to improve public health and conserve biodiversity. Delivered as planned, this workplan will mean more Kenyans surviving snakebite envenoming through locally produced antivenom, faster detection of the next emerging pathogen, better-protected primate populations and habitats, and a stronger, more financially self-reliant national research institute. Achieving these ambitions calls for the collective commitment and dedication of all staff and stakeholders.

I wish to sincerely appreciate the collaborative effort of all staff whose contributions have led to the successful development of this workplan. Together, we will continue to uphold the highest standards as we work to realize KIPRE's vision and create impact all round.

Dr. Peter Gichuhi Mwethera, PhD, MBS
DIRECTOR GENERAL/CEO

KIPRE 2026/2027 Annual Workplan Page 3 of 70

INTRODUCTION

Today, KIPRE stands as a leading research institution in Africa, playing a vital role in advancing scientific knowledge and addressing critical health challenges facing humanity and biodiversity. Through its ongoing research and collaborations, KIPRE continues to contribute significantly to the understanding of primate biology, human health, and the conservation of biodiversity, with a bias towards flora and fauna of medical importance. Its research areas include tropical and infectious diseases, reproductive health and biology, non-communicable diseases, snakebite research and intervention, and One Health research focusing on emerging pathogens, zoonotic diseases, ecosystem health and the conservation of biodiversity of importance to human health — for example primates, snakes, bats, rodents and medicinal plants. KIPRE also acts as the secretariat for the National Primate Taskforce, underscoring its national relevance in the primate conservation advisory role.

KIPRE is dedicated to conducting cutting-edge research translating scientific discoveries into tangible benefits for human and animal well-being. This commitment is supported by developing and maintaining advanced infrastructure that fosters world-class research and attracts global collaborations. KIPRE prioritizes capacity building by investing in the training and development of young scientists, researchers and technical staff, ensuring a skilled workforce for the future of primate research. The Institute embraces a One Health approach, recognizing the interconnectedness of human, animal and environmental health in its research programs, and maintains the highest ethical and sustainability standards across all its research activities, ensuring the welfare of primates under its care while promoting conservation.

Legal Mandate

Under Legal Notice No. 273, KIPRE is mandated to:

a) Conduct basic, pre-clinical and translational research using non-human primates and other experimental animals, in liaison with the relevant government agencies;

b) Establish an incubation center linking research and industry in the health products value chain;

c) Contribute to early warning systems for emerging and re-emerging diseases;

d) Establish and operate a national breeding colony of non-human primates and other experimental laboratory animals for research purposes;

e) Provide national in-vitro fertilization services for endangered wildlife of Kenya, in liaison with relevant government agencies;

f) Undertake studies in non-human primate conservation biology and primatology;

g) Create and maintain a national non-human primate database on research affiliations and the geo-spatial distribution of non-human primates and related zoonotic diseases;

h) Serve as a national research center for venom and anti-venom, including snakebite disease;

i) Undertake basic and pre-clinical research on reproductive health, and infectious and non-communicable diseases, using non-human primates;

j) Develop and characterize non-human primate and other experimental animal models for priority diseases in Kenya;

k) Undertake research in Human African Trypanosomiasis;

l) Undertake capacity building in animal welfare and the ethical use and care of non-human primates and other experimental animals in laboratory settings; and

m) Perform any other function incidental to the foregoing.

In performing these functions, the Institute has power to:

a) Create, develop, apply for and hold intellectual property rights, and enter into agreements for their commercial exploitation as the Board may consider appropriate;
b) Enter into partnerships and collaborations with similar institutions or professional organizations, within or outside Kenya;
c) Charge fees for services rendered;
d) Breed and maintain colonies of non-human primates and other experimental laboratory animals for research purposes; and
e) Do any other thing necessary or convenient to its functions.

About this Workplan

To effectively deliver on this mandate, KIPRE implements its programs through a Strategic Plan that sets the long-term direction for achieving the Institute's vision and mission. This Annual Workplan operationalizes the Strategic Plan by translating its strategic objectives into measurable activities, outputs and performance targets for the 2026/2027 implementation period. It provides a framework for coordinating effort, aligning resources, monitoring progress and enhancing accountability in the delivery of the Institute's mandate.

The workplan sets out implementation timelines, responsible divisions and resource requirements necessary to achieve four strategic goals aligned to the four strategic issues identified above. Its implementation is supported by a total approved budget ceiling of KES 1,025,113,534 from Recurrent and Development funds, complemented by KES 9,608,000 from the African Snakebite Alliance (ASA), a named donor partnership supporting the Institute's antivenom and snakebite research agenda. Together, these resources are aligned to the Institute's strategic priorities to ensure efficient utilization of resources and successful delivery of planned outputs and outcomes.

While the costed workplan prioritizes activities that can be implemented within the approved budget allocation, a number of additional priority activities were identified in the course of planning that would further advance the Institute's mandate. These are presented in the Appendix to this workplan as activities subject to the availability of additional funds, whether through exchequer allocation, donor funding (including from the African Snakebite Alliance and other research partners), or internally generated revenue.

Alignment to the Ministry of Health and National Agenda

As a State Corporation under the Ministry of Health – State Department for Public Health and Professional Standards, KIPRE's work is deliberately positioned to advance the Ministry's own strategic priorities, not merely its own institutional interests. The pre-clinical and translational research programs under Strategic Issue 1 feed directly into the Ministry's Universal Health Coverage agenda by generating the local evidence base — on reproductive health, infectious and non-communicable disease, and snakebite Research and Intervention — that informs national treatment guidelines and reduces reliance on imported clinical evidence.

The epidemiology, pandemic preparedness, One Health and AMR surveillance work under Strategic Issue 2 directly supports the Ministry's health security and pandemic preparedness architecture, including Kenya's Antimicrobial Resistance National Action Plan and its International Health Regulations obligations, while the biodiversity and ecosystem health components support Kenya's commitments under national conservation policy and international biodiversity frameworks.

The institutional capability investments under Strategic Issue 3 — human resource development, infrastructure and research collaboration — build the specialized research workforce and facilities that the health sector cannot source elsewhere, while the resource mobilization and financial sustainability work under Strategic Issue 4 supports the Bottom-Up Economic Transformation Agenda's health and manufacturing pillars by growing domestic production of health products

such as antivenom and reducing the Institute's, and by extension the sector's, dependence on exchequer funding over time.

Expected Impact

Successful implementation of this workplan is expected to deliver impact at three levels.

At the level of public health, it will expand Kenya's domestic capacity for snakebite prevention and treatment through locally developed antivenom and diagnostics, strengthen early-warning systems for emerging and re-emerging diseases, and generate new evidence on reproductive, infectious and non-communicable disease that can shape national clinical and public health practice.

At the level of biodiversity and environment, it will improve the conservation status of non-human primates and other species of medical importance, strengthen ecosystem health monitoring, and position KIPRE as the credible national authority on primate conservation through its secretariat role at the National Primate Taskforce.

At the institutional level, it will leave KIPRE a stronger, better-governed and more financially resilient organization: a trained and better-equipped workforce, modernized laboratory and ICT infrastructure including a new Laboratory Information Management System, deeper research partnerships that bring in co-financing, and a more diversified revenue base that reduces reliance on a single funding source. Taken together, these outcomes are what will allow KIPRE to sustain its contribution to the Ministry of Health's mandate well beyond the 2026/2027 Financial Year.

WORKPLAN AT A GLANCE

A statistical snapshot of the 2026/2027 Annual Workplan, prepared to give a quick, visual read of where resources are concentrated and what to watch.

Total Budget	Strategic Issues	Activities Planned	Additional Priorities
KES 1025.1M	**4**	**139**	**KES 626.9M**
Recurrent & Development	10 Key Result Areas	435 sub-activities	Subject to extra funding

Funding Source Composition

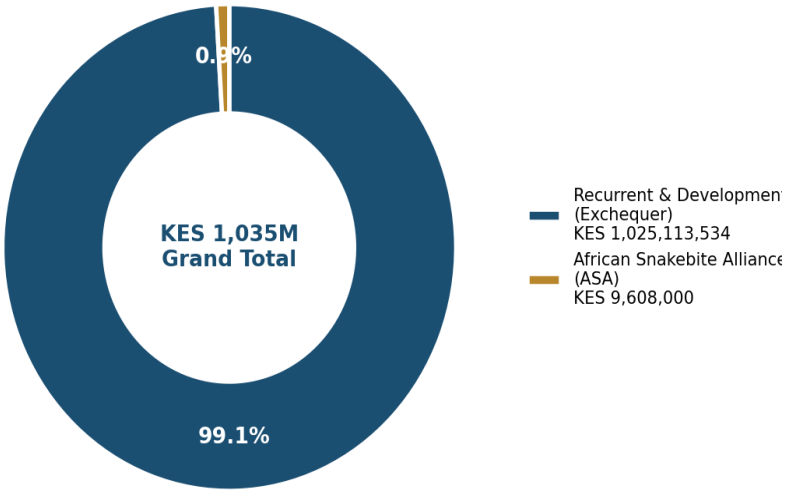

Figure 1: Donut chart showing the composition of total institutional funding by source.

Budget Allocation by Strategic Issue

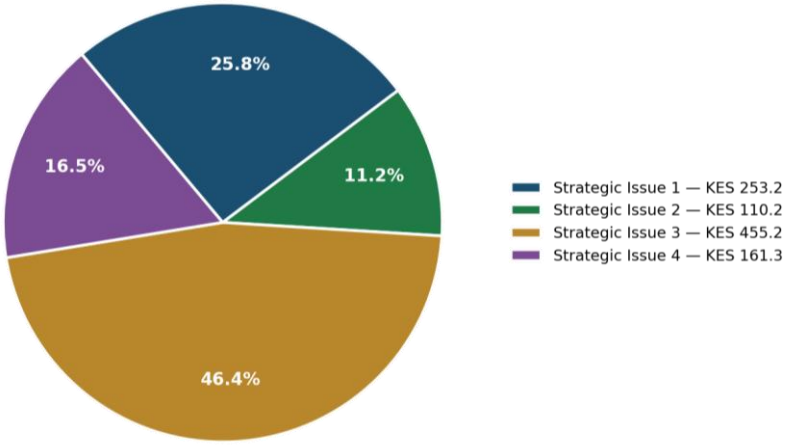

Figure 2: Pie chart showing budget allocated to each of the four strategic issues.

Budget Allocation by Key Result Area

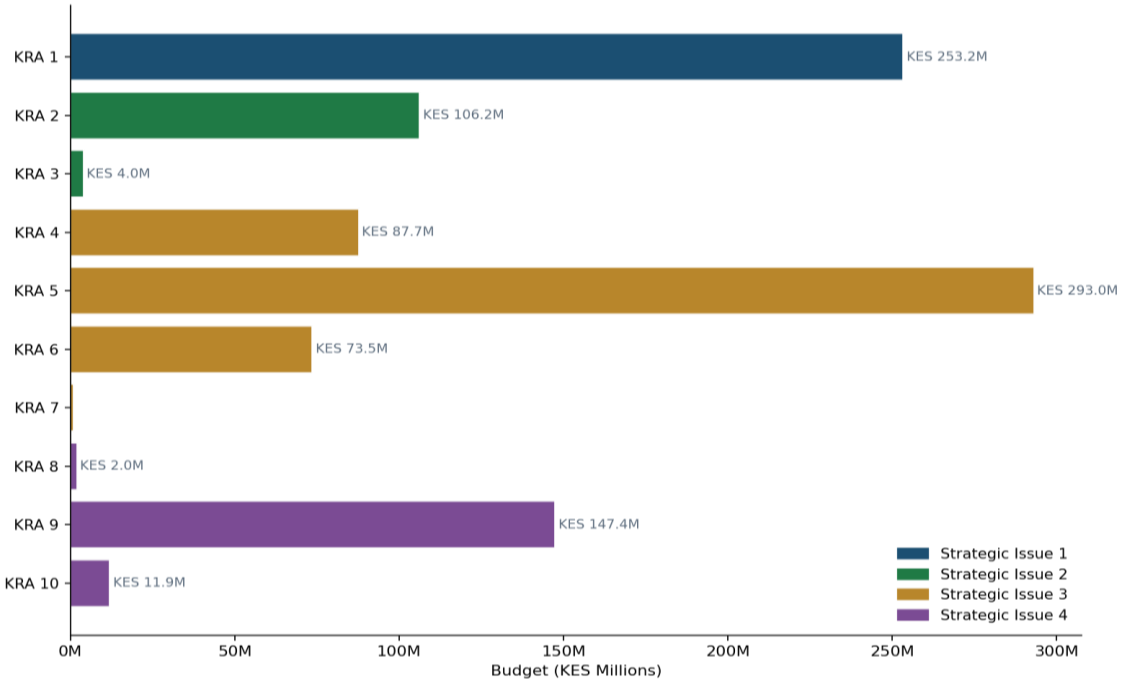

Figure 3: Budget per Key Result Area, color-coded by parent Strategic Issue (see legend).

Top 10 Highest-Cost Line Items

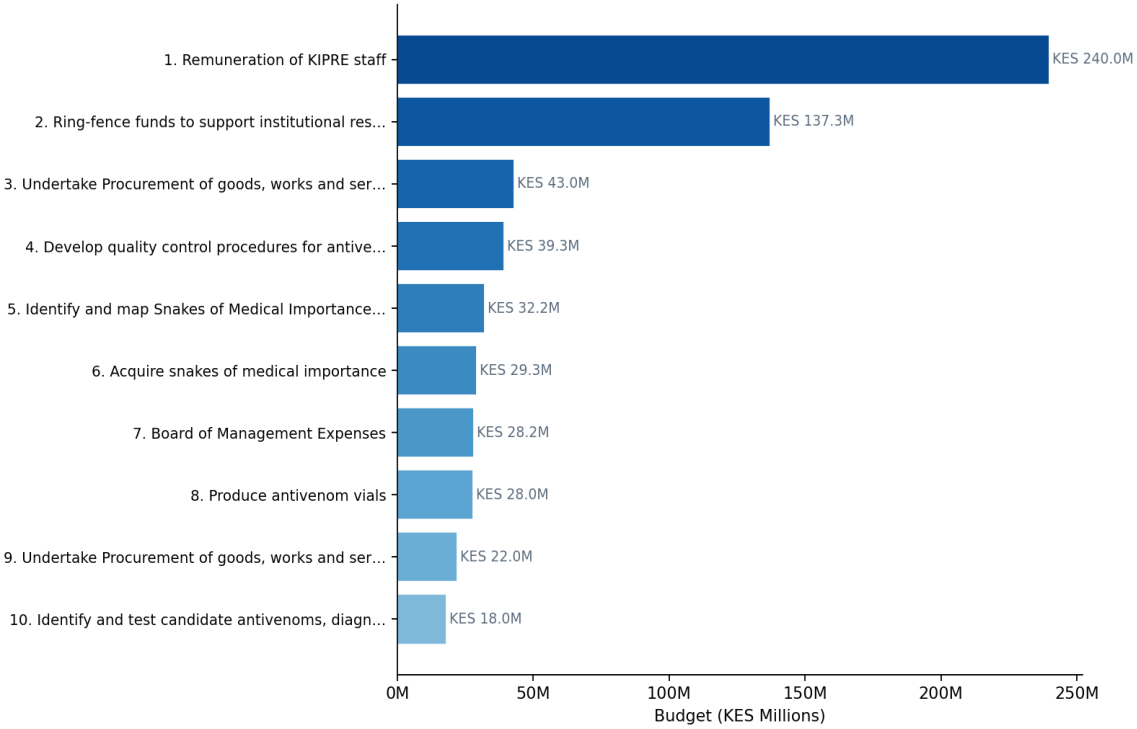

Figure 4: Horizontal bar chart of the ten highest-cost line items in the workplan, ranked by budget.

Key

#	Line Item	Budget (KES)
1	Remuneration of KIPRE staff	240,000,000
2	Ring-fence funds to support institutional research activities	137,277,436
3	Undertake Procurement of goods, works and services	43,000,000
4	Develop quality control procedures for antivenom	39,340,576
5	Identify and map Snakes of Medical Importance, other venomous snakes and other venomous species, map intra and inter-county snakebite hotspots in endemic counties	32,184,000
6	Acquire snakes of medical importance	29,303,200
7	Board of Management Expenses	28,160,000
8	Produce antivenom vials	28,000,000
9	Undertake Procurement of goods, works and services	22,000,000
10	Identify and test candidate antivenoms, diagnostics and other biologics for clinical efficacy and safety	18,000,000

Key Insights

- Strategic Issue 3 accounts for the largest share of the budget at KES 455,213,268 (44.4% of the total) — institutional capability building is this workplan's single biggest cost driver.
- KRA 5 (Human Resource Development) is the costliest Key Result Area at KES 293,022,000 (28.6% of total), driven mainly by staff remuneration.
- Staff remuneration alone is KES 240,000,000 — 23.4% of the entire budget — the largest single line item in the workplan.
- KES 137,277,436 (13.4%) is ring-fenced to directly support institutional research activities, safeguarding research delivery against competing administrative pressures.
- A further KES 626.9M in additional priority activities has been identified but is not yet funded — management may wish to prioritize resource mobilization against the items in the Appendix.

BUDGET SUMMARY

The table below summarizes the resource allocation across the four strategic issues and their constituent Key Result Areas for the 2026/2027 Financial Year.

Strategic Issue / Key Result Area	Budget (KES)	% of Total
Strategic Issue 1: Inadequate Research and innovations for improved Human Health	**253,235,400**	**24.7%**
Key Result Area 1: Pre-clinical and translational Research for improved human health	253,235,400	24.7%
Strategic Issue 2: Insufficient Pandemic Preparedness, epidemiology, Biodiversity Conservation, Climate change, Environmental Antimicrobial Resistance (AMR), and Ecosystem health.	**110,245,480**	**10.8%**
Key Result Area 2: Epidemiology, Disease Surveillance and Pandemic Preparedness	106,245,480	10.4%
Key Result Area 3: Biodiversity conservation, ecosystem health, climate change response and awareness	4,000,000	0.4%
Strategic Issue 3: Weak institutional capability for health research excellence	**455,213,268**	**44.4%**
Key Result Area 4: Legal, regulatory and policy framework	87,664,641	8.6%
Key Result Area 5: Human Resource Development	293,022,000	28.6%
Key Result Area 6: Infrastructure and equipment	73,526,627	7.2%
Key Result Area 7: Research collaborations and partnerships	1,000,000	0.1%
Strategic Issue 4: Inadequate Financial support for health research & Innovation	**161,315,336**	**15.7%**
Key Result Area 8: Advocacy and engagement of the government for increased research funding	2,000,000	0.2%
Key Result Area 9: Diversified funding streams	147,380,036	14.4%
Key Result Area 10: Efficient resource Utilization	11,935,300	1.2%
Administrative and Statutory Support Expenditure	**54,712,050**	**5.3%**
Fleet and Security Management	15,677,050	1.5%
Director General's Office Expenses	10,875,000	1.1%
Board of Management Expenses	28,160,000	2.7%
TOTAL (RECURRENT AND DEVELOPMENT)	**1,025,113,534**	**100.0%**
African Snakebite Alliance (ASA)	*9,608,000*	
GRAND TOTAL (ALL SOURCES)	**1,034,721,534**	

COSTED WORKPLAN BY STRATEGIC ISSUE

Strategic Issue 1: Inadequate Research and innovations for improved Human Health

Strategic Goal 1: To Promote research and innovation to address critical health challenges and improve human well-being.

Key Result Area 1

Pre-clinical and translational Research for improved human health

Result Areas	Activity	Sub-Activities	Expected Output	Performance Indicator	Impact	Target	Means of Verification (MoV)	Q1			Q2			Q3			Q4			Estimated Cost (KES)	Responsibility		Source of Funds

Key Result Area 5: Human Resource Development	**Outcome: Increased skilled and competent workforce**																						
	Strategic Objective 1: To promote public engagement and communication																						
	1. Coordinate Development and Implementation of Training and Capacity Building Policies and Strategies	1. Review existing policies, strategies and guidelines on training and capacity building	Training and Capacity Building policies, guidelines and Strategies developed	1. No. of training policies/guidelines developed or reviewed. 2. Training strategy approved. 3. % implementation of training strategy activities.	Strengthened institutional framework for professional training and capacity development.	10	Approved policies and guidelines, strategy documents, implementation reports.													1,000,000	CBPGM	All Other Directorates	GOK Recurrent
		2. Conduct needs assessment on research training		TNA report		1	survey/questionnaire results, reports,														CBPGM	HR and Admin	GOK Recurrent
	2. Support and coordinate Professional Biomedical Training Programs	1. Support and coordinate short biomedical courses aligned to institutional mandate. (e.g. IPMB, Laboratory animal Science Short courses etc.)	Relevant biomedical training programs developed	• No. of courses developed.	Improved professional skills and competencies in biomedical research and practice.	2	Training reports, course materials, participant registers, evaluation reports.													2,325,000	CBPGM	DRPD, ASWED	GOK Recurrent
		2. Identify professional biomedical training programs for researchers		No. of researchers linked to relevant biomedical training programs		4	certificates of completion, training records,																
	3. Promote Knowledge Management (KM) and Dissemination	1. Develop and Implement the KIPRE KM repository (Acquire the Dspace software/repository)	—	User adoption rate, submission rate, usage frequency, download and view counts	—	1	Software selection documentation, repository policies, repository URL/Platform access													1,000,000	CBPGM	Data Science & Analytics/ICT	GOK Recurrent
		2. Train CBPGM staff on the KM repository	—	No. of CBPGM Staff trained	—	10	Training reports, certificates, attendance lists														CBPGM	HR and Admin	GOK Recurrent

Result Areas	Activity	Sub-Activities	Expected Output	Performance Indicator	Impact	Target	Means of Verification (MoV)	Q1			Q2			Q3			Q4			Estimated Cost (KES)	Responsibility		Source of Funds
								Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun		Lead	Support	
		3. Sensitize staff on the KM repository	—	No. of KIPRE staff sensitized		150	Attendance lists																
		4.Document and disseminate training materials and knowledge products.	—	% of KIPRE training materials and knowledge products added to repository	—	—	—														CBPGM	All Other Directorates	GOK Recurrent
		5. Facilitate publication and sharing of training resources.	—	No. of publications and training resources shared/accessed	—	—	Repository URL/Platform access, repository usage statistics														CBPGM	ICT	GOK Recurrent
		6. Subscribe to journals and databases (e.g. Scopus)	—	Journal Access	—	1	—														CBPGM	1CT	GOK Recurrent
		7. Subscribe to plagiarism/AI detection software	—	vendor agreements	—	1	—														CBPGM	ICT	GOK Recurrent
		8. Coordination of KIPRE seminars	—	No. of weekly seminars conducted	—	35	Attendance Lists														CBPGM	All Other Directorates	GOK Recurrent
		9. Sensitize staff on controlled documents e.g. SPOs, policies, guideline	—	No. of controlled documents made available to staff	—	—	Attendance lists, controlled documents made available														CBPGM	Planning and Strategy	GOK Recurrent
	4. Digitize references and other materials	1. Acquire the KOHA Library management system (software)	Automation of core library functions	Online Public Access Catalog usage, system reliability and uptime, migration efficiency	Improved access to knowledge and institutional learning	1	Vendor agreements, training sign-offs, live system availability													0	CBPGM	Data Science & Analytics/ICT	GOK Recurrent
		2. Digitize all library and reference material		% no of library and reference materials digitized		1	—																
	Facilitate Specialized training for laboratory professionals	Facilitate training on Total Quality Management (TQM), Good laboratory practices (GLP) and International Organization for Standardization (ISO) 17025	Specialized training for laboratory professionals Facilitated	Number of trainings on Total Quality Management (TQM), Good laboratory practices (GLP) and International Organization for Standardization (ISO) 17025 facilitated	Increased Capacity and productivity in lab operations, strengthens biosafety and biosecurity procedures and compliance on regulatory standards.	2	Certificates													7,980,000	Planning	LSS	Gok
	Facilitate Specialized training for laboratory professionals	Facilitate participation for workshop on Infection prevention control (IPC) and occupational safety and health (OSH), Biosafety and biosecurity		Number of work shop on Infection prevention control (IPC) and occupational safety and health (OSH), Biosafety and biosecurity participation facilitated		2	Certificates													390,000	EHS	LSS	Gok
	Coordinate Development and Implementation of Human Resource Policies and Strategies	1. Develop and review HR policies, procedures and systems.	Updated HR policy framework and improved HR governance.	• No. of HR policies reviewed or developed.	Strengthened institutional HR governance and compliance with HR standards.	2	Approved HR policies, HR survey reports, advisory reports.													600,000	HR & Admin	DCS	GOK Recurrent
		2. Implement HR strategies aligned to		• HR surveys conducted.		5														—	HR & Admin	All Directors	GOK Recurrent

Result Areas	Activity	Sub-Activities	Expected Output	Performance Indicator	Impact	Target	Means of Verification (MoV)	Q1			Q2			Q3			Q4			Estimated Cost (KES)	Responsibility		Source of Funds

		institutional objectives.		• No. of HR advisory reports produced.																			
		3. Conduct HR management surveys on working environment.				1														200,000	HR & Admin	DCS	GOK Recurrent
		4. Provide advisory services to management on HR matters.				—														—	Legal Services	HR & Admin	GOK Recurrent
		5. Conduct training need assessment		TNA reports.		All Staff	TNA reports													500,000	HR & Admin	DG's Office and directorates	GOK Recurrent
	Coordinate Human Resource Planning, Recruitment and Talent Management	1. Conduct institutional HR planning and skills needs assessments.	Effective recruitment and optimal staffing levels achieved.	• No. of staff recruited. • % positions filled. • Staff turnover rate.	Improved human capital capacity and institutional performance.	3	Recruitment records, appointment letters, HR establishment records.														1,000,000	HR & Admin	ICT	GOK Recurrent
		2. Coordinate recruitment, selection and placement of staff.				45														1,000,000	DG's Office	HR & Admin	GOK Recurrent
		3. Facilitate staff induction, promotions and retention initiatives.				4														1,300,000	HR & Admin	DG's Office	GOK Recurrent
		4. Manage staff separation processes including retirement and exit management.				4														1,600,000	HR & Admin	DCS	GOK Recurrent
	Strengthen Staff Capacity Development and Career Management	1. Develop and implement staff training and capacity building programs.	Improved staff competencies and professional development.	• No. of staff trained. • Training programs conducted. • Updated staff skills inventory.	Enhanced staff productivity and institutional expertise.	5	Training reports, staff development plans, training registers.														2,000,000	HR & Admin	DG's Office & all directorates and divisions	GOK Recurrent
		2. Facilitate professional development and career progression.				4														1,000,000	HR & Admin	DG's Office & all directorates	GOK Recurrent
		3. Coordinate succession planning and skills development initiatives.				4														1,000,000	HR & Admin	All heads, directorates and divisions	GOK Recurrent
		4. Maintain staff training records and skills inventory.				All Staff														1,000,000			
	Coordinate Performance Management and Reward Systems	1. Implement institutional performance management systems.	Functional performance management and reward system.	• % staff appraised annually. • Performance appraisal reports completed. • Staff reward schemes implemented.	Improved staff accountability, motivation and productivity.	1	Performance appraisal reports, HR performance reports, reward scheme records. P														250,000	HR & ICT	DG's Office and Supply Chain management	GOK Recurrent
		2. Facilitate staff performance appraisal processes.				All Staff														50,000	HR	Directorates & Division	GOK Recurrent
		3. Develop and implement staff reward,				19														250,000	HR & Admin	HR & Corporate Services	GOK Recurrent

		compensation and benefits schemes.																					
		4. Monitor performance management compliance across departments.				All Staff														—	HR & Admin	All directorates and divisions	GOK Recurrent
	Promote Employee Welfare, Relations/Governance and Institutional Values	1. Manage staff welfare programs including medical scheme.	1	• No. of welfare programs implemented. • No. of grievances resolved. • Gender and inclusion initiatives implemented.	Enhanced employee satisfaction and improved workplace culture.	Employee satisfaction Report	Welfare program reports, disciplinary records, grievance handling reports.													1,000,000	HR & Admin	DG's Office and Human Resource Advisory Committee	GOK Recurrent
		2. Coordinate employee relations and grievance handling mechanisms.				All Staff														250,000	HR & Admin	All directorates and divisions	GOK Recurrent
		3. Manage disciplinary processes and conflict resolution.				—														250,000	HR & Admin	DCS	GOK Recurrent
		4. Coordinate and manage institutional committees				All Institutional Committees														250,000	HR &Admin	All directors and advisory committees	GOK Recurrent
		5. Promote Public Service values, gender mainstreaming, HIV/AIDS and disability inclusion. Staff Annual TB test				—														250,000	HR & Admin	All relevant Committees	GOK Recurrent
	Manage Institutional Records and Human Resource Information Systems	1. Maintain HR records and personnel files.	Efficient HR information and records management system.	• HR records updated. • HRIS operational. • % staff records digitized.	Improved efficiency in HR data management and decision making.	—	HRIS reports, staff records database, records management reports.													200,000	HR & Admin	DCS	GOK Recurrent
		2. Manage human resource information systems and staff database.				—														20,000	HR and ICT	DG's Office	GOK Recurrent
		3. Maintain institutional records management systems.				update HR data base														20,000			
		4. Update staff skills inventory and HR databases.				Digitalizing staff data														250,000	HR and ICT	DG's Office	GOK Recurrent
	Remuneration of KIPRE staff	Generate monthly payroll salary and remittance of statutory deduction and third-party deduction.	—	salaries paid to staff	—	12	1													240,000,000	HR & Admin	DCS	GOK Recurrent
	Enhance Media & Digital Communication	Media outreach and engagement	Media and Digital communication enhanced	Number media outreach and engagements	Increased institutional visibility and branding	4	news clips, you-tube links													2,000,000	Corporate Communications	DG's office	Gok
		Develop and disseminate IEC materials through social media		Number of IEC materials disseminated		24	social media analytics, social media posts													240,000	Corporate Communications	DG's office	Gok

	Strategic Objective1: To increase the number of collaborations and partnerships																						
	Develop and Manage Strategic Partnerships to support research and innovation	1. Establish partnerships with universities, research institutions, industry and government agencies.	Strategic partnerships established.	• No. of partnership agreements developed. • No. of collaborative training initiatives implemented. • No. of stakeholders engaged.	Strengthened collaboration and resource mobilization for training and research.	4	Partnership agreements, collaboration reports, stakeholder meeting reports.													1,000,000	CBPGM	All Other Directorates	GOK Recurrent
		2. Facilitate development and management of partnership agreements.	Partnerships agreement development facilitated	No. of Partnerships signed, No of partnership agreements in development (pipeline generation)		4	Due diligence reports, minutes of meetings, signed agreements, or MoUs														CBPGM	All other Directorates	GOK Recurrent
																				Sub-total for the above activities **1,000,000**			

Key Result Area 7 Total: KES 1,000,000

Strategic Goal Total: KES 455,213,268

Strategic Issue 4: Inadequate Financial support for health research & Innovation

Strategic Goal 4: To secure funding to sustain health research and innovation whilst ensuring efficient use of KIPRE finances.

Key Result Area 8

Advocacy and engagement of the government for increased research funding

Result Areas	Activity	Sub-Activities	Expected Output	Performance Indicator	Impact	Target	Means of Verification (MoV)	Q1			Q2			Q3			Q4			Estimated Cost (KES)	Responsibility		Source of Funds
								Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun		Lead	Support	
Key Result Area 8: Advocacy and engagement of the government for increased research funding	**Outcome: Increased research funding from government**																						
	Strategic Objective 1: Formulate and implement favorable, well aligned health research & management policies																						
	1. Operationalize the grants and partnerships office	1. Benchmark on Grant management best practices	Grants and Partnerships Office Established	Benchmarking report developed.	Improved coordination of Grant management across departments	2	benchmarking reports													1,000,000	CBPGM	Planning and Strategy	GOK Recurrent
		2. Subscribe to a Grants aggregator platform (e.g. Grant Watch, Scientific RESEARCH)		Procurement process completed		1	System installation report														CBPGM	ICT	GOK Recurrent
		3. Train staff CBPGM staff on the Grant aggregator platform		Number of staff trained.		10	Training attendance list														CBPGM	Finance	GOK Recurrent
	2. Coordinate Development and Implementation of Partnerships and Grants Management Policies and Strategies	1. Develop and review SOPs, policies, strategies, guidelines an institutional framework on partnerships and grants management.	Partnership and Grant management Policies, strategies and guidelines developed	No. of policies/guidelines developed or reviewed.	Strengthened governance and transparency in partnership and grant management.	10	Approved SOPs, policies and guidelines, strategy documents, implementation reports.													0	CBPGM	Planning and Strategy	GOK Recurrent
		2. Establish and review procedures for ethical conduct and conflict of interest management in partnerships and grants		Number of policies and procedures developed.		4	Approved policies and guidelines, strategy documents, implementation reports.													0	CBPGM	ISERC	GOK Recurrent
	3. Coordinate Grant Management, Compliance and Reporting	1. Monitor implementation of funded grant projects.	Improved coordination of Grant compliance and reporting	No. of projects undergoing M and E	Strengthened governance and transparency in partnership and grant management.	25	Progress and Performance reports, Financial reports, Updated project documents, Procurement reports													0	CBPGM	Finance	GOK Recurrent
		2. Ensure compliance with grant terms and funding agency requirements.		No. of compliant projects		25	Progress and Performance reports, Financial reports, Updated project documents, Procurement reports													0	CBPGM	ISERC	GOK Recurrent
		3. Support institutional processes on grant funding		No. of progress and financial reports		25	Progress and Performance reports, Financial reports, Updated project documents													0	CBPGM	Finance	GOK Recurrent
		4. Monitor grant expenditures in collaboration with the finance department.		No. of grants monitored for expenditure		25	Progress and Performance reports, Financial reports, Updated project documents													0	CBPGM	DRPD, Legal Services	GOK Recurrent
	4. Manage Grant Contracts, Sub-Awards and	1. Support researchers in negotiating and	Improved management of Grant contract sub-awards	No. of contracts negotiated/in negotiation	Improved compliance and accountability in managing research grant agreements	25	Research contracts, meeting minutes													1,000,000	CBPGM	DRPD, Legal Services	GOK Recurrent

Director General's Office Expenses	10,875,000
Board of Management Expenses	28,160,000

Summary of Total Institutional Budget

Funding Source	Amount (KES)
Recurrent and Development Funds (Exchequer)	1,025,113,534
African Snakebite Alliance (ASA)	9,608,000
GRAND TOTAL	**1,034,721,534**

APPENDIX: ADDITIONAL PRIORITY ACTIVITIES

Subject to Availability of Additional Funds

In the course of preparing this workplan, KIPRE's Directorates and Divisions identified a number of additional priority activities that would further strengthen delivery of the Institute's mandate but which could not be accommodated within the approved budget ceiling of KES 1,025,113,534. These activities are presented below for reference and would be implemented progressively, subject to the availability of additional exchequer allocation, donor support, or internally generated revenue. Costs shown are indicative planning estimates prepared by the respective Directorates/Divisions at the time of drafting this workplan.

Reproductive Health And Biology

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Integration of WERF-EPHECT Framework into Preclinical Experimental Models for the Study of Endometriosis	Acquire ethical approval	-	500,000
	Aquire centre registration to integrate EPHECT framework in preclinical research in endometriosis	1	
Analysis of semen parameters and tools for early diagnosis of male infertility	Conduct project laboratory meetings (Inception, mid-monitoring and terminal)	-	40,000
	Acquire ethical approval and research permits	-	
	Procure animals, reagents, consumables, laboratory equipment	-	1,149,030
	Collect semen and blood samples	-	50,000
	Conduct sample processing and analysis	-	
	Procure DNA sequencing services	-	
	Conduct data analysis and report writing	-	
Establish in vitro fertilization technology laboratory for assisted reproduction	Facility planning and regulatory approval	60	415,000
	Laboratory refurbishment		
	Procurement of equipment and consumables		
	Facilitation and Staff training (10 pax) in spermatology		
	Facilitation and Staff training (10 pax) in embryology		
	Facilitation and Staff training (10 pax in in-vitro fertilization		
Dissemination of reproductive health research output	Develop scientific manuscripts for publication and policy briefs on scientific outcomes	7	621,670
	Attend various technical working group meetings in reproductive health	2	
	Attend local and International conferences to present research findings	5	
Procurement of laboratory equipment	CO2 incubator	-	1,400,000
	Gel visualizer (Transluminator) + Monitor unit	-	800,000
	Hemocytometer	-	24,000
Procurement of lab furniture	Laboratory chairs	-	398,300
Procurement of office equipment	Extension cables, Laptop, UPS, Printer, printing papers, Printer Catriges and toners	-	602,000
		Sub-total	**6,000,000**

Tropical Infectious Diseases

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Establish pre-clinical studies	i)Maintaining and propagating parasites for preclinical research	50	2,549,120
Develop and strengthen preclinical research infrastructure and quality control sytems	upgrade snail room facility	1	2,433,000
Identify candidate drugs, vaccines & diagnostic targets for infectious diseases	Conduct a workshop for identification of libraries for novel drugs, diagnostics and vaccine candiates for infectious diseases of public health importance	1	1,017,880
		Sub-total	**6,000,000**

One Health and AMR

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Identify and characterise high risk disease regions	Baseline Data collection, stakeholder and institutional data integration, surveillance and sampling, labaratory characterization, Analysis, reporting and dissemination through community engagement platforms, policy and intervention planning	3	1,500,000
Surveillance of water-borne pathogens in urban, rural and wildlife interfaces	Obtain ethical/regulatory approvals (ISERC, NACOSTI.), Surveillance planning and site selection, Field sampling and water collection, laboratory detection and characterization, Analysis reporting and dissemination, policy and intervention planning	4	1,500,000
Profile AMR in selected animal species, environmental samples	Obtain ethical/regulatory approvals (ISERC, NACOSTI.), Target species selection and study design, Field sampling and environmental sample collection, Isolation of AMR indicator organisms, shotgun metagenomics sequencing, Comparative Metagenomic Resistome Mapping of Captive and Wild Baboons, Disseminate findings at local/international One Health conferences.	4	1,500,000
Undertake Surveillance of vector populations in urban, rural and wildlife interfaces	Obtain ethical/regulatory approvals (ISERC, NACOSTI.), Surveillance planning and site selection, Field collection of vector populations, Vector identification and taxonomic characterization, Intergrated morphological, taxonomic and molecular characterization of vector pathogens, Analysis reporting and dissemination of findings via local seminars and international conferences, Policy and intervention planning	4	1,500,000
		Sub-total	**6,000,000**

Non Communicable Diseases

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Identify environmental determinants of NCDs in selected Counties	Obtain relevant permits	4	45,000
	Conduct an initial workshop for stakeholder engagement	1	904,500
	Conduct workshop to develop PIC/MAT	1	—
	Procure consumables for sample collection and lab analysis	3	466,400
	Conduct sample collection	1	591,900
	Conduct lab analysis	2	1,350,000
	Conduct a workshop to provide feedback	1	442,000
	Prepare reports/publications/policy briefs/conference presentations	1	200,000
		Sub-total	**3,999,800**

Snakebite Research and Intervention

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Provide medical and animal welfare services for antivenom research and production	Procure veterinary supplies for the herpetarium and animal farm	300	1,285,300
	Procure herperatarium and rodent facility enrichment devices and cages		2,490,000
	Procure experimental animal feeds		1,760,200
	Procure janitorial supplies for the herpetarium and rodent facility		277,680
	Provide daily animal husbandry, clinical care and health monitoring		849,200
Develop quality control procedures for antivenom	Equip laboratory, herpetarium and rodent, office facilities according to biosafety and antivenom quality control standards	1	39,340,576
	Refurbish and upgrade laboratory, herpetarium and rodent, office facilities		9,000,000
	Procure catridges, furniture and stationery for the offices		962,100
	Develop, review and implement Standard Operating Procedures (SOPs) for venom research and antivenom quality control		3,879,100
	Train personnel in venom research and antivenom quality control methods		879,500
Conduct technology transfer in snake venom and antivenom research and development by collaborating partner institutions	Implement and sign technology transfer aggrements	1	2,458,200
	Conduct capacity building on antivenom production at partner collaborating institutions	1	6,867,650
	Facilitate PhD training for two K-SRIC staff members via a sandwich program		6,120,000
	Conduct capacity building on venom and antivenom R&D, at/with partner collaborating institution	1	8,261,680
Identify and test candidate/commercial	Procure laboratory consumables and reagents for in vitro efficacy tests (ELISA, Western blot,	2	3,312,500

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
antivenoms, diagnostics and other biologics for preclinical efficacy and safety	neutralization of venom enzymatic activities) for candidate biologics		
	Conduct in vitro efficacy tests for candidate biologics		0
	Procure CD-1 mice for in vivo assays (LD50, ED50) to assess the neutralizing potencies of candidate biologics		3,536,400
	Conduct in vivo assays to assess the neutralizing potencies of candidate antivenom		0
Identify and test candidate antivenoms, diagnostics and other biologics for clinical efficacy and safety	Evaluate the feasibility and diagnostic utility of Point of Care Infrared Thermography for assessing the progression of local tissue effects in patients with snakebite envenoming	1	3,271,000
	Conduct observational/clinical trials and studies for the new antivenom versus other currently available commercial antivenoms	1	18,000,000
Develop KIPRE antivenom and other new snakebite therapies.	Procure consumables and service for antivenom research and development	1	3,504,759
	Research and develop KIPRE antivenom, other candidate antivenoms and biologics including monoclonal antibodies.	—	0
Produce antivenom vials	Conduct pre-geasibility study for establishing a snake antivenom research, production, and commercialization programme in Kenya and East Africa (KIPRE)	30000	28,000,000
	Establish a sub-contract between antivenom manufacturer and KIPRE to commercially produce candidate antivenom		0
	Provide venoms for animal immunizations		—
	Immunize animals for antibody production		—
	Purify and fractionate immunoglobulins from immunized animals		—
	Perform quality control testing of the antivenom product		—
	Conduct sterile fill and finish operations for the antivenom product		—
Distribute antivenom vials	Engage regulatory authorities and supply chain partners for the proper distribution of antivenoms	5000	3,238,200
	Develop and implement innovative measures of distributing antivenoms		7,000,000
Develop candidate diagnostics for snakebite envenoming	Procure laboratory consumables and reagents for DNA extraction and PCR to support the development of a novel diagnostics tool for snake species identification	20	1,149,700
	Conduct snake DNA extraction to support the development of a novel diagnostics tool for snake species identification		0
	Procure service for snake whole genome sequencing to support the development of a novel diagnostic tool for snake species identification		6,410,000
	Conduct comprehensive bioinformatic analysis of whole genome sequencing data to support the development of a snake diagnostics tool		0

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Prepare and Sign PIC and MAT documentations to facilitate snakebite research	Prepare PIC and MAT documentations to facilitate venom and antivenom research at stakeholders workshop	20	11,156,400
	Discuss and sign amended PIC and MAT documentations to facilitate venom and antivenom research	—	—
Acquire snakes of medical importance	Procure protective gear and snake-handling tools for the herpetarium	10	444,000
	Acquire/renew permits for venom and antivenom research		154,500
	Acquire snakes of medical importance in Kenya		29,303,200
Create venom reference standards for antivenom development and production	Procure consumables for extraction and processing of venoms from snakes of medical importance	4	1,702,080
	Extract and process venoms from snakes of medical importance		0
	Procure laboratory consumables and reagents for characterization of venoms from snakes of medical importance		4,857,475
	Characterize venoms from snakes of medical importance in Kenya		0
	Assess oral and venom bacteria from snakes of medical importance in Kenya and their potential complications to snakebite victims		431,800
Profile (biomedically and clinically) Bitis arietans and Naja pallida venoms: Towards improved therapy and management	Characterize venoms from B. arietans and N. pallida spp from Kitui and Baringo Counties	2	1,000,000
	Examine and describe the clinical manifestations of snake envenomation by B. arietans and N. pallida bites in Kitui and Baringo		—
	Test and validate new clinical measures to assess venom induced swelling in patients presenting with B. arietans and N. pallida bites		—
Extract venom glands from Bitis arietans snake specie for the purpose of developing a biobank at KIPRE	Capture Bitis arietans species from Kitui county	3	800,000
	Extract venom and venom glands from Bitis arietans		—
	Establish dry lab infrastructure using bioinformatics and cheminformatics		—
Develop and submit proposals to secure funding for venom and antivenom research and development activities	Develop and submit proposals to secure funding for venom and antivenom research and development activities	5	0
Disseminate research outputs to various stakeholders	Publish scientific manuscripts in peer reviewed journals	2	1,000,000
	Develop policy briefs on scientific outcomes	1	500,000
	Attend and coordinate technical working group meetings	1	500,000
	Attend local and international conferences/training workshops to present research findings	2	2,659,100
Identify and map Snakes of Medical Importance, other venomous snakes and other	Train 5 program officers on mapping of snakes of medical importance and other venomous snakes using the Geographic Information System (GIS)	2	—

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
venomous species, map intra and inter-county snakebite hotspots in endemic counties	Procure voice recorders, digital camera, data collection tablets, laptops, GIS communication devices, power banks, high definition binoculars, printer, N ViVo analysis software, tents	—	590,000
	Conduct a workshop for the training of data collectors on snakebite community-based survey methodologies in 3 counties	3	2,000,000
	Survey 4 Counties for venomous snakes, snakebite incidences, other venomous snakes and GIS mappng	4	32,184,000
	Procure Field Research vehicle	1	12,012,000
Integrate Snakebite Envenoming mapping with other NTD programs	Train healthcare workers and community healthcare promoters in 5 Counties on protocols on integrating Snakebite Envenoming mapping with other NTD programs	2	2,156,000
	Conduct surveys to integrate Snakebite Envenoming mapping with other NTD programs in 2 counties		3,528,000
	Develop a user friendly community based reporting tool to report snakebite incidences and deaths across the counties		1,000,000
	Disseminate survey findings on integration of snakebite envenoming mapping with other NTD programs to 2 counties		2,058,000
Integrate Snakebite mapping with the Kenya Livestock Master Plan (KLMP)	Train livestock ward officers and community healthcare promoters on protocols in integrating Snakebite integrating snakebite mapping with the KLMP in 2 counties	5	4,236,000
	Survey 5 counties to integrate snakebite mapping with the Kenya Livestock Master Plan (KLMP)	—	—
Develop and submit proposals to secure funding for snakebite epidemiology and public health research activities	Develop and submit proposals to secure funding for snakebite epidemiology and public health research activities	3	0
Disseminate research outputs to various stakeholders	Publish scientific manuscripts in peer-reviewed journals, technical reports, policy briefs, conferences and workshop presentations	2	1,000,000
	—	2	2,019,100
	—	1	500,000
Conduct Research on the pathophysiology of snakebite envenoming	Analyse serum and blister fluid samples from snakebite patients	1	1,689,480
Train health care workers on snakebite diagnosis, management, antivenoms administration and snakebite prevention and control measures	Conduct a Workshop to develop Healthcare worker training manuals on snake species identification, snakebite diagnosis, management, antivenom administration and snakebite first aid, prevention and control measures	100	2,952,000
	Train healthcare workers on snakebite diagnosis, management, antivenom administration and snakebite prevention and control measures to capacity build across different healthcare carders in 2 counties.		1,880,000
	Train 25 County and subcounty Health Records Information Officers (HRIOs) on the Kenya Health Reporting System (KHIS)to ensure complete		3,664,000

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
	accurate and timely reporting of snakebite and antivenom utilization data in 2 counties.		
Train Community Health Promoters (CHPs) on snake species identification, snakebite diagnosis, first aid, prevention and control measures	Launch CHP training programs in 3 counties.	500	3,142,000
	Train CHPs on snake species identification, snakebite diagnosis, first aid, prevention and control measures.		1,856,000
	Implement Motorcycle Snakebite Emergency Response System (SERS) for Community Health Promoters (CHPs) to efficiently respond to snakebite incidents within the community and rescue snakebite victims in endemic Counties	350	630,000
Conduct advocacy, communication and social mobilization on snake identification, snakebite first aid, prevention and control measures	Conduct 25 public awareness campaigns on snake identification, snakebite first aid and prevention and control measures in 2 counties	75	3,108,000
	Engage Social media, website & other digital platforms to create awareness on snake identification, snakebite first aid and prevention and control measures		300,000
	Conduct five school-based campaigns in each of the 2 counties to raise awareness among children on snake identification, first aid measures, and snakebite prevention and control.		2,244,000
Develop snakebite guidelines and policy briefs	Develop/ revise snakebite management guidelines and/or policy briefs	1	2,725,100
Develop Snakebite envenoming (SBE) Scorecard	Engage and conduct Stakeholder mapping	1	7,772,000
	Develop data flow & reporting tools,	—	—
	Design and validate Scorecard	—	—
Develop and submit proposals to secure funding for snakebite clinical studies and interventions	Develop and submit proposals to secure funding for snakebite clinical studies and interventions	3	0
—	—	1	0
Disseminate research outputs to various stakeholders	Publish scientific manuscripts in peer-reviewed journals, technical reports, policy briefs, conferences and workshop presentations	1	500,000
—	—	1	500,000
		Sub-total	**312,607,980**

Data Science And Analytics

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
1. Develop and Implement Data Governance, Policies and Systems	Establish data governance frameworks	1 Operational framework	1,500,000
2. Data Collection, Analysis and Research Support Services	i. Collect and manage data	5 datasets archived with 100% integrity	300,000
	ii. Analyze and interpret biological and health data	2 analytical reports published/shared	
	iii. Support study design and reporting	8 study protocols	

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
		finalized and approved	
	iv. Provide statistical and analytical support to researchers.	10 consultations; 2 training workshops	
3. Disease Modeling, Epidemiological Analysis and Predictive Analytics	i. Conduct epidemiological studies	1 comprehensive studies completed	500,000
	iii. Develop predictive and machine learning models	1 functional models e.g Outbreaks/ Risk/pandemic	
	iv. Design and assess disease control programs.	1 evaluations of diseses control programs	
4. Monitoring, Evaluation and Impact Assessment of Research Programs	i. Provide M&E services; evaluate research outcomes	1 comprehensive M&E reports (1 per quarter)	700,000
	ii. Assess economic and health impact of disease interventions	1 impact assessment reports (e.g ROI/DALY)	
	iii. Generate performance reports.	4 Quarterly performance dashboards.	
		Sub-total	**3,000,000**

Laboratory Services

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Upgrade and maintain laboratory infrastructure for impactful health research	i) Upgrade Laboratory equipment for biomedical research	24	60,000
	—	5	648,000
	Coordinate essential services that support biomedical research (Laboratory and medical gases, emergency interventions)	10	1,611,200
	upgrade laboratory services office	1	680,710
		Sub-total	**2,999,910**

Planning and Strategy

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Coordinate Institutional Performance Management and Performance Contracting	6. Conduct institutional environmental scanning (SWOT and PESTEL analysis).	1	2,550,000
		Sub-total	**2,550,000**

ICT and Digital Infrastructure Development

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Install and implement access control systems for laboratory and administration doors (REPRO, Rodent Facility, ICT & Finance, K-SRIC)	10 devices @ KES 200,000 (2,000,000); installation and licensing (1,000,000)	1	3,000,000
Develop a Laboratory Information Management System (LIMS)	System development (9,000,000); 7-day training workshop for 10 staff	1	10,000,000
AI development by the Digitization Committee	Development, training and roll-out	1	10,000,000
Redevelop the Oloolua website	Development, training and roll-out	1	1,000,000
E-Citizen platform re-engineering	Upgrade of the e-Citizen payment system	1	5,000,000
		Sub-total	**29,000,000**

Capacity Building, Partnerships and Grants Management

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Support technology transfer in research and development with partner institutions	Support K-SRIC activities on snake venom and antivenom technology transfer	1	1,000,000
Coordinate development and implementation of training and capacity-building policies and strategies	Undertake professional training on curriculum development	10	1,500,000
Support and coordinate professional biomedical training programs	In-house training programs for researchers (e.g. laboratory safety, GIS)	2	1,500,000
Promote knowledge management (KM) and dissemination	Review existing SOPs, policies, strategies and guidelines on KM	13	2,000,000
Operationalize the Grants and Partnerships Office	Train KIPRE staff on grant writing (2 workshops)	2	2,500,000
Mobilize resources through grant identification and proposal development	Facilitate development and submission of institutional grant calls	2	1,000,000
		Sub-total	**9,500,000**

Resource Mobilization and Financial Planning

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Support development of a Resource Mobilization strategy	Support competitive proposal writing to increase research funding	8	1,600,000
	Support and participate in stakeholder engagement forums	2	500,000
	Hold meetings with strategic research partners	8	4,800,000
	Monitor and evaluate resource utilization through the Budget Implementation Committee	40	7,988,000
Coordinate institutional budget planning and financial strategy	Participate in development of annual budgets and MTEF negotiations	4	5,250,000
	Support KIPRE's strategic plans	16	3,090,400
Prepare financial reports and ensure statutory compliance	Printing and binding of quarterly financial reports; equipment and training	4	7,840,000

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
	Develop and submit Annual Financial Reports (printing, binding, dispatch)	13	260,000
		Sub-total	**31,328,400**

Corporate Communication and Visitor Experience (Oloolua Nature Trail)

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Undertake a customer satisfaction survey	Stakeholder engagement workshop	1	1,500,000.00
Ensure compliance with the Service Delivery Charter	Conduct monitoring and evaluation	1	2,000,000.00
Implement Presidential directives on tree growing	Grow 7,075 seedlings; hole-digging, casual labor and transport	7075	1,415,000.00
Improve Oloolua Nature Trail infrastructure	Upgrade gate entrance with improved access control	1	3,000,000.00
	Construct a modern eco-friendly ablution block	1	2,500,000.00
	Fabricate and install dustbins (10) and benches (6)	16	800,000.00
	Repair bridges, eagle hide and picnic site	3	4,500,000.00
	Design, print and install nature trail signage	30	150,000.00
		Sub-total	**15,865,000.00**

Infrastructure, Utilities and Security Development

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Asbestos removal and replacement with IT5 sheeting	Residential area and institute-wide, including harmony breeding cages at the colony and quarantine	1	2,100,000
Infrastructure works preparation	Prepare technical specifications and bills of quantities	4	3,000,000
Upgrade power, water and HVAC utility systems	Upgrade main power pillar/panel; install central reverse-osmosis water purifier; overhaul/install HVAC systems	1	87,000,000
Strengthen institutional security and asset protection systems	Monitor and upgrade CCTV and access-control systems	1	92,100,000
		Sub-total	**184,200,000**

Governance and Oversight

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Provide capacity building to the Board Audit Committee and management	Training charges, DSA, sitting allowances, statutory deductions and secretariat support	1	4,438,800
		Sub-total	**4,438,800**

Asset and Inventory Management (Supply Chain Management)

Activity	Sub-Activity / Details	Target	Estimated Budget (KES)
Preparation of the Procurement Plan	Conference facility and DSA for planning workshop (75 pax)	1	6,727,500
Valuation and re-evaluation of assets	Procure professional valuation services	1	5,000,000
Create an asset and inventory register on the ERP system	Conference facility and facilitation for system roll-out (18 pax)	1	1,605,000
Conduct Board of Survey	Facilitation and subsistence for survey team (6 pax, 1 month)	1	504,000
Tagging of institutional assets	Tagging machine, software and user training	1	4,000,000
Preparation of the Asset Disposal Plan	Conference facility and facilitation for disposal planning workshop (75 pax)	1	3,212,500
Develop an Asset and Liability Management Policy	Conference facility, DSA and contingencies for policy development workshop (18 pax)	1	4,208,000
		Sub-total	**25,257,000**

Indicative Total of Additional Priority Activities: KES 626,881,890
